EDITORIAL AND PUBLISHING OFFICES:

38 King William Street, City, LONDON, E.C.

THE stock etc., of J. E. Maranda, general merchant at St. Ours, Que., on the river Richelieu, insolvent, has been sold at a figure sufficient to net creditors 50 per cent. of their claims.——An assignment has been made by S. Z. Cote, at St. Anaclet, Que. He began keeping store in 1892, and in 1896 was reported as having compromised at 50 cents.

Mercantile Summary

A NEW steamer is to be put on the route between Boston, Mass., and St. John's, Newfoundland, stopping at several intermediate points.

VANCOUVER city council is discussing a by-law to provide for the borrowing of $130,000 for the construction of new sewers in several parts of the city.

THE Ontario Government has granted a charter to a corporation, which will be known as the Central Business College of Toronto, Limited, and will acquire the business and assets of the business of a similar nature now being carried on by Mr. W. H. Shaw, in Toronto, extend the same, and carry on a general business college and training school, and publish text-books, documents, etc., such as may be required for the use of such institutions. The company's share capital will be $150,000, and the gentlemen to whom the charter was granted are Messrs. W. H. Shaw, principal of the Central Business College; Alex. McP. Kennedy, and P. McIntosh, teachers in the same; A. F. Sprott, its secretary, and J. J. Teitz, manager of the United Typewriter Co., Limited.

DOMINION SECURITIES Corporation, Limited

26 King street East, Toronto

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Mercantile Summary.

KRUPP'S famous iron business in Germany has been converted into a limited liability company, with a share capital of 160,000,000 marks, or about $40,000,000. All the shares remain in the possession of the family.

WE see in a Newfoundland paper that the Dominion Iron & Steel Company have suspended operations for a time on their mines at Belle Island. The Nova Scotia Steel Company's mines in that vicinity are also working only part time.

THE Rat Portage Lumber Company is building a large saw-mill at Norwood, Ont., with a capacity of 25,000,000, or more feet per annum. The most highly improved machinery is being put in, and employment is to be given, according to present arrangements, to between 300 and 400 men.

THE North Star Mining Company has issued its annual statement, which is written in cheerful terms as to future expectations. The total amount of development work done during the year amounts to 12,166 feet of drifting, cross-cutting, sinking, raising and diamond drilling. During the year 3,426 tons of ore have been shipped, the assay value of which averages 29.5 oz. silver and 36.2 per cent. lead.

THE opening of the new factory of the McClary Manufacturing Company, London, Ont., was celebrated last week, by an immense picnic, at which thousands of people were present. The new shops, which will be devoted mainly to the manufacture of stoves, are a little outside the city limits. The moulding shop is 200 by 220 feet in dimensions; while the stove mounting department is 82 by 307, and two stories high, with 4,000 lights in its windows.

THE Ames-Holden Company, of Montreal, have re-elected officers as follows: J. C. Holden, president; James Redmond, vice-president and general manager; W. A. Matley, secretary; R. C. Holden, treasurer; directors, S. H. C. Miner, H. B. Ames, A. C. Flumerfelt, W. G. Norris, A. L. Johnson, A. B. Erskine, C. Bonnick, and W. M. Angus.

THE Canada Wood Manufacturing Company are establishing a factory in Farnham, Que., for the manufacture of furniture.

THE Cape Breton Coal, Iron & Railway Company have begun to develop their coal areas at Cochrane's Lake, near Sydney. A shaft is being sunk, and the work of equipping the colliery proceeded with. An electric railway will be built from the mine to Mira Bay, four miles distant, from which point shipments will be made. The company ultimately expects to build an electric railway to Sydney, and make it their principal shipping port. The company owns sixty-seven square miles of coal varying in seams 6 to 7 ft. in thickness. An extensive deposit of iron ore has been discovered at Loch Lomond, varying in thickness from 4 to 6 feet.

DIVIDEND NOTICE.

Notice is hereby given that a dividend of two per cent. on the preference shares of the company for the quarter ending June 30th, inst., has been declared and will be paid on Wednesday, July 15th next, to shareholders of record of June 30th.

The transfer books will be closed from the first to the fifth July, both days inclusive.

By order of the Directors,

HENRY RITCHIE, Cashier.

New Glasgow, N.S., June 25th, 1903.

Mercantile Summary.

THE first Montreal failure said to be due directly to losses sustained through stock speculations, is reported in the assignment of L. A. Cloutier, a jobber in grocery sundries. Mr. Cloutier was a successful commercial traveller, who began business for himself in 1894, and who is said to have accumulated a fair surplus of $25,000 to $30,000. This very comfortable sum is reported to have been all swallowed up in the putting up of margins during the recent "slumps" in stock values.

THE Columbia River Improvement Company, Limited, of Winnipeg, has received a charter from the Dominion Government. It will have power to place booms in Upper Arrow Lake, British Columbia, and on the shores of the Columbia River, where it enters the lake, and to construct incidental works so long as navigation is not interfered with. The use of the works is to be allowed to the public at all reasonable times on reasonable terms, which are fixed.

THE will of the late Senator A. T. Wood, of Hamilton, Ont., has been filed for probate in the surrogate court. Mrs. A. T. Wood, her son, William A. Wood, and George Vallance are the trustees. The estate is valued at $705,545.81. The sons, George and William, get $100,000 each, and a quarter share of the Wood, Vallance Co. business. The widow gets $50,000 income and a life interest in the homestead. Each of the daughters gets $50,000, and there are several bequests to Baptist church funds.

THE King Edward Hotel Company, Limited, of Toronto, held its first general meeting of shareholders on Friday last. The following were elected directors for the ensuing year: Messrs J. W. Langmuir, Robert Jaffray, W. R. Brock, W. D. Matthews, Aemilius Jarvis, J. Herbert Mason, G. H. Gooderham, Dr. James F. W. Ross, W. G. Gooderham, T G. Blackstock, D. D. Mann, Col. H. M. Pellatt, Frederick Nicholls, H. C. Hammond, Wm. Mackenzie, and W. H. Brouse. At a subsequent meeting of directors, Mr. Thomas Gibbs Blackstock was elected president, Mr. J. W. Langmuir, and Mr. D. D. Mann, vice-presidents, and Mr. W. C. Bailey, manager and secretary.

IT is proposed by the Ontario Government to grant as a subsidy to the Canada Central Railway Company, 7,400 acres of land per mile of projected railroad from a point at the head of navigation on the French river, through the town of Sudbury, to a point in Hutton Township, a distance of about seventy miles. This is the line in which Mr. F. H. Clergue, of the Soo, is interested, with the idea, no doubt, of developing the extensive iron deposits, the importance of which was discovered a short while ago. The proposed line would enter into a friendly alliance with the Algoma Central, and Manitoulin and North Shore roads.

Mercantile Summary.

THE steamship "Ascot" arrived in Vancouver last week from Muroran, with 7,000 tons of Japanese coal.

A ST. JOHN, N. B., baker, G. S. Dennison by name, has assigned to the sheriff. He started only last year, and without any experience of the business.

MAX DAVIDSON, clothier, Montreal, has assigned, and shows nominal assets of $8,000 to pay liabilities of $6,500. He was previously unsuccessful in 1897, when he arranged to pay 40 cents.

AN arrangement has been affected by the C. A. Paquet Hardware Co., of Quebec, whose suspension we lately noted, whereby they pay their creditors 50 per cent. cash, on liabilities of $19,750.

IN the matter of the New England Asbestos Co., of Thetford Mines, Que., recently reported as embarrassed, J. J. Griffith, of Sherbrooke, has been appointed liquidator, and creditors are called to meet on July 21st.

THE proposition made to their creditors by McCrimmon & Co., general dealers at Williamstown, Ont., for an extension having been apparently not generally entertained, they have now assigned, and show liabilities aggregating about $3,000.

ON the 29th inst., citizens of Winnipeg, Man., will vote on a by-law to raise $50,000, for the purchase of a large park site just outside the city limits, and for making the needed improvements thereon, in the way of tree-planting, and the building of pavilions, etc.

A MAN named J. O. Lavoie, doing business at Joliette and in Montreal, under the style of the Surpass Shoe Dressing Co., has assigned, showing an indebtedness of $3,500. He has had a somewhat varied experience; having been a country merchant, a hotel keeper, and later a broker before he began manufacturing.

A MEETING of the creditors of Clark Wright & Son, furriers, Kingston, Ont., was held in Montreal last Friday, when, no offer being made by the insolvents, it was decided to sell the assets by auction on the 15th of July.——W. Atkinson, carriage-maker of the same city, having been sued by the Bank of Toronto on some past due paper, has made an assignment of his estate for the general benefit.

THE Dominion Government has granted a charter to Gaults, Limited, Winnipeg, capital stock $750,000, for the purpose of carrying on a wholesale and retail dry goods and millinery business. Among those prominent in the organization of the company are Jas. Rodger, of Westmount, Que., and H. M. Belcher, of Winnipeg. Also a charter to the Canadian Northwest Steamship Company, Limited, Port Arthur, Ont., for the purpose of carrying on a steamer service on Lakes Superior, Huron, Michigan, St. Clair, Erie, and Ontario, and the Rivers St. Lawrence, Detroit, St. Clair, and St. Mary, etc.

48 to 49 Bay Street, Toronto.

Mercantile Summary.

ALFRED LAPAHNE, haberdasher, St. Hyacinthe, Que., who was one of the sufferers by the late fire in that city, has arranged a compromise at 50 cents, on liabilities of about $5,000.

THE Laurentide Pulp Co., Limited, Montreal, has received authority to change its name to the Laurentide Paper Co., Limited, also to increase its capital stock from $1,600,000 to $2,800,000.

THE Phoenix Bridge & Iron Works, Limited, Montreal, has been incorporated. They propose to carry on business as general merchants, manufacturers, and dealers in all kinds of metals, and will also conduct a foundry, machine shop, and boat and bridge building establishments.

FRENETTE & Rioux have for some time past been operating a sawmill at Sudbury. Neither of the partners has had much business experience, as a result of which the business has suffered. Then they had but little means, and the business was but a small one. They have assigned.

J. E. BOURDON, tailor, Montreal, in business since the spring of 1900, is accused of neglecting his business of late, and a demand of assignment has been made upon him. He has consented to place his business in the hands of an accountant, who shall divide receipts *pro rata* among his creditors.

IN consequence of considerable coming changes in the Vanderbilt railroads in Michigan and surrounding districts, and the possible merging of the Michigan Central, the directors of the Canada Southern Co., which has an agreement for running privileges with the above-named road, is considering the negotiation of a fresh one.

RESPECTING what we mentioned last week about the Poplar Creek gold strike in the Lardo country of British Columbia, the Nelson News' special telegram says it continues to absorb the attention of everyone. Business men, office men, and miners, all being equally interested. Groups are seen on the street excitedly examining specimens of the rock brought down by Messrs. Marquis and Gilbert. "All kinds of water conveyances were being utilized yesterday and last night to convey the eager gold hunters, who have left for the scene of the find." A telephone message from Lardo says that over one-half of the population of the place has stampeded and that the stores there are sold out of goods. "The strike is within four miles of Tenderfoot Creek, where James Rutherford is developing the property of the Lardo Valley Mines, being on the same belt and the ore being of exactly similar character. An average sample of the carbonates, which is the filling of the vein, brought down from this strike was submitted to E. Dedolph, assayer here, by Mr. Rutherford, and gave the enormous values of 395 ounces in gold, which is equal to $11,900 to the ton."

MAGEE & GREGORY,

YORKTON, ASSA.

Mercantile Summary.

Two Montreal saloon-keepers are among the latest insolvents. Joseph Couture had hi slicense cancelled for irregularities, and thereupon assigned, showing liabilities of $5,540. H. Girouard has assigned to the court, and owes $5,560.

THE Greenwood Board of Trade held its regular fortnightly meeting on June 24th, with President Ehrlich in the chair. The secretary reported the recent visit of the Dominion Inspector of Fisheries for the Pacific Coast, and what had been done to give that official full information upon the subject of stocking Long Lake with fish. A discussion took place upon representing to the Provincial Government the difficulty in obtaining sufficient coke to keep the district smelters running at their full capacity.

THAT the Chinaman is a cook by nature is a commonplace to us; but in his sudden inspirations for new dishes lies his weakness, for though in theory they may be logical enough, the practical outcome is not always acceptable. For instance, he sees us eating jelly with our hare, and concludes that if short of butter he may use greengage jam for the poached eggs; or, one morning, he may send up a sweet pudding made of turnips for a pleasant surprise,and be quite hurt if the sufferers do not applaud his originality. Does not the foreigner make his jam of melons?—North China Herald

AT Steelton, Wm. Bell carried on a small general store. About the end of last year he asked for an extension of time, his figures then showing assets of $3,000 and liabilities of $1,400. Owing to business depression, he has been struggling along for some months. He hoped that conditions would improve, but now finds it impossible to meet his obligations in full and is offering 25 cents on the dollar. His assets at present consist of $580 worth of stock and $400 in book accounts for the most part of no value. His liabilities are $1,400. If his offer is not accepted, he will make an assignment.

"GONE WHERE THE WOODBINE TWINETH."

Some weeks ago we had occasion to notice the efforts made by a certain concern named the Colonial Securities Company, to obtain permission from the Ontario Government to do a loaning business in this province. The persons who represented it, two of whom were named Fennell and Pensotti, respectively, represented themselves as "fiscal agents for the Dominion Oil Company," another concern which, if it existed in the States, had no legal existence in Canada. Their repeated applications to the Provincial Secretary of Ontario for charters have been refused; very properly, as we consider. And the latest that we hear of the two men we have named is that they have left Toronto. The office is still open, but largely denuded of the rather imposing array of desks and stenographers. It was a very brazen attempt that Messieurs Pensotti and Fennell made to do business as a company without the necessary legal permission.

SONGS OF THE SHIPYARD.

"Mother, may I go out to combine?
Yes, my darling daughter,
Sell your bonds at eighty-nine,
And fill your stocks with water."

Lewis and Charles went up the street
With forty millions of water;
The floods swept Lewis off his feet,
And Charles came grumbling after.

Sing a song of sixpence,
Here's a stock to buy!
Four and twenty shipyards
Baked in a pie,
When the pie was opened
There was no end of troubles
Nothing in that pretty dish
But irridescent bubbles.

—New York Evening Post.

A LONDON cable of 25th June says that the annual financial statement of the Hudson's Bay Company is a most favorable one and indicates a progressive though conservative policy. For the past financial year there was a trade profit of $710,000, compared with $342,000 the previous trade year. Next year's fur sales promise to be up to the average.

A Decided Difference In the Coal Bill. . .

By using the Mumford Standard Boiler instead of a return tubular there will be a reduction in the coal bill of 10 to 25 per cent.

If you require a boiler it will pay you to carefully consider the merits of the Mumford.

The statement shows that 368,678 acres of farm lands were sold, as compared with 196,844 acres last year, realizing $2,086,603, or an average of $5.66 per acre, copmared with $999,685, the previous year, and averaging $5.08 per acre. The sale of town lots realized $686,75[illegible] compared with $57,082 in the previous year.

—James J. Hill seldom talks in a personal vein, but the last time he was in New York, he made one remark that ought to become his epitaph and go down into history. One of his oldest friends had gone up into the office of the Great Northern to talk about the Northern Securities decision. He found the railroad wonder rather blue. They talked for a long time. At the end of the conversation, Mr. Hill got up from his chair. "They may spoil it all," he said, "and I may be beaten this time, but whatever happens, I've made my mark in the world; here it is!" And he pointed to the great wall map of the Great Northern Railway of America.—New York Times.

—Mr. Reginald C. Brown, Toronto, in his circular letter of June 30th, said that the lowering of the Bank of England minimum rate of discount had been expected to lead to an improvement in business, but the Epsom races and the Whitsuntide holidays were followed by a gloomy feeling, and quotations continue to sag. The depression due to the want of labor in the Transvaal has now been accentuated by fears as to the political situation in Great Britain, caused by the rapid development of the tariff question, and the possibility of differences of opinion among ministers causing a breakup of the Cabinet. Occasional rallies in the different markets are not prolonged, and there are few shares which are higher in price than a month ago. A general fall is to be noted in South African gold shares, also in most diamond, land, and exploration shares.

CANADIAN FINANCES.

Aemilius Jarvis & Co., Toronto, in their weekly letter, dated June 26th, say: The local markets have during the week made a good advance, while prices in New York are, with few exceptions, practically the same as those of a week ago. The American speculative public were severely shorn during the prolonged depression in prices and are timid about taking a chance in the markets again.

J. BRUCE PAYNE,
MANUFACTURER,
GRANBY, - QUEBEC.

The same holds true to a large extent with regard to our own markets, but the level reached by many of our stocks was lower in proportion than that reached by the New York stocks; therefore the inducement to go in again has been the greater. We cannot but feel that the price of dividend-earning railway stocks in the States is below the intrinsic value of these securities. The question as to how it is possible for them to continue for a long period below their intrinsic value is somewhat hard to explain, but it appears to us that these have been, and still are being sold, as they are the most salable stocks, in fact, almost the only really salable stocks at the present time, and are sold by the owners in order to protect commitments of a less liquid character, commitments which probably form, in the majority of cases, a portion of the new flotations, for two years so generously thrust upon the public. Our opinion is that it is only a question of time when such railroad stocks as are dividend payers will come to their real investment level. We believe that this is appreciated by the wealthy investor, and that the majority of buying at present taking place is done for investment. In our own markets the material improvement in the feeling of confidence towards the Coals and Steels has undoubtedly been of general benefit to the situation. These stocks have absorbed more than a proportionate amount of the interest and trading on our boards, and it will not be out of place, in view of recent developments, to consider more carefully their situation. It seems to us that the keen buying of these stocks during the past week indicates a disposition on the part of insiders and their following to discount the probable passing of some protective legislation by the Government. This legislation will only affect the Dominion Coal Co. in so far as it is intimately associated with the Dominion Steel Company, to whom the passage of the Act means a great deal.

—Farmers are often led away by glib-tongued agents who get them to sign things. Here is some advice given them by the Bobcaygeon Independent: "Don't involve yourself in debts in the hope of good sales in the fall. Avoid signing notes as you would the devil. Don't be inveigled by glib-tongued agents to buy things you can do very well without. The country is full of men preying upon the farmers—implements, pianos, societies, company stocks, pictures, sewing machines, books, every conceivable scheme to get the farmer to sign notes. Learn to say no, positively, emphatically. The good times are not to last forever, and if the agricultural slump that must come sooner or later should catch the farming community heavily involved with these notes, the smashing of a few loan companies and brokers will not be a flea-bite compared to the disaster that is meant by an involved farming community practically under suspension."

INTER-IMPERIAL TRADE.

The proposal of preferential tariffs with the colonies is one which awakens strong resentment in the United Kingdom. And in Parliament the opposition to it is fierce, while one group of persons contends that preferential tariff relations of Britain with her colonies will enormously stimulate the trade between them, and eventually strengthen the whole Empire, another group scorns the very notion, and declares that it will absolutely ruin the present trade of Britain with other nations, which is more than two-thirds her whole trade. In the House of Commons on 17th June, Mr. Robson, quoting the phrase of the Colonial Secretary that "he believed in a self-sustaining and self-sufficient Empire," declared that while this was a fine phrase, it meant "an Empire without any continental or world-wide trade. It was a phrase which encouraged every senseless protectionist in the British dominions to believe that this great Empire could sustain its strength and maintain its population and keep its power and possessions without continental trade."

This utterance was made after a vitriolic attack by Mr. Campbell-Bannerman on some utterances of Mr. Chamberlain, and a sarcastic reference by Sir Charles Dilke to divisions of opinion in the cabinet which had already misled New South Wales. What seems especially to have goaded the Opposition speakers was the fact that the Premier expressed his agreement with the Colonial Secretary in his suggestions as to the experiment of an altered basis of relation between the colonies and the Mother Country. A correspondent, who heard the debate, and who sees free-trade as "free imports for foreigners," and from a different point of view than that taken by the old-fashioned, copper-fastened free traders in Lancashire and thereabout, says:—

"Referring to recent utterances of Mr. Chamberlain, M.P., on the subject of Inter-Imperial Trade, please find enclosed his speech of last night on the same subject, and I hope it may help to allay the irritation you in Canada must feel, at the unnecessary badinage of his opponents in the House of Commons, who drag in the Colonies for 'party purposes.' You must be patient, because after Britishers have been born and reared in the school of Cobden, Bright, and Free-trade, to question their wisdom is like attacking an American or Canadian's religion.

"I felt that once the people over here realize that free-trade has become one-sided, and is to Britain only "free-imports for foreigners," the public will listen. It has not yet forgiven Germany and the bulk of Europe for the abuse hurled upon England during the late war."

"If you in Canada will help to show that taxation on food in Great Britain will be compensated in other ways, the battle for preference would be half-won. I am in doubt myself, food in England is surely a 'raw material.' It has to be imported more freely than most things; and its cost is a factor, just like raw cotton and ores."

Replying to the last paragraph of our correspondent we would say, it has already been shown on the floor of the British House that the duty of one shilling per quarter imposed on grain entering the United Kingdom, imposed by Sir Michael Hicks-Beach during the South African war, did not fall upon the British consumer. It was at once counterbalanced by a reduction in American rates of freight to the seaboard, or in other ways compensated for so that the Britisher never felt it.

We have seen in a recent private letter a remarkable illustration that new light is dawning upon some of the believers in free trade for England as it was fifty years ago. Remarkable when it is remembered that the writer of the letter is a British manufacturer, a man of mature years, and for a life-time a believer in and worker for free trade. He has begun to realize, as we in Canada do, the effect of a slaughtering policy by United States manufacturers in other markets. He has seen it tried in the United Kingdom itself, and he is at last moved to consider whether duties should not be imposed at British ports upon the slaughtering merchandise of the audacious Yankee. Here is an extract from his letter: "A word as to the tariff question. The thing is far from settled yet; but I imagine that the trend of English opinion generally is gradually veering round to the belief that a modification of our free trade action is becoming necessary, and that moderate preferential tariffs may be the right thing. But great caution will be requisite, as it is a very vital question."

PROBABLE ADVANCE IN TOBACCO PRICES.

The action of the inland revenue authorities with regard to the excise duties on raw leaf tobacco, was such a surprise to the majority in the trade, that so far it is difficult to judge what all the results are likely to be. It is believed to be an endeavor to protect more fully the native leaf, and, in the case of importations of foreign, to induce as much as possible of the labor connected with it to be performed by Canadians. The combination factories, those, that is, which use both the native and the foreign leaf, will have to pay higher duties on their raw material, unless they import it in an unstemmed condition. The proposition is to place, in addition to existing duties, a rate of 20c. per pound on unstemmed, and 28c. per pound on stemmed leaf. When it is for use in the manufacture of cigarettes, however, the rate will be 37½c. per pound on unstemmed, and 53c. per pound on stemmed. When for cigars, the additional rate will be 16c. per pound on unstemmed and 23c. per pound on stemmed.

Naturally there will be advances in the prices of tobaccos and cigars. The latter, ordinary foreign varieties, are likely, according to all accounts, to go up nearly or quite $2 per thousand, in cigarettes there is likely to be an advance of $1.25 per thousand, while in smoking and chewing tobacco the advance can hardly be less than 3 or 4c. per pound. This is so far as the retailer is concerned. For the consumer, prices will be higher, too, but to what extent it is too early to prophesy as yet. While the idea of encouraging the stemming of the leaf by Canadian labor seems a good one, yet it is not by any means a sure thing that a premium placed on the working up of Canadian tobacco into cigars will be received with good-will by the man who likes a good smoke with a pleasant aroma. The pipe-smoker of Canadian tobacco is responsible for harsh feelings in districts where he is plentiful, but perhaps it is possible so to improve the Canadian tobacco in this respect that it will become bearable. We cannot but think, however, that it will be a long time before a cigar made from domestic leaf can rival the article which has made certain parts of the Island of Cuba world-famous.

THE MARKET FOR EGGS.

The following paragraph occurs in a circular received from a Liverpool produce concern. It will indicate the requirements of that market as to imported eggs, and we will, after it has been perused, proceed to see as to how far these requirements are being met on this side the Atlantic. We quote from the circular in question:—

"The Russian season is now in full swing, and arrivals are large. We have bought to arrive next week 15 lbs.' weight guaranteed 4s. 11d., landed, Liverpool. At this price we fear large quantities will be put into cold storage and will be again competing with Canadian eggs during the coming winter. There is no inclination here on the part of the large contractors to pay the high prices at present asked by Canadian shippers for glycerines. This, of course, is only our experience, but as we cover practically the whole country, we have some idea of the feelings of buyers."

It should be explained that 4/11 (four shillings and eleven pence) represents packages of ten dozens, the way in which such eggs are sold in Britain. This reduced to cents per dozen comes to 11 4-5 cents. The extent, therefore, to which a dealer should go in paying for eggs is 11 4-5 cents at the outside; but in this amount he must allow for freight to Toronto or other shipping point, also across the ocean, deduction for losses for bad eggs and several other items. Let us compare this scale of price with the actual conditions as they exist to-day in Canada. In the first place, a buyer has to pay at least 13 cents f.o.b. for his eggs, as they are gathered. To this, add freight and returned empties, 1c.; loss on bad eggs and seconds, ¾c.; carrying charges, 1c.; interest and insurance, ½c.; case and handling, 1c.; freight and marine insurance, 1¾c. This is the estimate of one dealer, and it, no doubt, approximately touches the facts. The total reaches 19c., which is equal to 8s. 1½d. c.i.f., in Great Britain, while we have already seen that to pay expenses, Canadian eggs must be laid down in that country for 4s. 11d. Of course, the market in the Old Country may advance, but of this there is not much likelihood in view of the efforts being made in Russia, Denmark, and other countries, to take advantage of the free opportunities presented. Of course, too, there is something to be said in favor of the Canadian producer making all he can get. The above remarks set forth the view which may be legitimately taken by the Canadian dealer or shipper, and indicate plainly enough that he should exercise the most extreme caution at the present juncture, lest he should, by paying too much for eggs, fall into the error which played such havoc with his business last year.

CROP PROSPECTS.

Our Winnipeg correspondent, describing the weather conditions in Manitoba and the Territories, wires as follows, at noon on Thursday, 2nd July: The weather during the fore part of the week just ended has been very hot, with occassional local showers. The last few days have been cloudy and cooler, while welcome rains have fallen throughout the whole West, many districts being visited by soaking showers within the last forty-eight hours. Prospects for an immense yield of all grains are becoming still brighter as the season advances. The wheat is already heading out in some localities.

Some attention has been paid to collecting information as to the probable acreage in crop this year as compared with last. It is not easy to generalize as to this, because of the variation in the reported increase in districts of differing area. But it will prove of interest to give portions of the reports received by Commissioner Smith, at Winnipeg, from various land and immigration agents. In the territory of Alberta, for example, a dispatch from Lacombe describes the acreage as one-third larger than in 1902; at Olds, there are 6,000 to 7,000 acres under cultivation; at Cardston, the increase is one-fifth, namely, from 25,000 to 30,000 acres; and at Dundurn "settlement is going on very rapidly, and it is impossible to keep in touch with all improvements made."

The advices from Assiniboia Territory are also encouraging. In the south-east, Alameda reports an increased area of grain sown, a lot of new flax also, and fine prospects. At and around Moosomin, "the crop conditions are simply perfect," while the increase in area sown is ten or twelve per cent., in wheat, barley and oats. At Wapella, also in the East, both wheat and oats are well grown, with one-fifth more area than last year; while further west, Grenfell reports much more under cultivation than in 1902, and everything looking splendid. The flax crop at Estevan, near the United States boundary, is very promising. In the Arcola district, the area in wheat is 75 per cent. greater, in oats, increased from 5,000 acres to 7,000, and in flax, from 10,000 acres to 25,000, with plenty of rain.

Going north into Saskatchewan Territory, the reporters find at Prince Albert, that although the spring was backward, the crops were on 28th June looking well. Much breaking of ground is being done thereabout, and a number of settlers have already sown flax. Battleford, farther west, reports 7,000 acres in wheat, 3,000 in oats, and 2,000 in barley, flax, etc. The season late, and crops less advanced than ordinary at end of June. A slight frost had injured the garden crops in spots early in June. Nearly 1,000 acres is in crop around the Touchwood Hills, mostly a ranching region.

In Manitoba province, the Swan River report (Swan River is in the Canadian Northern district), places the increase of area sown to grain as one-third; Brandon, a splendid neighborhood, ten per cent.; Dauphin, in the north-west portion, "much larger than in any former year"; Teulon, north of Winnipeg, "grain is looking fine; pasture and hay are of the best." These reports make agreeable reading, and encourage the confident hope of another luxuriant harvest in the great grain fields of Western Canada."

MUNICIPAL ASSESSMENT.

The case referred to by our Montreal correspondent in to-day's issue, that of Mr. James Morgan, proprietor of a departmental store in that city, is noteworthy. Mr. Morgan had erected an extensive and handsome stone structure for his business. The assessors rated him for taxation at a sum which he thought excessive, namely $500,000. He protested, and was told that the value of his property for taxable purposes had been increased to this sum by the beauty of the building he had erected. Unable to concur in such a view of values—since a merchant, if he has the right goods and the run of custom, can make as much money in a rough-cast shop as in a marble one—Mr. Morgan threatened, rather than submit to an excessive tax upon his place because it was handsome, to build a plain brick wall of great height all around it. The city, however, has receded from its position, and has come to a settlement with Mr. Morgan, in consideration of which he withdraws his threat to build the wall.

We have made some enquiry into the basis of the assessment law as applied in Montreal, and find that the Morgan case has been misrepresented in some directions. It was not alone the raising of his taxes because of the increased beauty of his building that Mr. Morgan objected to, but the fact that the assessed value of the land was raised as well as the assessed value of the building which stood upon it. This he contended, was penalizing a man unjustly for adding to the architectural beauty of the city. And he was not content to be taxed on the grounds of both beauty and utility. So strenuously did he persist in his contention that the city authorities gave way. They had at first placed a value of $500,000 on his premises. He went to the court and had it reduced to $465,000. But this was not enough, and now to prevent the defacement, the city has decided to reduce the assessment still farther to $450,000, which being satisfactory to Morgan, will prevent his building an ugly wall right out to his limit on the streets. His present walls, we are told, are several feet back from the line to which he has a right.

The arbitary increase of land values, regardless of the disposition it may entail, is what Mr. Morgan and other proprietors similarly situate to him object to. They illustrate their position by citing an instance of the working out of the method in Montreal. Thus: Two lots side by side are assessed at $10 per square foot. [They buy, sell, and value land in Montreal by the square foot, not by the foot frontage as in Ontario]. One is sold and the purchaser erects a building valued at a quarter of a million upon it. He is promptly taxed for that quarter million expenditure. Not only this, but the valuation of his land is increased from $10 to $17.50 per square foot, while that of the unsold lot remains at $10. It will be generally agreed that this is unfair. The man who improves the structures upon land, while he may justly be asked to pay more taxes on them since they yield him more revenue by reason of these improvements, ought not to be penalized further by doubling or half-doubling the taxes on his land.

FIRE UNDERWRITERS' MEETING.

The twentieth annual meeting of the Canadian Fire Underwriters' Association was held at Niagara-on-the-Lake last week. There was a good attendance of members, from both Quebec and Ontario. The agenda did not contain a large number of entries, and nothing very radical resulted from the action of the meeting. The report submitted described the business of 1902 as encouraging, but that of the present year thus far cannot be so described. In fact, it is a question whether the Canadian losses in Canada thus far this year do not exceed the whole losses of last year. It is significant that an increased aggregate of risks west of the Great Lakes is mentioned in the report. Of course, when merchants, manufacturers, banks, find their business growing, fire underwriters must share in the growth.

Among the matters concerning the Province of Ontario we note that the city of London is to be schedule rated, as other Canadian cities have been, some of her taller buildings giving occasion for such procedure. As to Ottawa, that city will likely be specially rated, in consideration of recent events. A

topic which occupied some attention was the business done by Canadians, manufacturers especially, with United States companies which have no license in Canada. A disposition was shown to meet such Canadian insurants by some modification of rates that would induce the preference of Canadian fire insurance companies to "underground" companies, even though the Canadian rate should be a trifle higher. The subject of increased rates for conflagration hazards was debated with much earnestness.

The election of officers was proceeded with. Mr. George F. C. Smith, Montreal, manager of the Liverpool and London and Globe, was elected president; Mr. Alf. Wright, manager Toronto branch, London and Lancashire, western vice-president, and Matthew Hinshaw, of the Atlas Company, Montreal, eastern vice-president.

—A bill is being introduced in the Dominion Parliament which may fill a long-felt want regarding the punishment of fraudulent debtors, especially in these times of over-daring stock speculation. The bill provides that any debtor to the extent of $1,000 who for five years previously had not kept books or could not account for his losses to the satisfaction of the court should be liable to imprisonment. The only criticism which offers itself is the suggestion that the proposed legislation should be made even more stringent. For example, the indebtedness might be made $500 instead of $1,000. The book-keeping necessary, too, might be made for three years, instead of five.

—The final story in the Anderson bank failure in Oakville, Ont., is now about to be told. Mr. S. H. Blake found that the claims of the Bank of Hamilton on the securities were valid in law. Moreover, the bank has agreed to place a liberal valuation on the Oakville and other properties, and will hand over $7,500 for the benefit of creditors. There are one or two minor assets to be disposed of, but the first and final dividend to ordinary creditors will be in the neighborhood of 2¼ cents on the dollar. We suppose that this lesson to depositors in private banks will be remembered until some other private banker covers the field with a nice ingratiating manner and an offer of 6 per cent. interest.

MONTREAL LETTER.

The event of last week in this largely French city was the celebration on the 24th of the day of St. John Baptiste, the patron saint of the French-Canadians. Great were the crowds, from home and abroad, the processions and assemblies. There was mass, of course, in the morning and some good advice by speakers. And then Joseph and Mathilde went off to enjoy themselves, while Jean and Marie took their children off for a *fete*. One of the incidents of the day was the unveiling of a statue of the late Archbishop Bourget, a memorable son of the Church. There was a great crowd, and the preacher, Father Lalonde, made much of the missionary zeal of the early French pioneers and the faith of the early settlers. He declared that patriotism and religious fervor had been conspicuous in all classes of the French-Canadian people, but he feared, and rightly, I believe, that the faith of the present day was not so ardent as in the days gone past. Nowadays we go more quickly, he declared, "but are we as sure of spiritual success as were our more slow-going fathers. This, he said, is the age of speculation and exploitation, and he pictured the bad examples set before the masses by the classes, for the former might well say if others speculate why should we not speculate with our votes?"

Speaking of statues, it has been left for the French commercial body of the city, La Chambre du Commerce, to bring forward a proposal which the English merchants should long since have acted upon, and that is that a statue of Hon. John Young should be erected in Montreal. The following resolution was passed at a special meeting of the Chambre: "That in order to testify of its gratitude to the Hon. John Young, ex-president of the Harbor Commission, and ex-Minister of Public Works, for his eminent services, the City of Montreal should erect a monument to his memory, on the Place Royale, so as to recall to future generations the initiative taken by this most distinguished fellow-citizen in the construction of the Victoria Bridge, the canalization of the River St. Lawrence and in the improvements of the harbor of Montreal, the most important in the Dominion of Canada."

One of our best-known manufacturers passed away last week, Mr. James Linton, who had reached the great age of 82. He was born in the North of Ireland and must have been here some sixty years. He built up a large and successful boot and shoe industry.

Much discussion has been going on in Parliament about another bridge across the St. Lawrence in front of the city. I observe that the bill has been amended to make the company's capital $3,000,000, headquarters, Montreal, bonding power reduced to $3,000,000 and time of construction to five years. It is to be a good way down stream and to cross from Maisonneuve to Longueuil. It is provided that the bridge shall cross the main channel of the River St. Lawrence by a single span, with a clear headway of one hundred and fifty feet from the ordinary high water level of the main channel to the lower chord of the bridge for a width of not less than eight hundred feet.

Have you noticed James Morgan, the dry goods man's attitude towards the assessment department of the city? He has erected an architecturally handsome department store on St. Catherine street, spending much money on its decoration. And handsome it is, to be sure. But now he finds that he is being actually penalized for having made his place so pretty! His taxes are increased materially, and he is very angry thereat, swearing that he will surround his store with a plain and ugly brick wall, rather than submit to what he calls rank injustice. His contention is that his building should be taxed according to the value of the land it occupies, and that this land is worth no more now than before his store stood upon it. But such is not the theory of the assessment law nowadays, which holds that expenditure producing increased utility and beauty adds to value. "Very well," answers Mr. Morgan, "if that is your game, I will checkmate you by making my premises ugly by a plain brick wall 100 feet high all round it, and *that* will reduce its value and also my taxes."

Montreal, 29th June.

OUR HALIFAX LETTER.

The annual meeting of the Nova Scotia branch of the Canadian Manufacturers' Association took place in Halifax last week. The attendance was good. Resolutions were adopted affirming the principle that Government aid be given the Grand Trunk Pacific only on the condition that the Eastern terminal be at a point within the Maritime Provinces; that the section of the road from Montreal east be built and operated simultaneously with the Western section; that stringent provisions be made to ensure the shipment through Canadian ports of the through traffic originating on the road; and that the Government be urgently requested to consider the advisability of extending the Intercolonial Railway to the grain-producing centre of Western Canada. In the tariff resolution, the principle involved in the Ger-

nan surtax was heartily endorsed, the action of the Canadian Government toward the establishment of a railway commission commended; the necessity of tariff revision reaffirmed and the Executive urged to see that all due pressure be constantly kept upon the Government to the end that the much needed tariff changes be brought about. The third resolution had reference to the scarcity of labor in the manufacturing industries of the Dominion at the present time. The Dominion Government was asked to take immediate steps to fill the demands of the labor market and to refute the statements made to British workmen by certain Canadian labor organizations concerning uninviting conditions as being false and misleading and calculated to exclude from Canada the immigration of British people, whose influx has been so long desired. The general secretary, R. J. Younge, of Toronto, who was present, expressed the opinion that Canadian manufacturers were on the eve of a tremendous struggle with labor unions, and the time had come for manufacturers to make a firm stand. It was not from the men themselves that trouble was to be feared, but they were stirred to action by agitators from the United States.

The branch, which was organized a year ago, promises to attain a position of importance. The retiring secretary, Mr. J. R. MacLeod, whose duties as manager of the Nova Scotia Fire Insurance Company left him but little time to devote to Association work, has been succeeded in the secretaryship by Mr. R. M. Hattie, the indefatigable editor of the Maritime Merchant.

Recently a bill was introduced at Ottawa, as you have already stated, chartering the Alliance Bank of Canada to have an authorized capital of $5,000,000, with head office at Halifax. The applicants for the charter are Mr. John F. Stairs, president of the Nova Scotia Steel and Coal Company; Messrs. Harvey Graham, George E. Boak, Geoffrey Morrow and W. B. Ross. There are a number of rumors regarding the plans of the promoters, but the principals are non-committal. Even Mr. Stairs himself when interviewed, professed to know nothing more than that the incorporators will proceed when Parliament grants a charter. There is a rumor that the four banks you named are likely to be brought into the new institution, which will act virtually as an amalgamation. In this connection, Mr. Stairs is reported as saying: "I am very strongly in favor of maintaining our own banking institutions instead of allowing them to get into the hands of Western corporations. I would like to see our banks continue the policy which has prevailed here for forty or fifty years, that of being controlled by local interests. Having them absorbed by Western institutions creates a likelihood of our interests being sacrificed for those of the West."

Several weeks ago Halifax carpenters threatened to go out on strike unless their demand for an increase of pay from 22 to 25 cents per hour was acceded to. Finally, it was decided to accept as binding the decision of a board of arbitrators, consisting in part of a County Court judge, the president of Dalhousie College, and a representative of the Trades' and Labor Council. The arbitrators have concluded that 25 cents an hour shall be paid to first-class workmen only, the men to be entitled to the new scale of wages from the first of June. The decision as to who are first-class workmen is to rest with the foremen of the several firms who, it is agreed, shall not be members of any labor union. The day shall be nine hours, and all who cannot rate as first-class men are to receive the old rate of 22 cents per hour. The decision has been accepted by all parties to the controversy.

Very destructive forest fires broke out again in this province last week and raged unchecked until extinguished by the copious rains on Friday night. The greatest damage was done in Cumberland county, where lumbermen who had built up moderate-sized fortunes saw them swept away in a few hours. In the Shulee and Parrsboro districts much damage was done, between 30,000 and 40,000 acres of the best spruce lumber lands in this part of Canada having been burned over in this latest conflagration. It is impossible to state correctly the loss, but it is estimated at $2,000,000.

The lobster industry, which is an important one in this province, has been more than usually successful this season. In the eastern end of the province the catch has been exceptionally large and the factories have on some days had their facilities taxed to the utmost to take care of all the lobsters brought from the traps. Not only has the catch been large, but prices are from two to three dollars per case higher than in previous years. The present satisfactory state of this industry is no doubt due in some measure to the efforts of the Dominion Government to prevent the depletion of the lobsters in our coast waters. The announcement that there is to be no extension of the open season affords general satisfaction to sensible people.

The reopening of the Torbrook iron mine, which has been closed down since 1896, will be a good thing for Annapolis County. The first trainload of ore in seven years left the mine on Friday last. The entire output will go by rail to Londonderry, where the Montreal Rolling Mills Co. are again carrying on extensive operations.

"NICE FELLOWS," WHO "GO WRONG."

A correspondent, dating from Hamilton, has sent us a communication headed "Inequality of Justice," in which he complains that the Police Court Justice dealt too severely with William Beard, who pleaded guilty to stealing $3,497 from his employers, the Canada Life Assurance Company, compared with some other people. We do not print the letter of "Fair Play," partly because it is too long, but mostly because it misrepresents what was doubtless the aim of the magistrate who committed Beard to penitentiary for two years and three months. We believe that the purpose of the magistrate was a righteous one, namely, to show an example to other young men who might similarly go astray, that they must not use the money entrusted to them by employers for purposes of speculation. And the sentence pronounced was none too severe for the offence of the man, since the law cannot be a respecter of persons.

One of the Hamilton papers, the Spectator, we believe, commenting on the Beard case, put the matter in its proper light in saying that it was a mistake to treat men who steal their employers' money to gamble with in any spirit of sympathy or compassion. It mentioned several Hamilton employees who had been caught robbing their employers in order to bet on horse-races, and rightly declared it all wrong to condole with such people if they lost and were punished. The spending of seven months or years in gaol is more likely to cure such people for ever of the gambling propensity, and to deter others from trying to imitate them, than letting them off without prosecution, because they were "nice fellows," or because they had influential relatives who could afford to pay the guarantee companies back the sums that had been stolen.

THE LAW RESPECTING FRAUDS ON CREDITORS.

"Frauds on Creditors and Assignments for Benefit of Creditors,"—Parker, 1903.

Mr. W. R. P. Parker, of Osgoode Hall, Barrister-At-Law, has recently added another valuable legal treatise to his list of publications, he having formerly co-edited Masten's Company Law. In reducing the law relative to fraudulent transactions affecting the rights of creditors and assignments for the benefit of creditors into a coherent and systematic treatise, he has approached one of the most intricate branches of the law, and one the roots of which extend back as far as the reign of Queen Elizabeth at least, and he has produced an exhaustive and well-arranged commentary on the law as it stands to-day.

The only other Canadian treatise on this subject previous to Mr. Parker's book, was one by Mr. Cassells, the latter being really an annotated edition of the Assignment and Preference Act. Mr. Parker's book, however, though covering the same ground and discussing the same topics, such

as pressure, intent, etc., has covered a much broader field and treated it admirably.

The book is divided into six parts, or divisions, the first part dealing with transfers in fraud of creditors, and the development of the law, beginning with its fountain head, the Statute, 13 Elizabeth, Chap 5, and its re-enactment by our Province, and noting all the cases thereon down to the present day. The general character of the transaction for the purpose of detecting and remedying which this branch of the law has been developed, is where a man, in insolvent circumstances, or unable to pay his debts in full as they mature, transfers any part or all of his property, otherwise exigible for the payment of his debts, to some third party, and thus reduces his available assets, and in so far defrauds his creditors. The multitudinous ways adopted by insolvent debtors to save their property from creditors necessitates a legal consideration of all their different phases.

The second part of the book deals with fraudulent preferences, or the preferring of one creditor above others by an insolvent debtor, while the third part of the book discusses the legal proceedings to be utilized to impeach such transfers. Assignment for the benefit of creditors is discussed in part four, and it is this branch of the law particularly which approaches bankruptcy, and for that reason, in view of the many unsuccessful attempts that have been made to pass Bankruptcy Legislation, the latest of which was made by Mr. Monck, during the past session of the Dominion House, this part of the book is particularly instructive. Special arrangements with creditors including composition, and extension agreements, occupy the last division of the book proper, while a very full and complete appendix of valuable and not easily acquired forms makes it of additional value.

Throughout the whole book in the discussion of intricate questions, not only is Canadian Case Law exhaustively drawn on, but English and American cases are cited and discussed, although as the writer says in the preface, he has advisably avoided discussion of theories and historical matter as far as possible, he preferring to adhere generally to the exact language of the judges in the cases cited. The book is published by the Canada Law Book Company, Toronto. On the whole, the book is a great tribute to the industry, learning and experience of Mr. Parker, who is, although only a young man, one of the most promising men at the bar.

INCORPORATED ACCOUNTANTS. (GREAT BRITAIN).

From our London correspondent a report of the proceedings at the eighteenth annual meeting of this English and Colonial body is to hand. We generally review these meetings at length, by reason of the fraternal spirit towards all Colonial institutions shown in the actions and literature influenced by its councils. We note that this influence and its results have been the means of bringing upon this society captious criticism among the older chartered sections of the United Kingdom. This leads us to remark that while Canada has given charters to public accountants, and the United States is becoming debarred (in order to train her own accountants), from the fields of work for British accountants using only "home-diplomas," there was no reason that the English institute should not have established cordial relations only in the colonies before the Incorporated Society. We fear that a cursory glance at the history of the British institutes shows an ultra-conservative spirit—and they lacked the gift of generosity to accountants' interests throughout the Empire. The Incorporated Accountants' Council saw the possibility of professional accounting following commercial expansion, and met the desire of English accountants in the new colonies, not to be dissociated from the home-body, although self-governing. The members in South Africa appreciated the sentiment and prestige of their position, which finally brought about the absorption of the majority of South African accountants into the Incorporated body. The exclusiveness of the acts and speeches of the chief English chartered accountants have been well noted in Canada, and possibly in the other colonies. Even now, to the best of our belief, associates cannot get the final degree of F.C.A., if practising—"out of England and Wales,"—a distinction noted in their list of members published.

The members whose greater ambitions took them out of the favored precincts had to be thankful to be permitted to remit their annual dues across the water. But now that the Incorporated Society has sown seeds with much toil and expense, a tendency is shown by the British Chartered Institutes to help reap the crops. Two other factors, no doubt, have stirred the self-complacency of the "home-institutes, namely, the growth of Canadian chartered institutes into the wider Dominion body, and the phenomenal rise in the United States of the "Certified Public Accountants;" all of which diplomas are readily accepted by the investor and public bodies, and becoming more widely known.

These remarks are not based upon any clauses in the Incorporated Society's report; but they are apropos, by reason of the remarks made by the President of the English Chartered Institute, reported in a London professional paper, to the effect that English chartered acountants in South Africa and Quebec, (Canada), had "appealed for help."

It is improbable that either in Africa or Canada, a chartered accountant would be debarred from practice, provided he described the origin of his diploma, as (Eng.), for instance; or, that he would not be eligible for admission to the colonial bodies. We have in mind the correspondence in our columns relative to the comparative status and abilities of the English and Colonial professional accountants, and it seems to us the English Institutes wish to evolve a new policy, but cannot yet reconcile their attitude with the old views of superior exclusiveness. It must be remarked that the President of the English Institute opened the subject in an unfortunate manner by reviewing from a pedestal intead of level ground, the other institutes and societies at home and in the colonies. To a Canadian it seems insular to extol the English charter because granted by the Privy Council, as superior to the Canadian charters, granted by the Colonial Act of Parliament. The comparison we quote was not followed by any qualification, so it only remains to be pointed out that, in the view of Canadians, and upon Anglo-Canadian business, the status of our Chartered Institute holding a charter conferred under Act 46 Victoria—Statutes of Ontario—is equivalent to the charter conferred by the Privy Council in the same reign, and the signatures of the chartered members equal in weight. That the Privy Council itself had no thought of permitting only accountants to use the title "Chartered," is proven by the grant of the same title and privileges to the organization of professional "secretaries," as recently as last year. It is plainly visible to all who wish to see this useful profession firmly established that the welfare of the whole is related to its parts—and that the British institutes must recognize the growth of the sections uncontrolled by their charter—but amply and fully recognized by legislatures and the community.

Reverting to the Incorporated Society and its report, we extract the reply of its head official to the hostile criticisms of its Colonial expansion and home-policy:—"In the meantime we (the Council), are satisfied to obtain far-reaching results. . . . We have for years been asking that all those who differ (in policy) from us in the United Kingdom, should put their cases before a Select Committee of the House of Commons, where we are willing to attend, and where all parties could be examined and cross-examined. We renew our offer to-day, as we have nothing to fear and nothing to conceal, but the opponents of our policy evidently think we shall gain most by an impartial enquiry of this sort. Suffice it to say that nothing will prevent our aiming at making ours a truly Imperial organization. . . . . It is a plank in the platform of this Society that we do not seek to create a monopoly for its members, and we are still willing to consider applications from qualified accountants of good standing, in any part of the Empire, who can fulfil the conditions laid down by the members and by the Council for obtaining admission to membership. . . . . That your Council can be trusted to safeguard the interests of those who have passed their examinations will be amply evident to you when I say that—since the Extraordinary Meetings under Article 5 itself, we have only

admitted three Fellows, all men in good position and practice. Turning to the important question of legislation for the profession, while our Parliamentary action has not been without success during the session of 1902, no definite advance has been made towards getting on the Statute Book a measure for the registration and control of professional accountants. I would again emphasize the necessity of creating a statutory roll of professional accountants in the interests both of the public and of the profession itself. It is satisfactory to note that the President of the (English) Institute of Chartered Accountants admits that *"Some system of registration is the only possible reasonable course."* This is a striking testimony to the foresight of the Council of our Society, whose policy has been registration of many years past. . . . The Society's diploma has again been recognized in an Act which passed the Imperial Parliament, and received the royal assent. . . Upon the report of the Disciplinary Committee of professional misconduct by one member, an order of exclusion from the roll was made by the Council." . . .

Among other clauses in the report is the notice of the Autumnal Conference, to be held in Liverpool, next October, where the Society will be received by the Mayor, Mr. Rutherford, M.P.

The gold medal, to the best candidate for the year at the examinations, was awarded to Francis W. Higgison, of Walsall, (Staffs.); and the silver medal to Harry D. Myers, of Keighley, (Yorks).

The London library had been augmented, and the Canadian section, catalogued in the Year-book, is made valuable for reference by the addition of the ably-written accounting works produced by Canadian professional men during the last few years. The monthly organ of the Society, *"The Incorporated Accountants' Journal,"* has increased its circulation. Including the members of the late Institute of Accountants in the South African Republic absorbed during the year, the membership reaches the number of 2,060, and the invested funds of the parent-society, at cost, $26,529.

Among the members present at the meeting were Mr. R. A. Marr, (Edinburgh), President, Scottish Branch; Mr. E. Kevans, J.P., (Dublin), President, Irish Branch; Mr. James Grant, C.P.A. (Haskins & Sells), New York and London; Mr. Philip Salisbury, (Kimberley, South Africa), and others prominent in British accountancy circles.

INSTITUTE OF ACTUARIES.

The fifty-sixth annual general meeting of the Institute of Actuaries was held on 8th June, at Staple Inn Hall, London, England. The president this year is Mr. William Hughes, the vice-presidents, Arthur F. Burridge, George King, Thomas G. C. Browne and Ernest Woods. The treasurer is Henry Cockburn and the honorary secretaries, Geo. Todd, M.A., and Frederick Schooling. The council nominated, to the number of thirty, were unanimously elected, among them being T. G. Ackland, Charles D. Higham, H. W. Manly, Gerald H. Ryan. The number of members is now 828.

The labors of the joint committee of the Institute of Actuaries and the Faculty of Actuaries on mortality investigation are now nearly concluded. For the examinations of the Institute held in April last in the United Kingdom and the Colonies there were 266 entries. The papers submitted at the sessional meetings included, besides an inaugural address by the president, Mr. W. Hughes, a paper on The Comparative Reserves of Life Assurance Companies, by Mr. Geo. King; Temporary Assurances, by Mr. W. Palin Elderton; The Valuation of Endowment Assurances in Groups, by Mr. G. J. Lidstone; Mortality Experience of the Imperial Forces during the War in South Africa, 11 Oct., 1899, to 31st May, 1902, by Messrs. F. Schooling and E. A. Rusher. Valuation of Staff Pension Funds; Part II.; by Mr. H. W. Manly, with tables by Mr. H. Foot.

NORTH AMERICAN LIFE CONVENTION.

A most agreeable event in the Canadian life assurance world was the annual convention of the North American Life Company for 1903. It was held last week at the Frontenac Hotel, in Quebec. In addition to the president, managing director, auditor and superintendent of agencies, there were present inspectors and agents from various parts of the country to the number of forty or more. Proceedings began at the office of Mr. J. B. Morrissette, local agent of the company. The annual dinner given by the company was on this occasion held at the Kent House, Ste. Anne de Beaupre. Mr. J. L. Blaikie, president of the company, presided.

A feature of the occasion, which came as a surprise to the recipient, was a present to the managing director, Mr. L. Goldman, of an address and a cabinet of silverware. Mr. W. J. Fair read the address. It contained the congratulations of the field staff of the company to Mr. Goldman on his appointment to the onerous post of the managing directorship; recited his long connection with the company, his unwearying exertions, and the success with which he had stimulated the representatives of the company until it had taken a high place among the life companies of Canada.

THE AWAKENING OF MEAFORD.

Business of all kinds has undergone a marked revival at Meaford during the past two years. Previous to that time, the Grand Trunk Railway had its station perched on a hill half a mile from the harbor. The condition of the harbor itself was sadly neglected, and very little shipping came to it. The Board of Trade of the town had tried in vain for several years to induce the G.T.R. to bring the track down to the harbor and build a central station. Finally, the Grand Trunk people offered to do this if the municipality would give them a bonus of $35,000 and secure the building of an elevator. The energetic business men of the town, supported by a favorable vote of the citizens, agreed to the proposition, and in due time the elevator was built at a cost of $100,000; the G.T.R. tracks were built down to it, and a fine station put up close by.

Having done well so far, the residents were not weary in well-doing. They next brought pressure to bear upon the Government to deepen and repair the harbor, which was done. With these advantages to offer, manufacturers were induced to locate in the town. The Seaman-Kent Co., Limited, removed from Toronto and built a large factory in Meaford for the manufacturing of hardwood flooring, screens, etc., and they now employ upwards of eighty hands. J. E. Murphy built a good-sized furniture factory of the new building material, Portland cement, and this plant is running with a full force of seventy-five hands. Charles Barber is doubling the size of his foundry, which is being kept busy supplying turbines and ship parts for Georgian Bay craft. Other industries at Meaford are flourishing and include the Meaford Wheelbarrow Co., Wm. Moore & Son's flour milling business, James Randle's woolen mills, and W. P. Perry's tannery. Some of Meaford's prominent citizens, who took the initial steps in the securing for their town its present prosperity, deserve mention for their persistent efforts. Among them we hear of R. Finley, dry goods merchant; W. W. Stephen, druggist; C. H. Jay, banker, and H. R. Cleland, hardware merchant. It remains to be added that Meaford is a pretty place, and that the air of the Georgian Bay is salubrious for summer visitors.

TELEPHONES IN CANADA.

In a paper on telephone competition in Canada, by Mr. F. Dagger, telephone engineer, copied in the June number of the Canadian Engineer, the following statement is made of the relative number of telephones in use in various provinces of the Dominion. In Ontario, the writer says, there is one telephone to every 89 inhabitants; in Quebec, one to every

102; in Nova Scotia, one to every 122; in New Brunswick, one to every 129; in British Columbia, one to every 63. British Columbia is, therefore, relatively, the greatest user of the telephone. We are much behind other nations, however, in the provision of this facility for commercial or social intercourse. The people of the United States have in use a telephone to every 20 inhabitants, while Sweden, Norway and Denmark have one to every 14. Out of the 50,000 telephones estimated to be in use in Canada, the Bell Telephone Company supplies 42,858. That company had, according to its report for the year 1901, no fewer than 343 exchanges and 514 agencies.

PARODY ON THE MODERN BANK PROSPECTUS.

We are after your dough, and dough not forget it. If you are too busy to bring it we will send for it, and when you want to draw your money we will take it to you.

We have established a delivery service which can't be beat. Our wagons are built specially for the Burial Casket Trust which recently busted. To customers in mourning we will send wagons decorated with plumes. Each wagon has two horses or mules—as our customers prefer.

By our service system we are enabled to collect deposits, deliver pay rolls and transact all business with our customers without their ever seeing the inside of our bank.

Interest at the rate of 3½ per cent. will be allowed upon balances of $1, and of 4 per cent. on balances of $5 and over, compounded daily.

Parties not liking the looks of our delivery service attendants and so notifying us will be furnished with trolley rides each way at our expense. Customers preferring to walk will be entitled to beer checks instead.

Our regular bargain day is Thursday. Every week something new in bargains. This week we sell $20 gold certificates at $19.98. This is a special issue manufactured for ourselves, and is warranted to be the yellowest ever issued.

We have a ladies' department, exquisitely furnished with grand piano, chewing-gum slot machines, and all the most modern appliances.

At present we are giving souvenirs to all our customers. They are the popular one-cent coins of the vintage of 1903.

Engraved check-books will be furnished, and we expressly call attention to the fact that all the paper money used by this bank is also engraved. No other bank offers such inducements.

Our customers are respectfully requested that if there is anything they want that is out of sight to reach for it.

Let us open an account with you. Don't say you haven't any money. You don't need money. You can start your account with an overdraft and keep it going with the wind.—Evening World, N. Y.

INSURANCE MATTERS.

It is stated in a despatch from Sydney, that the Allan steamer "Norwegian," which went ashore off Newfoundland recently, has been libelled at Port Aux Basques at the instance of the Reid-Newfoundland Company, whose steamers salvaged her and her cargo. It is not settled yet whether the injured vessel will be taken to St. John, N.B., or Quebec for repairs.

The Mutual Life Insurance Company of Canada has secured a valuable addition to its field staff in Nova Scotia in the person of Mr. J. H. Fraser. Mr. Fraser is a native of the province, and has had about twelve years' experience in the insurance business, chiefly in the State of Massachusetts with the Metropolitan, and latterly with the John Hancock life companies.

A pretty heavy loss for the marine underwriters is implied in the stranding, in the Straits of Mackinaw, of the steamer "John Craig," on Simon's Reef. Almost all the steamer's cargo of 95,000 bushels of corn had been thrown overboard and what remains is considered a total loss. The steamer lies on the rocks badly twisted. The cargo was consigned by the Armour Grain Company to the Grand Trunk Railway at Meaford, Ont.

A company is being formed in Indianapolis for the purpose of insuring employers of labor against strikes. The membership would be kept secret, so that organized labor, when contemplating a strike, would not know whether it would be fighting an individual or making an onslaught on combined capital. The object of the company will be to protect its policy-holders from losses resulting from strikes and also to protect independent workmen. The company will have a legal department and will prosecute any man who attempts any coercion or commits any violation of law.

It is to be hoped that the Chief of the Halifax Fire Brigade spoke merely in a fit of spleen or at any rate greatly exaggerated facts when he made his recent remarks before a special meeting of the Board of Fire Commissioners in that city. According to a local paper, he said that the Halifax Fire Department was filled with cripples and consumptives, whom he had not yet had a chance to weed out. . . . There was not a man in the organization whom he would care to appoint to the position of assistant chief and have confidence in. He wanted experienced men to assist and they were not there. Nor was the reply of one of the commissioners, that there would be an opportunity of taking the value of this opinion at the next big fire, a very reassuring one.

ANSWERS TO ENQUIRERS.

Accountant, London.—We have not heard of such a one. We have heard of the proposed Northern Bank, the headquarters of which are to be in Winnipeg, Man., with Sir D. H. McMillan, F. W. Stobart, J. H. Ashdown, G. R. Crowe, and D. C. Cameron, provisional directors.

A. B. C., City.—It must be several weeks since a Montreal grand jury returned a true bill against Morris Bachrack, Abraham Levi and William Blackley, of Toronto, for conspiracy to defraud. The charge against them was that they incited Margolius, the Montreal defaulter, to buy goods on credit and sell them to the accused for about half what they cost him.

R. C. N., Halifax.—Write to the manager, Northern Navigation Company, Collingwood, Ont.

TRADE OPPORTUNITIES.

Canadian Government Office, London, 19th June, 1903.—Addresses of Canadian shippers of box shooks wanted by a London firm which can place large orders. North of England man wants a Canadian exporter of manufactured horsehair. London export merchant seeks large flour millers in Canada interested in South African market. London man wants names of leading iron and steel makers in the Dominion. A Montreal man asks of jute manufacturers in Great Britain. Wholesale fish house at Halifax, N. S., want to get in touch with fish importers at Alicante, Spain, and shippers of salt at Cadiz, Spain, and Augusta, Sicily. Canadian owner of a patent truck would correspond with an English manufacturer interested in U. K. patent.

Imperial Institute, London, 18th June.—Liverpool house asks for Canadians' quotations for supplies of basswood broom handles, 50 by 1⅛-inch. Manchester house wants to know Canadian producers of mica. English proprietor of a chemical specialty for electrical batteries is prepared to appoint some Canadian firm connected with the electrical trade his agent.

—We are advised that the People's Bank of Halifax will open a branch at Bridgewater, N.S., about the 2nd of July, under the management of Mr. H. H. Archibald.

SCOTCH WARRANTS.

The report of Messrs. Connal & Co., (Limited), Glasgow, is a sufficiently plain commentary on their view of the present and probable future state of the iron market in Britain. In the years between 1880 and 1885, the stocks of pig-iron in the Glasgow warrant stores varied between 739,000 and 940,000; in 1888, they reached the large total of 1,228,000 tons, Since that time they have been gradually declining, the year 1899 closing with only 71,286 in the Glasgow stores; and the decrease since then has been still more remarkably rapid, so that in May last, they only were about 15,000 tons. To such an extent has this annual reduction in stocks gone on that for the past three years the dividends on preference shares of the famous storage company have been paid largely out of the reserve fund. And now the directors propose to sell some of the company's land no longer required, and with the proceeds pay off the preference shares. Already some of the land not now needed has been put into tenement buildings. It may be a matter of interest to Canadian readers to be reminded, that on these stocks of pig-iron in the old days, warrants were issued, and that these securities were once the subject of international speculation. Now they are only handled by a few local dealers, and the Scotch warrant is no longer the ruling factor in the iron trade. Middlesborough is another place in the Old Country famous for its stocks of pig-iron, and, so far as it goes, there is some satisfaction in stating that these stocks have shown a considerable increase of late years. At the end of 1901, they were 140,467, at the end of 1902, they were 121,657, while at the end of May last, they had gone up again to 143,440 tons, just about the same quantity with which they opened over twenty years ago.

FOR GROCERS AND PROVISION DEALERS.

The French Government proposes to increase the duty on coffees. Here is another blow to the Brazilian planters, who have already faced a series of low-priced years with heavy production.

An important sale of hogs took place at the Hamilton, Ont., stockyards last week, when seventy-one pedigreed Yorkshires were sold at auction, the average sum realized being $115 per head. The highest price paid was $400.

DRY GOODS.

During the past week a large number of the textile mills in Lancashire, England, closed down owing to the continued heavy advances in raw cotton. From reports received, the cotton industry in England seems to be in a bad way.

Bradford (Yorks), advices state that in spite of the unsettled state of Eastern Europe, the disturbed state of the American money market, and the extremely quiet present-time demand for wool textiles, the quotations of all classes of both colonial and home-grown varieties remain extremely firm in this market. Stocks of pure merino, in the hands of both combers and merchants, must be getting unusually small, and as there seems to be no possibility of any large supplies being thrown on to the market, holders of both raw wool and combed tops are quite prepared to wait patiently until users are forced into the market.

A report to the Drapers' Record of recent date stated that the linen market in Belfast was in a healthy and satisfactory condition. The amount of new business shows a slight falling off, but spinners and manufacturers are well supplied with orders for some time to come, and a little slackening causes no anxiety. Values are very firm, the tendency being, if anything, upward. Yarns are in steady request. Orders are mainly of a sorting up character, and prices are fully maintained. Stocks are low. Tow yarns sell freely, but line wefts in the medium counts are rather quiet. Continental yarns are advanced in price a little higher. Brown cloth has been in good, regular demand. Powerloom linens for bleaching are selling steadily. Unions are in considerable demand. Dress goods have had an exceptionally good season, and manufacturers are busy for next year. The trade in damasks is fully maintained, but other makes of household linens are a little quieter. The handkerchief section is moderately busy. Taken all round, business is very satisfactory. Buyers are deterred from speculating by the advancing prices, and are content to purchase for immediate needs.

—The census figures for Newfoundland and Labrador were recently published. They showed a population in 1901 of 220,984, compared with 202,409 in the year 1891. In 1857 the figures were 124,288, so that the population of the Island, together with Labrador, may be said to double itself in about fifty years. St. John's municipality has increased its population by about 15 per cent in the decade, and the famous French shore district by 29 per cent., but some districts are not so fortunate. For example, the people of Ferryland, Carbonear, Harbor Grace, Port de Grace, Brigus, and Labrador have steadily been declining in numbers since 1884.

—It is agreeable to hear of the progress being made with the Temiscaming Railway in Northern Ontario. The engineer of the road, Mr. Russell, was in Ottawa on Monday, and reports that 80-pound steel rails have been laid on the line for a distance of seven miles from North Bay, and that ironing is proceeding at the rate of a mile a day. Ballasting will commence during the present week. Mr. Russell anticipates that sixty or seventy miles of railway will be built by the fall, and that early next summer the commission will probably take over and operate the line to Temagami, a stretch of about 72 miles. An order has been given to the Kingston Locomotive Works for four 70-ton locomotives, and the purchase of passenger coaches, flat, stock, and other cars is the next matter for consideration.

—Preaching to the graduating class at Princeton University, the other day, Rev. Dr. Henry Van Dyke referred to the temperance question. Here are a few of his sentences: "I do not say that we shall not pass resolutions and make laws against intemperance. But I do say that we can never really conquer the evil in this way. The strongnold of intemperance lies in the vacancy and despair of men's minds. The way to attack it is to make the sober life beautiful and happy and full of interest. Teach your boys how to work, how to read, how to play, you fathers, before you send them to college, if you want to guard them against the temptations of strong drink and the many shames and sorrows that go with it. Make the life of your community cheerful and pleasant and interesting, you reformers, provide recreations which will not harm them if you want to take away the power of the gilded saloons and the grimy boozing dens. Parks and play-grounds, libraries and reading rooms, clean homes and cheerful churches, these are the efficient foes of intemperance."

—It was an interesting decision that Mr. Justice Champagne rendered recently in the case of David Thomas v. the Pillow & Hersey Manufacturing Company. Thomas is a machinist and was employed by the company. He was ordered to take charge of two machines and refused to do so, on the grounds that it was not customary in the trade for a man to work two machines, and that, moreover, the rules of his union forbade him doing so. Mr. Justice Champagne held that the evidence showed that the plaintiff's first contention was not proven, and that his second, that regarding the union, was of no value, inasmuch as no contract with the union making this provision existed. He consequently refused the damages asked for alleged wrongful dismissal. The case is important as demonstrating an attempt to fasten upon local employers that feature of unionism which is killing the iron manufacturing industries especially of Great Britain, the restriction of the amount of machinery one man may attend to, such restriction being based not upon the ability of the man, but upon the union's desire to make as much work as possible for its members. That such an attempt should be crushed in its infancy is most important.—Montreal Gazette.

—At last, after many false rumors, it is announced that the coal miners' strike at Ladysmith, B.C., which started on March 11th, has been declared off, the men by a large majority having determined to go back to work on the terms which prevailed before the trouble. In the negotiations which have thus been terminated so happily, the union was ignored. The sympathetic strike at the Cumberland mines will come to an end automatically, the men there not having claimed any grievances. This settlement will presumably cause the C.P.R. to withdraw their further order said to have been given (or in imminent prospect), to Japan for coal. One steamer with 7,000 tons from that country has already reached Vancouver.

—Since April 15th, the Immigration Labor Bureau at Winnipeg has placed in situations no less than 3,700 hands, chiefly young Englishmen. Notwithstanding this, however, it is stated that there are hundreds of applications for hands remaining unanswered. The greater number of the above were placed on farms. Immigration into Canada last month from Great Britain was hardly up to the average, the first rush of the season, no doubt, being over. Large numbers, however, are expected to arrive within the next month or two. The annually recurring question of help to get in the harvests promises to be even more acute this year than last. The crop in the West looks as if it will be far and away larger than that of last season, and the contingent of harvesters from Ontario is hardly likely to be large owing to the fact that this province has not enough idle hands to take care of its own produce.

—There were some very good things said at the meeting of the American Association of Farmers' Institute Workers, which took place in Toronto last week. Among them was the following extract from Hon. John Dryden's paper on "How to Enlist the Interest of the Boys in Agriculture:" In agriculture, the speaker said, the best and most brilliant young men are needed, but not those who are unwilling. "I would never press a young man to enter farming if he did not wish to do so. A boy whose tendencies are toward ships and the water should be sent to the sea, or to the boats. He will not make the best of farmers. The same argument applies to boys who love tools or books. These will make good mechanics or lawyers. Then, again, boys are to be found who are fond of animals, of living in the open country, of the fresh air, and these boys are the kind of which to make farmers." The Institute, he thought, had done much in the past ten years to overcome the prejudice against farming. There used to be a sentiment against putting a bright boy to the plow, but this was becoming rare. In the Old Country, a man felt honored to be a successful farmer; even royalty were engaged in the pursuit. Often a boy was found who despised the monotony of life in the country and longed for the attractions of city life; often, too, he became a tired merchant or a starving lawyer. There is room for ability on the farm.

—The report of the Ontario Bureau of Mines for the first three months of the present year shows that of gold ore the quantity treated was 9,688 tons; gold produced 2,692 ounces, valued at $45,218. Nickel copper ore raised, 52,866 tons; smelted, 47,880 tons; nickel in matte product 1,059 tons, valued at $567,211; copper in matte product, 780 tons valued at $112,676. Copper ore raised was 9,940 tons; concentrates produced, 236 tons, valued at $10,388. Iron ore raised was 78,789 tons valued at $116,620; Ontario ore smelted, 7,392 tons; foreign ore smelted, 18,349 tons; pig iron produced, 14,357 tons, valued at $165,656; steel produced, 1,340 tons, valued at $29,480. Arsenic produced was 216,000 pounds, valued at $6,264. Compared with the same period of 1902, the total value of production was $1,055,513, a decrease of $201,172. This decrease is chiefly owing to the falling off in the output of pig iron, viz., from $397,838 to $165,656 due to shutting down the furnaces for repairs.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, July 2, 1903, compared with those of the previous week.

Cities	July 2, 1903	June 25, 1903
Montreal	$17,979,450	$24,060,836
Toronto	12,853,394	15,875,475
Winnipeg	3,887,541	4,642,012
Halifax	1,521,154	1,865,152
Hamilton	780,270	1,093,552
St. John	899,325	982,400
Vancouver	1,104,203	1,385,752
Victoria	473,118	516,212
Quebec	1,574,325	1,549,029
Ottawa	1,652,358	1,869,714
London	642,341	745,800
	$43,367,479	$54,585,934

THE SOVEREIGN LIFE ASSURANCE COMPANY OF CANADA.

AUTHORIZED CAPITAL $1,000,000.
INCORPORATED BY SPECIAL ACT

FULL GOVERNMENT DEPOSIT.
HEAD OFFICE, TORONTO.
OF THE PARLIAMENT OF CANADA.

are sold by all the leading wholesale houses

—CUT TOBACCO—

OLD CHUM MEERSCHAUM
OLD VIRGINIA

—CIGARETTES—

SWEET CAPORAL DERBY
YILDIZ MAGNUMS
Dardanelles

Pure Egyptian Cigarettes.

MONTREAL MARKETS.

Montreal, July 2nd, 1903.

Ashes.—There has been no material change in the market for potash, which is firm, owing to continued small receipts. A fair enquiry is reported from foreign sources, but the volume of business passing is light, and prices are maintained at $5.30 to $5.40 for first pots, and at $4.95 to $5 for seconds per 100 lbs. Pearls are scarce and nominally quoted at $6 to $6.25 per cental.

Cement and Firebricks.—A fairly active business is reported in this department and although supplies of foreign goods are coming forward freely, the undertone to the market remains steady. Canadian cement is selling at $1.90 to $2.25; German at $2.25 to $2.40; English at $2.15 to $2.25; Belgian at $1.70 to $1.95 per barrel, ex-store, and American at $2.20 to $2.40, ex-cars. The demand for firebricks is fair for the season, with sales of English at $16 to $22 and Scotch at $17 to $22 per 1,000, as to grade.

Dairy Products.—There continues to be a heavy feeling in the cheese market and prices are lower than a week ago with sales of round lots of Quebec goods at 10⅛c. In Ontario and Townships makes of cheese business has been quiet, as holders have not been disposed to accept the bids made for them, but in view of the heavy make the indications are that they will be compelled to in the near future. The shipments for the past week were 72,868 boxes, as against 72,172 for the same week a year ago. The total shipments for the season to date have been 484,291 boxes, as compared with 396,932 for the same period last year In butter the feeling has also been easier with sales of finest creamery at 19c. to 19¼c. per lb., which figures show a decline of ¼c. to ½c. per lb. on the week. The shipments for the past week were 8,038 packages, as against 16,040 for the same week in 1902, and the total shiments for the season to date are 38,617 packages, as compared with 98,082 for the same time last year.

Dry Goods.—A fair volume of business is reported for the season, there being a number of sorting up orders coming in, and the demand for fall goods is on the increase. There has been no special change in values for any line to note, the advances in the different lines noted a week ago being well maintained.

Groceries.—The feature in this branch of the trade has been the continued weakness in raw beet sugar in the foreign markets, and prices have declined 3d. on the week with the tendency still downward. This fact has had no influence, however, on the refined article, which has ruled steady under a fair demand at $4.05 for granulated, and at $3.40 to $3.90 for yellows per 100 lbs., of the market for molasses remains firm with jobbing prices at 39 to 40c. In as to quality, at the factory. The tone teas business has been rather quiet. Cable advices from Japan report the market firm and state that the second crop will be much shorter than last year. Another cable stated that Canada had made fair purchases of new crop green Ceylons at an advance in prices. Cables from Formosa report the market firm and higher for low grades with 15c. quoted as the inside for lowest Government standards. In dried fruit there is no change to note and the market is quiet. Cables from Patras on currants were firm and quote fine Amalias for prompt shipment at 12s. 6d. in barrels, and 13s. in cases.

Hides.—A fair volume of business has been done in hides. The tone of the market for calfskins is weak and lower prices are expected owing to the accumulation of stock, but values for beef hides and lambskins are steady.

Leather.—The demand for leather has been fair, and a moderate amount of business is reported in some lines. The tone of the market is steady, and prices show no change. Jobbing sole is scarce, and held at 26c. for No. 2, Mnfs. No. 2 quotes at 23½ to 24c.; grained upper, 14 to 16c.; waxed ditto, 32 to 35c.; Ontario splits, 19 to 21c.; Quebec ditto 15 to 7c.; buff, 11 to12c.; patent cow, 16c.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.

Metals and Hardware.—The volume of business in this line has been fully up to expectations and the market is fairly active with no important changes to note, but the tendency in heavy iron and metals is one of extreme caution with buyers at the present time, and the main argument with them seems to be the declining tendency of pig iron in the United States. No. 1 Carron pig iron is quoted at $21; No. 3 at $19.75; Middlesboro No. 3 at $17.75. Bar iron is unchanged at $1.95 to $2; iron pipe at $4.81 for inch; boiler plate, $2.10, and tank steel at $2.

Oils, Paints and Glass.—The tone of the market for all lines was steady, and the demand is fully up to the average, consequently a fairly active business is said to have been done. We quote, as follows: Single barrels, raw linseed oil, 57c.; boiled, 60c.; net 30 days, or 3 per cent, for 4 months' terms. Turpentine, 74 to 75c., single bbl. Olive oil, machinery, 90c.; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gallon; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands) $5 to $5.15; No. 1, $4.75 to $4.87½; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 5c. for pure; No. 1, ditto, 4 to 4½c.; genuine red ditto, 4¼-4½c.; No. 1 red lead, 4c.; putty, in bulk, barrels, $2; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40 to 45c.; Paris white, 75 to 80c.; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break.

TORONTO MARKETS.

Toronto, July 2nd, 1903.

Drugs, Chemicals etc.—A fairly good volume of trade is the rule locally. Hardly any noteworthy feature can be seen at present. Prices, while moderately firm, have made no change. An advance has taken place in opium, at Smyrna, the primary market, owing to rainy weather, and the New York market, is stronger. Quinine, German, is a little stronger owing to limited supply, but Java is easy.

Dry Goods.— Cotton continues remarkably strong, the price in New York this week having reached 13½c., but no further advances have taken place this week. Trade generally speaking has not been over brisk, though there is nothing particular to make complaint over. Country orders are coming in fairly well, but retailers appear careful not to overstock.

Flour and Grain.—Wheat has gone up again about 1 to 2c. and keeps strong at the advance. Barley is dull and unchanged. Oats are 1 to 2 cents higher. Peas, rye. corn and buckwheat, are nom-

inally unchanged, though the last named is meeting with renewed enquiry. A higher market exists for flour, and it is in good demand, and $2.80 is the quotation for 90 per cent. patents in buyers' bags, middle freights. Millfeed is steady, and no change has taken place in oatmeal.

Fruit.—An active trade is being carried on by the fruit merchants, though prices are naturally very hard to foretell from day to day. Strawberries are nearing their finish, the heavy showers having given them a tendency to softness. They are selling at 4 to 6c. as to quality, while poor berries bring even less. New potatoes are coming in in some quantity from across the line, as well as a few Canadian. The latter bring 40 to 50c. per basket. Quotations are: Bananas, $1.50 to $2.50 per bunch; cocoanuts, per sack, $3.75; beans, $2,50 per basket; lemons. Messina, $3 to $3.50; Sorrento, $3.25 to $4.25; oranges, Mediterranean sweets, $2.75 to $4; cherries, eating, $1 to $1.25 per basket; cooking, 75 to 90c.; small baskets, 50c. to 60c.; watermelons, 35c. to 40c.; Rocky Ford musk melons, $2 to $3.50 per case; apples, 75c. per basket; California peaches, $1.50 to $1.75 per case; do. apricots, $1.50 to $1.75; do. plums, $2.50 to $2.75 per case.

Groceries—A fairly good trade is the order of the day. The preserving season being at its height, the movement in sugar is brisk. No change has been made in regard to prices. The situation in other departments remains practically unaltered. Teas retain their strength. Canned goods are still tending higher, with peas and corn very scarce.

Hides, Skins and Leather.—No new development of importance has taken place in the hide market. They are coming forward in moderate quantities, and the demand is fair. Tallow is steady. A certain degree of dullness may be noted in leather, but prices keep steady. No additional transactions of importance were reported in the Chicago market for packer hides. A fair amount of interest, however, continues to be shown by buyers, and prices are well maintained at 11½ to 12¼c. for native steers, 14¾c. for heavy Texas, 11½ to 11¾c. for butt brands, 11¾ to 12c. for Colorados, 10¼ to 10½c. for heavy native cows, and 10½ to 10¾c. for branded ditto. Country hides are firm at 9½c. for No. 1 buffs.

Provisions.—Though quotations for butter are unchanged, there is a slightly easier tone to the market. Cheese continues steady. Eggs are becoming a little more plentiful, but the price keeps high, few sales being reported below 15c. In the meat market, things continue as last reported, with a good demand for hog products.

Wool.—Little business is being done under this heading, and little new clip is coming forward. Holders want more than the buyers feel disposed to offer. Pulled wools are dull.

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay $5.00 for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over $100,000 a year by doing neither one.

For sample copy send 10 cents to
PRINTERS' INK, No. 10 Spruce St.,
NEW YORK CITY.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

The non-paying building is the big building without a modern elevator.

The dividend-paying block is the one in which has been installed elevators that do their work steadily, safely, and economically all the time. . . . . .

Fensom's High Grade Elevators never run wild, are sure, and earn their cost. . . . . .

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay **$5.00** for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over **$100,000** a year by doing neither one.

For sample copy send 10 cents to **PRINTERS' INK, No. 10 Spruce St., New York City.**

Mercantile Summary

Receipts at the Halifax Custom House for June were $120,832. In the same month last year they were $100,989.

As the result of the employment of a non-union man in the J. & T. Bell shoe factory, in Montreal, on the 7th inst., the other hands struck work. So it goes. This is no longer a free country for manufacturing.

The rolling mills at Sault Ste. Marie are now almost ready to begin operations. It will be unnecessary to purchase pig iron for their use, as the blast furnace at that place is practically completed.

On Monday last, some two thousand Chicago wood-workers went out on strike. It is recalled by a contemporary that every strike declared in Chicago this spring has been a failure. So, we may hope, will this one be.

Murray & Gregory's steam sawmill, at North End, St. John, N.B., together with 2,000,000 feet of lumber and a house and barn, were on Saturday last destroyed by fire. On the same day the Quebec Garrison Club was damaged by fire to the extent of $5,000. The loss is fully covered by insurance.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Money to Loan on First Mortgage on Real Estate on reasonable and convenient terms.

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Mercantile Summary.

A winding-up order has been granted in the matter of the Strathcona Rubber Co., Limited, of Montreal, and J. McD. Hains has been appointed liquidator. The company was incorporated in September, 1901, to take over the business of E. L. Rosenthal, manufacturer of water proof clothing, who remained the principal stockholder. The authorized capital was $50,000, of which about half was subscribed.

The Dominion Government has appointed Mr. J. K. Barrett, who has been and will continue to be Inspector of Inland Revenue for the Winnipeg district, inspector of malthouses and breweries for the whole Dominion. It may be mentioned, too, that it recently passed an order-in-council giving the Minister of Inland Revenue power to issue licenses for the manufacture of beer and other malt liquors in the Yukon.

We understand that Mr. David Russell, head of the Abbey Salt Company, has purchased the hotel at Caledonia Springs, in East Ontario, close to L'Orignal, with 270 acres of land adjoining. He purposes to establish a spa or health resort with all modern appliances for giving invalids and others the use of the healing waters of that locality. This was already a favorite place for many to visit, but is susceptible of improvement, to come up to modern standards.

It has been officially announced that the United States Steel Corporation will begin work shortly on the large new plant to be erected at Port Colborne, Ont. Concessions from the Dominion Government have been secured for the dredging of an immense basin or harbor at the junction of the Welland Canal and Lake Erie, large enough to harbor sea-going vessels of the company's fleet. An option has been secured from one of the Niagara Falls power companies for 6,000 horse-power of electric power. The product, according to present arrangements, is to be sold in Canada and exported, but not shipped into the United States, where there are already ample facilities for all the supplies needed.

A strike began among the corporation laborers at St. John on Friday last. The men at work on street and water and sewerage department work wanted increased wages. The men get from $1 to $1.50 a day, but the majority are paid $1 and $1.20. They want 25 per cent. increase. About 200 will be affected. This is the first strike in years, but the laborers are said to have the sympathy of the various labor trades unions recently organized in St. John. On Saturday, 4th July, there was another St. John strike. The laborers working on the Street Railway Company's extension work on Douglas Ave. struck for $1.50 a day. The company decided that they would pay $1.50, but only to picked men.

DIVIDEND NOTICE.

Notice is hereby given that a dividend of two per cent. on the preference shares of the company for the quarter ending June 30th, inst., has been declared and will be paid on Wednesday, July 15th next, to shareholders of record of June 30th.

The transfer books will be closed from the first to the fifth July, both days inclusive.

By order of the Directors,

HENRY RITCHIE, Cashier.

New Glasgow, N.S., June 25th, 1903.

Mercantile Summary.

An offer of compromise has been made, at the rate of 50 cents on the dollar, by E. T. Roy, general merchant, at Windsor Mills, Que., whose failure was noted in a late issue.

Frequent recent judgments have been recorded against Solomon Fine, grocer and confectioner, at Glace Bay, N.S., leading to his assignment. He is now reported as trying to arrange a compromise at 30 cents on the dollar.

Mr. F. G. Weeks and a syndicate of Syracuse capitalists are said to be negotiating for the purchase of a tract of land of about 700 acres, adjoining the Thousand Island Park, for the purpose of having it plotted into lots and used for residential property.

An assignment has been made by Joseph A. Lesperance, of Montreal, doing business under the style of the Imperial Folding Bed Co. He is a practical cabinet maker, but had been acting as an insurance agent for some time before starting this business only a year or so ago.

A carriage maker, at St. George de la Beauce, Que., named Alphonse Nadeau, has assigned. He shows assets of about $1,600; all his liabilities are not yet ascertained, but his wife has a dower claim of $1,500, and there is a mortgage of about $500, so that general creditors are not likely to get much.

J. P. McFarlane, general merchant, Margaree, N.S., is in the hands of the sheriff. He has been long in business, but has been always disposed to overbuy. In 1897, his affairs got into embarrassed shape, and he then compromised at 75 cents. Since last fall he has been frequently sued.

The assignment is noted of E. T. Fournier & Co., dry goods retailers in Ottawa. Mr. Fournier has long been in business in Ottawa, but with a somewhat checkered record, having failed while doing business in his own name, and later under cover. Subsequently he was also unsuccessful in business as the Victoria Manufacturing Co., under which style he engaged in the making of wrappers, etc. Latterly, he has been doing business under the name of Mrs. E. Webster.

The grocery stock of G. H. Crozier, at Sydney, N.S., is advertised for sale under execution. Crozier was brought up a farmer, and started in business as a merchant only last fall, buying out a grocery stock of about $2,000, mainly on credit. He has had a little acquaintance with business now, and is said not to like it. If some intermediate sphere of occupation could be devised, which should be not so hard working as farming, and yet more surely remunerative than storekeeping, it would suit people like Mr. Crozier very well. He does not want to loaf, exactly, but he does not wish to exude perspiration, mental or physical, every day. He simply asks for an easy living.

Mercantile Summary.

THE steamer "Crown of Granada," Capt. J. Grouchy, left Montreal on Tuesday with a cargo of deals for Chatham.

MR. J. BRUCE PAYNE, of Granby, has converted his cigar business into a joint stock company, with a capital of $100,000. The incorporators are Messrs. J. Bruce Payne, James S. Neill, John J. Payne, Frederick W. Taylor, James Topp and V. J. Racette.

SEVERAL large cattle stables, at the Winnipeg Industrial Exhibition, on Sunday last were destroyed by fire, which was only barely prevented from spreading to other buildings. The loss, which is covered by insurance, was $10,000, but is the more to be regretted because the Fair is now only a few days distant.

ACCORDING to a compilation which appears at intervals in the daily press, the imports of French Champagne into the United States, which were 177,696 cases in the year 1901, reached 213,149 cases last year. Four-fifths of this quantity was shipped by three firms, the remaining 50,000 cases being the product of eighteen other firms.

PERHAPS it was the influence of the successful gathering of "Old Boys" at Toronto last week, but the residents of Montreal who are Hamilton Old Boys, purpose having a rendezvous in Hamilton on August 17th to 20th, which is from Monday to Thursday. Sports are promised visitors and cheap rates by rail and at hotels are expected.

ONE of the prettiest places in the beautiful Mahone Bay, west of Halifax, N.S., is Chester. All about that place the scenery is charming, and the residents of the New England States know it so well that they go there in parties, social parties, family parties, picnicking parties, fishing parties. Why cannot some of our Ontario and Quebec people go down there and try the salt air and the lovely surroundings. The Morning Chronicle correspondent announces with an amused dismay, that the streets of Chester village are being surveyed.

IN October last year the plant of the Goderich Organ Co., at Goderich, was destroyed by fire. From the ashes a larger, better, and more modern factory has been built. On Saturday, June 27th, this new structure was opened. On invitation of Mr. Saunders, the manager, the Mayor of Goderich turned on steam; he was accompanied by a number of aldermen and prominent citizens. The company's factory extends 98 feet on East St., 345 feet on Cambria Road, and 98 feet on Newgate St. The machinery and general plan are such that the raw material is in steady progression from the time it leaves the kiln until it reaches the shipping-room. A great many labor-saving devices have been introduced. Altogether the factory may be called a model one. Each department is separated by fireproof walls, which in turn are provided with automatic, self-closing doors.

Mercantile Summary.

THIS week is inaugurated the through passenger service of the Canadian Northern Railroad, between Port Arthur and Winnipeg.

MESSRS. J. A. & M. COTE, shoe manufacturers of St. Hyacinthe, Que., whose factory was burned down last May, are rebuilding.

EXPERIENCE having taught the German Postoffice that a great proportion of the pictorial postcards bear neither address nor stamps, the Postmaster-General has ordered a notice to be put on the pillar boxes: "Don't forget address and stamps."

THE Canadian Northern Railway are about to erect two more large grain elevators, each of 1,500,000 bushels capacity. A report says further that they are about to equip their lake fleet with wireless telegraphy.

THE Mexican Light & Power Co., in which mainly Montreal and Toronto capitalists are interested, has bought out the City of Mexico Electric Light Co. for about $2,200,000. Mr. Matthew Neilson, manager of the St. John, (N.B.) Railway, has been appointed resident manager.

THE hardware establishment of Rice Lewis & Son, Limited, Toronto, was on Wednesday night last the scene of an exciting chase after a burglar. The caretaker of an adjoining building heard a noise on the roof and notified the Electric Protection Co. and the police. A man was routed out and chased from cellar to roof and thence down again. He was finally captured, and gave his name as Henry J. Patterson, of Hamilton.

THE Montreal offices of R. G. Dun & Co. have lately been removed to the new Board of Trade Building, St. Sacrament St. In the fitting up of these new quarters, as well as in their elaborate furnishings, the utmost good taste has been displayed, and it may be safely claimed that these offices stand to-day as a model of their kind, not only in Canada, but on this continent. They are a striking example of the enterprise of this prosperous, world-wide concern.

THE G. A. Thorpe & Maddock Mfg. Co., Limited, was incorporated in March of this year to do business in Toronto, with an authorized capital of $100,000, of which $22,300 was subscribed and paid up. They took over the wholesale clothing business of G. A. Thorpe & Maddock Co., who succeeded to the business of the G. A. Thorpe Mfg. Co. in April, 1902. It appears that Mr. Maddock recently received money from the firm to purchase a general store business at Uxbridge. Evidently want of capital has been the cause of trouble, as the clothing business was never in more prosperous condition, some manufacturers being compelled to refuse orders. The firm has assigned to E. R. C. Clarkson, the liabilities being estimated at about $30,000.

DEBENTURES Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for investment by Trustees and Insurance Companies, and for Deposit with the Government, always on hand. — Telephone Main 2011.

MAGEE & GREGORY,

YORKTON, ASSA.

Mercantile Summary.

WHEN in Borneo, writes the British consul at Cadiz, it was a frequent experience of mine to receive illustrated catalogs of articles, such as churns, to be shown and distributed in a country whose inhabitants dwell entirely in huts erected on poles over the water and subsist on rice and fish.

IN spite of the enormous output of agricultural implements by the big Canadian manufacturers, Canada is the best customer possessed by the United States for those articles. During the last year we imported from that country $3,123,660 worth. Russia bought $2,294,440, and France and the Argentine Re- a little less.

FOR more than nine years, i. e. since March, 1894, Wm. Mose has carried on a harness business at Gorrie. For some time past he has been hard up and slow pay. Last month he put a chattel mortgage on his assets and now he makes an assignment. Another harness firm in trouble is Doherty & Williamson, of Picton. Doherty has been engaged in the business since 1886. About two years ago he admitted William Williamson into partnership, the latter contributing some $500 capital. This does not appear to have improved the firm's condition, at any rate it did not suffice, for an assignment has been made.

THE lake boats engaged in the St. Lawrence trade, says an exchange, are all employed and more could be chartered to advantage. Freights are firm. The rates from Fort William to Bay ports being 1⅝c. on wheat and 1½c. on oats, and by rail from Bay ports to Montreal 4¼ to 4½c. From Fort William to Kingston wheat has been chartered at 4c., and from Kingston to Montreal 1⅝c., making the through rate by all water 5⅝c, and by lake and rail 5⅞c. The rates from Chicago to Kingston are 3⅜c. for wheat and 3¼c. for corn, making the through rates to Montreal 5c. on wheat and 4⅞c. on corn; but it is thought that the latter figure would not be refused by shipowners for wheat. About 200,000 bushels of corn were chartered last week in Chicago on the basis of 3⅞ through to Montreal.

AT a meeting of the Lumber Carriers' Association, held at Detroit recently, the Great Lakes Towing Company submitted a proposition that will, if carried into effect, place lumber tonnage on a more equitable footing than has heretofore existed. Instead of 20 per cent. discount from tariff rates at the end of the season allowed to other tonnage the lumber carriers under the new arrangement will get 30 per cent. except at the ports of Chicago and Tonawanda, where a 35 per cent. discount from the tariff rates will be granted to members of the association. The cash discount will be 40 per cent. instead of five per cent., as given other tonnage. A flat price of $5 is also made for taking lumber tow barges into the locks at Sault Ste. Marie, thus doing away with the necessity of the steamer handling a long tow in the locks.

TORONTO STOCK TRANSACTIONS.

Owing to having been a short week on 'Change, and perhaps to the fact also that many people are away on their holidays, the volume of trading has not been large. Values have kept up well, however, surprisingly so considering the bearish influences at work in New York and Boston. The following summarizes the chief transactions: Ontario Bank, 5 at 128; Toronto, 6 at 232½-233½; Commerce, 45 at 159½; Imperial, 78 at 231¼-231½; Dominion, 198 at 235⅞-237¼; Hamilton, 128 at 226½-227½; Ottawa, 50 at 211-216; C. P. R. 1,425 at 123⅞-125; Toronto Electric Light, 59 at 125-133½; Can. Gen. Electric, 1,457 at 161-162⅜; Com. Cable, 61 at 163-164½; Bell Telephone, 6 at 155; Rich. & Ont. Nav., 250 at 90¼-93¾; Toronto Railway, 950 at 100-103½; Twin City, 2,028 at 98-99⅝; Sao Paulo, 378 at 90¼-93; Dominion Steel, 1,413 at 19½-21; bonds, $31,600 at 74-76⅝; Dominion Coal, 6,979 at 102¾-106¾, and Nova Scotia Steel, 915 at 98½-108.

I'd like to have a nice, soft job,
Where I could simply be
A sort of weekly visitor,
To draw my salaree;
And then, as that got burdensome,
And seemed inclined to bore me,
I'd like to have some fellow paid
To go and draw it for me.

—Baltimore News.

THE iron sailing ship "Sardhana" sailing from Baltimore, Md., last Friday, for Montreal, where she will load a cargo of lumber for Adelaide, South Australia.

SOME OF MAX O'RELL'S SAYINGS.

Marriage is like stage scenery; it looks well from a distance.

Woman is an angel who seldom appreciates a man who has not a bit of the devil in him.

The most religious woman will postpone an interview with her Maker for an appointment with her dressmaker.

In our family life in France we preach a delightful philosophy. We preach the gospel, the duty of cheerfulness.

Economy is a virtue, but carried to extremes it becomes stinginess, which is a fault, and even avarice, which is a vice.

FINANCES IN THE STATES.

Henry Clews & Co., New York, in their weekly circular dated July 3, 1903, said: Heavy June disbursements, improved monetary conditions abroad and a temporary oversold condition of the local stock market induced a fair recovery in values and a consequently better feeling on the Stock Exchange. The chief obstacle to further activity was the approach of the holidays and an indisposition to carry stocks over a two days' interval. We are now approaching the usual period of summer quiet, when abundant opportunity is offered for studying the probabilities upon which Wall Street always waits before taking the initiative. The first six months of 1903 have been a period of severe and thorough liquidation. What about the next six months? The reaction following the underwriting and speculative craze of 1901-2 came sooner than anticipated, as reactions of that nature invariably do; and the questions now pressing for solution are: Has the reaction culminated; is liquidation over; is the readjustment between supply and demand, or between quantity and value, complete? To be perfectly frank, we do not think the adjustment is complete. A number of good securities have come down to intrinsic values, where investors can take hold with confidence, but there are still many of the newer creations selling at inflated figures—held up by sheer force—which have yet to face the test of trade reaction or diminished profits. It is just here that careful judgment must be exercised in estimating the future of the stock market. While the period of special stress in financial circles is over; while the situation is better than it was six months ago; while all prolonged downward movements are accompanied by rallies such as the present, still these facts furnish very little guidance as to what may be expected between now and the close of 1903. As we have stated in previous advices, the dominating factors will be the crops and money. Political campaigns may have to be taken into consideration, but these at present do not threaten any very serious problems. The labor agitation has proved a serious burden upon industrial enterprise, the full effect of which remains to be seen; but indications are that such demands have at last reached a point where self-preservation prevents further concessions, and the next six months may demonstrate whether or not business will stand the new exactions.

Ever Use An Instantaneous Hot Water Heater?

A Gas Heater is the only kind that should be used in any kitchen during the hot months. We sell the "ACME," the heater which combines all the desired qualities to make it the best. It heats quickly, consumes but little gas and is out of service and expense unless you want to use it. It does not heat the kitchen either.

We have a little booklet which shows several styles of these heaters, and shall be glad to send it to you upon request.

LORD ROSEBERY ON THE TRADE QUESTION.

In his speech before the Liberal League last month, Lord Rosebery combated at length the suggestions of Mr. Balfour and Mr. Chamberlain, and declares fiscal freedom a necessity. Thus:

What is the present arrangement? The Empire is built up on free trade. (Hear, hear.) And by free trade I do not mean, of course, that there are not multifarious tariffs throughout the Empire. That would show a very elementary ignorance of the situation—a situation which I have studied for many years. It does not mean that there are not tariffs throughout the Empire, but it does mean this—that your Empire is founded on the condition, and it could not have existed until now except on that condition, that

Granby, - - - Quebec.

every self-governing part of it shall have the right to work out its own prosperity by its own methods. I do not know why it should enter the head of any statesman to deny that liberty to the United Kingdom, which, after all, is not an insignificant part of the Empire. The system under which we have lived, that system of free option for every part of the Empire, has enabled us in these islands to bear the great but the grateful burden of Empire, and in that respect, at any rate, it is surely not to be passed on one side. It has made the heart of the Empire, which is this island, the mart of the world, and it has brought about that united state of feeling which led to the remarkable outburst of loyalty during the late war—(cheers)—of which we are never weary of boasting, and rightly boasting, but which, I think, in the course of a few weeks we shall be asked to believe was the result of some protective tariff. (Laughter.) Well, then I say that the burden of proof lies with those who would disturb the existing arrangements of the Empire, which in different directions have had their fair development and under which it has grown to the present world-wide position which it occupies.

POLITICAL AND COMMERCIAL FREEDOM.

I quote you the words of the Premier of Canada, a person who has some right to be heard on the subject of political and commercial freedom:

What did Sir Wilfrid Laurier say, I think five years ago? I think he has been continuously in office ever since, and I have not heard that he has ever revoked those words. "There are parties," he said, "who hope to maintain the British Empire on lines of restricted trade. If the British Empire is to be maintained, it can only be upon the most absolute freedom, politically and commercially. (Hear hear.) In building up this great enterprise, to deviate from the principles of freedom will be so much to weaken the ties and bonds which now hold it together." I recommend that passage to the attention of the Colonial Office. (Hear, hear.) I agree, I confess, with Sir Wilfrid Laurier; nor is it from any want of thought that I have come to that conclusion, because it is not one of the recent discoveries of the Colonial Office that the Empire might be united by a bond of trade. I was a member of the old Imperial Federation League—perhaps some of you, some of the hoary-headed ones among you, have been members, too—and we worked out this subject as well as we were able, and we were always met with the absolute and insuperable difficulties which I believe will confront anybody who attempts to deal with it. My view of the policy which is really adapted to raise the strength and prosperity of this Empire is that of Sir Wilfrid Laurier. Another opinion which I will quote is from a different authority not often cited at a meeting of the Liberal League—I mean The Times newspaper.

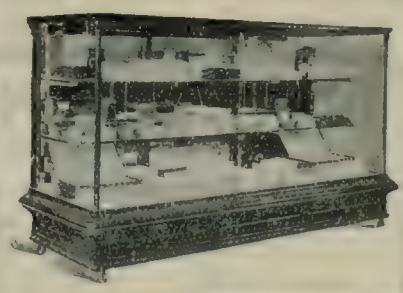
The Times' correspondent at Paris met an illustrious and anonymous gentleman—I am sure he is illustrious because he talks sound sense—and sent the following message, among others, for our consumption: "In order to strengthen the ties between the little European Island and Canada, Australia, India, and the whole Empire, what you ought to do is to make that little Island as strong and as rich as you possibly can. That is all that is needed. But do not make it poorer, less capable of an effort, less capable of defending its own, as you may thereby risk the loss of precisely what you intended to gain by the bribe of preferential tariffs. You will have been throwing away the pounds of colonial attachment, founded on respect, for the pence of colonial gratitude for the increased earnings of their exporters." (Cheers.)

The Traveller
GOING ABROAD
to thoroughly enjoy the trip should go prepared with all the small necessities we can provide.

Catalogue M of Travelling and Leather Goods is mailed to out of town buyers. Express charges paid in Ontario and liberal allowances to other points.

The Julian Sale
LEATHER GOODS CO.,
LIMITED
105 King St. West., - TORONTO

Our Patent "Coronation" Base



This case with its bevelled edge ALL GLASS top is without a rival in ANY market, it being a MARVELLOUS piece of show case manufacture. IT IS the MOST BEAUTIFUL, ARTISTIC, ATTRACTIVE and DURABLE floor case made, and IS a WONDERFUL MONEY MAKER. A FIRST-CLASS photograph CANNOT do this case justice, much less a cut of ANY kind. To see one means to go wild with delight over it.

We also manufacture HIGH-GRADE Bank, Office, Store, and Interior Fittings GENERALLY. Show cases of EVERY description. Write for beautifully illustrated catalogue and particulars.

RECENT DEVELOPMENTS IN TRADE UNIONISM.

Economic phenomena are at all times complex, and for that reason it is very difficult to isolate any salient phenomenon and ascertain its relation to the whole. This is particularly true in the phenomenal development of organized labor known as Trades Unions, the history of which dates back to the beginning of the industrial age, about a century ago. It may truly be said however, that in America not until during the past few years of unprecedented prosperity has their influence been so marked and very often their potentiality to disturb the whole economic organism been so keenly realized.

Beginning with small bandings together of fellow laborers belonging to the same craft for the purpose of promoting their own individual and combined interests, which was the first stage in the development of these present day mammoth unions, the next step in its growth was the uniting of several of those bodies which were most closely related in kind, such as the different unions of skilled mechanics. In the course of time these larger bodies determined that the cause of labor was one no matter what trade a man followed, and finally as in England all the local unions became amalgamated and a central labor council was constituted which practically controlled the whole field of labor. This process of natural organization went on further and further until at the present day there is a Trades Congress of the world held annually, at which the central bodies of every country are represented and at which the labor conditions of the whole world are discussed.

There can be no doubt that the primary principle of self preservation called these organizations into existence, and they have a definite and beneficial work to perform in the great economic world. But as in all such cases there have been and are numerous inherent evils attending these phenomena, the latest and most serious of which, both for employers and employed, is illustrated by the Parks case, which is now pending before the Criminal Courts of New York City. The management of these huge organizations of course requires good executive ability and for the acquisition of this capacity the unions have always had to suffer, from the days when they were not recognized by the law of the land and when consequently unscrupulous officers could play riot with their accumulated funds, until the present day, when professional organizers and "grafters" utilize them for their own selfish and corrupt ends and thus frustrate their very "raison d'etre."

Samuel J. Parks was the walking delegate or "business manager" of the Housesmith's and Bridgeman's Union, and while supposedly guarding the interests of his union during a protracted strike at the Hecla Iron Works he finally succeeded in making a bargain with the iron company to call the strike off if he were paid $2,000. Of course this was a cheap way of terminating the strike and stopping the great loss to the owners of the works, and the walking delegate, though sacrificing his union, enhanced his own store of wealth. When these facts finally came to light Parks was arrested on a charge of extortion, and his trial, which is now pending, is attracting a great deal of attention.

This is probably one of the worst features of modern trade unionism, though inevitable, because where power is concentrated in a few hands it is certain to be abused. Nevertheless it strikes at the very root of the utility of labor organization, which, so long as it protects the laborers from the tyranny of greedy employers, is performing its function, but so soon as it comes to exist for the selfish personal ends of its parasites, is a nonentity. And it is also apparent that corrupt negotiations and bargains of this kind sacrifice the interest of the employers, as well as those of the employed, for what both parties to the struggle require is a fair and equal discussion of their respective rights, and the protection of the same when they are ascertained. The result of the trial of Parks will be awaited with a great deal of interest, because his conviction must necessarily mean an attempt to eradicate the evil manifested in the walking delegate and his oft-times unscrupulous hampering of legitimate trade union intervention.

PROGRESS IN BUILDING TRADES NEGOTIATION.

The meeting of Central Federated Union representatives with union delegates in New York on Monday last, praised almost without exception the scheme of arbitration agreed on between the Union delegates and the Employers' Association on Friday night last. The plan

was to go before the Unions on Monday or Tuesday and before the United Board of the Building Trades on Tuesday. By Thursday the sense of the Unions upon it was to be made known. The new arrangement, it is understood, while not doing away with the walking delegate—of which functionaries honest labor union men have grown somewhat tired—limits his powers and leaves him no room to exercise his desire to "bleed" corporations in the way that Parks is alleged to have corruptly bargained with the Hecla Iron Works Co.

A lock-out was declared by the Building Trades Employers' Association of New York on the 5th of May. More than two months have thus been lost in an active building season, and it is estimated that 100,000 men have been that long idle. On Friday night last, after a long conference between the commissioners representing 19 unions affiliated with the United Board of Building Trades, the fourteen points in the plan of arbitration offered by the Employers' Association were accepted by the delegates of the unions. One of these is that all main points at issue are to be arbitrated. The president of the United Board, Mr. Eidlitz, said at last accounts that the indications are that the men would be back to work in a few days.

The plan thus far agreed to provides for an arbitration board, but its members sent by the unions must be actual workmen and not walking delegates. It is a very reasonable clause, and one hardly to be expected, that, namely, which permits employers, where union men cannot be obtained, to employ non-union men.

PROSPECTS FOR WOOL.

Cablegrams this week from London say that while no change has taken place in the price of merino wools, the coarser and medium crossbreds showed an advance at the new series of sales, which began on Tuesday, of 7½ to 10 per cent. compared with the close of those sales last held. This state of things will, no doubt, strengthen the position and stiffen the backs of holders of these classes of wool who have for some time past held out for higher prices. Buyers, however, have been afraid that such conditions were but temporary and that the firm values would not last. This seems to have been the case in all parts of the world. In England, Bradford manufacturers have allowed their stocks to become extremely low, yet the wool owners hold out. In the United States, manufacturers of woolen goods are fearful that the prices of their finished products cannot hope to advance in proportion to those of the raw material and so they refrain from buying wool. The lack of orders in their business compared with the booming in most other trades, gives color to the view that prices are already too high for the consumers' taste or pocket, and this is confirming buyers in their view of the superiority of the plan of allowing the "dealer to carry the wool" himself, at any rate for some time to come.

However, even in the United States, there are many people who take an optimistic view of the situation. They point to the fact that merinos are now only 2 per cent. higher than they were this time last year and that in Europe the advance has been more than 12 per cent. But even the above upward movement has been too much apparently for the Americans, for they have lately been turning their attention more and more to the cheaper medium or crossbred wools which may now be said to be the most popular in evidence. Against this, it should not be forgotten that they are at the present time already very much higher in price than they were only a few months ago, also that they are daily becoming more abundant in the various markets.

The above summaries of the state of affairs in Britain and the United States may be said to apply to Canadian conditions as well. Here, as elsewhere, the new clip is coming forward in comparatively small quantities, chiefly because, while holders feel very firm in their views, buyers are not, as yet at any rate, prepared to give the prices asked. In the meantime a good deal is hoped for as a result of the probable passing by the Dominion Parliament of a bill prepared by Mr. Walter Scott, M.P. for Western Assiniboia, whose object is to prevent the sale of impure or shoddy goods as all woolen, which already has done so much harm in the trade, and has been extremely detrimental to the sheep interests of the Northwest.

THE GREAT SIBERIAN RAILWAY.

From St. Petersburg, on the Baltic Sea, in European Russia, to Vladivostock, on the Pacific ocean, is a distance of 9,781 Russian versts, equal to about 6,521 English miles, for a verst is two-thirds of a mile. This distance has been spanned by a railway, the larger portion of it built by order of the late Czar Alexander of Russia. The railway, after passing through European Russia and crossing the River Volga at Samara, and the Ural Mountains at Orenburg, becomes the great Siberian line and runs from Cheliabinsk through Omsk, Tomsk and the great Lake Baikal to Stretensk, on the borders almost of Manchuria. It is this latter portion, possessing these most characteristically Russian geographical names, which constitutes the main line of the Great Siberian Railway. At Stretensk it forks, one branch going south into Port Arthur and Pekin, the other eastward to Vladivostock. The name Vladivostock means, we are told, "Dominion of the East." It may be instructive, because of Canadian interests on the Pacific Ocean and beyond, for our readers to be informed as to the enormous tract of country which we recognize remotely as Siberia, but which is greatly more valuable than the average person would believe.

Siberia possesses a varied climate, and is so enormous in extent that even the traveller accustomed to the great stretches of North America finds it difficult of comprehension. Still the cultivated zone of Eastern Siberia covers but 10,000 square miles. In this are included the Yenisei and Irkutsk governments, exclusive of that of the Kirensk district. The southern valley of the Yenisei river is a favored spot, and in ancient times was well peopled, as the remains of buildings and stones covered with inscriptions bear witness. To the north of this section is the forest zone, covering 65,000 square miles, and there forestry and agriculture are practised in a modern manner.

Western Siberia has an agricultural zone of 8,600 square miles. Bretun states that the real treasure of this northern land is in the rich black earth, and that the whole future prosperity depends upon this rich black earth. The vastness of the region is not easily described, but it may serve to indicate its dimensions if we say that among the railway bridges across the great rivers which drain the territory northward into the Arctic Ocean, is one 2,400 feet long across the Ob: one, 3,000 feet long across the Yenisei, and one 2,100 feet long across the Irtish.

The Siberian main line of railway from Cheliabinsk to Stretensk has a total strength of 4,865 versts, say 3,243 miles, and is divided into the following sections: The West-Siberian, 1,329 versts; the Mid-Siberian, 1,715.5

versts; the Irkutsk-Baikal, 64 versts; the Transbaikal, 1,035.5 versts, and the Ussuri, 721 versts. The total length of the railways connected with the Siberian line and under the control of the governing committee is about 6,445 versts, including, besides the main line, the branch lines to the landing-places of the Siberian rivers, traversed by the main trunk, with a length of 19 versts, the branch line to Tomsk, 89 versts, and the Ekaterinburg-Cheliabinsk line, 226 versts.

The branch line of the Manchurian railway, from Kaidalovo to the Chinese frontier, comprises 3,241 versts; that from Nikolsk to the Chinese frontier, 110 versts; and that from Perm to Kolas, 812 versts. The total cost of these railway works under the control of the committee is 355,377,911 roubles, or approximately $180,000,000.

These particulars are mainly derived from a book published during the present year: "The Great Siberian Railway," by M. M. Shoemaker. The author, who is himself a son of the man who laid out one of the great Pacific railways of the United States, is a traveller of some experience. He travelled in 1902 by this great road from St. Petersburg to Port Arthur on the Yellow Sea and it took him twenty days, at a cost of only $110, but he did not succeed in getting upon the "great train," which is described as the most luxurious in the world. The whole road is stated to have cost 700,000,000 roubles, which is in the neighborhood of $360,000,000. To travel by the great train first-class would cost six hundred roubles,—over $300—and take, from Moscow to Vladivostock, twelve to fifteen days. The whole railway is expected to have a revenue of 8,000,000 roubles, or say $4,200,000. Its earnings are steadily increasing. The Siberian section from Cheliabinsk (which is 2,660 versts from St. Petersburg) to Vladivostock is 7,112 versts or over 4,700 miles.

On the way this wonderful railroad skirts the Kirgiz steppe borderland, containing a population of about a million and a half, which possesses an industry the annual product of which scarcely amounts to the value of two million roubles. All the raw materials are exported from this region, where tallow boileries, tanneries, sheepskin, wool-washing and gut-works occupy an important place on account of their yearly output. This vast borderland is bounded on the east and partly on the south by Western China, and serves as a natural transit road between China and the Russian Empire, carrying on trade along the extensive land frontier.

Mr. Shoemaker has much to say in criticism of the management of the road. Its rails (54 to 60 pounds) are too light:—this, we are told, has since been remedied—its management lax; its rules for passengers arbitrary to the verge of ferocity; but its business is growing. The following figures illustrate the increase of passenger and goods traffic:—

In 1896, the West Siberian Railway conveyed 160,000 passengers, 169,000 emigrants, and 10,500,000 puds of various goods; in 1897 it carried 236,000 passengers, 78,000 emigrants, and 21,190,000 puds of goods; in 1898 the quantity had increased to 379,000 passengers, 195,000 emigrants, and 30,000,000 puds of goods. The Mid-Siberian Railroad conveyed: In 1897, 177,000 passengers and 5,393,000 puds of goods; in 1898 no fewer than 476,000 passengers and 11,000,000 puds of goods. A pud is equal to thirty-six English pounds. On the West Siberian Railway, which was first opened, the passenger traffic increased by fifty per cent. and the goods traffic by still more.

There are great mineral and other riches in that vast expanse of country. We quote from pages 62 and 65.

"At the present time the gold-mining industry of Siberia, yielding gold to the value of twenty million roubles, comprises a vast area. Gold is obtained in the Ob, Yenisei, Lena, and Amur basins, and throughout all the governments of this enormously rich country. . . . According to the data obtained it appears that, with few exceptions, gold is at present obtained in Siberia by washing machines of very primitive construction, the gold-bearing regions are but imperfectly exploited, and the mines insufficiently worked, while two-thirds of them are entirely undeveloped for want of capital and workmen. Some technical improvements in the working of gold mines are being adopted now at a few places; thus, for example, in the Lensk district gold is washed in winter with warm water; in the Amur territory dredging machines are employed, and the work time is extended by washing the ore in the night by electric light."

The Mid-Siberian Railway extends from the Ob River to Irkutsk, a length of 1,715 versts (over 1,200 miles), and it was built and equipped at a cost of 108,036,641 roubles. To Krasnoyarsk the cost was about $25,000 per mile, and thence to Irkutsk over $36,000 per mile. It would be an interesting story to describe the negotiations and the difficulties, financial and otherwise, of getting this railroad through Manchuria to a terminus at a virtually Chinese port.

Our author tells us that trade in Manchuria is mainly concentrated in its southern ports and in the towns of the Shen-tsian-shen province. The larger part of European and American goods, the aggregate of which is enormous, are imported through the ports of Intsy, Port Arthur, Bitsy-vo, and Da-gu-shan. Any one who will look at a recent map may know where these are. A lively trade is also carried on through the frontier with the Amur province. Among European and American goods, the first place belongs to cotton stuffs, metals, woolen produce, and opium. Along the frontier line bordering the Amur territories trade assumes a local character and consists in the barter of mainly animal products.

Travellers through that vast country are none too numerous. And this should make us the more attentive to the reports of those who have been across Asia. The Americans are paying increased attention to the wants of the Chinese and Russian millions, and Canada should have a share in the trade, which is bound to increase in proportion as enterprise will provide the materials. In another article we purpose giving some particulars of the extent and growth of Russian trade.

THE FIRE WASTE.

Another month brings its record of fires and fire loss to be added to the dismal array of destruction by fires in the United States and Canada. We find from the records of the New York Journal of Commerce that the fire loss for June shows a total of $14,684,350, or $4,000,000 more than the sum chargeable against the same month in the preceding year. The following table shows the losses for the first six months of the years 1901, 1902 and 1903:

	1901.	1902.	1903.
January	$16,574,950	$15,032,800	$13,166,350
February	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,300
May	22,380,150	14 866,000	16,366,800
June	9,590,000	10,245,350	14,684,350
Total	$88,926,150	$87,095,850	$83,765,250

There were in these two countries 192 fires during the month of June at which the loss was $10,000 each, or more. This is at the rate of sixteen per month. But thirty or forty of these fires caused losses of $100,000 each or over. One was in Ottawa, costing $400,000; one in Buffalo, $375,000; one in Rochester, $342,000; two in Milwaukee, aggregating $750,000; and one at Ravenna, a

pretty Ohio town, $262,000. All these are sufficiently close to Toronto to cause our property owners and our underwriters to look grave and to wonder when our turn may come.

It is noted by our contemporary that the losses for the first half of 1903 were over three million dollars less than for the same period of 1902, and more than five million dollars lighter than the amount chargeable against the first half of 1901. "As to fire loss the fire underwriters have fared reasonably well this year, but the fall in security values will unfavorably affect many of their statements. Still rates are now, in general, on a paying basis, and the insurance interest has less reason to complain than heretofore."

CROP PROSPECTS.

The weather since our last has been excellent growing weather as a rule in Ontario as well as in the prairie country, with the exception of excessive wet in parts of South West Ontario. The June rains did an immense amount of good, and while it was impossible to overcome to the full the long drought of May, the hay and some grain crops are better than could have been expected a month ago. Our Winnipeg man wired at noon yesterday: "Weather for the past week has been almost perfect for the growing crop. The condition of the wheat, without any exception, has never been better; the straw in most places is not high, being between eighteen inches and two feet; there is no premature heading out, and no damage to speak of from want of rain. A report comes from Clearwater in Southwestern Manitoba, that wheat thereabout will be ready to cut in three weeks.

From St. John's, Sherbrooke, Waterloo and other points in the Eastern Townships of the province of Quebec, come accounts of the condition of the crops which are reassuring. The hay crop will undoubtedly be light, as a result of the prolonged drought in May and early June, but roots are generally good and grain is very promising. The Waterloo Advertiser notes that rains have been frequent and adequate thereabout of late: "Haying will probably be later than usual. Grain of all kinds is making rapid growth and promises a big harvest. Potatoes never looked better at this season, and the same may be said of all roots. Corn is backward. The pastures have been greatly freshened."

BY VIOLENCE AND STEALTH.

The recent attempt of the Toronto Street Railway Company to take violent possession of part of Avenue Road in this city, is a disgrace to the company. It was an attempt to do by stealth what the company had good reason to know it would not be permitted to do openly. And it looked as if it were trying to place itself, by midnight lawlessness, in a position to say: "We are in possession," believing such possession nine points of the law. Who is responsible for such discreditable procedure as the attempt on Friday night last, by violence, to connect the company's city system of rails with those of a suburban company? Not the company's engineer, surely, for he has some respect for law and fair play. Whoever gave the order, the company's is the responsibilty for an attempt at "American" methods of settling disputes. This one was frustrated by the prompt action of a city official. Is it possible that their experience of the administration of the city's business has produced such contempt in the minds of the managers of this tramway, as to cause them to think the only way to "get even," is by means of clandestine procedure and the use of main force? Surely we are not as bad as that! In any case, it is well for the city to know that the Toronto Railway Company will stick at nothing to accomplish its ends, and to be on the look-out for any manifestation of its peculiar tactics.

LIFE ASSURANCE.

It is a curious thing that life assurance agents or canvassers have often much trouble in getting young men, or even middle-aged men, to perceive the value of a life policy or policies, whether as a means of thrift, through being stimulated to work and save to keep up payments, or whether as an investment, a safe place to put savings in order to get the benefit of them when older. Some assurance solicitors are able occasionally to get a young and perhaps ambitious fellow to see that he would do well to husband his small but growing salary. But almost any agent can do better than this—he can get and pour into the mind of his intending applicant for insurance the testimony of people who are already assured.

A contemporary cites a communication received from a pleased policy-holder on the satisfactory maturing of a twenty year endowment policy, thus: "My little investment has brought to me nearly four per cent. on my investment, besides life insurance for nothing for twenty years. I wish now I had made it double the amount, for one cannot get back the time he lives nor the money he wastes." And as an older instance of almost exactly the same sort from an older insurant, the Toledo "Bee" tells a story of what an elderly and rich man of that city confided to the writer. Said he: "I worked like a slave until I was forty-five years old to make a fortune, and have had to watch it like a policeman ever since to save it. My life assurance policies have really given me the least trouble of all my possessions. They have never fluctuated, but have steadily increased in value, have called for no watching on my part, and are worth more year by year. I took out the first ones in a half doubting way as to their ever being much good, except possibly to my family in case of early death. But I was young then. I have taken a good deal since as a protection to them and an investment for myself in order that I might have at least one line of securities that wouldn't keep me awake at night, nor my eye on the market reports by day. I suppose you would call me a pretty heavily assured man were I to tell you what I carry. But had I my life to live over I would cheerfully saddle myself with double the amount early in the game."

A happy characterization of the sums of money paid in the shape of premiums on life insurance policies is made by the Argus, which calls them "enforced savings." That is to say, enforced spontaneously and voluntarily by man upon himself. The value of such a habit of self-denial and regularity is very great, often keeping a man from needless and therefore wasteful spending. As the day approaches for renewal payment of premium, the feeling is: "I owe so many dollars and cents on my life policies," not: "Now I am going to deposit so much in a savings bank." Comparisons are sometimes made between the latter useful institutions and life policies, but where, asks the Argus, "is the man who would keep up year in and year out for, say, a couple of decades, the habit of placing a fixed sum of money in the savings bank with the same regularity he would use in paying his life insurance premiums? Even if he did, and the chances are a thousand

to one against it, it is still a fair subject for discussion as to whether or not he would be the gainer."

There is no economic or sociological force equal to life assurance in its results to the individual, family, society and the state. This principle is laid down and forcibly argued by L. G. Fouse, in the Underwriters' Review. It conduces, he contends, to frugal and thrifty habits essential in home building. "The periodical payment of life assurance premiums, which must be made or some sort of a penalty suffered, has frequently caused the indifferent or even improvident to form frugal and thrifty habits. Life assurance for protection is an unselfish act, intended to prevent dependents from becoming a public charge, which is a feature of good citizenship, and is essential in home building. The building of a home is more than mere bricks and mortar. It means the disposition and ability to provide. Death may cut off such provision, but life assurance steps in, in such event, to capitalize the home builder's expected labor of the future." So let the assurance agent labor to get the young, sanguine, pleasure-loving man to consider his way, and make provision during his years of able-bodied earning for the sere and yellow leaf time, which comes to most of us if we live.

ADVANTAGE OF PERSONAL INTERVIEWS IN GRANTING CREDIT.

BY GEO. H. SHEBLE, ST. LOUIS, MO.

The following is from "Business Topics," published in New York by the National Association of Credit Men:

The position of credit man in a large concern is not a sinecure, and at times is most unpleasant; in fact, I have had gentlemen in other positions not nearly so prominent tell me that they would not have the place with many times their present salary attached; and I assure you that I recently had two experiences when I wished I was almost anywhere else in the world but at the credit desk. I was informed that a young lady, daughter of one of our customers, was in the house purchasing goods. Now, this customer was considerably behind in his account with us, and, supposing that the young lady had been given instructions, I sent for her and upon questioning her found out that she kept her father's books and was well acquainted with his affairs, but was not inclined to tell me anything about them, till I so positively insisted that she became offended and would say nothing.

The other case was somewhat similar, the lady being the wife of a customer, and upon being questioned felt so much offended that she set up a good "cry," and then, being somewhat relieved, said that her husband, though his account was so far behind, was well able to pay, but that he gave the business very little attention, leaving it almost entirely to her. She, between her sobs, instructed me not to ship the goods she had just purchased—she did not need them, anyhow, and could get them somewhere else when she got ready for them.

The credit man's duties are multifarious, he having many things to do beside pass upon the fact that a prospective purchaser is good to sell upon credit or not. You know, it is often deemed necessary for you to go out of your office to meet a customer, accidentally, as it were, to "jolly" him—pat him on the back—make him feel at home—take him to a department and call some particularly good salesman to handle him, because you know he likes this special attention, or is "cranky" in some way—and in many other ways depart from your legitimate line of work. . . . . .

There are so many conditions to be considered in the granting of credit, more than I have time to take up here, that I will present but a few cases that have come under my personal observation or attention, some of which were correctly and some incorrectly diagnosed by me.

A few years ago, a party by the name of John Smith came into our house, and the salesman for his territory being called, he learned that Mr. Smith wanted to purchase a small bill of goods, between two and three hundred dollars, payable in sixty days, also informing the salesman that Mr. So and So, a salesman for another house, had sent him there. Mr. Smith, being a stranger, was requested to step in and interview the credit man, which he readily consented to do, and, upon being introduced, was requested to make a showing of his affairs, and to this made no objection, though at the same time saying that his purchase would be small, as he needed but few goods just then. Taking down my blank form, I asked the usual questions, and these are the figures he gave:

Stock in hand (insured for $2,000)	$2,500	
Notes and accts. all good	500	
Cash on hand	300	
Cattle, horse, etc.	500	
Total assets	$3,800	
And total indebtedness all for mdse.....	1,168	none due
Giving him a net worth of	$2,632	

Now, from these figures, this man, if honest, was unquestionably good for the quantity of goods he desired of us, but here is where the personal interview was the thing, for, upon quite a long talk with him, after obtaining these figures, I informed him we could not sell him the goods, except upon a spot cash basis.

The salesman was very much dissatisfied, and after considerable talk, and representing that his friend's house had shipped him a much larger bill of goods, he succeeded in getting the goods shipped by an order from a higher authority than myself. I told this gentleman that if he talked to the man he would not have shipped him, and to show that my judgment was correct the party failed in less than sixty days, and we succeeded in getting twenty-five per cent. of our claim, less attorney's fees.

A few seasons ago the head of our Arkansas Department informed me that Thomas Jones was in the house and told him that he had decided to transfer his dry goods purchases all to St. Louis, and would give our house his business if we would make prices right and we wanted to sell him. He was told that we did, and he started in to make his purchases. This customer was "full of ginger," the credit man said, stated his position readily and fully, as follows: Had stock, $13,000; other assets, $8,800, and owed $10,500, while he did an anuual business of $76,000 a year. He bought $4,000 from the St. Louis house, and was able to discount it before due date, and has been a valued customer ever since. The credit man would not have sold the man so large a bill if he had not seen and chatted with him. So this case also shows the value of personal interviews.

OUR ST. JOHN LETTER.

One hears very little in St. John of the rumored alliance of the Bank of New Brunswick and a number of the smaller banks throughout the provinces. It is generally understood that Mr. W. E. Stavert, manager of the Bank of New Brunswick, favors extension. In the two years since he took charge, the Bank of New Brunswick has absorbed one bank and opened half a dozen branches, occupying some of the territory that it might have taken exclusively years ago. A director of the Bank of New Brunswick told your correspondent that the matter of an alliance had not been seriously considered even by the directors, but he presumed that in due time the matter would all be presented to the stockholders for their consideration, and it would be for them to say whether or not they considered the scheme a good one. The Bank of New Brunswick is financially strong, pays half-yearly dividends of 6 per cent. each, and its stock sells close to $300. It makes as good a showing, if not a better, than any other Canadian bank, and it may be a rather difficult matter to convince the shareholders that under an alli-

ance they will be as well off. It is true, the tendency of the times is towards amalgamation, and the small banks now in existence in the Maritime Provinces may decide that it is more to their interest to unite than to be merged in some of the large institutions in which their identity would be completely lost. As far as the outsider can see, the projected alliance is yet some distance off, but circumstances may bring it about at any time.

There was great excitement throughout New Brunswick for a few days, due to the report that a 12-foot seam of coal had been discovered by Provincial Government employees, working with a drill in the vicinity of the Grand Lake coal fields. The story turns out, unfortunately, to be untrue. The only coal so far discovered is on the surface; while the geological survey men say that this is all there is, the New Brunswick Government intends to have the field thoroughly explored.

St. John is a dirty city these days—that is, dirtier than usual, for no street cleaning is being done. The men employed at this work have formed a union and have struck for a uniform wage of $1.50 per day. The city says it is willing to pay good men this wage, but that among the street laborers are many old men, practically unfit for work, who have been paid $1 per day, as it was considered more humane and more economical to give them work than to keep them in the Alms' House. The men say that all must get a uniform wage, and so the streets go dirty. To-day there is a rumor that the city firemen are going to demand more pay on threats of a strike if it is not forthcoming. The strike of the street laborers has tied up some important civic work, including extensive improvements to the water service.

Within the past few days, city bakers have advanced the price of bread—a two-pound loaf is the standard—to 7 cents. There is comment over this in view of the fact that within a very short period many of the bakers have tendered for bread for public institutions at from 4 to 5 cents per loaf.

The Murray & Gregory sawmill at St. John destroyed by fire on Saturday with three tenement houses and more than a million feet of lumber, will be replaced by a larger and much more modern mill. A portable mill is to be installed at once on the site, for the firm have a large supply of logs on hand, and with this they will manufacture lumber for the building of the new mill, and also for the general market. There is some doubt whether or not Mr. W. H. Murray, head of the firm, will again enter active business life. If he decides to retire, a joint stock company will be formed, and he will be one of the capitalists. In any event, it may be deemed advisable to become incorporated.

Mr. T. A. Wakeling, for twenty-six years in charge of the gentlemen's outfitting department of Messrs. Manchester, Robertson & Allison, has severed his connection with that house and gone West. It is understood he will start in business in Salt Lake City.

St. John is now enjoying the Saturday half-holiday. Practically all the businesses in the city, excepting the grocery stores and drug stores, now close at 1 o'clock on Saturdays, so that Friday evening has become the big shopping evening of the week. The idea has been growing in favor year by year, but last Saturday was the first that the retail dry goods and such stores joined in, and a July and August agreement has been signed, so that the scheme will have a fair trial. Even the newspapers are in line, and under the new arrangement several thousand clerks get off for recreation. So far as can be seen, there is no financial loss.

St. John, New Brunswick, 7th July. * * *

THE LATE MR. A. F. GAULT.

The death of Mr. Gault removes a prominent figure from the business circles of Montreal. Few men were better known, in dry goods and textile manufacturing especially; and to know him was to conceive an admiration for his business and social qualities. He had passed half a century of business life, almost the whole of it in Montreal. In that city he arrived about 1850, a boy, from Strabane in Ireland, and was trained in the dry goods warehouse of Walter Macfarlane. It would be about 1855 that he began, as a principal, in the firm of Gault, Stevenson & Co., wholesale dry goods. A few years later he and his brother, Robert L. Gault, formed the firm of Gault Brothers. Then by the addition of Mr. Samuel Finley, and later of some younger members, the firm became Gault Bros. & Co., and then, as at present, the Gault Brothers Company, Limited. At all stages of its career, it may be said, the firm's reputation for being "straight" and for being generous, was as wide as the Dominion. Indeed they were often too generous—sold retail people too freely and made bad debts in consequence. However, the firm prospered, having great faith in the future of the country, great enterprise, a large volume of trade, and the confidence of their bankers, and is one of the great dry goods houses of Canada.

Andrew Gault was framed on no narrow scale. His mind was broad, and he had a large grasp of business affairs. This is what made him a valued councillor on many boards of manufactories, etc. And he made friends of his customers and was a friend to any and everyone in his employ, who asked his confidence. He was one of the leaders in our textile industries, and believed in the ability of Canada to build and foster cotton and woolen mills and to carry them on to the striking variety of product which they display to-day. Steadfast, as well as sagacious, he held to his opinion, in good times and bad times, and was placed upon the board of some of our largest textile concerns. And his services were often sought in other directions, where talent and rectitude were valued. Of the Bank of Montreal he has been a director for many years; and we can think of but one among the weekly assemblage of able men who sit around that board who would be more missed by his colleagues than he; for Mr. Gault was an engaging man, with a warmth of heart and a benignity of disposition that never left him. Upon his charities and his recent large gifts to church and other schemes for good, it is not necessary to dwell. These, let us hope, wisely administered, will long flourish while he sleeps in dust. His seventy years have well become him; and he has left to those who mourn him the memory of a man who had friends because verily he showed himself friendly.

Mr. Gault was president of the Montreal Cotton Company, of the Globe Woolen Mills Company, of the Dominion Cotton Mills Company, of the Campbellford Woolen Mills Company and of the Canadian Colored Cotton Mills Company. He was a member of the Montreal Board of Trade, a director of the Liverpool, London & Globe Insurance Company, of the Royal Victoria Insurance Company and of the Bank of Montreal, and vice-president of the Manufacturers' Life Insurance Company, besides being interested in many other enterprises.

RAILROAD ACCOMMODATIONS.

We appreciate the strides which have been made in the providing of comforts for passengers travelling on the railroads of this country in recent years. We appreciate, too, the fact that railroad officials, as a rule, show a praiseworthy desire to rectify such errors of omission or of commission, as may be pointed out for their attention. Every now and then, however—perhaps more often than that vague combination of adverbs might imply—we hear people grumbling at the treatment they have received, not perhaps at the hands of the officials themselves, but in regard to the service rendered. And sometimes these "grumbles" are legitimate enough. For example, take the case of the Grand Trunk train from Stratford to Toronto, technically known, we understand, as "No. 6." On last Saturday the only accommodation which a certain friend of ours could obtain was on a car which might, perhaps, have been considered new say fifty years ago, but which looked as if it had been recently gathered from the scrap heap. Even on this dilapidated specimen of a public carrier, many passengers had to

travel standing up in the aisles, but it was a case in which, presumably, they found that to be crowded together without seats in a moving car was better than to be left behind altogether. Our friend, with others, remonstrated with the attendants of the train for the lack of proper accommodation, but were informed that it was the best the company could do, because so many cars had crossed the line for the celebration of the "Fourth of July." Surely this gives some color to the assertion of cynics, that, by some parties holding great privileges from Canada, anything is considered good enough for Canadians. If we had any indication of American railroads or the American public exerting themselves to add to our enjoyment on the Natal Day of our country, one might make allowances. But such a thing is out of the question. There is reason in the contention that our own people, who have paid much for our railroads, are entitled to consideration before "celebrating" Americans.

IMMIGRANTS LAST YEAR.

According to a report recently compiled by Mr. Smart, Deputy Minister of the Interior, the number of immigrants who arrived in this country during the fiscal year ending June 30th was approximately 124,658. Of these, 44,980 came from the United States, 41,787 from Great Britain and Ireland, and 37,891 from the European Continent. The total in the fiscal year ending 30th June, 1902, was 67,379, of whom 26,388 were from the United States, 17,259 from Great Britain and 23,732 from the Continent of Europe. In 1901 the number of incomers was 49,149, of whom 11,810 were from Britain, 17,987 from the United States, and 19,352 from Europe. A still greater increase is shown in the entries for homesteads. For the fiscal year ended on June 30th last, they were 31,343, in the previous fiscal year they were 14,633, while in 1896 they were only 1,857.

U. S. RAILROAD STATISTICS.

Some interesting information is to be found in the 15th Statistical Report of the Interstate Commerce Commission dealing with the fiscal year which ended with June 30th, 1902. It appears that on that date the number of railways in the hands of receivers was 27, a decrease of 18, compared with the same date the previous year. There were four roads placed in the receivers' hands during the year 1902, while those taken out of their hands was 22. Altogether, receivers operated 1,475 miles of road, the capital stock of which was $18,267,677, funded debt, $25,156,977 and current liabilities, $4,746,399. These figures represent a decrease in capital stock of $31,210,580, and in funded debt of $29,591,685. On June 30, 1902, the total single-track railway mileage in the United States was 202,471.85 miles, an increase during the year of 5,234.41 miles, being greater than that for any other year since 1890. As to the equipment of this enormous mileage of railroad track, on the aforesaid date, there were 41,228 locomotives in use, or 1,644 more than in 1901, while the total number of cars of all classes was 1,640,220, an increase of 89,387. This is in addition to cars owned by private concerns and used by the railroads. The amount of railway capital outstanding on June 30, 1902, was $12,134,182,964, representing on a mileage basis a capitalization of $62,301 per mile of line. Of the total capital stated, $6,024,201,295 existed in the form of stock, of which $4,722,056,120 was common stock and $1,302,145,175 preferred stock. The amount which existed in the form of funded debt was $6,109,981,669. This amount comprised the following items: Mortgage bonds, $5,213,421,911; miscellaneous obligations, $564,794,588; income bonds, $242,556,745, and equipment trust obligations, $89,208,425. The amount of current liabilities, which is not included in the foregoing figures, was $648,176,194, or $3,328 per mile of line. The amount of capital stock paying no dividends was $2,686,556,614, or 44.60 per cent. of the total amount outstanding. Omitting equipment trust obligations, the amount of funded debt which paid no interest was $294,175,243. Of the stock paying dividends, 8.36 per cent. of the total amount outstanding paid from 1 to 4 per cent., 13.48 per cent. paid from 4 to 5 per cent., 10.24 per cent. paid from 5 to 6 per cent., 12.78 per cent. paid from 6 to 7 per cent., and 5.54 per cent. paid from 7 to 8 per cent. The amount of dividends declared during the year was $185,391,655, which is equivalent to a dividend of 5.55 per cent. on the amount of stock on which some dividend was declared. The amount of dividends declared in 1901 was $156,735,784. The amount of mortgage bonds paying no interest was $181,485,951, or 3.48 per cent.; of miscellaneous obligations, $37,111,220 or 6.57 per cent, and of income bonds, $75,578,072 or 31.15 per cent. For the year ending June 30, 1902, the gross earnings from the operation of the railways in the United States, arising from the operation of 200,154.56 miles of line, were $1,726,380,267, being $137,854,230 more than for 1901. The operating expenses were $1,116,248,747, having increased in comparison with the year preceding $85,851,477. The income from operation, or the amount representing the difference between gross earnings and operating expenses, commonly termed net earnings, was $610,131,520, this item showing an increase as compared with the previous fiscal year of $52,002,703. The average net earnings per mile of road was $3,048, as compared with $2,854 in the previous year. The summary of accidents makes a bad showing. The total number of casualties having been 73,250, of whom 8,588 were killed. Of railway employees the number killed was 2,967 and injured 50,524. The increase in this item was due no doubt to the unusually large quantity of traffic, and to the fact that all kinds of equipment and many untried men were called into requisition.

THE SPECULATOR'S REPENTANCE.

According to the New York Journal of Commerce, one of the most conservative of New York's financial papers, the first part of the present year marked a period of six months' repentance in Wall Street. It was a time of heavy and almost constant liquidation. Indeed, except for the ill-timed burst of activity in early January, it may be said that the liquidation has been in progress since the middle of last September. These nine months have been a period of atonement for the reckless manipulation and inflation which preceded them. There can be no doubt that, however unpleasant this paying of the penalty has been, much has been done to improve the financial situation. The most evident accomplishment of the period in question has been a substantial reduction in inflated prices of securities. This in itself has undoubtedly put the market in a much sounder position. The process has the double advantage of enabling the banks to more readily meet any exigencies of the autumn crop moving season, and at the same time of rendering Europe more ready to advance funds if such assistance is needed. It would not be surprising if, for every dollar of gold sent to Europe in the past few weeks, New York should import two in the autumn. At all events Europe already shows a decidedly freer disposition to loan its capital here, this, as just stated, being an almost necessary result of the very great reduction in the market value of collateral. In the autumn of last year New York witnessed the spectacle of a money market with such exceptional rates as 20 per cent. on call and 8 per cent. on time, without bringing more than a mere driblet of gold from the other side. Explanation is found in the fact that European lenders had become so alarmed at the reckless speculation in this market that they demanded repayment of their loans at the most inconvenient time for American borrowers.

—The gross earnings of the Toronto Railway Company for the month of June were $177,593.21, an increase of $45,727.36, as compared with the same month of last year. The large increase is partly accounted for by the fact that there was a strike on in June of last year, the cars not running for three days.

MUTILATION OF COINS.

Editor, Monetary Times,—

Sir,—I desire to call your attention to the mutilation of our silver currency. The evil is assuming serious proportions, so much so, that if it continues much longer there will not be a respectable-looking silver coin in the country. The statutes provide severe penalties for clipping or defacing coins, gold or silver, but it does not appear to be anybody's business to see that the statutes are enforced. As we have no gold coinage, the offence is confined almost exclusively to silver, and I would ask that steps be taken by the Dominion Government to put a stop to the practice.

It is also necessary that the coinage should be increased, as it is not sufficient at present for the needs of the country, as witness the large number of United States silver coins in circulation. Trusting that the above will reach the eye of some person influential enough to remedy the matter, I am, yours truly,

Galt, Ont., July 3rd, 1903. E. J. Beaumont.

ANSWERS TO ENQUIRERS.

Ottawa.—It was not in this journal you saw such a contention, with reference to the Morgan case in Montreal. Possibly you are thinking of the editorial reference in the Globe a week or two ago to the doctrine of the physiocrats, and to the various doctrinaires whose views on values since that day have been like a moving kaleidoscope. Read the Monetary Times of July 3rd again, and you will see wherein we discriminated. Referring to the article in that issue, we have a reply from Henry Morgan & Co. themselves, from which we quote: "Re the article on Municipal Assessment. In explanation of our position, we may state that under the circumstances the reduction in our valuation was far from being satisfactory, but we accepted it in order to give the City Council an opportunity of amending the system of valuation; to give you an illustration, land we bought at 70 cents a foot, and improved by building on it, is charged at a greatly increased rate, whereas the land immediately adjoining, which has not been improved, except that it has been increased in value by the erection of fine buildings near it, is still valued at 70 cents."

S.C., St. Catharines.—The Lachine Canal was completed in 1825.

FINANCIAL MATTERS.

We learn from the Montreal Gazette of last Tuesday that the township of Windsor, Richmond County, Quebec, has voted to borrow $10,000 to construct permanent roads.

We understand that a proposal is being made to holders of City of Quebec 6 per cent. sterling bonds to exchange these for 3½ per cent. stock. We do not hear of many people ready to take up the suggestion.

It is reported that the board of the Dominion Iron and Steel Company have decided to make a second mortgage bond issue, and that $1,500,000 of it has already been underwritten by directors of the company, whose names are down, according to one newspaper, for $50,000 to $200,000 each for this purpose.

The premises at Farnham, Que., recently occupied by the St. Hyacinthe Bank, with vault and other fittings, were offered to the Sovereign for a year free of rent. It appears that the offer must have been conditionally accepted, for we are told that the Sovereign Bank intends to open a branch at Farnham in the near future.

The by-law of the municipality of St. Henri, formerly a suburb of Montreal, for the borrowing of $242,000 towards the reduction of the debt of the town was read for the second time in council on Thursday of last week, to be ratified this week. At the present time the place pays 6 per cent. a year on its debt of $242,000, by borrowing the $242,000 at 4½ per cent. interest, a saving of 1½ per cent., or $3,630 a year will be made.

Some changes are announced in connection with the Metropolitan Bank. Mr. F. W. Baillie has resigned the general managership of the bank, to engage in the bond investment business, and Mr. W. D. Ross, formerly assistant general manager, has been appointed in his stead. Mr. Ross was chief clerk in the Finance Department at Ottawa, and had been trained to banking in the Bank of Nova Scotia. We learn further that the vacancy on the board of directors, caused by the resignation of Mr. A. E. Ames therefrom, has been filled by the appointment of D. E. Thomson, K.C., as a director.

After having considered the matter for some time, the firm of G. W. Ames & Co., private bankers, at Wiarton, Ont., are retiring from that business, inasmuch as Wiarton is now amply supplied with banking facilities, the Commerce and the Union having each a branch in that town. "In order to do this [withdraw from the private banking business] with the least inconvenience to our depositors and ourselves, we are depositing with the Wiarton branch of the Canadian Bank of Commerce the full amount of our deposits to the credit of the individual depositor." Such is the announcement of Messrs. G. W. Ames & Co., who will continue to do a mortgage loan and agency business. The firm have been long in business, and in good repute. They probably gauged the trend of affairs well when they gave up private banking.

The British Columbia Permanent Loan & Savings Company, whose head office is at Vancouver, is giving evidences of active and prosperous business. We are told that it earns, as a rule, from 8 to 8½ per cent. on mortgage loans, while it pays 4 on deposits, 5 on debenture, and promises 6 on its full paid and instalment shares. Its stock is in request at a good premium. The other day, the Victoria Colonist had a description of the opening of a branch office in that city. The new office of the company is at 39 Government St., and it has obtained subscribers to the extent of nearly $250,000 over there already. There is a local board at Victoria, members of which consult from time to time with the head office board across the strait.

It will be observed that our St. John correspondent, writing on Tuesday last, makes light of the story about the amalgamation of four existing banks in the Maritime Provinces under a charter expected to be obtained for "The Alliance Bank." He says that a director of one of the banks reported about to be consolidated, the Bank of New Brunswick, told him that the matter had not been seriously considered even by the directors. And Mr. Stavert, the general manager of that prominent bank, upon being asked as to the truth of the amalgamation story, replies to the Editor of the Monetary Times: "You would not be far wrong in stating that the story is out of whole cloth, so far as this institution is concerned. Therefore, I may state, as I did when it first appeared, that it is at least decidedly premature."

It is a circumstance of interest, as showing appreciation of lengthy and faithful service, to note the retirement of Mr. James O'Neill Ireland from the service of the Trust and Loan Company of Canada, which took place at the end of June. Mr. Ireland entered the service of the Trust and Loan Company at Kingston in the year 1858, the company having opened its offices in Kingston in 1851, at the corner of King and Princess streets, under the management of Mr. F. A. Harper, the then commissioner. In 1867, or thereabout, the offices were moved to Toronto, and Mr. Ireland left his native city to follow the fortunes of the pioneer mortgage company of Canada. On Tuesday, 30th ult., Col. Edye, on behalf of the commissioners and staff of the Canadian offices, presented Mr. Ireland, manager of the Toronto office, with a handsome silver bowl, on his retirement, after a long career of 47 years of faithful service in the company, and read a letter from Captain MacDonnell, written on behalf of the whole staff in Canada, eulogizing Mr. Ireland's prolonged and splendid services.

INSURANCE MATTERS.

At a meeting of the shareholders of the Great West Life Assurance Company, held some days ago, it was unanimously decided that the time had come for increasing the capital stock of the company from $400,000, the amount first issued, to $1,000,000. The additional capital decided upon is likely to be subscribed and issued this year.

The sixteenth annual convention of the International Underwriters' Association opened on Tuesday last, 7th inst., at Round Island, one of the Thousand Islands of the St. Lawrence. One of the vice-presidents of the body is Mr. A. L. Eastmure, of the Ontario Accident Company. He is accompanied on the trip by Mr. Lightbourn, the company's secretary, and Messrs. Walker, Hedges and Baigent of the staff.

A special despatch to the New York Journal of Commerce and Commercial Bulletin says that three hundred and fifty agents of the New York Life Insurance Company from twenty-five Western States, were leaving for Mackinaw Island, last Monday on the "Manitou." The party will be for a week guests of their company's chief officers at Northern resorts. "A good time" may be expected with the utmost confidence.

The attempt of the assessors of Detroit to tax the reserve of the Michigan Mutual Life Insurance Company was nipped in the bud by the State Supreme Court. The opinion was filed June 13th, 1903, and is as follows: "The reserve fund of a life insurance company, required by law for the protection of policy-holders, represents a debt due or to become due within the meaning of the statute. (Sub-division 5, Section 3,832 C. L.) and is not subject to taxation."

The International Fire Prevention Congress was opened by the Lord Mayor of London on Monday last, 6th July. Delegations were present from the United States and Europe, altogether 800 delegates, representing fifteen governments, taking part. In reply to the Lord Mayor's address of welcome, a number of speeches were made by the foreign delegates, including one by Charles Hexamer, the president of the National Fire Protection Association of the United States.

A course in fire protection engineering will hereafter be included in the curriculum of the Armour Institute of Technology at Chicago. A special feature of the course is intended to be a series of lectures by prominent architects, contractors and insurance officials. Those who promulgated the idea believe that destruction of property by fire has assumed such vast proportions in the United States and Canada that it must be combated upon strictly scientific principles. When it is borne in mind, says the Argus, that the annual fire waste in the United States mounts up to at least $150,000,000, and that to this vast sum must be added the large amount expended by municipalities in means for fire protection, the need of some education in fire protection becomes apparent.

The conclusion of Mr. Howe, inspector for the Canadian Fire Underwriters' Association, as to the fire defences of Ottawa, is as follows: "I am of the opinion that lumber piling within the city should be prohibited; that another main at least 24 inches in diameter should be laid right from the pumps to Elgin, by way of Queen street; a 20-inch along Elgin from Queen to Slater, a 16-inch along Elgin from Slater to Somerset, and a 16-inch along Elgin from Queen to Wellington, the whole to connect with all principal mains. I also suggest four additional fire engines of capacity not less than those now in use, two chemical engines or wheels and one water tower. Owing to the difficulties experienced from anchor ice, a duplicate pumping system, independent of water-power, should be installed."

Mr. H. M. Boddy, who has held the position of agency instructor of the Manufacturers' Life Insurance Co. for the past eighteen months, has been promoted to the position of assistant superintendent of that company while still retaining the title of agency instructor therein. The appointment of Mr. Boddy to this responsible position is a recognition of the valuable services which he has rendered the company as agency instructor in preparing the new manuals and revising the field literature and policy forms so that the equipment of the agency force of the Manufacturers' Life is, we are told, now second to none in Canada. The importance of this work will be appreciated when it is remembered that the operations of the company are now carried on in four continents, requiring three different languages, in various parts of the territory covered by the company; Mr. Boddy's linguistic and mathematical attainments have enabled him to complete the task of preparing the manuals, literature and policy forms suitably for so varied a clientele.

It used to be said that the head office of the Sun Life Assurance Company of Canada did not encourage humor, "had no use for it," if we may be pardoned a slang expression. This appears to be no longer the case, for we find a distinct perception of humor, and even a relish for it in the following item from the company's monthly, "Sunshine." It is headed, "An Ontario Josh," which in the American language means a bit of chaff: The Head Office Cashier sometimes receives letters with remittances that put Josh Billings into a back seat as regards spelling and composition. Here is one received a short time ago: "Sir I will give u my adras agean adreas . . . wheạn I Chang I will lat u knoo I c ur notis has been writtan on the 21 of fab & I receve it on the 8 of march I send with this mony ordar amount $25.60 pay 2 primeum which I hoop u will find all right sir if knoot 2 much trubble I lik u 2 pleas lat mee knoo how many r living that was insheared ahad of mee.

Yours truly

. . . . . ."

TRADE OPPORTUNITIES.

The Canadian Government Offices in London have received the following enquiries during the week ended 26th June.—A London house offers Canadian firms agencies for electric lamps and accessories. The maker of a new patent electricity meter wishes to bring it to the notice of Canadians. A firm in Zurich, Switzerland, asks to be placed in touch with Canadian cheese exporters. Enquiry has been made for the addresses of Canadian makers of brick-making machinery. A correspondent in Canada asks about the nature and extent of the market in the United Kingdom for umbrella sticks.

Imperial Institute, 25th June.—A North of England house having a large connection in box shooks and excelsior wants to touch Canadian makers thereof. A manufacturing firm wishes to hear from Canadian makers of extension dining tables. A company dealing in teas and coffees would correspond with Canadian wholesale importers. A Bristol firm desires addresses of Canadian shippers of seeds, peas, etc.

GROCERIES AND PROVISIONS.

Our Montreal market correspondent writes on Wednesday evening: "Reports from the Mediterranean with regard to dried fruits are on the whole of a favorable character, though there have been some rumors of parasitic damage to Sultana raisins."

Halifax, N.S., retail grocers have organized an association for mutual protection, with the following officers: President, Ald. W. H. Cawsey; vice-president, R. N. McDonald; secretary, G. A. Cook; vice-secretary, C. E. Choate; treasurer, J. L. Archibald.

A fruit dealer, in Berlin, Germany, has written to the Department of Agriculture, Ottawa, pointing out the prospects for the establishment of a Canadian apple trade in that country. He is anxious to purchase a large quantity of apples, suitable for making cider.

The British demand for cheese had not changed much, though according to last reports there were no signs of accumulation. Prices were rather unsettled.

Mr. W. Levack, one of Ontario's largest cattle dealers, who also has the largest slaughter house in Toronto, has decided to do part of his business at the Junction Stock Yards, a step which is looked upon by the management of the latter as an important gain.

Latest reports from London, Eng., stated that the demand for Canadian butter had not increased to the extent expected, largely owing to spot values in comparison with the c.i.f. quotation, leaving no margin for profit to importers on that side. The rise in price of competing butters previously mentoned had not yet been sufficient to cause buyers to turn to the Canadian article. The amount of Canadian Butter imported since 1st May this year to June 20th had been only 3,346 cwts. against 19,189 cwts. for the same period last year. There was no quotable change in prices, "Choicest" salt makes from 94s. to 96s. per cwt., and "Finest" 90s. to 92s.

What is thought by the "man in the opposition" is always interesting. Mr. C. F. Ferguson, a wealthy fruit grower of Los Angeles, Cal., who has been in Great Britain selling California fruits for shipment via Boston and New York, reports that the market for grapes, peaches and oranges, which California growers formerly controlled in the Old Country, is not now as good as it used to be, and he accounts for this by the fact that English fruit dealers seem to prefer the Jamaican or Florida orange, and are learning to buy their other fruits, such as peaches and grapes, from growers in the Ontario Peninsula. He found a good deal of difficulty in disposing of California fruit to dealers, who formerly purchased that article almost exclusively, and he says that if the present rate of progress continues, Canada will, in the near future, supply Great Britain with all the varieties of fruit grown here, as she does now with wheat. Canada is exceptionally well thought of in Great Britain, and the representatives of United States firms, in consequence, labor under a very considerable difficulty. "English buyers," said Mr. Ferguson, "will patronize a Canadian firm in preference to an American firm every time, and therein is our principal difficulty."

DRY GOODS NOTES.

One of the large manufacturers of ladies' wrappers has announced an advance of from 7½ to 10 per cent. in those goods. The Alaska Feather & Down Co. have made a similar advance in quilts, etc.

Montreal wholesale dry goods men report that they are pretty busy, and, what seems strange, numbers of retailers throughout the province have already begun to call for the deliver of fall orders. There is a general tear on their part that further advances will take place in cotton goods.

There is still a good deal of anxiety expressed as to the condition of the Lancashire cotton industry. A majority of the mills in the southern part of that English county are either closed down altogether or shut from Friday to Monday. Some newspaper cablegrams style the present state of things the worst cotton famine since the American Civil War.

A shipment of bulls for breeding purposes was recently sent from Indiana to Argentina and after their arrival they developed foot and mouth disease. Nothing of this kind exists in Indiana nor anywhere along the line of travel to New York from which port the animals were shipped. They unquestionably contracted the disease on board ship and this vessel had been bringing wool from Argentina to the United States. The Department of Agriculture of the United States has reliable information that the foot and mouth disease exists in Argentina, and has existed there for some time. Sheep are just as liable to this disease as cattle. Two questions are being considered by the U. S. Government, whether to shut out wool from the infected countries altogether, or to disinfect at American ports.

A report upon conditions in the silk trade, appearing in the New York Dry Goods Economist, says that the eager manner in which dealers and manufacturers took hold of China silk at price concessions shows that they are impressed by the general strength of the market and that the latter, at least, are poorly supplied. All other markets from Canton have been quiet as a result of the extreme firmness of sellers. Even Yokohama is slightly firmer than last week, with new silk coming forward slowly and held at top prices. All estimates of the new Japanese crop now place it at 80,000 bales or more available for export. Shanghai is a little firmer than at last report, but sales are restricted. In Europe raw silk shows no change, but cocoon prices tend against buyers steadily.

It looks as if a good deal of the recent abnormally high price of cotton had been due to speculative influences after all. This week, partly owing to more favorable Government reports, as to the outlook for the growing crop, and partly to the fact that holders were keeping cotton at such a price that no buyers could be found, there has been an exciting time in the New York market, and this commodity, for future delivery, has been dropping from 10 to 50 points at a time. Rallies took place every now and then, but the bear influence was too strong, and on Wednesday at the close the net loss was 36 points. One set of speculators, known as the Brown Syndicate, is reported to have lost $3,000,000 during the last two or three days.

—The Canada Foundry Company, of Toronto, an important manufacturing concern in structural metals, employs when fully manned about 1,200 men. They have been and still are very busy, and a few weeks ago the men in their moulding shop took a notion to strike, and strike they did. The company's managers were not asleep, however, and promptly sent to the Old Countries for hands who would rather work than loaf or go into a "hold-up." They have already recived three carloads—not all moulders, but among them are pattern-makers, machinists, of different grades, but all workers. This, and other men they are arranging to get, will probably enable the works to overtake the great mass of orders on hand.

—A Vancouver paper draws a glowing picture of the progress made by that city's country surroundings since the establishment of the electric railroad connecting it with New Westminster. Everywhere along the route comfortable dwellings are being erected by new arrivals from the East and the United States, who are pouring into the province. Many citizens of Vancouver also taking advantage of the splendid service furnished by the Electric Company, are living where they can obtain the advantages of country air and quiet, with practically all the advantages of city life. "The Electric Company is keeping pace with the progress of the district, and is increasing the service and the car accommodation with the growth of the community." Some other Canadian cities wish they could do likewise, untrammelled by the "rapacity of corporations."

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, July 9, 1903, compared with those of the previous week.

Cities	July 9, 1903	July 2, 1903
Montreal	$25,559,580	$17,979,450
Toronto	20,244,475	12,853,394
Winnipeg	9,939,042	3,887,541
Halifax	2,145,831	1,521,154
Hamilton	1,181,338	780,270
St. John	1,004,081	899,325
Vancouver	1,542,641	1,104,203
Victoria	554,761	473,118
Quebec	2,085,956	1,574,325
Ottawa	.....	1,652,358
London	1,136,737	642,341
	$.....	$43,367,479

The following Brands manufactured by . . .

YILDIZ MAGNUMS
Dardanelles

Pure Egyptian Cigarettes.

Commercial.

MONTREAL MARKETS.

Montreal, 8th July, 1903.

Ashes.—Receipts continue very light, and there are only seven barrels all told in store at the moment. As a consequence, though the demand is slow, prices rule very firm, and as high as $5.50 has been paid for first pots, good tares, but general quotations rule about $5.40; second pots are quoted at about $5, and pearls at $6 to $5.25 per cental.

Cements and Firebricks.—Receipts of cement were last week again fairly large, comprising 19,150 bags and 6,400 barrels of German and Belgian cement; 7,800 bags and 1,150 barrels of English cement. There were also 163,000 firebricks. For the week ending to-day, receipts are 2,600 bags and 5,600 barrels of English cement, and 45,000 firebricks. A very fair aggregate of business is reported, and quotations are steady.

Dairy Products.—The tendency of the chees market continues downward; statistics showing that the make is exceptionally large, and Quebec makes are being dealt in at 9 to 9⅛c.; Townships at 9⅜ to 9½c, while for fine Westerns 9¾c. would now be considered a limit. Butter rules dull at 18½ to 18¾c. for finest creameries. The export demand continues light, but a little further shading in prices would doubtless encourage business abroad. Exports of cheese for last week were quite large, aggregating 129,334 boxes, as against 81,344 boxes for the same week of 1902. In butter the shipments last week were 13,428 packages, as compared with 16,664 packages a year ago.

Dry Goods.—Quite a number of dry goods retailers are already calling for delivery of fall orders, though one can scarcely see why they should, and the wholesale warehouses are all fairly busy. There is also quite a rush for cotton goods in the fear that further advances may take place, and general business is good for the season of the year, with payments generally well sustained. One of the largest manufacturers of ladies' wrappers, etc., has notified the trade of a general advance of from 7½ to 10 per cent., and the Alaska Feather & Down Co. advises a similar advance in quilts, etc.

Groceries.—The demand for sugars is not so active as refiners generally look for at this season, and the market shows some tendency to easiness, though there is as yet no change in quotations, which range from $3.40 to $3.90 for yellows, with standard granulated at $4.05. The first direct cargo of Barbados molasses has just arrived in port, and is consigned to the local representatives of the Boston Molasses Co. The city demand is light at the moment, but prices are firm at 39 to 40c. in a jobbing way. Reports from the Mediterranean with regard to dried fruits are on the whole of a favorable character, though there have been some rumors of parasitic damage to Sultana raisins. Filberts will likely be a short crop; walnuts look well, though it is yet too early to predict that the crop will be large. There is a good present demand for Ceylon green teas at a value of from 16 to 18c.; it is said Ceylon blacks will likely be a short crop. Prices of canned salmon on the coast are $4.65 for Fraser river, $4.50 for Skeena river, and $4.25 for River Inlet.

Hides.—Lambskins were advanced last week to 35c. each. In the buying of hides there is much competition, and though 8c. per lb. is the nominal quotation for No. 1, dealers in some cases pay up to 8½c. or even more. It is estimated that there are from 12,000 to 15,000 calfskins in store here still, at a low calculation, but no change has been made in quotations, which are 11c. per lb. ofr No. 1, and 9c. for No. 2.

Metals and Hardware.—The movement continues good in both lines for this season. In pig iron a fair volume of business is reported in Summerlee at $21 for car lots. There are no stocks of other Scotch brands at present, but there is some supply of Middlesboro iron at $19.50. Bars, boiler plates, iron pipe, etc., are unchanged in price. In Canada plates, black sheets, etc., there appears to be a little tendency to easi-

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.

Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance:

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

ness, and some fair business reported in galvanized Canadas at $4 for 52 sheets and $4.25 for sixties, while a good round lot could probably be done at a slightly better figure. Terne plates are quoted at $6.75, and regular galvanized sheets at $4 to $4.35, as to quality. Copper is easier; a sale of a two-ton lot is reported at 14½c., and for small jobbing lots 15c. is asked. There has been a decline in tin, and the quotation is now from 29½ to 30½c. Lead a shade easier at $3.10

Oils, Paints, Etc.—A good seasonable trade is still reported. Beyond a slight decline in turpentine, there are no noteworthy changes in quotations. We quote, as follows: Single barrels, raw linseed oil, 57c.; boiled, 60c.; net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 73c., single barrel. Olive oil, machinery, 90c.; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gallon; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands) $5 to $5.15; No. 1, $4.75 to $4.87½; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 5c. for pure; No. 1, ditto, 4 to 4½c.; genuine red ditto, 4¼-4½c.; No. 1 red lead, 4c.; putty, in bulk, barrels, $2; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40 to 45c.; Paris white, 75 to 80c.; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break.

TORONTO MARKETS.

Toronto, July 9th, 1903.

Chemicals, Drugs, Etc.—No new feature has developed in these trades so far as the local market is concerned. Reports are coming in to the effect that linseed oil is going to be considerably lower. British advices re the chemical market are to the effect that so long as the textile trades continue in their present unsatisfactory condition little improvement can be looked for in the demand for chemicals for the home trade. Bleaching powder is very low and many manufacturers have put in full supplies for future requirements. Heavy alkali and caustic soda remain steady. Consumers of bichromates are keeping well supplied in view of possible future advances.

Dry Goods.—A good trade continues to be done in practically all lines of dry goods. The hot weather is increasing the demand for light fabrics. Payments are reported good.

Flour and Grain.—A steady market prevails for flour, the quotation for ninety per cent patents holding at about $2.80 in buyers' bags. Middle freights, Manitoba flour is about the same price as quoted for the last several weeks, though its tendency is towards advance.

Millfeed is a little on the quiet side and oatmeal steady. In grain, our last week's quotations hold good for this. Little business is being done in wheat.

Fruit.—Strawberries are now practically out of market, last sales being made around 6c. Currants, red and black, are coming forward in some plenty and raspberries are beginning to do so. Oranges are not over plentiful. Extra fancy, late Valencias are quoted at $4.75 to $5.00 per box. Sorrentos, $2 to $4 as to size and quality. Best Florida Watermelons fetch 30c. to 40c. Florida Pineapples hold at $3.25 to $3.50 per case. Other quotations are about as follows: Raspberries per box, 11c. to 12c.; Cherries (eating) per basket, $1.00 to $1.50; Cherries (cooking) per basket, 90c. to $1.00; Gooseberries, per basket, 40c. to 85c.; Red Currants, per basket, 45c. to 65c.; Black Currants, per basket, $1.00 to $1.25; California Apricots, box, $1.50 to $1.65; California Plums, box, $1.50 to $2.00; California Peaches, per box, $1.25 to $1.50; Canadian New Potatoes, per bbl., $4.00; New Cabbage, per crate, $2.00; Wax Beans, per basket, $2.00; Green Beans, per basket, $2.00; Tomatoes, (4 basket crate) each, $1.25; Egyptian Onions, per sack, $2.50.

Hardware.—The manufacturers of horse shoes have put up prices 10c. These goods had for a long time not made any advance along with other articles, and the present oportunity was seized in order to do this. Other prices are very firm, with a very active business being transacted. Such goods as harvest tools, screen doors, ice-cream freezers, etc., are going out very freely. The demand for agricultural implements is accentuated by the rapid maturing of the hay and other crops. Metals for the most part are moving freely though iron is a little on the easy side. British advices say it remains about the same as a month or so ago. Copper has become steadier. Tin and lead continue to droop.

Hides and Skins.—A good demand exists for hides and skins and they are offering in moderately large quantities. The market for lambskins and shearlings is active. Tallow keeps pretty steady.

Groceries.—The strongest feature in the grocery business at the present time is the strength in canned salmon and there is a likelihood of a rise in the price of 10c. in Sockeyes, owing to the light run. Sugars are in better demand owing to the need of them for preserving poses. Teas continue very strong. Business in general may be described as moderately good.

Provisions.—With only ordinary offerings, the demand for butter keeps quiet. Cheese has made a considerable drop. Eggs are high-priced, under limited receipts. For hops there is a dull market. The hot weather creates a specially good demand for hog products and prices are firm.

—Customer—I tried this patent medicine, but it did me no good. Druggist—But the advertisement says "cures when all others fail." You haven't tried all the others yet.—Western Druggist.

—A citizen of a western city recently advertised on the same day for a cook and a music teacher. He received nine answers for the former job and 389 for the latter. This shows one thing that is making the servant girl a problem.—Atlanta Constitution.

—"Ef dey's milk in Paradise, dey mus' have cows dar," said Brother Williams; "en ef dey got honey dar, dey sho' mus' have bees, en whar bees is dey's blossoms, and whar blossoms is dey's always water-millions in season—bless de Lawd!"—Atlanta Constitution.

—The fact that a firm sells goods bearing the union label, when it has no authority to use it, constitutes fraudulent use of that emblem. This is the gist of a decision rendered by the judge of the Second District Court, sitting at Newark, N.J., a few days ago. The suit was brought at the instance of the International Typographical Union, through the Allied Printing Trades Council of Newark, against the Baker Printing Company, also of that city. According to the testimony, the Baker Company last fall furnished the Republican County Committee with 150,000 pasters bearing the label, which had been printed by Brandt & Borden, a union office. The judge said the Baker firm violated the law in cutting, handling and delivering the pasters after they had been printed in a fair office, and entered judgment for $200, the amount asked.—Typographical Journal.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."
Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at he bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY

The NORTHERN LIFE
Assurance Company

has no equal.

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay **$5.00** for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over **$100,000** a year by doing neither one.

For sample copy send 10 cents to PRINTERS' INK, No. 10 Spruce St., New York City.

AN ELOQUENT SERMON.

It was said, not long ago, by one of the masters of English, that "true feeling is best expressed in the briefest terms and in the simplest language." A memorable address was that of Bishop Carmichael of Montreal, in St. George's Church, in which he referred to the death of Andrew F. Gault. It is well known that Bishop Carmichael possesses warmth of eloquence, and having a fine character for his theme his fervency is naturally at its greatest. The warmth of his utterance, combined with the simple grace of his language and the worth of his subject, gave penetrating force to his address. The Bishop based his remarks on 1. St. Peter, iii., 4: "The hidden man of his heart."

"There has passed away from us, my dear friends, obedient to the call of God, one of the most justly admired and, to those who knew him well, one of the best loved men that ever lived in this city. It is not the custom of the Church of England, nor has it ever been the custom of this congregation to supplement the solemn services which emphasize the dignity of death with any passing words, but I do so without compunction on the present occasion, because in the narrow-

DOMINION SECURITIES

Corporation, Limited

26 King Street East, Toronto

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Don't Delay Making Your Will?

The greater the efforts, the longer the time spent by an individual in accumulating property for his family or other purposes, the more important becomes the duty of making a will. It is a duty that is sometimes put off until too late to be performed. We will forward free for the asking to any address in Canada, the various forms of wills.

ing track of life that lies before me, I dare not hope to meet another just exactly like Mr. Gault. Younger men may do so; God grant that they may, but I feel that in the lives of many of the congregation they have met their man of men, and their man is dead.

A great city has long known and recognized the business worth of Mr. Gault. But of that I will not speak, nor will I speak of the natural, and therefore growing, influential power of the man in the midst of his competitors and contemporaries. All such things lie largely outside my sphere, but knowing Canada as well as I do, I can truly say that I never heard Mr. Gault's name mentioned in any portion of the country, except in a respectful tone, and in this day of versatile flippancy of judgment this is the truest estimate that can ever be rendered in the commercial world. Others knew the deceased better even than I; better than I could ever have known him; let these speak. But what a heart Mr. Gault had; not that he was in any sense a weak-willed man, but far otherwise. His strong, forceful will had much, no doubt, to do with his success in life; it showed itself in the piercing glance of his clear eye, and in the shake of his magnificent head; bnt the sight of tears would break him up just like a little child. Whilst he would hold his own against you, and hold it fast if he thought he was right and you were wrong, yet if sorrow came to you, the first step at the door would be his.

Seldom have I known a man with such a passion for doing kindly things, and for doing them with the greatest of kindliness and keeping them wholly free from what one has called "the patronage of generosity." He was the first man I ever met, but, thank God, not the last one, who thanked me for giving him an opportunity of doing good that otherwise he would not have done; and never once in all the years of intercourse with Mr. Gault, have I asked him for the poor, the sick and needy, and asked in vain. Again and again, Mr. Gault has, unasked, given me of his gifts, and that not alone in later years, when his means were great, but in the early years of his friendship, when his future lay before him like a prophecy unfulfilled.

Of the munificence of Mr. Gault's gifts to the Church of England, the Bishop spoke with force, out of a full heart. "Not that he confined his gifts wholly to the Church. The Gault Institute at Valleyfield and every charitable institution almost in this city can testify to the fact that he did not confine his gifts, but that he felt as once he told myself: "The old church will live when you and I are dead and gone and forgotten, and the gifts bestowed on it will ensure a perpetuity of good."

I do not venture to speak of what Mr. Gault was to his home. Why should I? Neither dare I speak of what Mr. Gault was to the Archbishop, and to myself, to say nothing of the hosts of friends who followed him to the grave. But, oh, how many of them will feel as if a leading page were missing from the great book of their individual life. We all knew him

DIVIDEND NOTICE.

Notice is hereby given that a dividend of two per cent. on the preference shares of the company for the quarter ending June 30th, inst., has been declared and will be paid on Wednesday, July 15th next, to shareholders of record of June 30th.

The transfer books will be closed from the first to the fifth July, both days inclusive.

By order of the Directors,

HENRY RITCHIE, Cashier.

New Glasgow, N.S., June 25th, 1903.

so well, and so many of us loved him. He had cheered us so often, helped us so often, done such kind things and said such true things; and he did it all through years. Now he is gone, he has passed out, leaving us an example of what a true man could be who quietly and humbly loved his Lord.

Mercantile Summary.

THE assets of the Sunlight Gas Co., Limited, of Montreal, lately put into liquidation, have been sold for $2,500.

THE Dunsmuir estate has sold 50,000 acres of timber lands on Vancouver Island to State of Washington capitalists for $1,000,000.

VANCOUVER, (B.C.) city council is considering putting before the ratepayers a by-law providing for the borrowing of $130,000 for sewerage extension and the construction of new septic tanks.

FURTHER particulars are to hand regarding the Canadian Northern Railway's elevator plans for Port Arthur, Ont. These include a tile tank house with a capacity of 5,000,000 bushels, which will, it is claimed, surpass anything of its kind previously existing.

THE passenger steamer "White Star," belonging to the Oakville Navigation Company, was burned to the water's edge in Toronto Harbor on Friday last. She had been only lately refitted and was valued at $40,000. The captain and some of the crew had narrow escapes for their lives.

THE Canadian Transit Company, Limited, Ottawa, with a share capital of $1,000,000, has been granted a charter by the Ontario Government. It will convey grain from the Upper Lakes to Montreal and will work in connection with the New Canadian Company, Limited, of London, Eng., as wharfingers, etc. It is composed largely of British and Canadian capitalists, of whom Mr. Robert Bickerdike of Montreal is one.

A SHORT while ago the Toronto city council determined to award the contract for a new pumping engine at the water works to a local firm, the John Inglis Company, at $150,000, with the provision, however, that the Allis, Chalmers Co., of Milwaukee, make the designs and that the engine be made under their supervision. Now, however, this condition has been removed and the John Inglis Company will be solely responsible.

A MONTREAL clothier named Simon Barkoff, assigned last week, and has since arranged a settlement at 30 cents. He was originally a peddler, and began in his present line in 1894, shortly after compromising at 25 cents. His present indebtedness is about $2,500. Max Davidson, another man of the same class in the same city, is reported failed, with liabilities of about $8,000. He also was formerly a peddler, and started storekeeping at Slatington, Que., eight or nine years ago. He shortly afterwards made an assignment with creditors at 40 cents, and then moved to Montreal.

The Traders Bank of Canada

Notice is hereby given that after the publication of this notice for four weeks application will be made to the Treasury Board for a certificate approving of the following by-law passed at the annual meeting of shareholders held this date, viz:—

"That authority be and is hereby given to increase the Capital Stock of the Bank to the extent of $500,000, by the issue of 5,000 new shares, to be allotted pro rata to the Shareholders at such times and on such terms as the Directors may determine, and the Directors are hereby authorized to apply to the Treasury Board for approval of this By-law after notice as required by law has been given.

H. S. STRATHY, General Manager.

Toronto, 16th June, 1903.

L. A CLOUTIER, grocery jobber, Montreal, lately reported failed as the result of unfortunate stock speculations, is offering a compromise at the rate of 30 cents on the dollar, liabilities being $21.175.

IT is reported that N. Kitner, who last summer started a small general business at Cedar Hall, Que., is an absentee, owing about $2,000. L. Lazerovitz, of Quebec, has made an offer to the creditors of 15 cents on the dollar for their claims.

A YOUNG man, named J. O. Bussiere, who started in the tailoring line about three years ago at Shawinigan Falls, Que., has got into embarrassed shape and has been able to arrange a 40 per cent. compromise on liabilities of $2,225.

MCCRIMMON & Co., general dealers, of Williamstown, Ont., have been unable to put through the arrangement with creditors proposed, and assets, scheduled at $8,415, are advertised to be sold by auction this week by Marcotte Freres, Montreal.

IN the matter of J. B. I. Prefontaine & Co., of Ste. Adele, Que., whose failure was lately reported, the father of the insolvent has made an offer of 50 cents on the dollar for the stock, and 8 cents for the book accounts, which will likely be accepted.

THE North Vancouver, (B.C.), Ferry and Power Company, has put on another steamer, the "Mermaid," to augment the ferry service between North Vancouver and the city of Vancouver. Considerable improvements are also to be made to the wharves at both places.

Mercantile Summary.

THE population of Chicago has passed the two million mark. Its present population, according to the publishers of the Chicago city directory, for the present year is 2,231,000.

THE Government telegraph lines in the Yukon district have been considerably damaged of late by forest fires. The line between Dawson City and Vancouver has also been interfered with, though it is now reported to be in good working order again.

FOR twenty odd years, Kossuth Bezanson has been in the jewelry business at Moncton, N.B., with a favorable record hitherto. Latterly he has been attempting some jobbing through the surrounding country, besides opening a branch at Sydney, C.B., and has evidently got beyond his depth. He is now reported as having suspended payment.

ON Sunday last, Mr. T. A. McKinnon, first vice-president and general manager of the Boston & Maine, passed away at Boston, after a short illness. The deceased gentleman spent practically all his business life in the service of various railways—the Brockville & Ottawa, the South Eastern, the C.P.R., the Concord & Montreal, and ten years ago he was made general manager of the Boston & Maine. He was an admirable railway administrator and an excellent citizen.

WE hear from St. John, under date Tuesday last, that the city laborers' strike is over and the men have decided to accept the compromise offered them by the council. The old men get $1.10, and the younger get $1.40. The former rate was $1 and $1.20, and they struck for $1.25 and $1.50. Unusual to relate, there appears to be no hard feeling resulting from the strike.

THE following list gives the names of Canadian inventors and the nature of their patents, in this country and the United States during the past week: Canadian Patents.—W. J. McTavish and A. Graham, chaff blowers; F. Culham, locomotive ash pan cleaners; A. Herbert, hub nuts; F. Mesnard, lubricating axles; G. C. Mooring, fire boxes and fire pots for stoves, furnaces and other fuel-burning devices; J. L. Rankin, wire locking dveices; E. B. Bolger, device for fastening laces in boots and shoes; E. Myers, kindergarten apparatus for teaching the position of notes on the piano; J. Kincaid, boiler bearings; F. Mesnard, vehicle wheels; W. F. Sanford, gates; D. Beaulieu, automatic fire alarms; J. Muir and C. H. Herod, plates for feed-grinders; A. Hutton, rotary churns. United States Patents.—M. Chisholm, Empyema drainage device; J. B. Le Reau. Dit L'Heureux, et al, air-forcing device for ventilation or similar uses; E. Michaud, et al, belt controller; D. W. Mitchell, bag-holder; N. E. Nash, temperature regulator; N. E. Nash, temperature regulating appliance; L. Savaria, nut lock; J. W. Smith, car coupling; J. W. Smith, car coupling.

43 to 49 Bay Street, Toronto.

Mercantile Summary.

A REPORT comes from Halifax to the effect that the Renfrew gold mine, one of the richest mineral properties in Nova Scotia, and now owned by Messrs. E. and C. Thompson, has been sold to Boston capitalists for about $125,000.

THE ore shipments from Rossland, B.C., district were as follows: Le Roi, 3,840 tons; Centre Star, 1,470 tons; War Eagle, 1,170 tons; Kootenay, 270 tons; Le Roi, No. 2, 450 tons; Velvet, 125 tons; Giant, 60 tons; Jumbo, 100 tons; total for the week, 7,485 tons; for the year up to date, 192,997 tons. A considerable increase in the output is looked for shortly, owing to the improved conditions at Northport smelter.

THE Ontario Wind Engine and Pump Co., Toronto, advise us that they have just received an order from Australia for three Canadian air-motors of different sizes. They expect that their trade with the island continent will increase rapidly. They have also received from the Imperial Government an order for two 16-foot air-motors and four large pumps, destined for the Levant, a fact which serves to show what high favor the product of this well-known Canadian company has already achieved.

THE Dominion Government has decided to pay a bounty to any corporation, firm or person manufacturing binder twine in Canada, which shall be equal to the amount paid as export duty in the Philippine Islands on manilla fibre produced in such islands and used in making binder twine in Canada. Such bounty shall only be payable in respect of binder twine made on or after the 1st September, 1902, provided, however, that the bounty shall not exceed ⅜ of 1c. per lb. on the manila fibre so used in making binder twine.

A WELL known business man of Montreal passed away on Saturday last in the person of Mr. James Cooper. He began business life at an early age, being a salesman in the hardware establishment of Rice Lewis & Son, in Toronto, forty years ago. Thence he went into the service of Frothingham & Workman, of Montreal, for whom he travelled several years. In 1872 he began business for himself, later associating Mr. Fred Fairman with him under the firm name of Cooper, Fairman & Co., in hardware and manufactures. The firm was one of the pioneers in the manufacture of barbed wire and Mr. Cooper was president of the Dominion Wire Manufacturing Company. Again the Dominion Wire Rope Company was formed, of which Mr. Cooper was also president. Mining machinery was another branch to which the firm gave especial attention; and they had at one time a controlling interest in the Dominion Bridge Company. In addition to all this Mr. Cooper did a large general contractors' and railway supply business, representing such English firms as Chas. Cammell & Co., Sheffield; John Hendry Andrew & Co., Sheffield, as well as large American concerns.

DEBENTURES—Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for investment by Trustees and Insurance Companies, and for Deposit with the Government, always on hand. — Telephone Main 2011.

MAGEE & GREGORY,

YORKTON, ASSA.

Mercantile Summary.

FORT WILLIAM, Ont. ratepayers have voted in favor of a by-law to raise $40,000 for the purpose of building a new town hall.

A SMALL Montreal suburban grocer named Omer Langlois, has made a voluntary assignment, and his liabilities are shown at about $1,000.

ON Tuesday last, Mr. George Winks, formerly a prominent wholesale dry goods merchant of Montreal, and for nearly twenty years a resident of Winnipeg, died in the latter city, aged 78.

THE steamship "W. A. Hionda" last week arrived in Port Arthur, Ont., with a freight cargo comprising 1,200 tons of merchandise and 1,200 tons of rail for shipment by way of the Canadian Northern. This is one of the largest cargoes ever brought to the head of the lakes for shipment west.

THE gross earnings of the Canadian Northern Railway Company for the fiscal year ending June 30, amounted to $2,448,000, or nearly $1,000,000 over those of 1902. The working expenses amounted to $1,588,000, and fixed charges $637,000, leaving a surplus over working expenses and fixed charges of $223,000.

A NEW wharf, costing, it is said, about five thousand dollars, is being built at Burk's Falls for the convenience of tourists who make the trip from that place to summer resorts along the Magnetawan River. The Magnetawan Tanning Co. will also benefit by having a good wharf, because much of the bark they use is brought on barges up the river to their large tannery at Burk's Falls.

THE Shawinigan Water and Power Company has closed a contract with the Sorel Electric Company to deliver electricity in the city of Sorel, Que., for the purposes of light, heat and power. In order to carry out this contract, the first named company will build a transmission line from Joliette, through Lanoraie, across the St. Lawrence river by means of a submarine cable, to Sorel. Power is to be delivered in October next.

LONDON, Ont., citizens display much satisfaction at the fact that the Grand Trunk Railway Co. have agreed to build a connecting line with the Canadian Pacific, and to enter into negotiations with other railways for general interswitching arrangements in that city. The proposed spur will afford to established industries switching arrangements common to all railways, and provide accommodation for new industries.

PROMINENT British Columbia mining men seem a good deal impressed with the Lardeau district as a mineral producer. In the mines around Camborne, for example, great activity is being shown and the hotels and boarding houses are full of miners. There are indications that the free-milling properties as a rule do not run into base ore at depth, as is often the case in the Kootenays, but the ore is sufficiently rich at great depths to be very valuable, given good transportation.

All Kinds of Personal Accident Policies and Fidelity Bonds.

A. J. PATTISON,
Managing Director.
Toronto, July 8th, 1903.

$75,000
City of Winnipeg School Debentures
FOR SALE

Sealed tenders addressed to the Secretary-Treasurer of the Winnipeg Public School Board and marked "Tender for Debentures" will be received up to 4 o'clock p.m., on Wednesday, 22nd July, 1903, for the purchase of $75,000 of debentures of the School District of Winnipeg, No. 1, payable at the expiration of thirty years, with interest from the 1st of August, 1903, at the rate of four per centum per annum.
Principal and interest payable at the office of the Winnipeg Public School Board or at any chartered bank in Winnipeg.
The highest or any tender not necessarily accepted.
Any information desired may be obtained by addressing the Secretary-Treasurer.
STEWART MULVEY,
Sec'y-Treas. Winnipeg Public School Board.
JAMES SCROGGIE,
Chairman Finance Committee.

MRS. E. G. WOODCOCK, milliner, at Ottawa, is reported to be seeking indulgence from her creditors in the shape of a 40 per cent. compromise. Her husband, who formerly carried on the business, failed in 1896, owing some $13,000. She probably owes less than that now.

As the result of the voting in St. Henri, (near Montreal), last week, a loan of $242,000 for general improvements has been authorized. An analysis of the vote shows that the larger property owners most strongly favored the by-law.

WATERLOO, Ontario, ratepayers last week defeated a by-law to grant a loan of $5,000 to the Berlin Brush Company to assist them in building a new factory and enlarging their business. Another by-law to issue debentures for $6,000 to build a new bridge was carried.

THE Traders Bank is building a three-story brick structure on Main St., North Bay, near the handsome buildings erected recently by the Imperial Bank and the Bank of Ottawa in that place. The staff of The Traders will, we are told, move to the new premises about October the first.

IN October, 1889, J. J. Bannon, of Norwich, succeeded to the drug business of J. A. Tidey, the purchase amounting to $2,500. He paid $1,000 cash and gave a chattel mortgage for the balance. This has never been paid off, but the mortgage is still in existence and he has just made a living from the start. He now makes an assignment.

WE hear from Montreal that it is proposed by the Cobourg Radiator Company contemplating to establish a factory in Lachine. They have secured a part of the Decarrie farm and are prepared to build immediately. They have applied to the municipality for exemption from taxation for the present. This proceeding seems to have become quite a matter of course with concerns that propose to open works.

ANOTHER business man of Montreal, whose name has long been familiar, departed this life last week, in the person of Mr. Thomas Sonne, Sr., canvass manufacturer. Deceased was born in Denmark, 67 years ago, spent some years in New Zealand, in travelling through various parts of the world, and established his large sail-making establishment in Montreal, in 1866, which is now continued by his son, under the name of the Sonne Awning & Tent Company.

FAMILY BOOK-KEEPING.

"My account book," she said, proudly, "showed that I had eight dollars and fifteen cents more than I really did have, so I felt at liberty to spend the excess."

"But there wasn't any excess!" he protested.

"Oh, yes, there was!" she replied. "The book showed it."

"If you didn't have the money," he urged, "it was a shortage."

"Certainly not," she returned. "It was right there on the book—eight dollars and fifteen cents more than I had, and when the balance was so much bigger than it should be, I felt free to spend the money."

"If you had more money in your purse than the book showed," he suggested, "what then?"

"I should have spent it," she returned "Either way, it's all the same."

Now he is trying to get her to give up keeping accounts.—Chicago Post.

CANADIAN MANUFACTURERS' ASSOCIATION.

The election of officers of the Halifax branch of this body for the ensuing year, resulted as follows:

President—J. R. Henderson, Halifax.

Vice-President—J. W. Allison, Halifax; D. W. Robb, Amherst.

Executive—J. F. Stairs, Halifax; H. L. Hewson, Amherst; Alfred Dickie, Stewiacke; A. F. Pelton, Amherst; H. F. Baker, Sydney; Frank C. Simson, Halifax; A. C. Thompson, North Sydney; H. H. Hamilton, Pictou; T. M. Cutler, Halifax; Geo. Stairs, Halifax; Wm. Lithgow, Halifax; Ernest Hill, W. B. Taylor, Halifax; Jas. Munro, New Glasgow.

Delegate to Congress of Board of Trade—J. R. Henderson, Halifax.

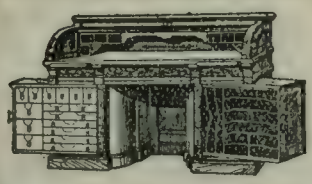
UNITED STATES FINANCES.

Henry Clews & Co., in their weekly circular, dated New York, July 11th, said: Midsummer quiet has prevailed in the stock market to an unusual degree. This general apathy of buyers does not require much explanation. Many are absent on vacations; some are recuperating from recent losses; a few have increased their holdings on the decline, and all are waiting for some fresh stimulus that will bring an upward reaction. There is some reason for expecting that a partial recovery at least is near at hand. It has been recognized for months past that money and crops would be the dominating factors in the markets of 1903, and in the crop situation there has been a distinct improvement that sooner or later must exert an effect upon Stock Exchange values. The monetary situation has, of course, been greatly relieved and strengthened by the heavy liquidation of the last six months; the improvement in this respect being much greater than indicated by the weekly statement of the Associated Banks, or even by the returns of the national banks of the country, published in response to the last call by the Comptroller. The banking capital of the United States has not only been greatly enlarged during the past year, but there has been an important increase in circulation, and the banks now have their resources under better control than for a long period. Perhaps the greatest strengthening in the monetary situation has come from the payment of heavy foreign loans, of which no statistical record such as the weekly bank statement is available and which consequently escapes attention except by the initiated. Our borrowings abroad, however, are a great many millions less than in 1901, and our ability to promptly redeem those obligations has vastly improved our credit abroad; a factor that will count in our favor in the future, for London already shows more partiality to make advances on American stocks. In the flood of pessimism which has lately broken loose, it is forgotten that curative forces have been quietly at work along with the decline; the injured being still occupied with their own bruises and the uninjured naturally regaining confidence slowly after the shock of a thirty to forty points decline.



THE DESK OF THE AGE.

Every Device necessary to make a desk reliable, labor saving, economical, is found in those we manufacture In material and construction, in finish and utility, in durability and design they lead all other makes. They make an office a better office. ☞Our Catalogue goes into detail.

A young man as Cashier for Loan and Savings Company. Must have previous experience. Apply fully, stating salary expected, to P. O. Box 655, Winnipeg, Manitoba.

WHAT A TRUE SCHOLAR IS.

The scholar in the true sense is the man or woman for whom the schools have done their best. The scholar knows some one thing thoroughly, and can carry his knowledge into action. With this, he must have such knowledge of related subjects and of human life as will throw this special knowledge into proper perspective. Anything less than this is not scholarship. The man with knowledge and no perspective is a crank, a disturber of the peace, who needs a guardian to make his knowledge useful. The man who has common sense, but no special training, may be a fair citizen, but he can exert little influence that makes for progress. There may be a wisdom not of books, but it can be won by no easy process. To gain wisdom or skill, in school or out, is education. To do anything well requires special knowledge, and this is scholarship whether attained in the university or in the school life. It is the man who knows that has the right to speak.—David Starr Jordan, in Atlantic.

—Johnny.—"Pa, what is the law of supply and demand the papers tell about?" Wise Pa.—"It is a universal law, my son, that when a man is well supplied with this world's goods he demands more."—Boston Transcript.

—Mr. W. L. Brown, president of the American Ship Building Co., in an interview given out in Chicago, says that he is confident that ship building will continue to be an increasingly important industry on the great lakes. Wooden boats are wearing out and going to pieces, he says, and the territory fed by the lakes is rapidly increasing. The modern steel carrier must continue to supplant the poorer class.

—District Attorney Jerome was rather amused by the manner in which a tramp who strolled up to the kitchen door of his Lakeville home last Sunday morning sized up the labor situation. While the wanderer was devouring the food set before him he bitterly complained about the hard times. "But I had imagined that work was plentiful now," ventured Mr. Jerome. "Oh, yes," was the reply, "there is plenty of work all right, but if you belong to a union you have to be on strike most of the time, and if you don't belong to a union they won't let you work anyhow."—New York Times.

—Should the standard price of pig lead in the London market exceed £12 10s. per long ton, such bounty is to be reduced proportionately by the amount of the excess price. The Canadian Government has decided to pay a bounty of 75c. per hundred pounds, or $15 per short ton on lead, the bounty, however, not to exceed half a million dollars in any one year. It is stipulated, moreover, that if the charges for the transportation and treatment of lead ores in Canada are accepted, and that there is any discrimination in Canada in the smelting of lead the Governor-in-Council may reduce the bounty to such amount as may be deemed just on the lead contained in such ores mined in Canada and exported for treatment abroad. The bonus expires on the 30th of June, 1908. This arrangement will enable some of the mines of the Kootenay to re-start. But there is still a demand for greater protection.

THE HARBOR OF MONTREAL.

The Harbor Commissioners of Montreal did an eminently sensible and business-like thing when they took some sixty members of Parliament and of the Senate around the harbor of Montreal and showed them the improvements that have been made in it. The visitors were also made aware, we doubt not, of what is still necessary to be done for the port before it can be, as so many people desire it should be, a complete and up-to-date seaport, handling a very great proportion—not all, for in spite of Montrealers' boasts she can never handle all—of the exports and imports of the Dominion. Those who know Montreal and have watched, on the spot, the development of its harbor, have much admiration for what has already been done there, and much sympathy with the demands which her citizens continue to make for governmental assistance in building up the harbor and maintaining the channel through Lake St. Peter. But there are many, and members of Parliament among them, who are not aware of the volume of inward and outward trade handled at that important port. And it is well for such representative persons to see for themselves the needs of a seaport, and to judge how far the facilities at Montreal supply or fall short of them. Here, for instance, is a table showing in a dozen categories, what passed through the port outward:

Cheese, boxes	2,109,171
Butter, packages	539,845
Cattle, head	77,193
Horses, number	548
Sheep, number	45,831
Lumber, feet, board measure	240,472,113
Grain, bushels	21,105,080
Lard, tierces	212,376
Meats, cases	114,830
Canned goods, cases	95,564
Apples, barrels	483,496
Eggs, boxes	160,344
Hay, bales	691,747
Flour, sacks	938,536
Flour, barrels	132,792
Meal, sacks	33,035

Montreal can boast that she exports sixty per cent. of all the grain that leaves Canada, eighty per cent. of all the cheese and butter, ninety per cent. of all the apples, and a half at least of all the animals and dead meats. She is further entitled to boast that she returns one-third of the custom's revenues of Canada, for out of $36,000,000 collected in duties last year, Montreal's share was $11,803,300. A pamphlet supplied by the Commissioners to their guests described the harbor improvement works since 1888: the Hochelaga piers, the piers in front of the centre of the city, the extensions of wharves at Windmill Point, the basin, etc., at that point. It is ten years or more since the Guard Pier was begun, which now stretches its defensive length from the Victoria Bridge to opposite the custom house. It has been named the Mackay Pier, after the Hon. Robert Mackay, president of the commission, and has cost $355,000 exclusive of the railway tracking. Very important was the work of replacing the old wharves between the entrance to the Lachine canal and the Victoria pier with three high level piers of 300 feet wide by 825 feet to 1,014 feet long, with shore wharves of 210 to 240 feet in breadth. Then there was the widening of Common and Commissioners streets to widths of 80 to 100 feet, and putting a stone wall between the street and the wharves for the protection of the city from floods. The King Edward pier, begun in 1901, was ready to berth ships a month ago. The railway tracks in the harbor, too, have been raised to the modern high level. There remains now the making of roadways, the alteration of Victoria pier, and the erection of permanent freight sheds, with adequate fire protection. The Commissioners' grain elevator, of 940,000 bushels capacity, opposite St. Peter street, is nearly completed, and another, of 1,000,000 bushels capacity, is now being built by the Grand Trunk Railway at Windmill Point wharf, and a new high level wharf of 2,300 feet in length is being built on the southeast side of the basin. It is an unmistakable and urgent proof of the lack of adequate room at the Montreal wharves when we find the Dominion Line of transatlantic steamers this very week notifying the Commissioners that the steamers of that line must be taken to some other Atlantic port unless more berths can be found for them. At the same time there appears to be a lack of resolute supervision of the harbor itself, else the conditions of congestion and confusion complained of could not have lasted for weeks, as has been seen. Granted, that strikes have interfered with the movement of inward bound freight, there are still disabilities in the approaches to the harbor or elsewhere, which energetic action ought to remove.

The net expenditures on the construction of harbor enlargement and improvement works and charged to capital account are, we are told, as follows: 1898, $109,537; 1899, $203,202; 1900, $276,600; 1901, $360,024; 1902, $591,117; and to July 1st of the present year, about $250,000. Here is a yearly-growing expenditure, amounting since 1897 to at the present time $1,790,000, which should show with what determination the Montreal authorities are proceeding to the end that the port of Montreal may be equipped to do the great work that lies before it.

CURRENCY EXPANSION.

It is proposed to increase the paper currency of the Canadian Government from $20,000,000, its present limit, to $30,000,000, the larger amount to be secured, as at present, by a gold reserve of 25 per cent. for its redemption. A bill to effect this change is brought into the House by Mr. Fielding, the Finance Minister. There is not only justification but necessity for the change, because the requirements of the financial situation have of late years compelled the limit of $20,000,000 to be exceeded largely, to the extent of some $16,000,000 indeed, and in that case dollar for dollar in gold had, under the law, to be held by Government for the redemption of the extra notes. As the law requires that not less than 40 per cent. of the cash reserves of the banks must be kept in Dominion notes, any expansion of business causes increased demand for these notes on the part of the banks. But there is a great difference between the holding of a gold reserve of $16,000,000 against an extra issue of $16,000,000 and holding 25 per cent. against the extra issue. Under the new arrangement the $30,000,000 of Government notes issued will be secured by $7,500,000 of gold. The large quantity of gold formerly held against the extra issue, and now set free, is to be set aside, we understand, as a reserve against the Government Savings Bank deposits, which are now some $58,000,000. The move is a prudent one, for it is the part of wisdom to be able to exhibit some such buttress to the financial structure as this reserve implies.

ONE REWARD OF SPECULATION.

According to a St. Thomas telegram of recent date the ex-manager of the wrecked Elgin Loan and Savings Company, George Rowley, was brought on Saturday before the local judge, charged with forgery, theft and perjury, and pleaded "not guilty." The charges against Rowley embrace thirty-six instances in which he appears to have used other people's money as his own, to carry on his stock gambling operations. He began his peculations, it is charged, eight years ago, and continued them till the present year. The list of his irregularities contains only one case where he wronged any depositor in 1896, but in the next year he was bolder, or else more needy, for he is charged in 1897 with $12,589. Year by year his peculations grew, as alleged, till in 1900 and 1901 they reached $9,300 and $12,850. But in 1902 the pace must have become furious, for in that year there are instanced twelve cases amounting to $20,500. The total is placed at $67,185. No application was made for bail. Rowley is also charged with having in September, 1902, forged a document in connection with a bank transaction. Also with having forged a savings bank deposit receipt in the name of M. Laidlaw for $1,500 and using the same for his own purposes. Furthermore, with having on the 15th of February, 1903, sworn falsely to a statement of the company's assets and liabilities, to deceive the public.

So much for Rowley, the manager. But there is room for the belief that the directors of the Elgin Loan Company are blameworthy in that they not only had some knowledge of their manager's stock-jobbing operations but seconded them. One transaction is mentioned wherein they consented to a mortgage being accepted by the company for $25,000 on Rowley's house—worth perhaps $5,000—as collateral security for stock or bonds of a certain corporation in whose securities the loan company had no power, under its charter, to deal. This transaction will, no doubt, be thoroughly investigated. And if it shall be found that the president or any member of the board concurred in thus "whipping the devil round a stump" after such a fashion as is above outlined, some means should be found of punishing him. It is useless for legislators to frame and promulgate safeguards for the depositors or shareholders of a loan company if the laws they have framed are transgressed with impunity by managers and directors.

TERMINATING LOAN COMPANIES.

Correspondents have sent enquiries recently, as they have done many times before, as to the standing and probable lastingness of certain loan associations doing business in Ontario and elsewhere. One or two of the writers also ask for an explanation of the methods of terminating associations. (This explanation they seek, curiously enough, after they have paid in their money and presumably have agreed to all the rules and by-laws of the concern). And the whole burden of their cry appears to be: "Is our money safe." We answer, we do not know; it depends on the management of the company.

During the recent session of the Ontario Legislature, Mr. Downey, M.L.A., of Guelph, introduced the subject of forfeitures, that is, loss of money by the subscriber failing to comply with the company's rules. Mr. Downey asked for a definition of "terminating shares." He declared that people were induced to pay in their money into certain companies and when through stress of circumstances their payments ceased, they lost all they had deposited. The transaction, he declared indignantly, was founded on false business principles and intended to lure the unwary and ignorant. And then he gave an instance where one corporation gained $72,000 in three years through forfeiture of savings. This, he contended, showed the necessity of immediate action, and he asked if the Government were doing anything about it. In reply, the Attorney-General, Mr. Gibson, said that the system of terminating shares, with fines and forfeitures for non-compliance with a company's rules, was capable of being abused. He averred, however, that the Government was in no way responsible for the manner in which these companies carry on their business. He might have added, though, that the Government has a duty to see that the managers of such companies do not violate the law, and are not passing rigid and grinding by-laws which exceed the powers which an Ontario charter gives them. Mr. Gibson further stated that these companies were intended to encourage thrift, and he was disposed to lay the blame for any dissatisfaction with rules upon the personal canvasser. "Encouraging thrift" is all right: it is an excellent thing to encourage thrift. But the process of so-doing here in question reminds one of the method described by Tom Hood, of a butcher who was somewhat brutally belaboring a lot of sheep to get inside the gate of a certain pen to be killed. Being remonstrated with by a philanthropic bystander, who urged the butcher to "try con-

ciliation," that burly figure grasped in his arms a particularly restive sheep, and throwing it clear over the railing into the pen, replied grinningly to the objector: "Theer, maister; I've conciliated *him*." It is hard lines for a poor man or woman who, having with sincere punctuality made payments for years and having at last failed in some, is compelled to lose portions of preceding payments as a penalty. And as a way of promoting thrift it is not likely to be lasting, however effectual at the time, like the butcher's conciliation.

We have seen questions and answers in the British Columbia and Maritime Province newspapers as to the peculiar operations of certain companies with terminating or "maturing" shares. And the Pictou Standard of June 16th, after noting that "the people of Ontario are getting nipped by some of these companies," goes on to say that many of them are doing business in Nova Scotia and "there is not, as far as we know, anything to guard the depositor against loss.

The important circumstance is emphasized by the Standard that "the canvasser, an adept at his business, shows the gain in doing business with his company in preference to all others; produces a carefully worded bond or agreement, certificate, etc.—in all of which there may not be one sentence of a guarantee against loss—worth the paper on which it is written, or so worded as to make recovery very expensive, if not impossible. For a few years regular—yearly or half yearly dividends are paid. But if the company becomes *non est*, when or how is the depositor to get his dividend, his deposit or part of it? There are exceptions, but the ordinary man or woman is not capable of determining which is safe—and in any case we believe the better way is to trust our earnings to our banks. Though the earnings there be small the principal is safe—but best of all is to invest in some enterprise of which we have some knowledge and may have a share in making a success."

Since the above was written we have learned with satisfaction that the Government of Ontario has taken steps to regulate companies with "terminating shares." Indeed we are told that no new companies are to be allowed to collect dues on shares by monthly or weekly instalments, as has been done. The Registrar of Loan Companies will notify companies which collect instalments on shares, fixing a date next month on which such companies must adopt by-laws in accordance with the legislation passed at the last session of the Legislature. It will be provided that there shall be printed in bold, clear type on the books or cards of each subscriber a notice that the payments are not ordinary deposits, but are for withdrawable shares, a very necessary distinction. There will also be tables published, showing how much each subscriber is entitled to at the end of the term agreed upon. Rules are to be carefully drawn, so as to protect subscribers, and to enable any ordinary intelligent person to understand clearly the conditions attached to the shares. It was time that such restrictions were framed, and that the law did something to offset the disabilities which many credulous people imposed upon themselves in subscribing for shares under the glamour of clever and often unscrupulous canvassers for so-called loan companies.

—A telegram from St. John's, Newfoundland, states that the revenue of that colony for the fiscal year ended June 30th, reached $2,250,000, the largest annual revenue ever realized in the colony.

CROP PROSPECTS.

Nothing in the weather conditions during the week in Ontario has altered the fair prospect we have had to chronicle heretofore. There has been some hot weather, but it was mostly fair and cool. Nor do we hear any complaints from the Province of Quebec, where conditions have continued to be favorable. In the North West there is not exactly agreement as to the effect of the weather upon the crops, nor as to the probable extent of the impending yield. The disposition of the average Manitoban to exaggerate the quantity of wheat to the acre must be allowed for. In reading our correspondent's dispatch, which claims no more than "a good average," it will be noticed that the sanguine folk are predicting, as they usually do, "a record crop." Under date Winnipeg, 16th July, we are wired as under:

"For the past week the weather throughout the Province of Manitoba has been somewhat dry and cool, with only scattered showers in some parts. The large elevator companies here are predicting a fifty million to sixty million wheat crop as against 65,000,000 bushels last year. They say there was not enough rain in June and the rains later on had not such a beneficial effect; while other equally good authority predicts a record crop. Some parts are suffering from drouth, but on the whole the weather for the week has been satisfactory. The heads of grain are reported as filling well and there is almost sure to be a good average."

RUSSIAN TRADE.

Following up our article on the great Siberian Railway, we have procured some recent statistics, which we think trustworthy, of the character and extent of Russia's trade. In the year 1902, the total foreign trade of Russia, outward and inward, amounted to £142,781,000 or say $713,900,000. This aggregate was six or seven per cent. more than in 1901, but the increase was in exports, not imports. The imports into Russia last year were valued at $278,190,000, where in 1901 they were $281,275,000. More than half of these were products intended for industrial use; only one-sixth was food products. Her exports amounted last year to $435,715,000, where in 1901 they were only $385,185,000. About 64 per cent. consisted of food products and 31 per cent. of products for industrial use. The figures, if taken by departments, show that trade is increasing along certain avenues and declining along others. It appears, for example, that her export trade is declining with Turkey, Egypt, the East Indies and China, while increasing with other northern European countries, and decreases have taken place in the shipments of wheat, oats and forest products to France.

An article on the foreign trade of Russia appeared in a recent issue of the "Journal de St. Petersbourg," portions of which have been translated for the New York Journal of Commerce. They relate to foreign trade by the European frontier, the Caucasus and the Black Sea respectively. The frontier trade is of course the great trade. The following table shows the value of the imports by categories in 1901 and 1902:

Imports.	1901. Roubles.	1902. Roubles.
Food products	84,349,000	81,409,000
Products for industrial use	288,107,000	295,483,000
Animals	1,495,000	1,403,000
Manufactured articles	158,993,000	148,800,000
Total	532,944,000	527,095,000
	£56,255,000	£55,638,000

A rouble is about 52 cents. Of the total import trade in 1902, no less than 490,808,000 roubles represents the value of the trade by the European frontier, 12,320,000 roubles that by the Caucasus and Black Sea, and 23,967,000 roubles that of the special trade with Finland. That is to say, eleven-twelfths, or more, of her trade is done over the European frontier, leaving only less than one-twelfth for the Black Sea and the Caucasus. The principal countries of origin of the trade are indicated in the following table:

	1901. Roubles.	1902. Roubles.
Germany	208,823,000	202,886 000
Great Britain	102,913,000	99,307,000
United States	34,111,000	39,150,000
France	27,566.000	26,284,000
Austria-Hungary	24 858,000	23,506,000
China	21,440,000	19,446,000
Egypt	18 299,000	15,082,000
Netherlands	8,545,000	11,337,000
East Indies	6,590,000	10,190,000
Italy	10,224.000	9,213,000

The following table shows the value of the exports by categories in each of the years 1901 and 1902.

	1901. Roubles.	1902. Roubles.
Food products	430,955,000	526,189,000
Products for industrial use	256,697,000	258,267,000
Animals	20,224,000	21,558,000
Manufactured articles	21,939,000	19,263,000
Total	729.815,000	825,277,000
	£77,036,000	£87,112,000

The subjoined table shows the export trade according to frontiers. It is growing rapidly with Britain, Germany and the Netherlands. Also a little with the United States but apparently not with the east.

Exports	1901. Roubles.	1902. Roubles.
European frontier	607,628,000	708,255,000
Caucasus and Black Sea	83,488,000	78,992,000
Finland	38 699,000	38,030,000

Of these exports, the larger share goes to Germany, who received 203,596,000 roubles' worth last year as compared with 178,356,000 in the previous year, an increase of 12½ per cent. But the growth of her exports to Great Britain was still more remarkable, going up as they did from 156,751,000 roubles in 1901 to 188,775,000 last year, an increase of 17 per cent. The Netherlands come third in the list of countries to whom Russia exports largely: they took 103,000,000 roubles' worth last year.

Great hopes have been built upon the construction of the Siberian railway, and many predictions have been indulged in as to the future greatness of the traffic it will carry. But while the traffic has certainly grown, it must be admitted that thus far the commercial policy of Russia on the Pacific shores is not encouraging. Vladivostok, which used to be virtually a free port, was to be the most wonderful of ports on the Pacific. But at the beginning of 1901 Russia imposed such heavy duties that the business of the place was almost killed, the foreign trade being ruined. The fact that Vladivostock, being pretty far north, was ice-bound for several months of the year, compelled in recent years the seeking of a terminus for the trans-Siberia railway farther south. It was found on the warmer waters of the Gulf of Pechili. There, despite of China, she has built besides the naval and military arsenal of Port Arthur, another city, named Dalny, advertised as a free port. It has not proved a satisfactory port, however, to foreign traders, and the development of trade by her Siberian railway is hindered by the arbitrary character of Russian regulations and their lack of modernness.

BUILDING TRADES RESUME IN NEW YORK

The intelligence from New York that twenty thousand of the skilled mechanics in the building trades of New York city returned to work on Monday last under the modified plans of the Employers' Association, is welcome. It is further stated that the number of men at work would be increased to 50,000 on yesterday, unions with that membership having voted to accept the terms of the employers. It is especially satisfactory to learn that one of the terms abolishes walking delegates and refers all disputes to a joint board of arbitration. For the trades unions to get rid of walking delegates, most of whom were firebrands and some of whom were flagrantly dishonest, is a triumph for the cause of honest and reasonable labor. The despatch of Monday adds that the United Board of Building Trades held a long and stormy meeting on that day. The four unions which accepted the plan of arbitration offered by the Building Trades' Employers' Association, and which sent their men back to work to-day, were expelled from the board. These four unions are Mosaic and Encaustic Tile Layers, the Hexagon Labor Club of Tile Layers' Helpers, the Electrical Workers and the United Cement Masons.

THE INTEREST IN CURRANTS.

As is well known, the main modern production of Greece, or at any rate, the one which renders that historic country famous commercially to-day throughout the world, is currants, or as they are known there, Corinthian grapes. The acreage devoted to this crop is about 170,000 acres divided among some 85,000 cultivators. At present prices, and under present conditions, the returns from the industry are barely sufficient to make it pay; but this does not prevent matters connected with it being the chief centre of interest, and the main theme of conversation, and of newspaper articles for several months of each year. As is the subject of wheat to the farmers of our own Western provinces during the growing summer time, so are currants to the people of Peloponnesus and Patras—only more so. Every now and then a "crisis" arises in the trade, owing to the over-production which has almost become chronic, a feature which, no doubt, would be even more marked than it is, were it not for the periodic visitation of the dreaded peronosporos, the blight produced by which, while doing at times immense damage, yet prevents prices from falling to absolutely ruinous depths.

Another thing which is intended to have a similar effect is of a more artificial character. This is governmental interference, taking the shape of what is known as the Retention Law, by means of which the surplus crop over a certain quantity has been sold at a comparatively low price to local distillers and wine makers. In the past, the proportion "retained" was not to exceed 20 per cent. of the crop, but this often being found not to satisfy the requirements of the case, over and anon a cry is raised for larger retention powers, or for the entire removal of the restriction as to percentage.

This is what has been going on during the last six months or so, but then, while the excitement was running at its highest—and the Greeks are an excitable people—the offer was made by a British syndicate, with a capital of $1,000,000, to purchase during the next twenty years the entire crops up to 150,000 tons annually, at fixed prices, according to well marked grades and sizes. In exchange for this, the company would have the sole privilege of exporting currants form Greece. The idea was received by a majority of the growers in Greece with avidity, the guaranteed prices suggested being considerably better than those which have prevailed as a general average. Owing to the protracted discussion which took place, however, in the Grecian Parliament, and to many proposed modifications in the contract, there is a chance that the negotiations may fall through, although there seems to be a likeli-

hood of ultimate success. To guard against the resentment of disappointed growers, and to prevent prices from declining unduly this season, the Government, in conjunction with a useful institution known as the Currant Bank, has evolved a measure whereby it agrees to purchase any currants which may be offered, at a certain price, which is equal, unless exchange alters very considerably, to about 11s. 6d., f.o.b., in quarter cases.

In the meantime it may be noted that the currant market in London is at present very firm—and it is London which is the primary market, so far as this continent is concerned. France, New York, and the other chief consuming markets also report good demand. Against this, the growing crop is progressing quite favorably, and promises to be plentiful; but, of course, if the plans of the new syndicate be carried out, the goodness or poorness of any particular crop will probably not make so much difference in cost of the exported article as has been the case heretofore.

MUNICIPAL RIGHTS.

On Tuesday last, at Ottawa, the Premier and three members of his cabinet received a deputation, representing the Ontario Government and various municipalities of Ontario and Quebec, who made known their views on the points raised in connection with the Toronto and Hamilton Railway bill. The memorandum they submitted to the cabinet recited the following principles, which they desired to affirm:

"(1) That undertakings entirely provincial, and essential for local or municipal purposes, should not be removed from municipal control, by the mere declaration that such works are for the general advantage of Canada.

"(2) That no such declaration should be made in any case until the Government and Parliament are satisfied by actual proof that the declaration is true.

"(3) That all street railways or tramways constructed and operated wholly or in part through the streets or highways of a municipality are essentially of a local character, and should be left under the jurisdiction of the local Legislatures and municipalities.

"(4) That the local Legislatures have hitherto dealt with the incorporation of such railway companies, and have provided safeguards for the construction and operation of such railways, and their right so to do should not be interfered with.

"(5) That the construction of an electric railway from the City of Toronto to the City of Hamilton, as proposed in the bill No. 147, now before Parliament, is not a work for the general advantage of Canada."

This memorandum was signed by the Mayors of Montreal, Toronto, London, St. Catharines, Kingston, St. Thomas, Ottawa, and by the city solicitors or representatives of Hamilton and other municipalities. Also by a special representative of Victoria, Vancouver, Winnipeg, Brandon, Sherbrooke, Charlottetown, St. John, Peterboro, Brantford, Richmond and Westmount. So distinct a statement of opinion, from sources as widespread as these, should have the effect of modifying any disposition to override provincial or municipal control by pronouncing the proposed work of any coterie to be one "for the general advantage of Canada."

A SPECIMEN ESTATE.

Another specimen list of creditors and record of an assignee's administration of an insolvent estate has been sent to us, apparently for comment. When creditors get a reasonable dividend out of an estate, say sixty, or fifty, or even forty cents on the dollar, they are not, as a rule, disposed to make trouble. But when they are forced to be content with twenty, or ten, or even five per cent. as a dividend, their voices are likely to be lifted up to know why these things are thus. The estate now in question pays 9¾c. Unpleasant reading as the particulars make, such literature has a value. It is valuable "for reproof, for correction, for instruction in"—giving credit. While merchants and manufacturers rail at the heavy charges often made by lawyers and assignees in winding up small estates, and at the law which permits such charges, they may profitably consider at the same time whether they themselves have not been culpable or foolish in selling to the insolvent.

The present circular concerns the estate of Bessie Simon, doing business at Greenfield, in Glengarry County, Ontario, and also at Vankleek Hill, Ont. The assignee is Mr. George Hearnden, and he shows that the assets have been sold by tender for a total of $3,190, whereas the estate has liabilities of $13,447. True, this sum realized would have paid nearly twenty-four per cent. to creditors had there been nothing else to pay. But of a truth there was something else to pay. The assignee's circular tells us what it was:

Legal expenses and settlements of suits...	$733 27
Guardianship, stocktaking, expenses of assignee to Montreal and Cornwall, etc., attending to suits	580 00
Privileged claims, rents, salaries, etc.....	286 00
Inspectors' fees	100 00
Commission, 5 per cent. on $3,190	159 50
Preparing and posting dividend sheet	20 13
Total disbursements	$1,878 90

Here is an expenditure which sweeps away almost three-fifths of all that had been realized from the assets. The largest items are especially provoking to creditors: $733 for legal expenses, and $580 for stocktaking, guardianship, and various expenses. Thirteen hundred dollars in two items! This is enough to cause, if not to excuse, profanity in many counting houses in two provinces. We do not say the spending of so much money and legal effort was unnecessary, for we do not know the exact circumstances of the estate. But where three-fourths of the par value had already been expended in realizing the other fourth, to have *two-thirds of this other fourth* go in paying fees to lawyers and officials is exasperating.

A word now as to the share which creditors themselves had in the *fiasco*. There are sixty-eight creditors, of a trader with small means, who has been conducting two stores in Eastern Ontario at places not twenty miles apart. These sixty-eight manufacturers or wholesale houses sold Mrs. Simon $13.447 worth of goods on credit, in sums varying from ten dollars to fourteen hundred dollars each. Forty-one of them are houses in Montreal; six in Toronto; four in Ottawa, others as far west as Norwich, and as far east as St. Hyacinthe and Sherbrooke, Farnham and Rock Island; some few close at home. Mrs. Simon must have had a varied stock, for among her creditors are all sorts and conditions. She sold whips and drugs, hats and corsets, essences and biscuits, clothing and harness, wall paper and jewellery, tobacco and oysters, hardware and crockery, dry goods, shoes, and apparently soap. If she did much trade in groceries, she must have bought them mainly from one house, for we perceive that the largest creditor is a grocery house, and we can trace few others in the same line. Mrs. Simon could have bought all she needed for a reasonable stock of a country store, from ten or a dozen houses. How comes it then that she deals with sixty odd? There are a dozen clothiers and dry goods men in the list of her creditors, half a dozen furriers, five or six shoe dealers in four different towns or cities. She bought woodenware in Norwich and tobacco in St. Eustache. Did any one of the sixty-eight creditors know that the other sixty-seven were selling goods on credit to Mrs. Simon? Or did any of them take the trouble to enquire how much she owed? If they did not, and if they were content to sell her $100 or $200; $600 or $800 bills without any further enquiry or knowledge, how can they be surprised if they make a loss of ninety and a quarter per cent. of all she owed them?

A HALF-YEAR'S FAILURES.

The first half of the year 1903 has shown a further remarkable contraction in the number of Canadian business failures. Up to the end of June last they totalled 480, as compared with 603 last year, and the liabilities were $4,446,743 and $5,103,404 in each case. The following table, compiled by Bradstreet's, summarizes the matter:

	No. of Failures, 1903.	Liabilities.	No. of Failures, 1902.	Liabilities.
Ontario	214	$2,631,180	230	$1,782,133
Quebec	184	1,248,484	224	1,770,590
New Brunswick	9	33,200	17	112,525
Nova Scotia	15	111,300	40	148,782
Prince Edward Island	7	121,500	5	35,925
Manitoba	19	89,483	21	81,390
Northwest Territories	4	11,796	12	88,268
British Columbia	27	198,300	53	1,073,791
Yukon Territory	1	1,500	1	10,000
Total	480	$4,446,743	603	$5,103,404

The assets are estimated this half-year at $2,115,301, which is equal to 47 per cent. of the liabilities, where in the 1903 half-year the assets were only 44 per cent. of the liabilities.

OUR HALIFAX LETTER.

The commission appointed to expend the Government grant of $10,000 for the erection of a suitable monument to the late Hon. Joseph Howe, recently met in this city and decided on a bronze statue of the celebrated statesman to be placed upon a pedestal of Nova Scotia granite, the statue to be erected in the Province Building Square. Artists in Canada and the United States are being asked to submit models and estimates of cost. The erection of this long delayed monument to the Father of Responsible Government in this province, is none the less appropriate at the present time when the organization of the Empire is occupying so prominent a place in the British mind. If the consolidation advocated by Chamberlain be effected, Howe will rank as one of its earliest and ablest and bravest champions.

The fishing industry on our shores and on the banks has been very successfully prosecuted so far this season. The Spring Bank trip was 25 per cent. better than last year, and the price opened at $3.50, ex-vessel, a very fair figure. The lobster catch was above the average, and the price unusually high. The spring mackerel catch was large, especially in the eastern end of the province, and the summer run is satisfactory. The establishment of a deep sea fishing fleet at Louisburg, C.B., is now assured. Louisburg residents have subscribed $20,000, the town, $500, and $50,000 has been subscribed at Glace Bay.

The Provincial Government has awarded the contract for the erection of the new building for the College of Agriculture at Truro. It will cost $28,000 and will be unsurpassed in all its appointments. Construction is to begin at once, and it is intended to be ready for occupancy on December 29th. The college will be conducted on lines similar to those which obtain at Guelph. Last summer the local Government equipped a travelling dairy and sent it in charge of Miss Rose, of Guelph, on a tour of the province, for the purpose of instructing our farmers in the most approved methods of butter making. This school proved so successful and did so much good that this year the Secretary of Agriculture has equipped and sent out two travelling dairy schools. A day or two is spent in a district, the process of butter-making exemplified during the day, and a public lecture given in the evening.

Following upon the oil and gas developments now being made at Cheverie, in Hants Co., a number of gentlemen in Halifax and vicinity having had brought to their notice strong indications of the probable existence of oil, secured some 16,000 acres of land in the Milford and Elmsdale districts and decided to form a company for development purposes. An organization meeting was recently held in this city, when a capitalization of $1,000,000 in shares of $1 each was decided upon, the concern to be known as the Eastern Hants Oil and Gas Company, Limited. The officers of the company are: J. A. Gass, president; J. Burton Mitchell, vice-president; H. S. Moir, secretary-treasurer; Dr. W. F. Smith, trustee.

Negotiations are being carried on for the sale of the Renfrew gold mine to a syndicate of Boston capitalists, who have paid the owners $20,000 to bind the option. This property is the property of Evan and Charles Thompson, and is one of the richest gold mines in Nova Scotia. According to the Government returns in the last three and a half years, up to January last, $200,000 worth of gold has been taken from the mine. The sale price is, I understand, in the neighborhood of $150,000.

An American company recently commenced the quarrying of selenite (gypsum, in transparent crystals), at Elmsdale, east of Windsor, and last week loaded a steamer of 1,600 tons, at Halifax, for New York with the material. Selenite is used in making house plaster, and the management of the company hope to have an output of 100,000 tons a year, and to make regular shipments to the United States.

A very extensive tanning establishment is being established at Ingram River, in Halifax County, by the Messrs. Beardmore, of Toronto, who some months ago acquired an interest in the Young lumber properties in this vicinity. It is intended to manufacture sole leather for the export trade. The company will send the lumber from their own mills to the South American market, and bring back return cargoes of hides which can be landed here at a considerable saving in freight. The tanneries when completed are to be the largest in Canada, and will have the benefit of both railway and water transportation, a branch of the Halifax & Southwestern Railway being built to the works.

The union carpenters in this city are out on strike, and building operations are suspended. A short time ago the contractors and men arbitrated their differences. The men sent the decision of the arbitrators to the union board in the United States, and were told they need not stand by it, and so it was decided to strike.

There is a great deal of railway building going on at present in Nova Scotia and laborers are in strong demand. The Intercolonial is being double-tracked between Bedford and Halifax, and new 80-lb. steel rails being laid to Truro. Work began last week on the Halifax section of the South Shore Railway, and the construction of other sections is in progress. Progress is also being made on the line from New Glasgow to Country Harbor, which it is considered is destined to afford the Mackenzie & Mann system an Atlantic outlet.

It is believed the new iron and steel bounties will be of great advantage to the Sydney industries and will result in renewed activity in that quarter and the rapid completion of the plant for the manufacture of wire rods, structural shapes and rolled plates. The stock market has not been helped, as the bounties are regarded as affording temporary relief, and not having the permanency of tariff protection. The directors of the Dominion Iron & Steel Co. are at present holding a conference at Sydney regarding future plans. So far they have been very reticent regarding the effect of the new bounties.

The officials of the Plant Steamship Company recently visited the points served by the line. At a meeting in Halifax a new bond issue was decided upon, but the amount of the same and the particulars will not be announced until the annual meeting in August.

Halifax, 14th July, 1903.

—We are informed that the Union Bank of Canada has opened a branch at Haileybury, in the Nipissing district of New Ontario.

EXPECTED CROPS IN THE STATES

The United States Department of Agriculture has published preliminary statistics regarding the condition of various crops. Of spring wheat on July 1st, taking 100 as a basis, the average condition was 82.5, as compared with 95.9 last month, and 92.4 on July 1st, 1902, and a yearly average of 95.9. Winter wheat on the 1st inst. was 78.8 compared with 82.2 last month, and 77 on July 1st, 1902, and a ten-year average of 78.2. The acreage of corn planted is about 89,800,000 acres, a decrease of 4,200,000 acres, or 4.5 per cent., from the area planted last year. Its average condition on July 1st was 79.4, as compared with 87.5 on July 1st, 1902, 81.3 at the corresponding date in 1901, and a ten-year average of 89.8. The expected yield of corn this year is 2,262,960,000 bushels, which is at the rate of over 25 bushels per acre. The quantity of wheat remaining in the hands of farmers on July 1st is estimated at about 42,500,000 bushels, equivalent to about 6.3 per cent. on the crop of last year. The average condition of the oat crop on July 1st was 85.3, as compared with 85.5 one month ago, 92.1 on July 1st, 1902, and a ten-year average of 87.8. The average condition of barley is 86.8 against 91.5 one month ago, 93.7 on July 1st, 1902, 91.3 at the corresponding date in 1901 and a ten-year average of 83.

The average condition of winter rye is 90.2, as compared with 91.2 on July 1st, 1902, and a ten-year average of 87.5. The acreage of flax is about 500,000 acres, or 13.5 per cent. less than that of last year, and the condition is 86.2. The acreage of tobacco is about 7,000 [illegible] per cent. greater than that of last year, and the condition is 85.1.

RESUMPTION OF AMES & CO.

The firm of A. E. Ames & Co., stock brokers, of Toronto, who suspended payment on the 2nd June last, reopened their doors on Monday, 13th July. The firm had made, as we announced, a proposition to their creditors to pay in full, offering one-fourth in cash on 15th July, and the balance in three equal instalments to be dated six, twelve and eighteen months thereafter, with interest of 6 per cent., on the unpaid balances. The offer was agreed to by the firm's creditors generally, and quite a number received cheques on Monday last for the instalment due on the 15th. It is said that the amount paid out by the firm in cash this week was about $140,000. Besides the cash, scrip for one-quarter of the stock held by them for clients at the time they made the offer of settlement was sent out.

THE CHAMBERS OF COMMERCE VISITORS.

By the courtesy of a friend in Montreal, we have a copy of the official itinerary of Canadian tours in connection with the fifth Congress of Chambers of Commerce of the British Empire, which is to be in session in Montreal, August 17th to 20th. It is divided into three parts: The first covers from Montreal to Ottawa, Toronto, Niagara Falls, Detroit and the Muskoka lakes—1,443 miles. The second, Toronto to North Bay, Winnipeg, Victoria, the Kootenay, Sault Ste. Marie, Ottawa, back to Montreal—6,604 miles. The third takes in Quebec, Miramichi, Fredericton, St. John, Halifax, Sydney, Rimouski, and back to Quebec—2,216 miles. The whole itinerary thus covers something over ten thousand miles, and is appropriately described as a rapid survey of Canada. The time allotted is six weeks, and the visiting British Empire people are to reach Quebec (having begun the series of tours on August 22nd), on their return journey by October 4th. All accredited delegates will be transported free, and the Canadian Government pays their sleeping car fare. Wives of delegates are accorded like privileges, and a member of Canadian Committee of Arrangements will accompany each sleeping car to give information. A stenographer and typewriter will be on board the train for the convenience of travellers.

ELGIN LOAN COMPANY.

The liquidators of the Elgin Loan Company, St. Thomas, Ont., have presented a preliminary statement as to the condition of its affairs. This has been arrived at after a careful valuation of the securities, but, it is explained that the amounts claimed by depositors, as appearing in their passbooks, but of which no record is to be found in the company's ledgers, although added in the liabilities, are not yet admitted as debts. The genuineness of the entries will have to be proved. Under assets appear mortgages on real estate, $261,843; loans on debentures and other securities, $93.354; cash in bank and in hand, $1,124. Liabilities.—Savings bank deposits, $322,858; due to Imperial Bank, $10,-543. The nominal surplus is thus about $22,920, in addition to which should be possibly added deposits in Atlas Loan Co., $31,423, and the amount of Atlas debentures, over and above estimated value of Dominion Coal stock, held as collateral, $13,440, besides a few minor items, such as Geo. Rowley, the manager's guarantee bond of $10,000. The defalcations of this official are placed at $187,620, no small achievement for so "good" a man as he appeared, and indeed used, to be.

MODERN MONTREAL.

"The number of streets in the city and its outskirts is 810. There are about 50,000 residences in the city and about 9,500 stores and offices. Our returns give about 1,200 unoccupied stores, houses and tenements, a large decrease on the number reported last year." These facts and figures concern Montreal, the greatest of Canadian cities, and are taken from Lovell's Directory of that city for 1903, just issued. Directory publishers have very good means of judging the population of a place, and it is interesting to know that the Messrs. Lovell estimate the present population of Montreal, without the suburbs, as 287,000, and with the suburbs at 360,000. In 1891 the population of the city was 220,181, and in 1901 it was 266,826, so that growth has been steady, while the suburbs have increased in size and importance.

The directory contains, we are told, about 91,000 names (exclusive of Lachine, Laprairie, Longueuil, St. Lambert, and St. Laurent), villages which are across the river, or "round the mountain," or up the lake. We read of the earlier directories of Montreal, in the days of relatively small things, as follows: "In 1841, the first volume of the Montreal Directory, compiled by Robert W. S. Mackay, and published by Lovell & Gibson, was issued from the same premises as occupied by the present publishers. It was a small book, 4¼ by 6¾ inches, and contained 272 pages. In 1864 the work contained but 526 pages, and in 1884 the number of pages had increased to 800, whilst the present volume contains 1,560 pages in a small, clear type, and with matter much condensed."

FINANCIAL ITEMS.

A number of Nova Scotia financial institutions have announced their half-yearly dividends, among them being the Bank of Nova Scotia at the rate of ten per cent. per annum; Royal Bank of Canada, eight per cent. per annum; Bank of Yarmouth, five per cent. per annum. The Eastern Canada Savings & Loan Co. declares at the rate of six per cent. per annum; the Acadia Fire Insurance Co. a half-yearly dividend of five per cent.; Halifax Fire Insurance Co. a half-yearly dividend of five per cent.; the Nova Scotia Steel & Coal Co. quarterly dividend of two per cent. on preferred shares. The shareholders of the Exchange Bank of Yarmouth have approved the terms of sale to the Bank of Montreal, and the transaction, by which the smaller bank is merged in the larger, is therefore closed.

Referring to the failure of a little bank at Cornwall on the Hudson, the New York Journal of Commerce says: "If a bank of large capital and an efficient organization could

maintain a branch or an agency at a small place like Cornwall, it would afford much better facilities and keep a closer watch upon its affairs. There would be less danger of loss, and if it came the resources of the bank would promptly repair it and the community would not suffer. These small banks have been established by the hundreds all over the country are weak spots in the National system, and if a time of financial stress should come they would cause a good deal of trouble."

At the last meeting of the Public Accounts Committee of Halifax, the following resolution was recommended to the council: "Be it further resolved that the City of Halifax do forthwith borrow from the Royal Bank of Canada the sum of $100,000 to be applied for defraying expenditures for which the taxes of the current year would if now collected be applied, to be repaid to the said bank out of the said taxes when collected, and that the city treasurer be authorized on behalf of the City of Halifax to negotiate the said loan and to pledge the credit of the City of Halifax therefor." All the local banks were written to regarding the loan, and the Royal's terms were considered the best. The charge is 6 per cent. on the loan, and the city is allowed 6 per cent. on any money it may bank on current account in reduction.

Counterfeit 50 cent pieces are in circulation in Eastern Nova Scotia. The spurious coin made its appearance since the visit of the Pan-American circus, and by some is attributed to fakirs following the show. The counterfeits are good imitations of the Newfoundland half-dollar, dated 1900, and are somewhat difficult to detect.

The American Bankers' Association is to meet, as we have already noted, in San Francisco, in October, from the 20th to the 23rd. Other coming conventions of bankers are to be held, according to the Bankers' Magazine, as under: Illinois Bankers' Association at Rock Island, July 28th and 29th; Indiana Bankers' Association at South Bend, September 9th and 10th; Iowa Bankers' Association at Davenport, July 28th and 29th; Kentucky Bankers' Association at Hopkinsville, September 16th and 17th; New York State Bankers' Association at Saratoga Springs, September 9th and 10th; Pennsylvania Bankers' Association at Pittsburg, September 23rd and 24th; South Carolina Bankers' Association at Columbia, October 6th; Washington Bankers' Association at Whatcom, July 23rd to 25th; Wisconsin Bankers' Association at Milwaukee, August 5th and 6th.

The bill respecting penny savings banks has been held over this session. It provided for the establishment of voluntary associations with limited capital desirous of encouraging savings of small amounts; these to be deposited in Government savings banks, at a slight advance on the ordinary rate.

THE LUMBER TRADE.

While in a few grades of lumber a certain amount of easiness has been displayed by Toronto dealers, perhaps on account of the continued unsettled condition of the building trades, prices for the most part may be said to retain their firmness. Throughout Ontario, and indeed, most other parts of Canada, this has been quite markedly the case; and indications point to a continuance of good conditions. Business has, to a certain extent, been hampered by the strikes and the uncertainty reigning in several trades, but on the whole it has been fairly active in lumber, and little complaint can be made. The export trade, too, has been fully up to its usual dimensions.

Farnworth & Jardine's (Liverpool) circular, dated 1st July, 1903, gives the following particulars as to the outlook for the lumber trade in Great Britain: The business of the past month has again been of a quiet nature, with little change of importance to report; the new season's imports have arrived freely, the deliveries have been satisfactory, while stocks generally are not excessive. Values of most woods rule high. Stocks of pitch pine are excessive. Waney, chiefly on contract, has arrived freely, and goes largely direct into consumption, values rule high. The demand for square is limited, the deliveries have been disappointing, and the stock, which consists chiefly of lower grade, is sufficient for present requirements; prices are steady. There has been a moderate import of red pine, the demand is limited, prices are firm, and the stock light. New season's oak has arrived on a moderate scale; the demand is quiet, prices firm, and stocks of first quality, although light, appear sufficient. Of elm, the import consists chiefly of first-class rock elm on contract, and there has been a fair consumption, prices are steady, and the stock fairly moderate. The demand for ash is dull. Pine deals are now arriving more freely, the deliveries have been fairly satisfactory, and stocks are not too large; there is little change in value to report. Red pine deals continue dull of sale; stocks are sufficient. Referring to New Brunswick and Nova Scotia spruce and pine deals, the past month has supplied the largest June import for many years, viz., 15,630 standards against 10,000 standards for the corresponding period last year. The deliveries, although not brisk, have been fairly steady, and stocks are not excessive. Owing to reported drought in Canada, causing a large quantity of logs to be hung up, and also disastrous forest fires, prices have hardened, and the latest sales have been at a slight advance. Pine deals are only in limited demand; prices are steady. Birch logs have arrived more freely and chiefly from Quebec; the deliveries have been fair, but the stock is sufficient; prices are unchanged. Planks have also arrived freely, but the consumption has fairly kept pace, and although stocks are not excessive, prices continue very low. Of British Columbian and Oregon pine there have been no fresh arrivals, the demand is limited, and prices are firm; the stock is sufficient.

INSURANCE NOTES.

The International Association of Accident Underwriters, which held its sixteenth annual convention at the Hotel Frontenac, in the Thousand Islands, last week, and to which we referred in last issue, elected the following officers for the ensuing year: President, Edward S. Lott, United States Casualty Co., New York; vice-presidents, Arthur L. Eastmure, vice-president Ontario Accident Insurance Company, Toronto; George S. Dana, Commercial Travellers' Mutual Accident Association of Utica, N.Y.; treasurer, A. E. Forrest, North American Accident Co., Chicago, Ill.; secretary, G. Leonard McNeill, Massachusetts Mutual Accident Association, Boston, Mass. Executive Committee, W. B. Smith, Hartford, Conn.; W. H. Jones, Boston, Mass.; H. G. B. Alexander, Chicago, Ill.; F. E. Haley, Des Moines, Iowa; F. J. Moore, Philadelphia, Pa.; R. A. Kavanagh, Chicago, Ill.

The Insurance Commissioner of Wisconsin has issued a circular giving the names of unauthorized companies operating in that State and warning business men against these fraudulent organizations. The extent to which the formation of such companies has been carried, particularly in the West, is probably not dreamed of by the uninitiated, and relatively few, even of those engaged in active business and carrying large policies, are aware that they are in constant danger of being mulcted of heavy premiums for policies upon which no recovery can be made in case of loss. This evil, however, is not confined to fire insurance, but has spread widely throughout the life insurance field as well. In Wisconsin, Iowa, Illinois, Ohio and other important States the bogus insurance evil is now at its height. It is stated on good authority that, in Iowa, numbers of State officers, when thrown out of office by some turn of the political wheel "go into the insurance business." These men become connected with some one of the doubtful companies at Des Moines or elsewhere, and exert their united influence to prevent the enactment of laws designed to protect the innocent public. The result has been an era of "liberality" in legislation, and of laxity even in the enforcement of existing laws. The local press has been debauched by large and profitable advertisements, and public opinion has thus been muzzled. Other States are not far behind Iowa in the scandalous conditions thus sketched.— Commercial Bulletin.

A test of the town of Glace Bay's recently installed water-works system was made not long since, in the presence of M. Fahie, Secretary of the Maritime Board of Fire Underwriters. Mr. Fahie expressed himself as well pleased with the efficiency of the service.

Since its formation at the opening of the coal mine in the seventies, the town of Springhill has suffered through lack of a proper water supply. Owing to its altitude, the installation of a water supply can only be accomplished at an expense hitherto considered beyond the resources of the mining town. As a consequence, insurance rates ruled high, and during the summer months as a consequence of insufficient water, there has also been a high rate of mortality, especially among children. At last the citizens have decided to introduce a complete system of water-works. The source of supply is between seven and eight miles distant from the town, on the South Branch of the Maccan River, and the estimated cost is in the vicinity of $100,000.

It is stated that life assurance policies to the amount of more than ten thousand millions of dollars are to-day carried in the United States. An authority on life insurance matters has been gathering some striking statistics on the subject of insurance policies and payments. In 9,333 cities and towns in the United States during the year 1902, the total distribution to policy-holders and their beneficiaries exceeded $320,000,000. In the distribution of this sum among the larger cities, New York holds first place, $22,945,475 of the total sum having been distributed here in 1902. Philadelphia follows the Metropolis with a record of receipts aggregating $8,926,089. Chicago holds third place with a record of $6,922,457. In each case these figures show an advance over those of the preceding year.

FOR GROCERS AND PROVISION DEALERS.

The D. Wade Co., Limited, have erected a pork-packing factory at Leduc, N.W.T., which is reported to have a splendid plant and good prospects of success. The president of the company is Mr. T. R. Glanville, and the manager, D. Wade.

A railroad official estimates next season's California orange and lemon crop at 35,000 carloads, which would be considerably the largest on record. This is rather a premature guess, however; so many things may happen. So far this season the product shipped out has amounted to 20,217 carloads, with about 2,000 more to go out.

Old currants, raisins and prunes, or samples which have lost freshness or grown dusty by exposure in the show-window, can be made to look quite new by being shaken up in a coarse meshed sieve, after which they should be sprinkled with a solution of one-third molasses and two-thirds water, and again shaken together until they look as good as new.—Exchange.

From a London letter, written at the end of June, we learn that the Imperial Cold Storage Company had an opening at Nottingham of the first store it had built, and another store was to be opened in a few days at Chesterfield. The letter adds: "We are now already receiving goods at our Poplar warehouses in London, and I hope to be able to give you some further news from time to time, which might be of interest to your numerous readers."

The result of the labors of the Dominion Government analysts, in testing various canned meats, has, on the whole, been satisfactory. Altogether, there were analyzed ninety-nine samples, and of this number two samples were found to be quite spoiled, three others slightly so, and the remaining ninety-four were in good condition. One of the slightly-spoiled samples contained boric acid, but with this exception all samples containing preservatives were found to be in good condition. The only preservative discovered was boric acid, and in no case did the quantity of the same acid exceed the limit fixed by the British Parliamentary commission, viz., .05 per cent., and in most cases it fell markedly below that amount.

Considerable improvement is apparent in the movement of sugars, the recent all-round advance having evidently stimulated the demand.

The combined sections of the Retail Merchants' Association, of Toronto, held a monster picnic in the Exhibition grounds on Wednesday last, at which over 6,000 people were present. It was a great affair.

For a few days early this month there was a strike among the salmon fishermen along the Fraser river in British Columbia. The canners' terms have now been accepted, however, and everything promises to go on smoothly during the season.

The shipments of cheese from Montreal last week were large; they amounted to 136,894 boxes, which quantity is in excess of the corresponding period last year by 50,350 boxes. These shipments went to London, Bristol, Liverpool, Glasgow and Leith.

The gross profits of the Lipton Tea Company, London, for the year ending June 30th, 1902, were £226,915, with expenses of management at £45,559. The directors have recommended a final dividend for the year on ordinary shares at the rate of 8 per cent. per annum. The sum of £10,000 was placed to reserve, and £4,814 carried forward. For depreciation, the sum of £19,630 was written off.

A recent report from London stated that the market in the United Kingdom for Canadian butter could not be called brisk, but there was a steady demand and a fair amount of business passing. Prices are slightly easier, and "choicest" brands of salt might then be bought at 94s. on spot, while saltless of fine quality brought 96s., and in extra fine samples even 97s. per cwt. Imports for the two weeks ended July 3rd showed increasing quantities, although far below the corresponding period of last year. The arrivals of Canadian cheese, although much in excess of last year, were not sufficient to cause an accumulation and consequent falling prices, nevertheless values showed no signs of advancing, and it seemed very probable that c.i.f. quotations for "choicest" quality might soon be in the "forties." Spot prices might be quoted as 52s. to 53s.

IN THE DRY GOODS STORE.

Of the cotton mills in Fall River, Mass., which possess a total of about 2,800,000 spindles, about one-eighth of this number have closed down.

The Alaska Feather and Down Co. give notice of advances of from 7½ to 10 per cent. in the price of cushions, pillows, cosies, etc.

Nothing new has developed in raw silk conditions. These point to a fairly strong market in Lyons, Milan and other European centres.

The recently-developed weakness in raw cotton continues, and the New York market continues very easy, in sympathy with bearish crop reports. Prices for near delivery have declined several points.

Mr. B. N. Fraser has bought the premises of the Manitoba Felt and Yarn Works, at Brandon, and will convert them into a woolen mill, under the name of the Brandon Woolen Mills Company.

A company in which Messrs. R. Millichamp and Dr. B. Nesbitt, of Toronto, and C. Kloepfer, of Guelph, are interested, has been formed for the purpose of erecting a linen factory in Bracebridge, the surrounding country being considered a good flax-growing region.

The offerings at the London wool auction sales on the 14th inst., numbered 13,116 bales. Competition was spirited and prices were firmer. Crossbreds were bought freely by the home trade. Half-bred combings and scoureds were in strong request for France. Scoureds were in active demand for Germany. Broken wools sold at the highest prices of the series. Cape of Good Hope and Natal grades were in better demand. Several lots of medium slips and half-bred lambs were taken by American buyers.

"We are selling a better grade of goods," is the report which has been given to The Dry Goods Economist by retailer after retailer for many months past. This abandonment by the public of the old desire for trash is a gratifying result of the prosperity which the country has enjoyed for some years. It is worth noting in this connection, says that journal, that the day of the cheap glove is past. We no longer see sales of so-called kid gloves at 79 cents a pair. The public is perfectly willing to pay $1 and more. Many retailers report larger sales of gloves at $1.50 than at any time during the past eleven years.

TORONTO STOCK TRANSACTIONS.

Although the volume of business carried through has been quite up to average for the present time of the year, a general easiness in prices has prevailed, and several stocks have made considerable drops. Not so much so as in New York, however, for there the heavy declines on Wednesday recalled the panic days of 1901, and many stocks dropped a dozen points or more in an hour or two. The immediate cause of the slump is difficult to define, but there can be little doubt that what some of the best informed of the New York journals are saying is true, and that speculators are now undergoing the penalties due to former over-zealous booming. The following is a summary of the transactions of the week: Bank of Ontario, 10 at 128; Toronto, 4 at 238; Commerce, 186 at 159; Imperial, 98 at 231½; Dominion, 174 at 234-7; Hamilton, 56 at 226½-8; Ottawa, 16 at 205; Traders', 10 at 137; Western Assurance, 62 at 88; Consumers' Gas, 24 at 209-210; C.P.R., 9,345 at 119-125; Tor. Elect. Light, 157 at 136-8; New ditto, 19 at 134; Can. Gen. Elect., 392 at 158-162⅛ ; Com. Cable, 739 at 155-163; Bell Tel., 50 at 158; Rich. Ont. Nav., 617 at 88-95; Tor. Railway, 637 at 98⅞-104; Twin City, 2,029 at 95-101½; Can. Per. Mortg., 133 at 119¾-120¼; Sao Paulo, 537 at 88½-91½; Dom. Steel, 1,145 at 15-20¼; Bonds, $26,000 at 72¾-76½; Preferred, 35 at 42¼-7; Dom. Coal, 3,003 at 96½-105½; Nova Scotia Steel, 1,755 at 93½-108½; Bonds, $1,000 at 109½; and Lake Superior, 600 at 2-2¼.

TRADE OPPORTUNITIES.

Imperial Institute, London, 3rd July.—A firm in Rennes, France, asks to be placed in correspondence with Canadian shippers of apples, suitable for the production of cider. The firm states that a considerable demand exists for such apples thereabout. Rennes is in the west of France, north of Nantes. A person wishing to acquire a first-class manganese deposit would like to hear from Canadian owners of properties. A Liverpool firm invites quotations from Canadian shippers of box shooks for shipment to South Africa in lots of 10,000 to 20,000 boxes. Selling agents for several makers of railway supply goods seek the services of a first-class Canadian firm in close touch with railway or tramways, to act as their representatives in the Dominion.

—Stratford, Ont., is a thoroughly enterprising city. A number of its citizens have clubbed together and bought up all the unoccupied land in the southeastern part of the city, where a large portion of its factories are located. This they purpose having surveyed into building lots of one-fifth acre each. The lots will be sold to factory employees at $100 each, one-half of which is to go into a fund to be administered by trustees for the purpose of inducing industries to locate in Stratford.

The Boston wool market continues very firm and prices are steadily hardening. Medium grades are higher, and sales have been made at last week's outside asking prices. A good amount of Territory wool has been sold at full prices, and there has been a call for fine staple, the first for some time. London is firm, and medium and coarse crossbreds are 7½ to 10 per cent. higher. In Montana there are a great many Eastern buyers waiting to pitch in, and everything points to good, active competition for the clip of that State. The shipments of wool from Boston to date from December 31st, 1902, are, 118,936,443 pounds, against 139,218,763 pounds at the same date last year. The receipts to date are 124,987,985 pounds, against 147,942,005 pounds for the same period last year.

— A copy has been sent us of the prize list of the Eastern Townships' Agricultural Association, which will hold its annual Exhibition at Sherbrooke, Que., 29th August to 5th September next. This great show has been for many years one of the most prominent in Canada. The secretary of the association is W. M. Tomlinson, Sherbrooke, and Mr. N. T. Dussault is the president. The prize list takes a wide range; there are prizes not alone for cattle and horses, poultry and pet stock, but for dairy produce and products of field, garden, and orchard; machinery; manufactures; woman's work; the fine arts. Sherbrooke is a fine city, with a list of fourteen hotels, and is situate in as pretty a countryside as the sun shines on.

—The New York firm of R. H. Macy & Co. have been at loggerheads with the American Publishers' Association and the American Booksellers' Association. The trouble was that the two organizations refused to sell books to the department store firm because they declined to enter into an agreement not to sell books below a certain price. R. H. Macy & Co. claimed that each firm had the right to sell books at as small a profit as it chose, and when the Association directed its members to refuse to sell them they applied for an injunction. This was granted on Tuesday by the Appellate Division of the Supreme Court. Justice Ingraham, in his decision, holds that the Association, being incorporate for the purpose of maintaining a uniform price, formed virtually a monopoly in the restraint of competition, contrary to the anti-trust act of 1899. Thus the decision is in favor of Macy.

—A Montreal despatch says that as a result of the recent visit to Canada of Commissioner-General Sargent, of the Immigration Department of the United States, Robert Watchorn, Commissioner-General for Canada, has left that city for the West to establish a number of new investigating stations throughout the far West of Canada. Two new stations are to be established on the Pacific Coast, one at Vancouver, the other at Victoria.

—Mr. Peter A. Ball, Canadian Commissioner at Birmingham, writing to the Canadian Manufacturers' Association, says that there is a big opening for Canadian produce in England. He further declares that he has written to a number of manufacturers and produce dealers in a business way, but has not received any acknowledgment from them. These letters meant business to Canadian merchants, and Mr. Ball is somewhat chagrined at the manner in which they were received.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, July 16, 1903, compared with those of the previous week.

Cities	July 16, 1903	July 9, 1903
Montreal	$23,442,607	$25,559,580
Toronto	.....	20,244,475
Winnipeg	4 515,570	9,939,042
Halifax	1,696,630	2,145,831
Hamilton	1,044,275	1,181,338
St. John	966,622	1,004,081
Vancouver	1,335,307	1,542,641
Victoria	543,025	554,761
Quebec	1,621,241	2,085,956
Ottawa	2,535,636	2,533,383
London	889,886	1,136,737
	$.....	$67,927,824

The following Brands manufactured by . . .

The AMERICAN TOBACCO CO.

OLD VIRGINIA

—CIGARETTES—

SWEET CAPORAL DERBY
YILDIZ MAGNUMS
Dardanelles
Pure Egyptian Cigarettes.

Commercial.

MONTREAL MARKETS.

Montreal, July 15th, 1903.

The improvements at the Bonsecours market are being welcomed. The increased accommodation is giving the farmers much satisfaction. On Saturday last, according to the Gazette, over 900 of them were registered there, and of these 368 were gardeners, and 298 were dealers in potatoes, tomatoes and berries. "Though the number of farmers is so large yet there is little or no congestion, as the new space allotted by the city on Le Royer and Commissioners street, relieves St. Paul street and Jacques Cartier square, and gives each farmer plenty of opportunity to dispose of his produce."

Ashes.—The situation is not materially altered since a week ago. There is practically nothing coming in, and from $5.45 to $5.50 could be readily realized for first quality of pots; seconds, $5 to $5.10, and pearly, $6 to $6.25.

Cements and Firebricks.—Imports for the week ending to-day are again large, including 24,680 bags and 7,863 barrels of Belgian and German cements, and 10,779 bags and 9,920 barrels of English cement; firebricks received, 172,200. A good steady business is reported, and prices are steady.

Dairy Products.—Cheese shipments last week were large, exceeding those of the corresponding period of 1902 by 50,350 boxes. In all there were shipped 136,894 boxes to London, Bristol, Liverpool, Manchester, Glasgow and Leith. Butter shipments continue quite moderate, the figures for last week being 8,944 packages, as against 18,423 packages for same week a year ago. The butter market is a little easier than a week ago, with prices of creamery ranging from 18c. for good to 18¼c. to 18½c. for finest. Cheese is fairly steady at about 9¾c. for fine Ontarios; Township, about 9⅝c., and 9⅜c. to 9½c. for Quebecs, with some expectation of decline.

Dry Goods.—For the season the wholesale warehouses show considerable stir. The various cotton mills are just now making heavy deliveries of goods, and shipments to country retailers on fall orders are proceeding quite briskly. Collections are reported as being well kept up. European letters speak of increasing firmness in silks and linens, and woolen manufacturers are quite as stiff in their ideas as heretofore. Following their circular of last week, advising an advance in quilts, etc., the Alaska Feather & Down Co. now give notice of a similar advance, in cushions, pillows, cosies, etc.

THE TRUST & LOAN CO. OF CANADA.

TO BE DISPOSED OF:

that substantial and commodious three storied office building,

25 Toronto Street, Toronto,

corner Toronto and Adelaide Streets.

Apply to Commissioner.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:

JOHN H. C. DURHAM, General Manager.

Groceries.—The local sugar market took a strong upward turn towards the close of last week, owing to an advance in New York, and quotations were put up a full ten cents a cental on all grades, making the present factory price for standard granulated $4.15, and the lowest grade of yellows, $3.40. The advance has stimulated the demand, and the New York market is reported very strong, with large dealings reported. Molasses is quiet, but holders of old stock are very firm in their views, importers asking 38c. in round lots. The quality of the new crop is said to have been unfavorably affected by last year's seismic disturbances in the West Indies, the volcanic dust having apparently penetrated the sugar canes, making the juice dark. New advices from the Mediterranean are to hand; currants are now offered at 15s. 6d. for fine Filiatras, early shipment; quotations for Sultana raisins are also cabled at figures 2s. lower than last year. The crop of Valencias is reported good, both as to quality and quantity, so far as present indications go. Grenoble walnuts are quoted at 75 francs, f.o.b., for early shipment; the filbert market is easier, mainly owing to a lack of buyers. Candied peels are being sold at same figures as last year. At a meeting of the trade here, last week, it was decided to ask the canners' combination not to include jams, jellies, baked beans, canned

chicken and turkey in the list of goods for which the combination is to fix prices.

Hides.—While the price of No. 1 beef hides is supposed to be nominally 8c., still, owing to competition, the prices paid range from 8 to 9c. There has been no reduction in calfskins yet, 11c. being the figure for No. 1, and 9c. for No. 2. For lambskins, 35c. each is quoted.

Leather.—While no very large transactions are reported, boot and shoe manufacturers are buying fair lots for the fall cut, and prices continue steady to firm. Export trade in sole and splits principally juniors, is reported good.

Metals and Hardware.—In heavy metals the movement is not quite so brisk as it has been, and trade is likely to be of quieter character during July and August. Hardware men still appear to be well satisfied with the volume of business doing. The nail and wire manufacturers and rolling mill men have given notice of a shortening of the terms on which their goods are sold to the jobbing trade; the time limit henceforth is to be 60 days, with 2 per cent. off for cash, instead of three and four months, as heretofore. The Hardware Association, now in session at Gananoque, is discussing the matter, and may ask for some modifications. As regards general prices there are no material changes since a week ago, except that tin, lead and copper are all a shade easier.

Oils, Paints and Glass.—There is little new to be noted in these lines except some easing off in linseed oil, which is lower by a cent or so. We quote, as follows: Single barrels, raw linseed oil, 55 to 56c.; boiled, 58 to 59c.; net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 73c., single barrel. Olive oil, machinery, 90c.; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gallon; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands) $5 to $5.15; No. 1, $4.75 to $4.87½; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 5c. for pure; No. 1, ditto, 4 to 4½c.; genuine red ditto, 4¼-4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40 to 45c.; Paris white, 75 to 80c.; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break.

TORONTO MARKETS.

Toronto, July 16th, 1903.

Chemicals, Drugs, etc.—Nothing out of the way has developed in these markets, so far as local conditions are concerned. Business has been normally active and prices on the firm side. New York advices state that the upward movement in opium continues, and further advances are anticipated, owing to strong reports from the primary markets. Quinine, too, is quite strong and the firmness in menthol continues. The English chemical markets are a little dull just now for the most part. Baltimore fertilizing materials are in good request.

Flour and Grain.—Practically no change has taken place in either of these markets. Flour continues at $2.80 for ninety per cent. patents in buyers' covers middle freights. Millfeed and oatmeal keep steady. In wheat and other grains price quotations remain unaltered from last week. Not much business is being done, farmers are marketing hay and have not at present much time to bring in receipts of wheat, etc.

Fruit and Vegetables.—Strawberries have continued in the market longer than was expected, fetching this week anywhere from 5 to 9c. per box, according to quality. They may now be said to be over for this season, however. Raspberries are fairly plentiful, selling around 9 to 11c. per box. Business all round is quite active. Prices may be quoted as follows: bananas, $1.50 to $2.50 per bunch; cocoanuts, per sack, $3.75; beans, 75c. per basket; lemons, Messina, $3 to $4; Sorrento, $3.25 to $4.25; 300's, $4; oranges, Mediterranean sweets, $2.75 to $4.25; late Valencias, $4.50 to $5; watermelons, 35c. to 45c.; apples, 60c. to 75c. per basket; cucumbers, per dozen, small, 40c. to 50c.; large, 75c.; red currants, 40c. to 60c. per basket; cherries, sweet, large baskets, 70c. to $1; small, 40c. to 60c.; sour, 70c. to 90c.; Canadian tomatoes, $1.25 to $1.50 per basket; southern do., 90c. to $1.25 per case; California peaches, $1.10 to $1.25; do, plums, $1.35

to $1.75; black currants, 75c. to $1 per basket; huckleberries, $1 to $1.25; pineapples, $3.25 to $3.50 per case; Havana sugar pines, $3.75 to $4.

Groceries.—The feature in sugar was an advance all round of 10c. per cwt., due to the strong feeling and similar advance in New York. The movement is pretty active. New peas (canned) are now in the market, and quoted at from 87½c. to $1.40. Business in general lines is exceptionally active for this season of the year.

Hides, Skins and Leather.—A fair demand exists for hides and receipts are moderate. Lambskins and shearlings are steady. In tallow no change has taken place. The leather trade is experiencing no great activity, but conditions are good and prices keep firm. In Chicago the hide market is dull and unsettled. As a general rule packers are not disposed to push sales. In a few instances, however, there appear to be holders who are looking for bids. Prices are nominal at 11¼ to 11¾c. for native steers, 14½c. for heavy Texas, 11½c. for butt brands, 11½c. for Colorados, 10¼ to 10½c. for heavy native cows and 10½c. for branded ditto. Country hides are quiet at 9¼c. for No. 1 buffs.

Live Stock.—At the cattle market this week there was an exceptionally heavy run of export cattle, and, although Chicago reports were firm, prices here took an easier turn, a drop of 10c. per cwt. in some cases being recorded. Butchers' cattle were in rather keen demand and good qualities had an upward tendency so far as price was concerned. Few stockers or feeders offered, but there was little demand. Trade in milch cows was good, the offerings as a rule being of high grade. Sheep and lambs were in smaller supply than usual of late, but the demand was also slack.

Provisions.—For choice lots of butter the demand is good, and receipts are fairly liberal. Fresh dairy pound rolls are most wanted. For cheese the demand may be described as only fair and the market is easier in accordance with outside markets. A fair demand exists for eggs, at 14 to 15c., with moderate receipts. A dull and easier feeling exists with regard to hops, and Canadian crop is quoted around 18c. to 21c. There is a brisk demand for smoked meats and other hog products at about the same prices.

Wool.—Not much is doing under this head, though prices are a little firmer. These are only nominal, however, as the exporters find they cannot operate at the figures which holders want.

What Probate Reveals

Hundreds of men deemed wealthy die every year poor, leaving their families penniless.
To avoid so great a calamity take out a policy, while in good health, in

Head Office—WATERLOO, ONT.
The Mutual Life OF CANADA

Its policy-holders constitute the Company, elect the Directors, control its funds, and receive all the profits. A policy in it pays.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at he bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

CANADA PERMANENT MORTGAGE CORPORATION

Head Office, Toronto Street, TORONTO.

By an Act of the Parliament of Canada passed at the present session, the name of The Canada Permanent and Western Canada Mortgage Corporation has been changed to Canada Permanent Mortgage Corporation.

J. HERBERT MASON, Managing Director.

As an... Investment

We believe our 5% **DEBENTURES** to be one of the safest and surest that you could possibly enter into. It is safer than a Bank, because you have all of our Permanent Capital Stock, and the whole of our Assets, consisting of first mortgages on improved real estate, as a guarantee behind the Debenture. It is the surest, because the half-yearly coupons are attached to the Debenture and can be cashed at any bank in the country. . . . . Write to-day for our booklet, entitled, "An Investment of Safety and Profit."

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay $5.00 for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over $100,000 a year by doing neither one.

For sample copy send 10 cents to PRINTERS' INK, No. 10 Spruce St., New York City.

Max Davidson, clothier, Montreal, whose failure we lately noted, is offering his creditors 50 cents on the dollar, 25 cents cash, and balance on time.

Chas. Gordon, of Pembroke, Ont., has sold thirty-six square miles of timber limits in Nipissing district to Messrs. Holland and Graves, of Ottawa, for $200,000. This is considered a high price.

Upon demand, an assignment has been made by E. Caumartin, a Montreal suburban baker, who shows liabilities of $8,210, some $,500 of which being in the shape of mortgage indebtedness, partly securing a principal creditor.

In the matter of the Strathcona Rubber Co., of Montreal, against whom a winding-up order was recently applied for, J. McD. Hains, accountant, has been appointed liquidator. The liabilities are approximated at $35,000 to the general public.

J. A. Chabot, of Ottawa, formerly a Government employee, who went into a general liquor business in 1899, is in financial trouble and seeking a settlement at 40 cents on the dollar. He has been reported as crediting too freely, and has had some trouble with his landlord this spring, leading to a cancellation of his lease.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Mercantile Summary

KOSSUTH BEZANSON, the Moncton jeweller, whose embarrassment we noted in last week's issue, is now offering his creditors 50 per cent. of their claims.

THE Montreal police are interested in the whereabouts of Alfred Goslin, identified for some little time past with the management of the American Finance and Mortgage Company, a "get-rich-quick" institution, which recently closed its doors after obtaining some $60,000 worth of dupes' hard-earned cash.

A NEW company has been incorporated in Albany, N.Y., which has for its object the operation of a telephone line to connect Albany, New York City, Syracuse, Rochester, Buffalo and other cities in the State of New York with Canadian points. The directors are mostly New York men, and the share capital of the company is $1,000,000.

IN April last, we reported McDonald & McLean, general dealers at Louisburg, N.S., as obtaining an extension of three, six, nine, and twelve months, on liabilities of about $8,000. This arrangement they have been unable to complete, and they are now asking their creditors to grant them a settlement at 50 cents on the dollar.

MR. CHAS. H. BAKER, of Vancouver, B.C., is about to undertake the development of the Snoqualmie Falls in Slave river for power purposes to be supplied to Vancouver factories. The power would enter the city along wires and poles, the privilege to erect which has already been granted to the Slave Lake Power Co.

THE estate of J. B. Trahan, dry goods retailer in Montreal, is likely to prove a poor one. Trade liabilities are filed to the amount of $25,456, and there are also said to be $11,000 of privileged claims, while assets are figured at $13,355. It is reported that he claimed quite a fair surplus not long since, and he may be asked to explain the present large deficiency before a judge.

AFTER many years' experience as a store clerk, Wm. McColm, of New Richmond, Que., started storekeeping on his own account in 1898, but did not "make good." He has been complained of as slow pay for some time past, and has now assigned.——Mrs. J. B. Martel, in a small millinery and dry goods way at Roberval, Que., has made an assignment.

THE Council of St. Louis (near Montreal), is bringing in a by-law to raise a loan of $250,000 to carry out some needed improvements. It provides for a sinking fund of 2 per cent. annually and an assessment of $16,250 to be levied on all taxable properties on the valuation roll. The new loan will be used for extending the water service, for building a new city hall, for a new fire station, for part payment of the floating debt, and for paving. The by-law will be submitted to the electors at a public meeting for ratification.

THE Sydenham Glass Company's flint house, at Wallaceburg, Ont., was on the 15th inst. destroyed by fire. Loss, $15,000; covered by insurance.

THE culture of the sugar beet is rife in Alberta, it seems. The Chronicle, printed at Raymond, Alta., where the new sugar beet factory is being built, says: "The busy season in the beet fields has commenced and growers are unable to get all the help they want. Within a very short time 3,000 acres will have to be weeded and thinned by hand. The beets are coming up splendidly and so far everything points to a successful first season for growers and factory."

Mercantile Summary.

THE Central Vermont, and the Montreal and Southern Counties Railway companies are, between them, contemplating the erection of a railway and highway bridge over the Richelieu river, between St. Johns and Iberville, Que.

A SEEMINGLY important "strike" of free gold quartz was made recently on Granite creek, near Princeton, B.C., by H. McAllister, an American who has intermittently prospected in that region for some years past.

THE Dominion Show Case Company reports unusual activity for this time of year. Cases are now being turned out which are destined for service in all parts of the Dominion. This firm, like so many others, is finding their present quarters too small to care for the orders received.

BAILEY'S broom factory in Kingston, Ont., was on the 20th inst. destroyed by fire at a loss of $30,000. It is supposed to have originated in spontaneous combustion. On the same date E. B. Eddy's rag warehouse, at Ottawa, was struck by lightning and stock consumed to the value of $3,000; covered by insurance.

A DESPATCH from White Horse, B.C., says that the placer diggings recently discovered some 150 miles northwest from that place are attracting quite a crowd of miners. The gold is described as being very evenly distributed, panning on the average from 3 to 15 cents on the surface, and miners are taking out from $10 to $12 per day.

THE firm of Whitesell & Bradley succeeded to the drug business of W. E. Lehman & Co., Newmarket, in August, 1902, the purchase amounting to $1,900. They paid $700, and gave a chattel mortgage for the balance. This they have never been able to pay off, and it has now been foreclosed, and the stock, we are told, which amounted to $2,564, was sold, Wednesday of this week.

THE shipments of ore from the Rossland district of British Columbia for the week ending 18th inst, were as follows: Le Roi, 3,210 tons; Centre Star, 1,590 tons; War Eagle, 1,020 tons; Kootenay, 275 tons; Le Roi, No. 2, 780 tons; Velvet, 125 tons; Giant, 40 tons; Jumbo, 135 tons. Total for the week, 7,165 tons; last year, 200,093 tons. They would have exceeded these quantities had it not been for the shortage of railway cars.

THE Retail Furniture Dealers' Association held a convention in Toronto on Wednesday last, and, after listening to several interesting papers, elected the following officers: President, J. F. Brown, Toronto; vice-presidents, J. E. Wilder, Montreal, and John Hoodless, Hamilton; treasurer, W. B. Rogers, Toronto; secretary, Jas. Acton, Toronto. Executive Committee, Wm. Trafford, London; W. G. Jennings, St. Thomas; Charles Duncan, Brantford; T. W. Currier, Ottawa; L. F. Harrison, Kingston; John Leslie, Winnipeg; E. A. Wilson, Halifax; Charles Lordly, St. John, N.B.; **C. S. Coryell, Toronto.**

ROBERT HAMPSON & SON, Gen. Agts. for Canada
CORN EXCHANGE BUILDING, MONTREAL.
MEDLAND & JONES, Agts., Mail Bldg., TORONTO

A DEMAND of assignment was made in April last on M. Mallickson, a small dealer in clothing and dry goods in Montreal. He then left the city, but has now returned and assigned to the court. Liabilities will hardly exceed $1,000.

THE Michigan Central Railway Company has renewed the lease of the Canada Southern road for a period of 999 years. The directors have also agreed to the proposition to refund $3,000,000 of the bonds of the Lake Erie & Detroit River, a railroad controlled by the Pere Marquette line, in order to secure a lower rate of interest.

THE gross earnings of the British Columbia Electric Railway, of Vancouver, for the month of May this year, were $55,665, compared with $45,674 for that month last year, the net earnings being $23,023 and $16,265 respectively. The net earnings for the period intervening between July 1st, 1902, and May 31st, 1903, were $203,054, as against $171,697 for a similar period a year previous. The increases have been noticeable in all departments, both in lighting and transportation.

A HINT FOR OTHER STATES OR PROVINCES.

The extent of the income derived by the State of Maine from sportsmen is not generally recognized. The commissioners of inland fisheries and game in their report to the Maine Legislature, state that the money expended in the State of Maine in the year 1902 by non-resident sportsmen and summer visitors was more than 30 per cent. of the value of the total farm crops of the State of the year 1899, the last year of which there is any report.

The commissioners to substantiate this statement present the following figures:

Number of non-residents visiting State in 1902	133,885
Deer killed	20,000
Moose killed	461
Paid for guides	$300,000
Est. personal expenses $14,759,500	
Total expense by non-residents	$15,059,500

Mercantile Summary.

THERE seems to be a somewhat easier feeling in the binder twine market, though prices are not likely to feel much effect therefrom, so far as present indications would show.

A REAR-end collision took place on the 21st inst. between two freight trains on the C.P.R. bridge over the Grand river, at Galt, Ont., and three men, all cattle dealers, were killed and several injured.

THE Temiscamingue and North Ontario Railway, which is expected to open up a productive country, has already been built ten miles north from North Bay, and the work is proceeding, we are told, at the rate of half a mile per day.

AMONG the new manufacturing concerns, which have opened recently in Winnipeg, are the Manitoba Iron Works, which are now turning out their first castings, and the Cement Building Block Company, Limited, which will manufacture a patent cement building block, designed to take the place of brick and stone for superstructures.

THE Board of Trade of Orillia held its annual meeting on the 22nd inst., there being a large attendance. Congratulatory reference was made to the successful work of the year. R. J Smith retired from the presidency, and Mr. A. B. Thompson was unanimously elected in his stead. Mr. C. J. Miller was elected vice-president, Mr. J. A. Fowlie, secretary, and Mr. E. A. Doolittle, treasurer. Mr. C. J. Miller was appointed delegate to the Fifth Congress of Chambers of Commerce of the Empire in Montreal.

ANOTHER pork-packing establishment has ceased to exist. The latest concern of this kind to go under is the Paisley Pork Packing Company, Limited, incorporated in June, 1900, with an authorized capital of $15,000, of which sum about $10,000 was paid up. The stock was originally subscribed by local farmers; a practical man was engaged to manage the affairs of the company. A year ago he severed his connection with the firm, and since then the management has been a little loose, This fact, coupled with keen competition and high prices for hogs, has compelled an assignment.

STORE-KEEPING, hotel-keeping, then store-keeping again, Jos. D. Mudge carried on a general store business at Bruce Mines, but was not as successful as he might have been. In November, 1891, he removed to Peninsular Harbor and tried his hand at running a hotel. This did not result in wealth. Then in 1900, he, in partnership with his son, succeeded Thomson & Co. in a general business at Schreiber. The combination does not seem to have been a very happy one; success has not attended their efforts, a number of claims have been put in the solicitors' hands, and they now assign.

Mercantile Summary.

MR. JOHN BAIN, private secretary to the Minister of Customs, has been appointed assistant commissioner of customs. Though only thirty-four years of age, he has had a varied experience in law, newspaper work, etc., and his friends say is peculiarly fitted for his new position.

A GOOD deal of interest is being manifested by manufacturers and other employers of labor in Senator Lougheed's bill directed against the "walking delegate," and the interference of foreign agitators in Canadian industries. It has passed a third reading in the Senate, but how it will fare in the Commons is another matter.

A LETTER from London to the Gazette says it is very likely that the party of Parliamentarians, who are proposing to visit Canada in August will be considerable. "Great interest is felt in the new departure, and the result will be to impart to the House of Commons at Westminster a more intelligent understanding of Imperial problems and responsibilities than is possible to the stay-at-home Briton."

THE Temiscouata Railway, running from the St. John river, on the borders of New Brunswick, to the ocean, has issued a little brochure setting forth its claims on the attention of sportsmen, particularly for moose shooting. It also contains excellent views of Riviere du Loup, its northern terminus, Quebec, Cacouna and other places with which it is in easy communication, and some of the fine scenery and falls along its route.

WE hear from Montreal that the Slater Shoe Company have placed their factory under the protection of the International Brotherhood of Boot and Shoe Workers, as the result of trouble with the local union, the lasters and turn workers having been called out, about two hundred men being involved in the difficulty. An official of the International Brotherhood states that should the strikers refuse employment under the International Union, first-class workmen who are members will be engaged.

IT is agreeable to learn that Canadian flour is making for itself a reputation in Japan. An Osaka newspaper says that the demand for Canadian bread at the Osaka Exhibition is already greater than the supply. Of the last consignment of 1,700 bags of flour, 1,000 have already been used, but the trouble is that with the number of ovens which is at their disposal, the bread cannot be turned out fast enough. The Consul-General, Mr. Nosse, of Montreal, has also received certain official notification from Baron Kamura, the Japanese foreign Minister, that preference will be shown Canadian over American flour. "The idea that the Dominion is one of the United States is slowly being dispelled, but it is being spread and encouraged by the American visitors."

THE Grand Trunk Railroad has installed on the Brockville section of its road a new kind of long-distance telephone service, known as the telegraph telephone. It is connected with and is operated on the telegraph wires, and business can be done with Montreal, Coteau, Cornwall, etc. Telegraph and phone messages can be conveyed at one time without conflicting. If the present test proves satisfactory, the system may be brought into general use on the G.T.R.

Mercantile Summary.

THE British Columbia Permanent Loan and Savings Company has declared a dividend for the half-year ended with June 30th last, at the rate of 8 per cent. per annum.

ON the 14th inst., a party of journalists, mainly representing provincial papers, was to sail for Canada to spend some weeks in touring the Dominion, as guests of the Government. They are expected to give an unbiased record of their experiences and their impressions of the country.

MR. HICKMAN, the popular lecturer of the Canadian Emigration Department in London, has come back to Canada to collect and arrange a long series of views of Canada, which he purposes displaying with the cinematograph, when his autumn lectures begin again. He will take these cinematograph views all over Great Britain.

MAJOR BELL is erecting at Indian Head, Assa., a steel elevator on concrete foundations, with a capacity of 20,000 bushels. His idea is to erect several of these through the wheat district and rent them to individual farmers, who will be able to fill and empty them themselves as often as they please without charge beyond the annual rental.

IN August, 1901, at Copper Cliff, F. D. McNaughton opened a general store, his previous experience in this line having been gained at Warren. There he was not successful. In March, 1902, he put a chattel mortgage on his assets for $5,000 to his principal creditor. This was renewed last March and in May he put another chattel mortgage on his stock. On the 10th of this month the stock was seized under these chattel mortgages, and he now makes an assignment.

INSURANCE ITEMS.

The secretary has notified members that the National Association of Local Fire Insurance Agents has postponed the time of its annual national convention at Hartford, Conn., to October 20th, 21st, and 22nd, of the present year, thereby avoiding conflict in dates with the annual convention of the National Association of Life Underwriters.

A French insurance journal, "Le Conseiller des Assurances," has a grievance against American life companies in that they are too ready to publish letters of acknowledgment from the relatives of deceased policy-holders. That journal asks: "Is it moral, is it decorous, that a life insurance company should thus beat the big drum over the dead bodies of its policy-holders? Has any French company ever been guilty of such a lugubrious performance? Do not all preserve, in honor of the weeping wife, the pious secret of the last solicitude of the dear departed one?" And the article goes on to declare that "the Mutual Life, in its passion for advertising, treads

under foot all sentiment, respects no grief, laughs at tears, and exposes to public notice the women to whom the death of their husband brings money." The good gentleman needs not make so serious a sentimental journey to the graves of deceased insurants. If the widows or other relatives are at all harrowed by the fact of their being beneficiaries becoming known, they are not likely to write such letters of acknowledgment as the French critic describes.

It seems likely that all those using sprinkler installations will be called upon in the near futre to pay a charge to water departments for the privilege. One of the arguments advanced in favor of making such a charge is that the reduction in rates of fire insurance allowed when a sprinkler system is installed justifies a reasonable compensation for the service rendered. At the recent convention of the American Water Works Association, at Detroit, F. A. W. Davis, vice-president of the Indianapolis water company, pointed out that the estimated reduction made in the rates of fourteen business houses in that city in consequence of the installation of sprinkler systems was $44,650, while the amount paid to the company for the protection was only $950. The speaker admitted that the cost of making the installments was considerable, but maintained that the equipment pays for itself in two or three years in the reduction in rates.—Investigator, Chicago.

Whether from lack of time, or because agreement could not be reached, we are told that no action of a definite kind was taken at the convention of the International Association of Accident Underwriters on the question of uniform phraseology for accident policy conditions. Such differences of opinion became evident that, one by one, the clauses were referred back to the special committee on the subject for further consideration. However, some action is likely to be taken before the next convention, for the committee named an early day for discussing the matter. The practice of the courts in construing policy conditions in favor of the insured whenever the language used is susceptible of more than one construction, renders the work of the committee of the utmost importance.

STEEL PRODUCTION ON A LARGE SCALE.

It is announced that the plants of all the subsidiary companies of the United States Steel Corporation are working to their full capacity, and that the entire output is ordered ahead for the rest of this year, and for a part of next. Perhaps this hardly conveys to the general public an adequate idea of the vastness of the industry referred to; so we will put it in another shape. Of blast furnaces there are eighty, and these are all busy, turning out an aggregate in the year of about 10,000,000 gross tons annually. The 112 rail mills and steel works of the corporation, exclusive of the Union-Sharon complement, will produce nearly 8,000,000 tons of Bessemer ingots, 4,000,000 tons of open hearth ingots, 1,400,000 tons of billets and slabs, 1,800,000 tons of wire rods, 9,000,000 tons of rolling and foreign products, and 5,000 tons of armor plate. The sixteen wire nail plants are busy turning out a

yearly aggregate of 12,000,000 kegs of nails of 100 pounds each, while the 23 wire drawing plants will produce 1,500,000 tons of wire rods and the same amount of wire. The seven seamless drawn tube plants will produce not less than 64,000,000 feet, while 12,000,000 cubic feet of gas will come from the natural gas properties of the corporation. Every one of the 24,000 cars of the corporation and the 428 locomotives are busy on its 1,500 miles of railroads, transporting ore and coal to the plants and taking away finished products for sale. The twenty-six tin plate works will come near turning out 250,000 boxes of 100 pounds each, all of which will be sold before it is made. The sixty-nine steamboats and the forty-three barges of its transportation service will carry from 12,000,000 to 17,000,000 tons of ore down the Great Lakes during the season, while the coal and ore mines will turn out their quota of raw material.

TORONTO STOCK TRANSACTIONS.

The conditions of last week have continued more or less the same during this. Volume of business has not been large and prices of many stocks have dragged, but, in view of the bear campaign, which has been waged in New York and elsewhere, they have kept up better than might have been expected. Transactions are as follows: Bank of Toronto, 46 at 233-4; Commerce, 224 at 159-160; Imperial, 13 at 230; Dominion, 170 at 235-8; Hamilton, 37 at 227½-8; Ottawa, 20 at 215; Traders', 10 at 138; Brit. Nav., 70 at 89-90⅛; Toronto Rail., 318 at 100½-1¾; Twin City, 1,398 at 95¾-6⅞; Brit. Can. Invest., 78 at 71; Can. Land. & Nat., 34 at 103½; Can. Perm. Mortg. Loan, 1,329 at 120¼-121; Lon. & Can. L. & A., 10 at 94; N. W. Land. (pref.) 375 at 97¼-99; Nor. Nav., 110 at 131-3½; Bell Tel., 15 at 158; St. Law., 135 at 133-4; Brit. Am. Ass., 20 at 91; Sao Paulo, 130 at 88⅞-89; Dom. Steel, 278 at 14-15; pref. 100-42; Bonds, $1,000 at 71; Dom. Coal, 580 at 96-7¼; N. S. Steel, 180 at 92; Lake Superior, 135 at 2½-3.

THE PHARMACIST'S TOAST.

At a recent meeting of the British Columbia Pharmaceutical Association, Mr. Mills, of Victoria, wound up his speech in an interesting way by giving what he called the pharmacist's toast. It was as follows:

"May his occupation never become a drug in the market as long as he sticks (like his own plasters) to business. May he never be bruised in the mortar of adversity by the pestle of misfortune. May his rise in his profession be as accurately marked as his graduated measure. May his success never be alloyed by a mixture of ill-luck or a tincture of regret. May his counter prove the crucible whereby he transmutes human ailments into precious metal and precipitates the golden deposit into his own pocket. May his career be as unsullied as distilled water and as smooth and pleasant as pure Narbonne honey. May he never be called upon to swallow the bitter pill of disappointment or be incensed in the bitter spirit of enmity. Should fickle fortune ever refuse him her smiles may he find an antidote in the soothing opiate of woman's love; be strengthened by the tonic of experience and purified by the sudorific of patience."

THE PRAIRIE CROP PROSPECT.

Some exception has been taken, we are told, to our statement of last week under the usual heading "Crop Prospects," that in the opinion of good judges, because of a lack of adequate rain in June, the wheat crop of Manitoba would not equal that of last year, but would be more like 50,000,000 to 60,000,000 bushels as compared with 65,000,000 in 1902. The objectors to this careful statement are probably of the optimistic class who without any close observation or much practical knowledge are forever predicting big crops. A very well informed agricultural journal, the Nor'-West Farmer, has this to say on the subject in its last issue, dealing with the prospects of the present year's crop: "The Nor'-West Farmer is the only paper, so far as we know, that has as yet hinted at the possibility of a diminished crop yield. But we are quite satisfied of the accuracy of our diagnosis of the crop conditions of the whole of Western Canada, and think it in the very best interests of the farmers themselves that we should state our opinions with all possible plainness. The men who proclaim all over the world a prospective yield of 25 bushels of wheat, where the actual outturn will be nearer 18, are not the true friends of this country."

In the opinion of the journal quoted, the Territories have been better off this year than Manitoba as regards rainfall; much of the land there is newer and where properly worked will make an excellent return. Furthermore it is stated that perhaps the most promising sections in Manitoba are to be found between Manitou and the western boundary and from Minnedosa westward. Northwestern Manitoba possesses special advantages of soil, and rainfall there has been more liberal.. So logical and sensible is the whole article of our contemporary on the crop prospect of Manitoba and the Territories that we give it almost entire:

From almost every quarter we are being told of fresh, healthy looking crops and a good promise of abundant harvest. "What everybody says must be true," but the accuracy of some of these reports is open to question. Some observers see only skin deep and their reports are to that extent misleading. Of course there must be a considerable variety of experience in a country so far stretching as Western Canada, but it is quite certain that over a large part of the area on which most of our crop is grown, the rainfall up to a recent date was very limited. Seed time was all right and in some sections rainfall was ample for immediate requirements, but there was a very remarkable difference between this year's June precipitation and that of last year. It was to that month's rainfall the liberal yield of last year was largely due. The question is whether with a much smaller amount of moisture anything like the same yield this year can be looked for.

No fault can be found with the June report of the Manitoba Government. Up to the time that report was prepared every condition was as favorable as was there stated. It is the month of June itself that according to all previous experience is the crucial stage of crop growth in this country. Last year there was a heavy rainfall in June with corresponding profuse growth in all kinds of vegetation. But this year the June rains have been very limited over wide areas, and the effect of this is already manifest to every clear-eyed observer. Lands well worked, not previously over-cropped, and having a good open clay subsoil, have suffered comparatively little from the short rain supply and some districts have had more rain than others. With moderate showers from now on this class of land will make a very satisfactory showing. Crops there are still in the growing stage and in the streak of fine weather we are enjoying at time of writing have yet a fair chance to do well.

But there are other sections where drouth has already done serious damage. In many sections of the Red River Valley the men who have 60 per cent. of last year's crop will be fortunate. The amount of crop in the Red River Valley does not furnish a large percentage of the crop of the whole country. But if our carefully gathered information is correct, there are in the Mennonite country, the Portage Plains and Souris Valley—the very wheat gardens of the province—indications that eighteen bushels to the acre will be the maximum average.

This watchful and prudent estimate of the conditions commends itself to any reader as likely to be not far from the truth. But there follow some words especially noteworthy, considering that we have been accustomed to hear for years that the wonderful black soil of Manitoba was absolutely inexhaustible. The Nor'-West Farmer says: "In all cases where there has been prolonged cropping a short rainfall develops evidence of exhaustion, and we have now large areas subject to that condition. Plenty of well done work helps to mitigate this tendency, and this year's experience will very strongly emphasize the importance in a dry season of good work. Last year any kind of work had a decent yield after it, but dry years tell a different tale." It is not easy to exaggerate the value, in a community where so many are disposed to be over confident, of counsellors who possess a calm judgment. And

we consider that this Winnipeg paper has shown both discernment and pluck in coming out with statements, the nature of which is calculated to rebuke people who see everything through rose-colored glasses.

Our usual weekly despatch dated from Winnipeg on Thursday noon, is this week of the following tenor. It will be observed that its terms are guarded, while instancing many places where the yield will be greatly over the average. "The weather during the past week very hot and dry. At a number of points in Manitoba the fields have suffered for want of more rain, the grain being short in straw, but, on the whole, conditions have been very good. While it is hardly expected that the average will be up to that of last year, a big yield is predicted throughout the Territories. In many places conditions were never better, and at these places this yield will be phenomenal, the present hot weather will ripen the grain fast. A five acre field of barley in Kildonan has already been reaped and stacked. Harvest will be ready by middle of August in many places probably."

THE BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian banks for June, 1903. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities; average holding of specie and Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.

	June, 1903	May, 1903
Capital authorized	$95,826,666	$95,826,666
Capital paid up	76,660,301	75,979,565
Reserve Funds	47,973,814	47,608,280
Notes in circulation	$58,865,845	$56,949,119
Dominion and Provincial Government deposits	8,005,086	7,666,491
Public deposits on demand in Canada	111,298,423	109,397,451
Public deposits at notice	267,639,035	266,785,156
Deposits outside of Canada	36,235 655	37,442,446
Bank loans or deposits from other banks secured	676,068	808,175
Due to other banks in Canada	3,842,403	3,323,674
Due to other banks in Great Britain	8,180,084	9,195,745
Due to other banks in foreign countries	1,025,337	1,432,551
Other liabilities	12,281,956	12,746,722
Total liabilities	$508,049,963	$505,747,605

ASSETS.

Specie	$14,464,063	$14,517,991
Dominion notes	29.092,337	28,349,046
Deposits to secure note circulation	2,869,992	2,802.931
Notes and cheques on other banks	19,429,914	15,638,763
Loans to other banks, secured	676,157	798,104
Deposits with other banks in Canada	5,422,247	5,128,427
Due from banks in Great Britain	1,725,774	508,915
Due from other banks in foreign countries	15,221,888	18,255,648
Dominion or provincial Govt. debentures or stock	11,760 805	12,604,812
Other securities	52,376,054	52,328,325
Call loans on bonds and stocks in Canada	40,876,987	44,286,045
Call loans elsewhere	39,509,716	38,237,824
	$233,425,934	$233,456,831
Current Loans in Canada	363,329,721	358,063,500
Current Loans elsewhere	21.943,598	27,216,08c
Loans to Dominion and Provincial Governments	1,641,117	2,586,320
Overdue debts	1,978,025	1,911,018
Real estate	840,775	842,176
Mortgages on real estate sold	738,665	752,360
Bank premises	8,306,310	8,230,738
Other assets	9,781,040	5,070,665
Total assets	$641,985,372	$638,123,930
Average amount of specie held during the month	14,067,030	13,872,063
Average Dominion notes held during the month	28,651,860	26,822,892
Greatest amount notes in circulation during month	59,865,662	58,255,828
Loans to directors or their firms	11,954,418	11,447,333

It is noticeable that circulation has gone up by nearly two millions. This is a usual gain at this season of the year. At one time in June the circulation almost touched $60,000,000. The increase in public deposits in Canada is not far from three millions, viz., from $376,187,000 in May to $378,937,000 in June, and the increase is mostly of demand deposits. Outside of Canada there is a decline of about a million and a quarter in the deposits. Obligations to banks in Great Britain and the United States are less than they were in May.

Turning to assets, it is seen that out of a total of $641,985,000 (increased by nearly a million within the month) there is $233,425,000, or more than 36 per cent. readily available. Current loans in Canada have gone up by five millions, but current loans elsewhere are much less. With respect to call loans, however, there is an increase in those in the United States, while the call loans in Canada are reduced from $44,286,000 to $40,876,000. There is an increase of two millions in the average of specie and Dominion notes held during the month.

ABSTRACT OF BANK RETURNS.

Description.	June 30th, 1902	June 30th, 1903.	In Month 1903.
Capital paid up	$69,584,000	$76,660,000	In. $ 881,000
Circulation	53,953,000	58,865,000	" 1,916,000
Deposits	393,470,000	427,694,000	" 2,304,000
Loans, Discounts and Investments	393,183,000	453,702,000	Dec. 1,804,000
Cash, Foreign Balances, Net & Call Loans	165,061,000	159,402,000	In. 2,315,000
Legals	23,690,000	29,092,000	" 743,000
Specie	12,409,000	14,464,000	Dec. 53,000
Call Loans	92,216,000	80,385,000	" 2,132,000
Investments	59,591,000	64,135,000	" 797,000

Government Savings Banks,	$ 58,866,000	
Montreal City and District Savings Bank	14,504,000	
La Caisse d'Economie, Quebec	6,866,000	
Loan Companies	20,000,000	
		100,236,000
Bank Deposits		427,694,000
		$ 527,930,000

GOVERNMENT CIRCULATION.

Large	$ 26,832,000
Small	$ 12,174,000
	$39,006,000

Gold held, $25,930,000 or 66 per cent.

A RESOLUTE POLICY.

It is a good thing, occasionally, when cowardly and timorous counsels are about to prevail, to find some man or men who will raise his voice in a meeting and advocate the pursuing of a plucky and reasonable course. This was exemplified the other day when sixty or seventy policy-holders in the Victoria Mutual Fire Insurance Company assembled in Hamilton. The company had several losses of late, the aggregate of which would necessitate a call of say $6,000 being made on 1,300 shareholders. But rather than pay so insignificant a sum, incredible as it may seem, 300 or 400 persons left the company, while others declined to pay the call. It is only fair, however, to explain that a former employee of the company, now employed by a rival concern, was engaged in the dirty work of predicting the failure of the Victoria Mutual. And the members being largely farmers, most of them unacquainted with either underwriting or commercial principles, were easily scared.

Explanation being made of the company's position by Mr. Lees, one of the directors, a discussion ensued and one man suggested winding up, and with questionable

taste spoke slightingly of mutual companies. But others stood up pluckily for continuing. The Chairman of the meeting, Mr. John Milne, and Messrs. Lees and F. F. Dalley said if the policy-holders would stick by the company the business could be carried on successfully. Ex-Ald. Hannaford and Mr. Thos. Clappison spoke in favor of continuing.

It was then decided unanimously on motion of Messrs. Thomas Clappison and David Morton that the payment of the extra calls should be enforced, and the company continue in business. It was stated at the meeting, by Mr. W. R. Stuart, secretary, that the company's liabilities are only $10,000 all told, while it holds to-day premium notes to the extent of $40,000.

Mr. William Kavanagh is president of the Victoria Mutual and Messrs. John Milne, F. F. Dalley and Wm. Lees are directors. Mr. Justice Teetzel was a director till he was appointed to the Bench, and the late Major J. J. Mason was a director. These two vacancies are now to be filled by the directors. The company was formed in the early sixties to do a non-hazardous business, Mr. Geo. H. Mills was its first president.

THE LIVE STOCK INTERESTS.

No very important new feature has developed in the cattle trade, speaking so far as Canada is concerned. In Toronto and to some extent in Montreal, a certain degree of improvement has been visible in the demand, and prices during the last week or two have been well maintained. This applies to both export and butchers' cattle, and in the latter case it was accentuated at the Toronto market this week by the fact that the run was somewhat light. The prices being realized just now in Toronto for fair to good average grades are as follows: Export cattle, ex choice, $4.50 to 5.00; inferior cows, $2.75 to 3.25; butchers' picked lots, $4.65 to 4.75; do. choice, $4.40 to 4.60; do. fair to good, $4 to 4.30; good cows, $3.25 to 3.50; rough do., $2.50 to 3.00; bulls, export, heavy, $3.75 to 4.25; do. medium, $3 to 3.50; do. light, $2.75 to 3.00; feeders, short keep, $4.25 to 4.50; do. medium. $3.50 to 3.75; do. light, $2.75 to 3.00; stockers, 700 to 900 lbs., $3.60 to 4.00; do. light, $3.30 to 3.60; do. common, $2.75 to 3.00; milch cows, each $30 to 55.00; export ewes, per cwt., $3.65 to 3.75; do. bucks, per cwt., $2.75 to 3.00; culls, each, $2.00 to 3.00; spring lambs, each $2.50 to 4.25; do. per lb., $0.4¾ to 0.05; calves, per lb., $0.04 to 0.05½.

One trouble which is being complained of especially, we hear, in the rich cattle-raising district in Wellington county, Ontario, is the expensiveness of feeders and the lower prices for finished beef. That is to say, that while the feeders and stockers have kept up their comparatively high prices, the finished article is now very much lower than it was a year ago. It should however be remembered that prices for the latter for a time were exorbitantly high. In the meantime, the reason probably that stockers keep high is that so many have been shipped to Buffalo and other American points. Whether present values will be continued next fall is a moot question.

The aforesaid improvement has been mainly brought about by news from the Old Country. Liverpool advices of recent date stated that trade had been a good deal more active, though prices had not become quotably higher. However some slight advances were deemed not unlikely, though the hot weather, if it continued, would doubtless militate against this. For beef of nice weight the average top price was 10½c., though a few carcases were going as high as 10¾c. For ordinarily good grades, the price realized was 9¼ to 9¾c., with cow and bull beef at 8¼ to 8½c. Sheep were in less active demand and heavy animals were not wanted at all. For the latter 8½ to 9½c. was the price quoted, while young lean carcases sometimes fetched as high as 12½ or 13c. per pound.

In Great Britain, the fact that the imports of sheep and cattle from Canada show a remarkable increase, while those from the United States are decreasing, and British ports are closed against Argentina, is drawing interested attention to Mr. Chamberlain's preferential tariff scheme. The total number of cattle shipped into Great Britain from all parts of the world for the first six months of the present year was 235,560; of sheep, 176,209; of beef, 1,978,653 cwts.; of mutton, 2,201,099 cwts.; and of pork 336,312 cwts.; worth altogether £13,717,000, and of all this the colonies represented only £4,177,600. In view of this, critics are asking what will happen? Will the colonies be able to supply the demand and treble their present output? To us, we confess, it appears that with the encouragement which would be theirs under any probable scheme, it is not impossible that they should be able to meet these requirements, not perhaps immediately, but with courage and energy, in a comparatively short time. Wonders have already been wrought in Canada's export of dairy produce, of fruit, of cattle and dead meats. With the stimulus that any encouragement by way of preference would give, our export of food products to the Mother Country could be enormously extended.

THE WRECK OF THE MONTEREY.

It now appears probable that the accident to the C. P. R. steamship "Monterey" will end in that steamer becoming a total wreck. A fair proportion of the cargo has already been saved, but the holds, fore and aft, are, according to last reports, already filled with water, as are also the engine and stoking rooms. At high tide the water is 27 feet deep in the holds. The ship was valued at $350,000 and the cargo at about $600,000, out of which cheese, butter, flour and cattle have been saved to the amount of $80,000.

The accident is important, not so much in itself as in its effects on the feeling with regard to the St. Lawrence route, more especially as it occurred in the first year of Canadian Pacific ownership of Atlantic steamers, and at a period which, so far as insurance is concerned, might be regarded as a test-season. The vessel was a long way out of her course at the time of the stranding, though the stipulation in the insurance policy that she should avoid the Belle Isle route and take that by way of Cabot Island was in no way infringed upon. It is important to bear in mind that the disaster was in no way brought about by any defect in appliances in what are properly termed Canadian waters. The ship was off the coast of a French island, south of Newfoundland. The alleged breaking down of the fog signal at the French lighthouse has brought forth a good deal of comment, to such an extent indeed in some circles that condemnation of all aids to navigation has been indulged in freely. This is absurd, however; for what has happened merely shows that "aids" should not be relied upon implicitly. Machinery will meet with mishaps, however carefully made and tended; and lights and whistles, while very valuable to the mariner, should not be regarded as doing away with the necessity for slowing down in foggy weather and for keeping the sounding lead constantly in operation. As the Minister for the Marine and Fisheries said, referring to this very point, it

is an order very strictly enforced by vessels in the British navy, and no war vessel has ever met with a similar accident.

THE ARGENTINE REPUBLIC.

This extensive territory, occupying so much of the lower portion of South America, is growing steadily in production and in commerce. The latest statement of its area is 841,000 square miles, though if the portion of land in dispute between this republic and Bolivia were added, the area would be not far from a million acres. Argentina extends some 1,400 miles from north to south, nearly the whole of Patagonia having been added to it. From east to west it covers 400 to 700 miles. The population, which has practically doubled in a quarter century, is now stated at about five million souls.

In spite of its relatively small population, the Republic has already a considerable importance in international trade, owing to its limited local industries and the valuable natural products which constitute practically the whole of its export; and it is destined to assume greater importance yearly, for the area of virgin soil which can be cheaply acquired and turned to productive uses, and of that which might be diverted from grazing to cultivation, is still very large. In the latest issue of Dun's Review is an interesting paper on the growing commerce of Argentina, the figures of which are compiled by the Buenos Ayres office of R. G. Dun & Co. According to this paper, for the year 1902 the total exports were valued at $179,500,000 (gold), made up as follows:

Animals and animal products, the largest single item being unwashed wool (valued at $45,000,000)	$104,500,000
Agricultural products and by-products, chiefly wheat, maize and linseed	68,200,000
Forest products, chiefly quebracho logs and extract	3,700,000
Mining "	300,000
Sundry " including provisions for ships, $1,800,000	2,800,000
Total exports	$179,500,000

Expressed in quantities the principal exports of Argentina were as follows:

	Tons.		Tons.
Frozen mutton and beef, including chilled	150,000	Tallow	49,000
Sheepskins	41,000	Linseed	340,000
Salted hides	35,000	Maize	1,119,000
Dry hides	26,000	Wheat	645,000
Canned tongues	5,500	Flour	39,000
Butter	4,000	Quebracho logs	245,000
		Wool	90,000

Respecting the foreign commerce of this enormous country it has thus far been mainly with Europe. Of course, as this article states, as the demands of the home market become greater, and the scope of manufacturing extends, the requirements for imported raw material in the United States must grow; and it is to the Argentine Republic that they must chiefly look for such material as wool, skins and hides. The exports have hitherto gone very largely to Europe. Last year the United States stood fifth in the list of the Republic's customers, the order of the first four being Great Britain, France, Germany and Belgium. So far the principal exports to the United States have been dry hides and quebracho for tanning.

As regards imports, the United States comes next after Great Britain in supplying this market, Great Britain supplies rather more than one-third of the imports, being closely followed by Germany, and at some distance by Italy. The United States shared in the general shrinkage of trade with the Argentine Republic in 1902; but while their proportion of the import trade fell from 13 to 12 per cent., that of great Britain rose from 32 to 36. Of the total imports from the United States about one-quarter consists of lumber, one-tenth kerosene, and similar or higher proportions of fencing materials and agricultural machinery, respectively, while binder twine and steel rails are also important items. All these lines might be greatly increased with improving trade; but in the large section of imports included under textile materials the United States are practically unrepresented.

The returns of the first quarter of the present year show an increase in exports of twelve million dollars, and in imports of six millions. But exports have gone on briskly up till now, so that for the five months to the end of May there is an increase over the previous year in wheat of 650,000 tons, and there is a prospect, if the weather improves, of a heavy increase in maize shipments, while the open character of the winter so far has kept up supplies of fat cattle for the freezers. It is therefore to be anticipated that imports in the second half of the present year will be very heavy all round.

"From the national point of view the outlook is better than it has been for years. Internal disturbances are a thing of the past. The "armed peace" with Chile has been ended by an arbitration which has been cordially accepted by both sides, and a heavy drain on the national resources has thus been stopped. This aspect of the question has been brought into prominence by the warm welcome extended here to a representative party of Chileans; and Argentine and Chilean men of-war have fraternized without mishap. A somewhat more extended survey of the commerce and economic condition of the Argentine Republic will follow in an early number."

THAT NEW BRUNSWICK SHORT LINE.

The view of Mr. Blair, late Minister of Railways, and of those who think with him, is that a short line through northern New Brunswick will parallel and seriously injure the Intercolonial Railway. The Premier contends, on the other hand, that the new line will not parallel the Intercolonial; that between the two lines there will be a distance varying from forty to seventy-five miles, and that the proposed line will serve an entirely new territory. The view of Sir Wilfrid is shared by the St. John Gazette, which has an article from which we make the following extract:

"From Quebec to Edmundston, the new line would run considerably to the south of the St. Lawrence, and quite a distance from the Intercolonial. It would pass through a rich section of the province of Quebec, which is in need of railway facilities. After reaching Edmundston, it would strike through the central portion of New Brunswick, following presumably the route surveyed some years ago, by a company of which Sir Joseph Hickson, when general manager of the Grand Trunk, was a prominent member and which at that time expected to build the line with generous public aid which Sir John Macdonald proposed to give to the company. It would cross the Miramichi in th vicinity of Boiestown, and in its course to Moncton would come close to Chipman, where connection could be made with the railway from there to Norton on the Intercolonial.

"The line from Edmundston to Chipman would open up a vast section of well timbered country, which is said to be adapted for agricultural purposes, while, by making connection with the system of The New Brunswick Coal and Railway Company at Chipman, it would afford a line to St. John, via Norton. From Chipman, as a common point, the trains would diverge for Moncton, and St. John, while Fredericton would also be brought in close touch with the transcontinental line over the road now being built from Chipman to the capital.

'When it is remembered that the distance from Quebec to St. John by the new route would be two hundred miles

shorter than by the Intercolonial, it will be seen what an advantage it would give to the Grand Trunk Pacific for transporting the products of the West to the seaboard at St. John, over what it would have if obliged to use the much longer Intercolonial route from Quebec to Moncton and thence to St. John. It seems to us that from a national standpoint, and particularly from the standpoint of the Maritime Provinces, there is much to be said in favor of the Government proposal.

THE NEW STOCK EXCHANGE IN MONTREAL.

The new building of the Montreal Stock Exchange, now being erected on the eastern side of St. Francois-Xavier St., promises to be a very handsome and spacious structure. It will have a frontage of 108 feet and a depth of 72. The facade will be an imposing one, consisting of a central colonnade of detached Corinthian columns, six in number, forming a spacious loggia twenty feet back from the street and sixty feet long. Five large bronze windows are to light the board room on the front, and five in the rear. The central facade will be forty feet high flanked with two wings. The north one, containing the members' entrance, a large coat room, and an anteroom giving access to the board room and a committee room.

The south wing will contain a members' and clerks' entrance, as well as a separate entrance for the public, opening into an entrance hall and reception room at the back. In the rear of the reception room is to be the clearing house, a stately room of 22 by 27 feet, with vault accommodation off it. In the basement are placed the telegraph operators', clerks' and messengers' rooms, a storage room, et cetera.

The board room is to be a magnificent chamber 49 by 60 feet in size by 31 feet high, that is intended to rival in beauty and proportions anything of the kind on the continent

The room will be in the Corinthian order with pilasters supporting an elaborately decorated ceiling. The lower part of the room will be of simple large blocks of Italian marble. At the further end the public gallery is to run. Telephone stands with accommodation for 64 instruments will be arranged in groups at one end of the room and around the walls, and pneumatic tubes and ticker stands will be found at frequent intervals. Particular attention has been paid to the lighting, thorough ventilation, washing and screening of the air admitted to the building. It is intended to be ready for occupation by March of next year.

PETERBORO VERY MUCH ALIVE.

Situate on the river Otonabee, and almost in the centre of that chain of beautiful waters known as the Kawartha Lakes, Peterboro is wonderfully well situated for furnishing water-power. This was foreseen when the town was founded in 1825. It is not long since a prominent Englishman, member of a big banking house, declared Peterboro destined, in his judgment, to be one of the large manufacturing centres of the North American Continent. Seventy miles northeast of Toronto, on the main line of the C.P.R. to Ottawa and Montreal; on the Grand Trunk Railway, which radiates from it east, west, north and south; on the Trent Canal, which bears larger boats than the Erie—what better facilities for handling freight could any town possess? A recent visitor tells us of extent of its water-power facilities and the great cluster of industries which are now congregated there. He says: "Besides the Auburn Woolen Mills and the Canadian General Electric Works, large concerns both—the latter putting up new buildings—there are some very extensive factories of more recent date. The Cereal Company's works are of enormous extent, and use much water, both in the shape of power and for processes of manufacture. And the cordage works, into which $400,000 to $500,000 of Canadian capital has been put, are doing extremely well. Then there is a beet sugar plant projected and the walls being raised. It is further reported that the Cereal Company, which has very large water privileges, is about to re-open the street railway."

Everything in and about the town appears to be booming at the present moment. And it may not be inappropriate for us to mention that a reunion of Peterboro "Old Boys" is to be held from Saturday to Monday next, which from the programme promises to be a most enjoyable affair. Peterboro and Ashburnham contain between them some 13,000 to 14,000 of a population; and the assessment valuation was last year $4,750,000. Houses are greatly in demand for dwellings, a fact which better than any other illustrates the industrial activity of the place. An enterprising man named J. Alexander Culverwell was some years ago impressed with the value of water-power in and around Peterboro. He was instrumental in forming the Central Ontario Power Co., of which he is managing director. It is offering electric power at Peterboro to manufacturers at remarkably low cost. We understand further that Mr. Culverwell, who is an electrical expert, in 1901 or 1902 bought other water-power properties, both outside and within the city limits. He deserves to do well, and get a good return for his enterprise. The whole county of Peterboro is uncommonly blest with resources of value. Much of it is fine arable land whose cultivators are thrifty. If its timber wealth is mostly a thing of the past, there are treasures of a mineral nature that only need developing. Finally, the surroundings of Peterboro as a resort for summer pleasuring are difficult to excel. Stony Lake is a scene of enchantment, and a trip on the waters traversed by the steamers of the Trent Navigation Company will give the passenger his fill of summer beauty.

A LINE FROM TRINIDAD.

Writing on 10th July from Port of Spain, Trinidad, to the Monetary Times, Mr. T. Geddes Grant, commission merchant of that city, says: "I have been appointed one of the delegates from our Chamber of Commerce here to the Congress of the Chambers of Commerce to be held in Montreal in August, and hope during my visit to get in touch with many persons who should become more deeply interested in trade between Canada and the West Indies. A few years ago there was a prejudice against anything Canadian on the part of our people, but that has gradually given way, and now there is a readiness to give anything from Canada a fair trial. There is one thing that the Canadian manufacturers should bear in mind, and that is to bring out prominently that the goods are made in Canada. It is not sufficient to mark on oats, 'Galt, Ontario,' because to the average man in the West Indies this means nothing; but if they had 'Canada' upon the packages, it would mean a great deal. For instance, I often come across canned goods marked 'Charlottetown, P.E.I.,' which conveys nothing to most of our people, for they do not know where Prince Edward Island is; but if the word 'Canada' was there, it would have a good effect. The term, 'Made in Germany,' or 'Made in England,' is always kept before the purchasing public of the world, and I think 'Made in Canada' should be made equally as prominent."

ACROSS THE ATLANTIC.

A Canadian business man, who is on a visit to the Mother Country after many years' absence, sends to the Editor some impressions of the various cities of England and Scotland he has been visiting: "There are many fine and intelligent business men, over here, who are for the most part friendly. And there can be no doubt that they would like to increase their trade with Canada. But they don't seem to know how to set about it very well. It looks sometimes as if they thought Canadians ought to confine their buying of goods to the Motherland in a spirit of filial gratitude or something of that sort. Then the Motherland would not even need to send commercial travellers over to Canada.

"Once in a long while you come across a man, a principal in the house, we will say, who has been in Canada and the States, and who knows the conditions amongst us. Such

a man will at once agree that for many things the United States is the most natural place for us to buy. And he will own up, too, that it is the Britishers' own fault if they do not sell us more of their manufactures. The lordly English salesman with his 'Take it or leave it!—*we* made it, and it is the best in the world,' will not succeed so well as the polite German or the hustling Yankee, who will say to the proposed customer: 'If these goods of ours don't suit you, we will take your specifications and make something that *will* suit you.'

"It is hard for a Canadian to be patient when he finds himself surrounded, as he is over here, with such ignorance of our country. I declare to you if I had a kiddie of fifteen who did not know more about Canadian business than the majority of the people here, I should spank him. But I think the Britisher is waking up to the idea that we are not clothed in furs eleven months of the year. It is very cruel to a man who knows business on both sides of the water to meet the horrible ignorance that one runs across occasionally. You must not think for a moment, however, that this ignorance is on the side of the Britisher only; it is almost as bad among Americans and Canadians, for they do not seem to know what a great market there is over here. The Americans, I think, are wakening up to it more than we are.

"The Canadian manufacturer and shipper are just as densely ignorant of the wants of Great Britain as the other way round. You would do well to impress on the Canadian manufacturers and shippers that something more is wanted than to join a society, sit down in a nice room, pass resolutions, fire verbal bouquets at each other, and then to go down and try to touch the Government for an extra 10 per cent. tariff. Why don't they get out and hustle for foreign trade? This market is open for millions of stuff at better prices than we can get in Canada. And yet I have been told by people here who have written for quotations that replies have come back, saying that our houses were too busy with the home trade to look after foreign exportations. Do you know, Sir, that we Canadians are rather apt to be struck on ourselves, thinking that we 'know it all?' But we don't, by any means. The sooner we drop that idea the better. It is rather laughable, but still it is a sore point with me, that I should have to pay 9½d. for four apples. What are our people thinking of? You know that if we pay two dollars a barrel for them when we are at home, in Canada, we kick."

THE CANADIAN NORTHWEST.

Lest we grow self-opinionated, it is well sometimes to take notice of the opinions of people outside our borders as to the progress of Canada. The Nor' West Farmer, published in Winnipeg, has in its last issue a letter from W. J. Kennedy, Professor of Animal Husbandry, Iowa Agricultural College. This refers to the American agricultural editors' trip through the Canadian Northwest. The professor says: "I have just returned from a ten-day tour through the Canadian Northwest. The trip was a most pleasant and profitable one. In many respects it was a complete revelation to me. . . I have been fully convinced that the people in the outside world have no conception whatever as to the immense possibilities of your country. The good things are not confined to any one district or vicinity. The soil and climatic conditions of the Edmonton district vary from those prevailing at Indian Head, Souris, or Lethbridge. Each district has its advantages and disadvantages. The Edmonton district impressed me as being especially well adapted to mixed farming. . . The Lethbridge district, with its modern irrigation facilities and new sugar beet factory, was a point of peculiar interest.

"One of the most profitable days was spent at Indian Head. The experimental farm was a complete revelation to me. The good work being done there will mean millions of dollars to the farmers of Western Canada. Nowhere else on the continent has the writer seen so much practical and instructive work done for the meagre sum of money expended. Angus Mackay is a genuine farmer in every respect. . . The courtesy of your people on every hand astounds the American visitor. Never before did we receive such kind and generous treatment. You have a wonderful future. Your development is going to be marvellous during the next decade.

"A word of caution to your farmers and I am through. Good people, you have a wonderful country, your soil is very productive, but sooner or later you must adopt mixed farming. Thus, why not purchase a few good specimens of live stock now and lay the foundation for a good herd or flock? No country can continue to prosper without good live stock. Grain growing is uncertain and sure to lead to failure and hard times, followed by a national set-back."

UNITED STATES COMMERCE.

The commerce of the United States of America continues to grow apace. The total foreign trade of that country, imports and exports combined, for the fiscal year ending June 30th, 1903, was the largest ever recorded. We learn from a recent compilation that the total imports and exports combined amounted this year to $2,445,610, 417, as against $2,285,-040,349 in 1902, and $2,310,937,156 in 1901. The record for exports was made in 1901, and this year's exports do not nearly equal that phenomenal year. The great figures of the last twelve months were due to the phenomenal showing made by imports, for exports, although considerably in excess of the total for last year, fell well below the record made in 1901. The excess of exports over imports, popularly styled the balance of trade, which two or three years ago was so large and increasing so fast as to occasion serious concern among foreign observers, has fallen to the lowest point in several years. The following table shows the total exports and imports of the country for six recent fiscal years:

	Exports, Year.	Imports, Year.
1903	$1,419,991,290	$1,025,619,127
1902	1,381,719,401	903,320,948
1901	1,487,764,991	823,172,165
1900	1,394,483,082	849,941,184
1899	1,227,023,302	697,148,489
1898	1,231,482,330	616,049,654

The excess of exports over imports for the fiscal year just ended was $394,372,163, as compared with $478,398,453 last year, and $664,592,826 in 1901. According to the preliminary figures issued by the Treasury Department, the combined exports of breadstuffs, provisions, cotton and mineral oils were only slightly larger than in the preceding year, and were greatly below those for 1901. Considered separately, exports of breadstuffs aggregated $213,043,296, a gain as compared with the preceding year of eight millions, but a decline as against 1901 of over 54 millions. Exports of cattle and hogs, $28,520,885, were almost the same as a year ago, but eight millions less than in 1901. Exports of meat and dairy products, $160,336,716, were 21 millions below the preceding year, and 20 millions less than 1901—the year 1902 having exceeded 1901 in this case owing to the high prices then prevailing. Cotton exports were remarkably large; they aggregated 6,932,110 bales, valued at $315,847,105, which was 25 millions more than in 1902 and two millions above the record mark reached in 1901. Exports of mineral oils, $65,-118,303, were the smallest for several years. As the preliminary returns do not include any record of exports of manufactures it is not possible as yet to state these, although it is known that they show an increase, as compared with 1902 and a decline as compared with 1901.

THE ONTARIO CHARTERED ACCOUNTANTS.

It was a happy thought on the part of somebody to suggest that the 1903 meeting of the Ontario Institute of Accountants should be held at the Hotel Brant, in Burlington, and that they should go thither by boat. The gathering was both successful and interesting. The retiring president, Mr. W. C. Eddis, in his annual address, congratulated the institute on its healthful growth. He stated that at the examination in May there were 52 candidates, but only a few passed, be-

cause the examiners were rigidly keeping up the standard of qualification. Reference was made to the deaths of two prominent members, Messrs. Wm. McCabe and J. J. Mason. The chairman invited all members, particularly those resident out of town, to use the new offices fitted up by the institute. The election of the council for 1903-4 resulted as follows: Geo. L. Blatch, Ottawa; Wilton C. Eddis, Geo. Edwards, Jas. Hardy, D. Hoskins, Toronto; J. W. Johnston, Belleville; W. T. Kernahan, J. P. Langley, Toronto; F. H. Macpherson, Windsor; C. R. W. Postlethwaithe, Toronto; C. S. Scott, Hamilton; W. B. Tindall, T. D. Williamson, John H. Young, Ralph B. Young, Toronto. There was not time for the election of president and vice-president. This will take place at a meeting of council shortly. It is understood that next year's meeting will be held at Niagara-on-the-Lake.

FIRE INSURANCE MATTERS.

There was an investigation into the grounding, off the Cape Breton coast, of the steamer "Herinod," bound to Sydney with coal, and several captains testified that the aids to navigation around the Cape Breton coast were entirely inadequate to ensure the safety of vessels during a fog. Higher insurance rates are talked of, unless better protection is given.

We have received a long letter—which we do not print, thinking it unwise—taking the view that fire insurance interests are in a bad way and that no one can hope to get dividends from any fire insurance company for some time to come. On the same grounds which the writer of this letter uses, it might be argued that no one should buy shares of any security because of the number of over-capitalized and indigestible stocks that are now on the financial market. But this would be preposterous. Well managed fire insurance companies, which proportion the rates to the risk, can earn dividends—are earning dividends. No better proof of this is needed than the case of the Queen City Fire Insurance Company, Scott & Walmsley, managers, which has been doing business in Canada for thirty-two years. This company's original capital was $100,000 subscribed, and $10,000 paid. With such care has it been conducted that the fortunate shareholders have received ten per cent. dividend on the amount paid up every year since 1871, and in addition special distributions which completely pay the balance on the stock. Quite recently, this company declared a dividend of 50 per cent. on the subscribed capital stock, payable Sept. 7th. This is to be used, we are told, to pay the balance on unpaid stock. The Queen City Company will then have a capital stock of $100,000 fully paid up, a reserve of $100,000, profit and loss account of about $25,000, and contingent account of about $15,000. Of course, such results as these imply caution and competent management. But they go to show that money can be made in fire underwriting. Our correspondent must be, like the fat Babu in "Kim," "a fearful man." His letter is full of unreasonable fear.

LIFE INSURANCE ITEMS.

The Empire Accident and Surety Co., of London, Ont., one of the latest companies to enter the field which its name indicates, has received its charter, completed its board of provisional directors, and expects to be in a position to write business at an early date.

At the regular quarterly meeting of the board of directors of the Northern Life Assurance Company, held in their offices at the city of London, Ont., T. H. Purdom, Esq., K.C., of London, first vice-president, was elected president of the company to fill the vacancy caused by the death of the late president, the Hon. Justice Mills. Mr. Thomas Long, of Toronto, the second vice-president, was elected first vice-president; W. S. Calvert, Esq., M.P., of Strathroy, was elected second vice-president, and the vacancy on the board of directors was filled by the election of Charles Jenkins, Esq., of Petrolea. The business of the company for the previous six months, it was stated, was entirely satisfactory, and the prospects for the balance of the year considered very encouraging.

It is possible to whip a horse until the whip no longer serves to goad him, and it is possible to harass a man by letter or by word of mouth until he resents being asked every quarter or every month to do more and more work. Some life companies, especially in the United States, appear to be vieing with each other who can issue the most stimulating circular asking for more business. The Insurance and Finance Chronicle has a good paragraph on that sort of thing, as follows: . . . "Insurance agents, as well as other men, exhibit the same qualities. Some are in the state known in the religious world as "Gospel-hardened," for their pulpit eloquence has lost its power. So, however forcible the appeals from head office, some agents keep up the old jog-trot pace year in and year out, hardly ever pressing the collar, but yet doing useful work. Others answer such appeals by sudden but soon exhausted bursts of spasmodic energy, while the highest class, men like dynamos, full of go and vim, need no stimulus from outside, but are apt to be irritated by incessant cracks of the head office whip, yet are strengthened and refreshed by kindly recognition of their work. Periodic circulars to agents should therefore recognize these various classes, as it is unwise and unfruitful of good results to assume that all agents need the same vigorous stimulation to call out and inspire their best exertions."

FINANCIAL ITEMS.

Brouse, Mitchell & Co., stockbrokers and dealers in municipal debentures have just moved into new and more commodious offices on the ground floor of 20 King Street west. Formerly they were at 24 King Street west.

The late A. F. Gault, of Montreal, left the bulk of his estate to Mrs. Gault, his son, A. Hamilton Gault, and his daughter, Mrs. Benson. As might have been expected, however, from a man so interested in institutions of a beneficent character, he left money in varying amounts to several such, among them being the Protestant House of Industry and Refuge, Montreal General Hospital, the McGill Y.M.C.A., etc.

George Rowley, the ex-manager of the Elgin Loan Co., arraigned at the St. Thomas Court House and charged on five indictments with forgery, perjury, theft, embezzlement and misappropriation of funds, pleaded guilty to all charges. Upon representation by Crown Attorney Donahue, that Rowley's assistance would be of great value in straightening out accounts, sentence was deferred for three weeks.

The Cunard Steamship Company, in order to keep itself exclusively British, is considering the advisability of altering its constitution so that no foreigner will have power to hold office as a director or principal officer. Another change contemplated is to increase the capital to £2,000,000 by the creation of a new body of shares to the value of £20, to be known as Government shares, and to be issued only to Government nominees.

The official announcement of Mr. F. H. Clergue's retirement from all active part in the management of the Consolidated Lake Superior Company has now been made. Mr. Clergue will devote his time to the interests of the Canada Central Railway. The company is now offering $12,500,000 worth of new thirty-year 4 per cent. collateral trust bonds at 60. It is stated by Mr. William Coyne, assistant to the president of the company, that when arrangements have been concluded for the payment of the Speyer note, the only obligation that the company will have to pay will be the interest on $15,000,000. This would only mean that the company would have to earn $600,000 per annum, or $50,000 a month. When the copper-nickel mines are in operation, they should, according to Mr. Coyne, almost show earnings to that amount. From a purely practical standpoint, he holds that there never was a time when there was less reason for any financial difficulty in the way of the company than at present.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending June 30, 1903.

		CAPITAL			LIABILITIES			
		Capital authorized	Capital Subscribed.	Capital paid up	Amount of Rest or Reserve Fund.	Rate per cent. of last Dividend declared.	Notes in circulation.	Bal. due to Dom. Gov. after deducting advances.

J. M. COURTNEY,
Deputy Minister of Finance.

TRADE OPPORTUNITIES.

Imperial Institute, London, 9th July.—A Liverpool firm would correspond with Canadian shippers of tallow, hides and skins; also, mica and plumbago. A London paper agent would act as representative of Canadian paper mills. A firm making boot-blacking and furniture polish would like to develop trade in Canada.

Canadian Government Offices, 10th July.—A Sheffield firm making tools would correspond with a wholesale hardware dealer in Canada dealing in tools of engineers, shipbuilders, etc. An English firm of cider-makers and bottlers wish to hear from Canadian exporters. An Ontario dry goods salesman would act as agent for some export house in Britain. An agent, experienced in the hardware trade in Canada, would like to represent some English makers of or dealers in hardware, cutlery, and engineers' supplies.

ANSWERS TO ENQUIRERS.

R.S.M., Brandon.—There is abundant room for difference of opinion as to the route of the railway proposed through Northern Ontario. The average man is not at all well informed about the territory, and those who have traversed it are few. Your question about our remark in the article of 26th June, "Manitoba to the Sea Board," is natural enough. No wonder you were puzzled. The word "north" was used in error instead of "south," thereby reversing the meaning of the writer. The last sentences of the first paragraph on page 1753 should have read: "Opinions are not yet agreed as to whether the railway in question should pass to the north or to the south of Lake Abittibi. It is probable that most of the people who are informed about that part of Northern Ontario would prefer to go to the south; but from what we hear of the results of exploration as far north as Lake Mistassini in Quebec, there is much to justify these who advocate the more northerly route in preference."

Subscriber, Cornwall.—There are two places, if not more, in Canada named Lakefield; one in Peterboro County, Ontario; and one in Argenteuil County, Quebec, near Lachute. The former is the larger and the more likely.

A.B.N., Detroit.—Cannot say. The expression is not familiar to us. Carlyle has written something to the same effect, but in more and longer words. It was Voltaire who said: "Labor rids us of three great evils—irksomeness, vice, and poverty."

FOR GROCERS AND PROVISION DEALERS.

Into the Union Stock Yards at Toronto Junction, stock has been pouring in large quantities during the last few days. United States dealers are taking advantage of the C.P.R. to ship in large quantities, in readiness for the forthcoming opening.

The Paisley, Ont., Pork Packing Company is the latest concern of that nature to go under. It had a capital of $10,000 but its liabilities are so far not stated. The causes for the assignment are, no doubt, keen competition, the difficulty of getting live hogs, and the high prices which have had to be paid for them.

Messrs. Black Bros. & Co., Halifax, N.S., have been converted into a limited liability company, with a capital stock of $150,000 and officers as follows: Messrs. G. J. Troop, president; G. S. Troop, vice-president and managing director; W. H. Troop, secretary; R. P. Butler, treasurer. It will make special efforts to develop the fishing side of its business, and will erect a plant at La Have for the manufacture of boneless and shredded fish. They also have a fishing ground in Labrador, which it is the intention to improve.

On July 10th, according to a report of that date recently to hand, Canadian butter was about 2s. per cwt. lower. Irish, French, Dutch and Russian butters were all in large supply and cheap, although a gradual diminution in the supply of milk, especially in France, was beginning to make itself felt. The quality of some of the Canadian butter coming forward was exceptionally fine, especially that made from pasteurized milk or cream. Choicest brands fetched 92s. to 94s., and finest, 88s. to 90s. Against the above may be placed a remark, in the circular referred to, that choicest Russian was unquestionably the best value on the market, and another that it was surprising that it paid Siberian shippers to sell butter at the prices they did. Some large concerns were reported to be buying it at about 80s. per cwt. for storage purposes.

Rebuking the indiscretion of those who are predicting a seventy or eighty million bushel crop of wheat in Manitoba, the "Nor' West Farmer," of Winnipeg, says, at the conclusion of an article from which quotation is made elsewhere: "We may in conclusion point to the record of the winter wheat crop of the United States for this same year. On April 1st they had a showing of fully 97 per cent. In two months that splendid showing had to be cut down 21 per cent., and some critics allege that even that reduced estimate is still too high. The foreign nations that want cheap wheat from this continent prefer big crop reports. Our real friends are those who keep inside the truth."

The Canadian Government Agent in Jamaica, like others, is surprised at the supineness of Canadians in the matter of developing their dairy trade with the West Indies. He says: "What astonishes me, in consideration of the very appreciable output this market offers for both butter and cheese, especially the former, is that other butter and cheese sections throughout the Dominion do not make a determined bid for the trade notwithstanding the conditions existing in their favor as against imports from the United States and the United Kingdom. I do not hesitate to say that if Canadian factories can be got to pay some attention and show some interest in meeting the conditions of the demand, and dealers and exporters will reasonably co-operate in making an energetic effort to cultivate the Canadian demand, the time would not be far distant when the Canadian article would practically monopolize the best trade."

FOR DRY GOODS MEN.

The Alaska Feather and Down Company, of Montreal, Limited, draw our attention to the fact that they have not advanced the prices of quilts, cushions and cosies by 7½ to 10 per cent. as announced in recent issues. We regret the error. The only article which has been raised in price in their list is feather pillows, which have gone up 10 per cent.

The names of the representatives from Trinidad to the Chamber of Commerce meetings, to be held in Montreal next month, are: Hon. George Goodwille, member of the Legislative Council; Mr. Edward Tripp, Commercial Agent in Trinidad for the Dominion of Canada, and Mr. T. Geddes Grant of that island.

We note the formation of a Canadian company to manufacture linen. The parties are Christian Kloepfer, Guelph; J. A. Kammerer, Hamilton; J. D. Shier, Bracebridge; J. H. Van Dusen, Reuben Millichamp, Ewen Mackenzie and Dr. Beattie Nesbitt, Toronto. Western Ontario is regarded as a good flax-growing country. A site for a factory is said to have been secured at Bracebridge.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, July 23, 1903, compared with those of the previous week.

Cities	July 23, 1903	July 16, 1903
Montreal	$21,538,948	$23,442,607
Toronto	14,204,293	.....
Winnipeg	4,503,489	4,515,570
Halifax	1,677,669	1,696,630
Hamilton	1,027,567	1,044,275
St. John	1,200,023	966,622
Vancouver	1,666,388	1,335,307
Victoria	502,194	543,025
Quebec	1,711,362	1,621,241
Ottawa	1,969,275	2,535,636
London	898,580	889,886
	$50,899,788	$.....

The following Brands manufactured by . . .

The AMERICAN TOBACCO CO.

OF CANADA, LIMITED

are sold by all the leading wholesale houses

—CUT TOBACCO—

OLD CHUM MEERSCHAUM
OLD VIRGINIA

—CIGARETTES—

SWEET CAPORAL DERBY

YILDIZ MAGNUMS
Dardanelles

Pure Egyptian Cigarettes.

WE are told that the Messrs. Gooderham intend to erect within a short time a $50,000 store and office building on the northeast corner of King and Sherbourne streets, Toronto.

THE ferry service in Vancouver, B.C., has now passed altogether under the management of the North Vancouver Ferry & Power Co., organized by Mr. A. St. G. Hamersley. Extensive improvements will be made, including the addition of a new double-ended ferry steamer, of which the tenders for building will be awarded shortly.

Commercial.

MONTREAL MARKETS.

Montreal, July 22nd, 1902.

Ashes.—The demand is still light, but owing to the extreme paucity of receipts, quotations for pots keep creeping up, and $5.60 has been paid for first quality. There has been little or no recent business in second pots or pearls.

Cements and Firebricks.—There has been no recent change in prices, which rule steady, with good demand reported. Since last report there have been no receipts of English cement, but 4,500 barrels and 27,030 bags of Belgian are reported, and 126,500 firebricks.

Dairy Products.—The butter market has assumed a firmer tone, quotations being from a quarter to half a cent stronger than a week ago. For finest creamery 19c. is asked in some cases, but 18¾ to 18⅞c. seem to be the generally accepted figures. The cheese market is quiet at the moment, with values barely at the level of a week ago. We quote Quebecs, 9¼ to 9⅜c.; Townships, at 9½c., and Ontarios at 9⅝ to 9¾c. Shipments of cheese last week again considerably exceeded those of corresponding week last year, the figures being 98,342 boxes, as compared with 46,641 boxes, and the total increase for the season to date over the same date in 1902 is 207,600 boxes, and over 1901 some 336,000 boxes. Exports of butter last week were 10,912 packages, making 71,901 packages to date, as against 149,303 packages at this date a year ago.

Dry Goods.—Wholesalers in this line are quite busy. Fall deliveries to country customers are now quite general, and the warehouses are now kept open to six o'clock, instead of five, as earlier in the summer. Remittances are barely so brisk, but some little falling off is usual in July and August. In the cotton situation there are no new features, but all quotations rule firm at late advances. Several representatives of French dress goods manufacturers have been in town this week, and they quote all lines 10 to 12½ per cent. dearer, while of the opinion that prices are liable to go higher still, as their principals report a difficulty in securing adequate supplies of fine wools.

Groceries.—Jobbing grocers report a somewhat quieter business, but this is not unusual at the season. In sugars, however, there is activity, refiners reporting a strong demand and market, and prices are again 10c. a cental up

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.

since last writing, making standard granulated now $4.25 at the factory, with yellows ranging from $3.50 to $4.10; these figures being for barrels, bags 5c. less. Teas are in fair request, particularly Ceylon and Indian greens at from 15 to 19c.; some business has also been reported in good medium Japans of 1902 at 17 to 18c. Late advices from the Mediterranean are of favorable character as regards fruit. The various crops of nuts will be rather later than usual, but they are all doing well except, perhaps, filberts, which had rather a bad set back in the early spring. Sicily filberts are quoted for September shipment at 22s. 3d. per cwt. c. & f., Montreal, equal to laid down cost of about 7½c.

Hides.—The hide market is firmer, 8½c. being now the general quotation for No. 1 beef hides. This is not owing to any increased demand, but mainly to increased competition among buyers. In calfskins and lambskins there has been no recent change.

Leather.—The market is a steady one, with fair local demand, and Quebec shoe manufacturers are said to be buying more freely. Considerable export of sole is also reported from this port. No. 2 manufacturers' sole is quoted at about 24c.; slaughter, 27 to 28c.; grained upper, 14 to 16c.; waxed ditto, 32 to 35c.; Ontario splits, 19 to 21c.; Quebec, ditto, 15 to 17c.; calfskins, 16 to 23c. per foot; patent cow, 16c.

Metals and Hardware.—While the movement in heavy metals is less active, hardware men report good business for the season, with something already doing in the way of fall trade. In iron products there are no local changes. No. 2 Summerlee pig iron continues to be quoted at $21, in ordinary lots, and bars at $1.95 to $2. The late general quotations for Canada and tinplates, etc., are unchanged, though some dealers claim to be able to buy at shaded figures. Tin and copper being speculative articles appear to be affected by the shrinkage in stocks, and are weaker, copper being quoted at 14½ to 15c., and tin at 30 to 31c. Lead is fairly steady at $3.10; antimony, 7¾ to 8c.; spelter, $5.75.

Oils, Paints and Glass.—There is a good seasonable distribution in progress. Some further easing off seems anticipated in linseed oil; turpentine is steady. A combination of French ochre manufacturers is reported, and makers of Canadian oxides are said to be firmer on quotations. We quote, as follows: Single barrels, raw linseed oil, 55 to 56c.; boiled, 58 to 59c.; net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 73c., single barrel. Olive oil, machinery, 90c.; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gallon; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands) $5 to $5.15; No. 1, $4.75 to $4.87½; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 5c. for pure; No. 1, ditto, 4 to 4½c.; genuine red ditto, 4¼-4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

Wool.—Local importers report business as quiet, transactions being confined to small parcels. Prices are firm, and for Capes quotations run from 17 to 19c.; fine B.A.'s at 33 to 38c. There does not appear to be any Australian wool here, nor Natals. Some Northwest is offering at about 14 to 16c.

TORONTO MARKETS.

Toronto, July 23rd, 1903.

Dry Goods.—While the sorting trade has shown no particular briskness of late, general trade, including that for fall delivery, may be described as better than usual for this time of the year. Prices in all lines of staple goods continue firm, a state of things not affected by the recent break in raw cotton. The wholesalers report that the season so far has been a good one for all kinds of seasonable fabrics and light dresses, and especially marked has been the demand for goodness of quality, rather than cheapness in price. Payments have kept up well.

Drugs, Chemicals, Etc.—Opium and quinine are somewhat firmer than they

were, as also is menthol. Otherwise there is nothing worthy of comment in so far as local trade is concerned. A fair normal demand is being experienced.

Flour and Grain.—Steadiness characterizes the flour market. The quotation for 90 per cent. patents is about $2.80 in buyers' bags, middle freights. Bran is easier, the supply being more than equal to the demand. Shorts is about steady. No change has occurred in oatmeal. Wheat is 1c. lower and somewhat dull at the decline. Oats also are down about a cent. Little or no business is being transacted in grains, the old crop being about cleaned up.

Fruits and Vegetables.—Receipts of fruits this week have been fairly large. Raspberries are the main stand-by just now and sell at 7½ to 9c. per box. A few Canadian peaches are beginning to arrive, but they are hardly ripe as a rule. Prices may be quoted as follows: Peaches, 35 to 60c. per basket; blackberries, 6 to 7½c.; black currants, 75c. to $1 per basket; cherries, eating, $1.25 to $1.35 per basket, and cooking, $1; huckleberries, $1 to $1.25 per basket; gooseberries, basket, 40 to 65c.; currants, red, basket, 40 to 60c.; California plums, case, $1.25 to $1.50; peaches, $1.10 to $1.25; pears, Bartlett, half box, $1.50 to $1.75; watermelons, 30 to 40c. each; apples, 30 to 40c. per basket; bananas, $1.25 to $2 per bunch; lemons, Messina, $3.50 to $4; potatoes, new, Canadian, 75 to 85c. per bush.; tomatoes, Canadian, basket, $1 to $1.25; do., Southern, case, 90c. to $1; beans, basket, 40c.; cucumbers, dozen, 40 to 50c.

Groceries.—While a very good trade is being transacted, there cannot be said to be any special feature worth noting. Sugars are moving with some degree of freedom at the recent general advance, a large quantity being required for preserving purposes. Teas continue very firm, and a good trade is going on. Canned vegetables are coming into market in larger quantities. Prices remain about as stated before.

Hardware.—Wholesale hardware and metal houses both report a brisk demand. Agricultural implements and all goods likely to be in demand at this season are being ordered in large quantities. In fact, there was probably never a better season's business than this is proving to be. Copper, tin and lead among the metals are fluctuating in price constantly, but not more than is usually the case. Pig iron is fairly firm, though reports from the States and Great Britain are a little bearish in attitude.

Hides, Skins and Leather.—A steady market exists for hides and skins, and the receipts are about normal. Tallow continues firm without change Dullness prevails in leather just now, but prices are without change.

Provisions.—Prices for butter are easier, the supplies coming forward being more than what is needed to meet the immediate demand. Under the lack of demand from outside, stocks are accumulating somewhat in the market. Cheese remains about the same as last week. Eggs are in good supply, but of poor quality, and the demand has fallen off. Canadian hops fetch from 18 to 20c. Under the stimulating influence of summer weather, hog products are experiencing a steady demand, and prices are very firm.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company
has no equal

It gives the necessary Home Protection for less money than the Regular Policies.
Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

North American Life
Assurance Co., Home Office, TORONTO, Ont.

CANADA PERMANENT MORTGAGE CORPORATION

Head Office, Toronto Street, TORONTO.

By an Act of the Parliament of Canada passed at the present session, the name of The Canada Permanent and Western Canada Mortgage Corporation has been changed to Canada Permanent Mortgage Corporation.

J. HERBERT MASON, Managing Director.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay $5.00 for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over $100,000 a year by doing neither one.

For sample copy send 10 cents to PRINTERS' INK, No. 10 Spruce St., New York City.

Mercantile Summary.

The Metropolitan Railway, Toronto, is making the survey for an extension of its road northerly from Newmarket to some point on Lake Simcoe, probably Barrie or Sutton. The Schomberg extension is now nearly completed.

The Ontario Government is offering the timber limits along the Temiskaming Railway to settlers in the district, who are availing themselves of the opportunity to secure building material. Some extensive sales of timber limits will be held in the early fall, mostly on the sites of new townships recently surveyed.

The Ottawa Government has issued revised regulations regarding the bringing into Canada of automobiles by tourists from the United States. When not new, these vehicles will in future be admitted free of duty upon making a deposit of 5 per cent. of the value, and giving a bond for double the estimated duties. The collector at the port of entry may use his discretion in waiving the requirement for the 5 per cent. deposit, when he is satisfied that the automobile will be used in Canada only within the limits of the port of importation and vicinity.

THE GREAT WEST

PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Money to Loan on First Mortgage on Real Estate on reasonable and convenient terms.

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Mercantile Summary

HENDERSON BROS., Limited, wholesale druggists, Vancouver, B.C., held their first annual general meeting, since amalgamation, last week, and, after declaring a good dividend, re-elected officers as follows: President, Mr. T. M. Henderson; vice-president, Mr. H. McDowell; secretary-treasurer, Mr. W. Henderson; directors, Messrs. J. N. Henderson, J. M. Atkins, and H. H. Watson.

AN expert engineer employed by the Dominion Government to report upon the feasibility of bringing water by force of gravity from Fraser Falls, on the Stewart River, to the Dome, or centre of the Klondyke mining region, says such a scheme would not be practicable, owing to the lack of sufficient height in the Falls. The idea had been suggested of installing a water system for supplying the placer operators with water for hydraulic purposes.

THE Fredericton (N.B.), Boom Company held a sale of unmarked and mixed lumber last week, in which great interest was taken by the many lumbermen present. Competition was keen. Spruce rose to $13 per thousand, unmarked hemlock fetched $4.50, mixed cedar, $10.25, unmarked and mixed pine, $11.25. The quantities of stranded logs above Grand Falls have not been affected by recent rains, these not having been heavy enough to do much good.

AN item published in last issue made it appear as if the Michigan Central Railway had proposed to refund $3,000,000 of the bonds of the Lake Erie & Detroit River road in order to secure a lower rate of interest. The former road has nothing to do with the latter, however, and the above-mentioned action was taken by the Pere Marquette Railroad. What the directors of the Michigan Central did at their meeting a few days ago was merely to renew the lease of the Canada Southern, as stated.

MR. J. C. BAILEY, the well known engineer, died in Toronto on Monday last in the 78th year of his age. He had a long and varied experience in the exploration, location and construction of railroads and other public works. Among some of the railways of recent date of which he was chief engineer are: The Credit Valley, Toronto & Nipissing; Lake Simcoe Junction, Toronto & Ottawa; the Midland and its various extensions, and the Northern & Pacific Junction Railways. He located the Sault Ste. Marie Railway, and the Nipissing & James' Bay (now Temiskaming & Northern Ontario Railway), and was also connected with the Atlantic & Great Western, Detroit & Milwaukee and Muskegon railways, and other roads in Canada and the United States.

A BOY put a lighted match to a load of hay in Winnipeg and the fire spread to a large storehouse of the Arctic Ice Company, and 10,000 tons of ice were spoilt. The loss was about $40,000. What was done with that boy was are not told.

UPON demand, L. H. Bissonette, general dealer at St. Isidore de Laprairie, Que., has consented to assign. He was formerly a clerk in Montreal, and began business on his own account three years ago. Figures as to liabilities, etc., are not yet available.

THE building permits issued in Toronto during the first half of the present year amounted in value to $2,311,773 which, in spite of the labor unsettlement in the building world, is the largest since 1891, when permits for a large portion of the new municipal buildings were issued.

SEVERAL minor failures are noted in Montreal as follows: J. E. Leclair, tailor, has assigned, owing about $1,100.——A demand of assignment has been made upon L. G. Clapin, saloonkeeper.——Philias Dagenais, carriage maker, is declared an absentee, and his creditors are notified to meet on the 31st inst.

Mercantile Summary.

DR. ELLS, of the Dominion Geological Survey, who has been investigating the mineral resources of Charlotte County, in New Brunswick, is reported to have discovered traces of nickel.

A BILL has been introduced by the New Zealand Government empowering it to retain or prohibit the coasting trade of the islands from being done in foreign vessel. The order, if passed, will counteract the disadvantages suffered by British vessels in foreign waters.

THE McLennan Paint Company, of Buffalo, has purchased the patents, formulae, etc., of the Hollywood Paint Co., Hamilton, Ont., and will carry on business on a large scale, under the name of the McLennan Paint & Color Co., of Hamilton. The Buffalo concern is capitalized at half a million dollars.

THE Ontario Portland Cement Company is making quick progress with the erection of its factory building at Blue Lake. Says a news item from Paris: Railway tracks from the G.T.R. main line extend nearly around the plant. Gangs of men have been installing machinery, the rotary kilns are already installed, large engine and boilers are in place. Masses of heavy machinery are being put in position and the entire plant is expected to be ready for operation before very long.

GEO. WILSON & Co.'s lumber yards, in St. Catharines, Ont., were on Sunday last destroyed by fire, which caused a loss of about $45,000, partially insured. The Warren Electric Co.'s plant and several frame houses close by were only saved with a good deal of difficulty. On the same day, a fire broke out in Wm. Watt's feed stables, at Souris, Man., and spread to T. H. Patrick's lumber yard and other buildings. Total loss was about $30,000, with only small insurance.

RECENT failures in the boot and shoe trade are noted as follows: A demand of assignment has been made upon F. X. A. Cabana, and Wm. Debiens, of Montreal, doing a manufacturing business in women's and misses' shoes, under the style of the Humanic Shoe Co. They started about a year ago on a limited capital.——G. G. Gymer, of Richmond, Que., was for many years in the employ of the Grand Trunk Railway, as inspector, and retired from service, well up in years, in 1899, to open a retail boot and shoe store, which has not proved successful, and he has been asked to assign.——Elzear Beauchemin, of Roxton Falls, Que., is a young tradesman, who started in a small custom way in 1898. He subsequently put in a small stock, but has got beyond his depth, and makes a proposition that creditors accept 55 per cent. of their claims, which aggregate about $1,000 ——A demand of assignment has been made upon V. E. Marchand & Co., of Shawinigan Falls, Que., by the Slater Shoe Co., Montreal. The business was started in the summer of 1901, by V. E. Marchand and Onesime Proteau. The former is a young man, who had some experience as a store clerk with his father at St. Stanislas, and Proteau is a farmer, who contributed most of the capital to the present venture. It would look as if their affairs were in pretty bad shape, liabilities being reported in the vicinity of $9,000, with estimated assets of only $3,500.

Mercantile Summary.

IT is estimated that the proposed Government railway line from Winnipeg to St. John will be 1,652 miles long, or 253 miles shorter than the Canadian Pacific.

OWING to poor business this summer G. D. Welton, hotel keeper at Sault Ste. Marie, found himself unable to pay his rent, and the landlord has taken possession.

A GROCER at Hull, Que., named Isidore Michon, is offering his creditors 30 cents on the dollar. He owes less than $1,000.——For 20 years J. M. Laganiere has been keeping a small general store at La Chevrotiere, Que., and previously he peddled throughout the same district. He has hitherto paid his way in full, but has now assigned. He owes $1,200, and is said to show nominal assets of $2,500.

IT has been decided to liquidate the Northrop Iron Works, Limited, of Valleyfield, Que. The company was incorporated as the Northrop Loom Co., in May, 1898, with a capital stock of $100,000, but the capital was afterwards increased to $200,000 and the style changed as above. The intention was first to manufacture looms and textile machinery; subsequently they went into the manufacture of elevators, heating apparatus, etc., but the venture has not proved profitable. A winding up order has been granted, and shareholders and creditors will meet on the 4th prox.

THE reported failure of Calixte Beaudry, general merchant at St. Nazaire, Que., occasions some surprise. He was originally a farmer, but some twenty years ago started storekeeping at St. Dominique, afterwards removing to St. Nazaire, where he has also done considerable trading in hay, grain, cordwood, etc. Though considered to be in somewhat widespread shape he was regarded as good, and his coming to Montreal last week with a proposition to pay his creditors 50 cents on the dollar, created much comment, especially as he had claimed, in the spring of 1902, to have a surplus of $50,000. His offer evidently was not favorably entertained, and he has assigned upon the demand of Messrs, P. P. Martin & Co.

IT is pointed out by our contemporary, "Commercial Intelligence," of London, that Canada, unlike other British colonies, does not furnish particulars for British contractors when there are openings for business in the Dominion. Says that journal: "All plants, materials and supplies for which contracts are made by Canadian public bodies can only be supplied under the present system by Canadian or American business houses, owing to advertisement in the Dominion only and to the short time allowed for the sending in of tenders." Lord Strathcona, having been written to on the subject, replies that he realizes its importance, and "will take whatever action may appear desirable upon consideration" to obtain publicity in Canada for the view submitted.

Mercantile Summary.

AN application has been made to the court for the winding up of the Tuckahoe Lithia Water Co., of Toronto.

THE Peterboro Review, which copies our article of last week respecting that town, adds a footnote stating that while the assessment is as we stated it, the valuation is $1,176,425 more, property to that amount being exempt.

LIMITED means and inexperience have led to the assignment of Trevett & Wiggins, at Chesley. They started business as bakers last April, with a stock of about $400, which was the extent of their responsibility, owning no real estate.

THE Bell block in Dundalk, Ont., occupied by McFarland & Richards' general store and several stores and offices, was on Tuesday last destroyed by fire at a heavy loss. On the same day the Victoria Wheel Works at Galt, were damaged to the extent of about $7,000. The fire started owing to the running over of a caldron of boiling tar used in the finishing off of hubs.

MR. NOSSE, Consul-General at Montreal for Japan, continues to show his active interest in Canadian trade with his country. He was in Ottawa last week to confer with Hon. Sydney Fisher regarding the agreements made between the Minister of Agriculture, acting on behalf of the Dominion Government, and the Japanese Government.

IN view of the fact that radium, the wonderfully valuable metal which has been attracting so much attention of late, has been extracted, what there was of it, from uranium, it is interesting to note that deposits of the latter metal have been discovered in some localities in New Ontario—notably at Point Maimanse, on the north shore of Lake Superior.

CONSIDERABLE excitement prevails in Wallaceburg, Ont., over the reported discovery, by means of an Ontario Government diamond drill, of coal in its immediate vicinity. According to one rumor, of which many are afloat, three distinct veins of coal were pierced at a depth of 270 feet. We shall learn more about it when people are calmer. One thing we find, namely, that geological students do not take stock in the story,

LONDONDERRY, Nova Scotia, is feeling the effects of the enterprise and expenditure of the Londonderry Iron & Mining Co. That company is employing quite a number of men from all parts of the Province in the rebuilding of the various department works at Londonderry, and the place is beginning to reawaken to something like its former activity. Old houses and stores which have remained idle for years are being put into repair, and readily find tenants. whilst hotel accommodation is at present put into repair, and readily find tenants, where sewerage and other pipes are cast and moulded, is in full swing, and the blast furnace and adjacent buildings are being rapidly repaired and reconstructed.

DEBENTURES—Municipal Debentures **bought and sold.** also Government and Railway Bonds. Securities suitable for investment by Trustees and Insurance Companies, and for Deposit with the Government, always on hand. — Telephone Main 2011.

THE assignment is reported of J. O. Lamoureux and Fils, founders, at Sorel, Que., and their creditors are called to meet on the 29th inst. The father was long in the business, but not very successfully, and transferred the assets to the son in the fall of 1901. Liabilities are approximated at $7.000.

UNITED STATES IRON AND STEEL TRADE.

A careful review of the state of the iron and steel trade, says an exchange, to-day shows that the outlook for the last six months of the year is of a decidedly encouraging nature. The United States is producing pig iron at the rate of 1,750,000 tons a month, or 19,000,000 tons a year, a much larger output than England and Germany combined. One of the prominent iron trade journals shows that while more iron was made in the United States in May than ever before in any one month (about 1,775,000 tons) yet unsold stocks were less than 100,000 tons, or about a two days' supply. This shows conclusively that the present enormous output of pig iron is going into active consumption and is not being piled up in the furnace yards. In addition, the big consumers of pig iron have been buying regularly in the open market, and in some cases have recently paid slight premiums in prices in order to get early deliveries. The pig iron market is quiet at the present time, but this is invariably the condition in July and comes largely from the fact that many rolling mills and foundries are closed for repairs and to take stock and absolutely refuse to buy pig iron or anything else until repairs and stock taking have been finished. Not a single blast furnace in the Central West, where more than 75 per cent. of the pig iron output of the whole country is made, has been shut down because it has no orders on its books. On the other hand many furnaces have their entire output of pig iron under contract to October and some for a longer period. The steel trade, which embraces billets, sheet and tin bars, has passed through about the same experience as the pig iron business and with the same result—prices have gone off to some extent since the increased suply of coke put an end to the artificial scarcity in the output. The steel market has gradually settled down to an equitable basis and billets are selling today at about $28 a ton Pittsburg mill. At this price there is a handsome profit to the manufacturer, who would much prefer to run his mill full time on billets at $28 than spasmodically at $33 a ton or higher.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their circular dated July 25th, 1903, say: Has the liquidation in stocks run its course, and what will be its effect upon general business? These are the two questions at present uppermost in the minds of business men, though definite answers are impossible under such a conflict of opposing forces as are now actively at work. The decline in securities has been satisfactorily accounted for over and over again; and now it is the consequences of that decline that cause concern. Losses have been exceedingly severe, and the fact that they have thus far been quietly met without inducing open disaster is simply astonishing. It is explained, of course, by the other fact that the losses have chiefly fallen upon the rich, and by still another that liquidation while forced has at no time been allowed to develop symptoms of panic. Support at critical times has always been forthcoming from big insiders as well as from bargain-hunting investors who usually apear when securities sell at or under intrinsic values. For high grade railroad stocks with a proved reputation for dividend earning capacity there are ready purchasers on every decline; and these no doubt will eventually prove profitable investments, even should the market fall to a still lower level. As to the latter possibility, it depends entirely as to the completeness of liquidation, and an assertion to that effect is premature. It is quite certain that bottom will not be touched until the weak spots have been thoroughly eliminated, while the bear element, encouraged by recent success, are likely to carry their campaign to the extreme limit. Indications are that the bottom is not far distant, and that many stocks are at or sufficiently near bottom to warrant purchasing on a downward scale. This applies, however, only to really sound securities. There is still on the market a mass of undigested stocks, or indigestible, as Mr. Hill aptly described them, for which a still lower market is possible, if not probable.

The monetary situation is certainly improving more than indicated by either the weekly bank statement or by the current high rates for money. Liquidation, such as lately experienced, has certainly put the banks in much better control of their funds, besides enabling them to loan under more satisfactory conditions. Good rates for time money promise to prevail, and there will be plenty of funds for legitimate uses, but little for speculation in unsound properties. Crop demands will soon assert themselves; still the indications are that there will be less suffering from stringency this fall than a year ago. Our credit abroad is excellent, and we shall have little trouble in borrowing there if necessary.

FALL FAIRS.

We have seen a list of some 175 fall fairs in Canada during the present autumn. Their dates extend from that of Brandon, Man., July 28th to 31st (properly a summer fair), to that of the Woodbridge, Ont., Fair, which takes place on October 14th and 15th. We present below the dates of some of the principal fairs:

Dominion, Toronto...	Aug. 27-Sept. 12
Sherbrooke	Aug. 29-Sept. 5
Central Canada, Ottawa.....	Sept. 11-19
Brockville	Sept. 16-18
Kingston	Sept. 8-11
Western, London	Sept. 11-19
Guelph	Sept. 15-17
Hamilton	Sept. 15-17
Lindsay	Sept. 24-26
Peterboro, ...	Sept. 22-24
Owen Sound	Sept. 15-17
St. Catharines	Sept. 25

FOR GROCERS AND PROVISION DEALERS.

A somewhat unexpected drop took place on Wednesday last in all grades of sugars. The movement during the last few days has not been so brisk as it might have been.

In the United States recently the manufactures advanced the price of brooms by from 15 to 25 cents, owing to the poor outlook for the growing crop and lightness of supplies of those articles.

Recent reports from Spain indicate that the Malaga raisin product of 1903 will exceed in size the 1,000,000 box crop of last year, which was rated as the largest yield for fifteen years. This is conditional upon the prevalance of favorable weather from now on until the first week in September, when the raisins are prepared for shipment.

Estimates made in Zanzibar figure the clove crop there at 75,000 bales, as compared with 110,000 last year.

Columbia River (B.C.) salmon packers are somewhat uneasy with regard to the light pack. The fish are not running at all freely.

Considerable talk is heard as to the great scarcity of apples, but these reports, so far as we can judge from reliable authorities, only apply to certain restricted localities. While the crop will naturally be considerably smaller than that of last year, the prospects for a very fair yield are good in many districts. Bordering along Lake Erie, the crop will likely be light, while around Lake Huron, Georgian Bay and most parts of Lake Ontario, it will probably be good. Plums and peaches promise to be abundant in most sections, while pears while not plentiful as last year, will probably be of better quality.

FOR DRY GOODS DEALERS.

It was stated in the British House of Commons last week that 700 cotton factories in Lancashire were working on short time, 360,000 operatives being affected. The question of cotton growing in the British Empire, in order to create a supply outside that of the Southern States, is receiving careful consideration on the part of the British Board of Trade.

As visible stocks of merino wool in Britain are undoubtedly small, and it is considered quite out of the question that the normal production of this wool in Australia can be regained for some years to come, there is every indication of merino wool prices remaining at a much higher level. That this opinion is growing is shown by the fact that dealers in tops or combed merino wools are not prepared to commit themselves to any contracts for delivery of merino wools or tops for any distant time at rates lower than those ruling at present. These are, of course, comparatively high as compared with the average prices of the last ten or fifteen years. On the Continent, December deliveries are quoted absolutely higher than to-day's rates at both Roubaix and Antwerp.

A report to the London Draper's Record from Nottingham states that although few novelties in cotton millinery laces are being introduced, there is a fair demand for Valenciennes of different kinds, which are sold extensively for home use and for exportation to all parts. Common Valenciennes, embroidered and maille ronde Valenciennes, from low prices to high values, are a steady sale. Coarse Torchons in cotton, and finer qualities in linen, are now more or less in favor, in all widths. There is a continued demand for insertions of embroidered Valenciennes, and also of Torchons. Galons still find favor with most buyers. Cheap edgings, crochet laces, and warp goods are in average request for shipping assortments.

The Chemnitz correspondent of the New York Dry Goods Economist, speaking of what is being sold most in that city, says that printed and extracted hose are more popular than they were last season, but are still only taken in limited quantities. Black and white are the most popular, while the old polka dot has again come into favor. On gray or brown mixed grounds printed effects are also shown in large variety, and have been bought extensively for the fall trade, but for spring only a few orders have been placed. Embroidered hose will no doubt be the best selling article for the coming season and very complete lines are being shown. The number of patterns is very large and buyers will find it very difficult to make selections. Small effects are more in favor than the larger patterns, and while green and gold are taken up in some assortments, the orders mostly call for embroideries in red, blue and white.

WANTED

A young man as Cashier for Loan and Savings Company. Must have previous experience. Apply fully, stating salary expected, to P. O Box 655, Winnipeg, Manitoba.

Business Chances

Sealed tenders will be received for the purchase of The Paisley Pork Packing Company Limited's premises and plant, situate in Paisley. by Hector Cowan, assignee of Company, up to and inclusive of 31st AUGUST, 1903. Premises and plant are up to date, and neighboring country a first-class hog producer. Lowest or any tender not necessarily accepted.

For particulars apply to

HECTOR COWAN, Assignee,
Paisley.

HARDWOODS IN THE STATES.

Writing last week about woods other than pine, the American Lumberman says: "Hardwood stocks have not yet reached a point where they can be said to be equal to the demand, and it is doubtful if the production of poplar, quartered oak and a few other items will be sufficient for the trade this season. Substitutes for these two and some other items are still being used. Stocks in the Ohio Valley are increasing and in some concentrating centres ample stocks are reported. The movement is heavy from that section, however, and all stock is being cared for. South of the Ohio and in the central and lower Mississippi Valley there has been no accumulation, and markets there show little if any improvement in this respect. Demand for quartered oak and for poplar in the north and east is more than equal to the abilities of the producers to supply it. Buffalo reports a scarcity of maple and there has been an endeavor to supply the deficiency with Pennsylvania birch in so far as that wood will fill the purposes for which maple is used."

THIS HAT BOX
HOLDS 5 HATS.

Made of the best sole leather, hand sewn, leather lined and spring lock.

The box will hold SILK HAT, DERBY HAT, CRUSH HAT, STRAW HAT, SOFT HAT.

Price, $12.00.

We pay express charges on all our goods in Ontario. Catalogue M shows the leading lines we make. We are pleased to mail it.

THE INDEPENDENT ORDER OF FORESTERS.

Editor Monetary Times:—

Sir,—Permit me once more to take up a little space in your valuable columns to draw the attention of the members of the above Order to gross extravagance in the management of what is claimed to be the "best Fraternal Society."

The total expenses for the year 1902 amounted to $755,188, an increase of $112,425 over the previous year, the ratio of expenses to amount paid in by members being 24.42 per cent., as against 22.51 per cent. in 1901; or in other words, for every one hundred dollars ($100) paid in by the members, $24.42 was used by the Supreme Chief and his Executive for expenses. This, mind you, is apart from the fact that all moneys collected by the Subordinate Courts are remitted free of charge to the Supreme Court—yet we are told that the expenses are limited to 5 per cent. of the mortuary fund, and sick and funeral benefit fund receipts, capita tax, etc.

I have looked over the reports of the three largest fraternal societies in America, Modern Woodmen, Knights of the Maccabees, and Royal Arcanum, and find their expense ratios to be 10 per cent., 10.66 per cent., and 2.92 per cent. respectively, for the year 1902, taken in the same way as the I.O.F. That is to say, the Modern Woodmen, with a membership of 664,166 spent $636,087; Knights of the Maccabees, membership, 285,564, expenses $386,942, and Royal Arcanum, membership 254,322, expenses $213 919; while the I.O.F., with a membership of 205,369 requires $755,188. Surely if the others can secure and keep a larger membership at such a low ratio, what is the trouble with the I.O.F.?

We are also told that the Order pays no commission, while in 1902, the sum of $132,720 was paid as "commission" fees and "expenses retained by or allowed to agents," and $114,514 as salaries of managers and agents (apart from salaries of officers, etc.); $49,015 for advertising and printing (not supplies)—quite a sum to exploit the Order with and apart from $42,174 for publishing The Forester, the official organ of the Order. Then there is $240,338 charged as "miscellaneous," it would be interesting to have the items in detail comprised in this large sum.

We have been told time and again of the great principles of the Order—"Liberty, Benevolence, and Concord," yet last year the sum of $14,898 was paid for legal expenses—a sum far in excess of that paid by any life company in Canada for the same purpose—the post of legal adviser to the I.O.F. ought to be a good one. We are told that 30 101 new certificates were issued in 1902, while 16.818 certificates ceased to be in force a loss ratio of 55.9 per cent as against 49.9 per cent. loss in 1901. Does this mean anything? If so, what?

The letter is rather longer than I anticipated, and you are at liberty to condense it. The subject, however, is such that I am not qualified to put it in a nutshell. Thanking you in advance,

Yours truly,
A member of the I.O.F.

Montreal, 27th July, 1903.

FINANCIAL REVIEW.

The figures of the Bank Statement for June, as given last week, present the same evidences of continued growth and prosperity that have characterized them in so marked a degree for many years back. Yet it is most satisfactory to find that there is little or no evidence of that over-trading, over-lending and illegitimate expansion, which is sure to be followed by reaction and possibly by revulsion. It is certain that all the legitimate money requirements of commerce are being abundantly met, and that no man who has good paper to offer, or is engaged in a sound enterprise needing temporary loans, has been, or is being turned away by reason of a scarcity of bank funds. Complaints of refusals to lend, or discount, there have undoubtedly been; but such refusals are taking place at all times; and for the very good reason that there are always persons desiring to borrow money from banks who do not deserve to have it. But there is no undue pressure of this character on the banks, and no great wave of commercial "boom," or speculation sweeping over the country such as has, at other times, caused ordinate demands to be made upon the resources of the banks. From this, of course, we must except stock speculation; but loans on stocks, in a large majority of cases, so far as the banks are concerned, have been kept under strict control; and so managed as in no degree to interfere with legitimate commercial requirements.

The fact is, that banking in Canada has long passed the experimental stage when experience had to be gained at severe cost. It is now on settled foundations; its peculiarities are well understood, and it is largely in the hands of men who understand not only the theory of banking in general, but the practical requirements of banking, as applied to the circumstances of Canada.

And this leads to the consideration of a very important problem which is even now coming to the front; namely, the provision of the large amount of money required to move our crops to market, that is, practically to provide the current funds wherewith to pay the farmer. It should always be borne in mind that the first movement of the crop must be met by actual currency. When grain or other produce gets into the hands of the merchant, all subsequent movements can be carried on by means of cheques, or bills of exchange. But for the farmer nothing will answer save actual currency. Of this, as everyone knows, two kinds are to be found in Canada; bank notes and Government notes; the amount of both being strictly limited by law. And very properly, for an unlimited power to issue notes could not possibly have any other effect than for the notes to depreciate in value. The experience of last year, however, proved that the limit imposed by law required to be enlarged. In the case of many of the banks, this requirement has been met by enlarging the capital, for their circulation is limited to an amount not exceeding the amount of the paid capital. An additional circulating power of several millions has thereby been secured, which may prove sufficient, along with what is about to be mentioned, to tide the country over the approaching autumn and winter.

This resource, however, is not available in the case of Government notes; nothing but an Act of Parliament will avail to widen the limit here. The Finance Minister has therefore taken the matter up, and introduced a measure for increasing the circulating power of Government in respect to promissory notes. The exercise of this power, however, requires to be jealously safeguarded, so as not to interfere on the one hand with the circulation of the banks, nor on the other to transgress the limits of safety. With regard to the latter, our judgment is that the moving up of the limit from twenty to thirty millions, with the same ratio of gold and securities as before, will meet all reasonable requirements; it being, of course, understood, that dollar for dollar in gold is to be held for any excess, beyond the limit. And, by the way, we cannot but commend the judgment that has suggested the making provision of a reserve against savings bank deposits at the same time. This has long been needed. As to the form of this reserve there may be different opinions; but of the thing itself there can be no question. But now with regard to the question of non-interference with bank circulation, this is more

important than is sometimes supposed. The most strenuous financial contest ever waged in Parliament was to preserve the circulation of the banks. And time and events have fully justified those who waged it. The Dominion Note Act was expressly framed on its present lines so as to secure this; and in our opinion, any measure which would in any degree jeopardize or interfere with bank circulation should be resisted in the interests of the country at large, not to speak of the banks themselves. These remarks are made in view of the proposal of the Government to issue five dollar bills as well as those it has the power to issue at present. Five dollar bills, it is well-known, constitute a large part of the bills circulated by the banks, and if the same denomination is issued by the Government, the circulation of the banks must necessarily be interfered with, perhaps to a considerable extent.

CANADIAN TRADE.

The advance of her outward and inward trade by leaps and bounds in recent years is one of the remarkable things in Canada's history. Not only does it attract attention beyond the seas, but, the intelligent portion of the United States people, especially those of the northern and north-western states, observe our growing trade and are pressing for reciprocity with us. In the year 1880, the aggregate trade of Canada amounted to $174,000,000; in 1887 it was $202,000,000. By 1896, it had advanced to $239,000,000; in 1901 it was $396,000,000, and this year it reaches $424,000,000. These figures are noteworthy, not only for their size, but for their relative increase in two decades.

The change in the character of our exports is an element to be borne in mind. Years ago the great item of Canada's export was lumber and timber, ranging from $25,000,000 to $30,000,000 a year in value. In 1873, it constituted one-third of all our home export; in 1881, 31 per cent., and as late as 1890, 32 per cent., while the item animals and their produce, which attained such large proportions in recent years, was then quite subsidiary. For the last few years, two divisions of our export trade, live and dead meats, including dairy produce, and products of the field, have surpassed forest products in export value. Minerals form a much more considerable item of our outward trade. Exports of these last year, $34,497,000, ten times what they were twenty years before. Our fishery product has developed too, and manufactures shipped abroad have made strides which are illustrated if we compare the $16,000,000 and $18,000,000 of manufactures exported in 1901 and 1902 with the $3,000,000 of 1882 and the $6,000,000 of 1892 under the same category.

The character of our import trade varied somewhat in the last twenty years. In 1882, out of total imports amounting to $111,145,000, we bought $50,356,000 worth from Great Britain and $47,006,000 worth from the United States. To-day, out of total imports of $196,000,000 we buy only $49,000,000 worth from the Old Country and $114,740,000 worth from the States. That is to say, the proportion of our purchases from Great Britain was 45 per cent. in 1882, and 25.36 per cent. in 1902, while from the United States it was 42.33 per cent. in 1882, and had grown to 58.4 per cent. last year. Almost half these purchases from the States, however, were raw materials for manufacturers, such as raw cotton, crude rubber, wool, tobacco, hides, chemicals, besides steel rails and coal, and we must remember that these purchases by our manufacturers from the Americans have already gone to swell the aggregate of our 18,000,000 of manufactured goods sent abroad.

The following is a resume of our domestic products exported:

Exports from Canada 1902.

Produce of the Mine	$34,947,574
Fish and Fishery Product	14,143,294
Products of the Forest	32,119,429
Animals and their Produce	59,161,209
Agricultural Products	37,152,688
Manufactured Goods	18,462,970
Miscellaneous Articles	32,599
Total Domestic Product Exported	$196,019,763

To the total in this table requires to be added say $15,640,286 worth of United States wheat and other products shipped from our ports, to make the total exports from Canada.

The aggregate of Canadian trade for the fiscal year 1902 was $423,910,444, of which $221,270,158 consisted of imports and $211,640,286 of exports. Not far from one half of this trade was done with the British Empire all over the world; more than half the exports went to the British Empire. It may be summarized thus

	Imports.	Exports.	Total.
British Empire	$54,039,090	$129,070,620	$183,109,710
United States	129,794,147	71,197,684	200,991,831
Other foreign countries	27,436,925	11,371,982	39,808,903
	$221,270,162	$211,640,286	$423,910,444

It will thus be seen that 43.18 per cent. of our total trade was done with the British Empire; 47.40 per cent. with the United States; and 9.42 per cent. with other foreign countries.

On another page we give a table showing imports, exports, total trade, and destination of principal exports. It will, we trust, be found a convenience by many readers.

PROSPECTS FOR BINDER TWINE.

The leading binder-twine interests in Canada seem to think that, on the whole, there will be a sufficiency—counting in the good, bad and indifferent—of binder twine to meet all probable requirements during the coming grain harvest. From present indications we judge that more twine will be wanted throughout the country this year than last; but this will be more on account of the increased acreage than of the yield, which though promising to be very good in some districts, in others looks less certain than it did two or three weeks ago. Prices have been fixed at slightly lower rates than those which prevailed last season, but there is no likelihood whatever of a further drop. Some of the manufacturers, indeed, have already disposed of their entire output, and agents have received instructions to take no more orders. Another thing that militates against any change in a downward direc-

tion is that nowadays manufacturers have a safety-valve in the harvests of other countries. Any surplus of binder twine here or in other parts of the Continent can be shipped away to places where the harvest comes at a different time. There is no inducement, therefore, to cut prices.

Some talk has been indulged in of the use of soft-fibre or flax twines in the coming harvest in the North-west. So far as we can learn, however, this is scarcely likely. Little has been asked for so far, and it is questionable if it will ever cut much figure. Manilla fibre seems to be regaining its old-time popularity at the expense of sisal. During the nine months ended with April 30th, 1903, manufacturers in Canada and the United States received 412,206 bales of manilla, and 368,613 bales of sisal, whereas in the similar period a year earlier, the deliveries were 356,475 bales of manilla and 392,898 of sisal. Of course, the improved condition of things in the Philippine Islands would partially account for this increase in the shipments of manilla, but another thing which has affected the situation is the increased cost of sisal fibre owing to the enhancement in value of silver in Mexico, the country in which this article is largely grown.

For some time Canadian manufacturers had to complain of the position in which the United States Government had placed them by its action in putting an export duty of ⅜ cent per pound on manilla fibre shipped out of the Philippine Islands for consumption in any country other than the United States. This has been counteracted, it is hoped, by the Dominion Government, which has provided for the payment of a bounty of an equivalent amount on twine made in this country, of manilla fibre. A good deal of opposition is being manifested to this course by out-and-out high protectionists, on the ground that while the United States imposes a high tariff wall, sufficient to keep out Canadian made twine, we should do exactly the same towards them, and impose a stiff duty against twine coming from the United States. The Canadian farmer, however, is a factor in the problem, and it is deemed wise to compensate the manufacturer to the extent of something like $56,000, rather than to tax the farmer about $500,000, the presumed extra price he would have to pay consequent upon a rearrangement of duties.

CROP PROSPECTS.

The news from our far west farming districts continues to favor a satisfactory harvest. Our Winnipeg despatch dated 30th July, at noon, says: The weather during the earlier part of the week just closed was extremely hot, but during the last couple of days has been much cooler. The thermometer dropped forty degrees. Rain has been general all over the west, and the outlook for Manitoba remains much the same as last report. The territorial government report just issued shows crop in satisfactory condition on the whole; some sections being adversely affected by the dry weather, but not to any serious extent. It is conceded that the yield will be lighter than last year, but it still will probably be a good one. There is an increase of some two hundred thousand acres under crop in the Territories, and the estimated yield of wheat is fifteen million bushels against fourteen million last year. And the yield of all grains, twenty-eight millions against twenty-six millions last year.

THE POSITION OF UNITED STATES STEEL.

The Wall Street Journal devotes an article of nearly a column in length to a discussion of United States Steel stock, and the reasons for its extraordinary weakness in the market. This is practically a national institution, let alone being the greatest industrial company in the world, whose financial operations are larger than those of some nations, and any such widespread liquidation as has characterized it during the last few days is not merely an important incident of a fluctuating stock market, but an event in the history of the country.

The above journal suggests that "a decline in the price of a stock paying 4 per cent. dividend a year to 22, clearly establishes the fact that there is a lack of confidence in the public mind either as to the stability of the corporation itself, or as to its continued earning power. At 22, United States Steel, common, is practically selling ex-dividend and ex-confidence. At that price the stock is earning about 18 per cent. a year, and if there was any assurance that it could continue to pay such dividend, it would be one of the at st[illegible]rgains in Wall Street. The decline to such a low figure, therefore, is a clear demonstration of public belief that it cannot continue to pay dividends at its present rate. If the dividend had been already passed, the price of the stock could scarcely have declined lower than it has already done. It would, therefore, be proper for the directors of the corporation to make the facts square with the public expectation, and seize the opportunity presented by the decline in price of the stock, to strengthen the position of the company and the standing of its other securities by passing the dividend on the common. It would certainly be better to do that, at this time when it possessed an ample surplus, than to wait for a period when it might be obliged to do so by a depletion of its surplus revenues."

As to the reason for this lack of confidence on the part of the public in a company whose pay-roll is $120,000,000 a year, and whose directors figure amongst the shrewdest, if not the most conservative in the world, it is difficult to speak definitely. No doubt a certain distrust of its former president, Mr. Schwab, has had something to do with it, but it is due probably still more to the widespread feeling that the corporation, in spite of the admirable system on which it is managed, is too enormous, too ponderous, to endure, a feeling which has not been minimized by the undoubted fact that it has been over-capitalized, and possibly, too, that the Wall Street standpoint has been regarded more closely than that of the steel industry.

TERMINATING SHARES IN LOAN COMPANIES.

In the Ontario Legislature last session provision was made for a measure which should narrow the operations of some modern loan companies in certain directions. And in pursuance of this, the Registrar of such companies has issued a mandatory by-law for all loan companies in the Province, issuing what are known as terminating and instalment shares. It was time that something of the kind was done, for some of these concerns were taking advantage of the ignorance or helplessness of some of their members, and were

exacting forfeitures and fines in an outrageous way. It was stated before the House last month that one company had made no less than $72,000 by forfeitures.

There are thousands of shareholders in the many terminating loan companies of this Province who do not understand the nature of the investment they have made, nor the rules and regulations under which they have come in joining these societies. They have been "talked into it," as many of them will tell you, by canvassers long of tongue and short of conscience. These poor people, some of them minors, had bound themselves, foolishly to be sure, but unknowingly, to pay certain sums at certain dates for seven, eight, or ten years. They had also bound themselves, although they did not know it, to let their money lie in the company for so long a time; and this time of "maturing shares" was often postponed. Then they found, with an awakening start, that when because of misfortune they could not keep up their payments, the amounts paid had been forfeited. It was the cruel injustice of this provision that probably induced the Legislature to order new regulations.

These regulations are to come into force on the 10th of September this year, and are to apply to all terminating and instalment shares issued thereafter. It is provided that, when issuing shares requiring a stated number of weekly or monthly payments, such payments shall not extend over a longer period than ten years. And when the stated payments are made the holder shall not be subject to any further demand or liability. The issue of a prepaid share also relieves the holder from further liabilities with respect to it. The payment of instalments for three years on instalment shares entitles the payer to recover the amount of his payments with interest. If such payments have been made for less than three years but more than six months, 90 per cent, of the actual amount paid may be recovered at the end of three years. The amount of a prepaid share can be recovered with interest after five years. While these provisions cannot get back for the unhappy losers the moneys they have lost in recent years by forfeitures, they will protect others from injustice and spoliation.

FORESTERS' DEATH LOSSES INCREASING.

Some years ago, when that clever promoter, Dr. Oronhyatekha, first began booming the Independent Order of Foresters, he was very fond of calling attention to the circumstance that the losses by death in that society were not increasing. In fact he proved by the general statistics of Great Britain and the United States that death losses do not usually increase from year to year. But of late years it has been made abundantly manifest that in assessment societies, as well as in life insurance companies, people die faster per thousand members as they grow older. It is also made plain that in consequence of this, the assessments are sure to increase in any society which acts on the principle of calling on the members for not much more than is needed to meet each current year's claim. Nearly all assessment societies now see, as they could not do a dozen years ago, the necessity of accumulating a reserve fund. Some of them are succeeding in doing this in a small way, but others are rapidly losing their healthiest members in the effort to accomplish it.

Signs are not wanting to show that in Canada, where the Independent Order of Foresters has been in operation for nearly thirty years, the deaths in that order, among Canadian members, are now becoming increasingly numerous. Those persons who joined twenty-five years ago at say 45 and 50 years' of age, are now aged seventy or more, and the death rate upon persons of that age and over is bidding fair to render the outgo larger than the income.

The Canadian blue books show that in the case of the newer membership in the Order, from outside of the Dominion, the death losses leave a large margin of the year's income to the good. But in the case of the Canadian membership, the margin of income available for increase of the reserve fund is becoming alarmingly small. The claims paid on the Canadian business in force the past year ($84,455,000), were $826,816 in amount, while upon $140,394,500 of business in force outside only $741,820 was called for. The income on Canadian business was $1,050,507, and the outgo on Canadian business, as above, $826,816, thus leaving only the small sum of $223,691 to the good. But from outside Canada there came $1,806,401 for premiums during the year; and $741,820 taken from that sum leaves $1,064,581 to add to the funds. This is a very noteworthy difference. There are 78,027 certificates of the I.O.F. in force in Canada, and 127,342 in force in other countries. And yet the 78,027 domestic membership cost during the year 1902 in death losses, $84,996 more money than did the 127,342 members from outside. What is the reason of this ?

The reason is obvious. Very few new members are joining in Canada compared with the number of old ones, and the losses by death are always lighter upon young men, fresh from the medical examiners' hands, than upon those who joined long years ago, and are now verging upon seventy or eighty years of age. Only $6,837,000 of new certificates were taken out in Canada last year, as compared with $17,672,500 or nearly three times the amount, from foreign countries. And then, over against the $6,837,000 rushed on to the books in Canada, the blue book shows that no less than $3,690,500 of Canadian membership dropped out, leaving an increase of certificates held by Canadians of only $3,146,500 during 1902. Lapses on the outside business were pretty heavy also. New certificates for $17,672,500 were issued to foreigners, but an immense number of these foreigners must have dropped out after a few months' experience. The increase for the year was only $6,585,500, showing that $11,087,000 went out by death and lapse among the outsiders, besides the $3,690,500 of Canadians.

The total of the new certificates issued by the I.O.F. in 1902 was $24,509,500, while the increase to the total amount in force was only $10,276,000. This certainly shows an extensive leakage, whatever way it may be accounted for. The difference between the amount put on and the amount found there in the shape of increase at the close of the year foots up to $14,233,500. Of this huge sum only $1,551,536 is attributable to the death losses.

Put into tabular form, somewhat as in the blue book, these figures arrange themselves as follows:—

	Income from Members	Deaths Claims Paid	Claims Resisted	Deaths Per $1000.
In Canada	$1,050,507	$826,816	$ 6,000	$9.92
Other Countries	1,806,401	741,820	19,367	5.53
	New Certificates	Certificates Terminated		Certificates now in force.
In Canada	$ 6,837,000	$ 3,690,500		$ 86,453,000
Other Countries	17,672,000	11,087,000		140,394,500

From the above it will be seen that the death losses of the Order in Canada cost $9.92 for every $1,000 in force at the beginning of 1902; while on the business in force in other countries upon younger lives, only $5.53 per $1,000 was needed to meet the claims by death.

Ten years ago, in the year 1892, the death claims of the entire Order only called for $4.86 on the average as compared with $9.92 in 1902 for the Canadian members. The one sum is more than double the other. What is going to be the position ten years hence, if the death claims per $1,000 upon the Canadian members should increase only as much as the bare difference between the $4.86 and the $9.92, which would raise the latter figures to $14.98? Half of that increase would not only sweep away the whole $1,050,507 of 1902 gross Canadian income, but render a large call on the surplus necessary. It ought, therefore, to become a live question, and that pretty soon, how much of the surplus now belongs to the Canadians, and how much to those living in other countries. If "first come first served" is to be the rule, as is usual in the assessment business, then possibly the extra deaths among the home members may, in the course of time, eat up the whole of the surplus and leave none for those from other countries. Such a prospect is by no means pleasant for the Europeans, Asiatics, Australians and Americans, who have so recently been investing in the great Independent Order of Foresters. If Oronhyatekha or any of his lieutenants will favor us with an answer to this plain statement of what seems a serious case, we shall be really obliged, and some of the thinking members of the Order will be perhaps enlightened.

SHRINKAGE IN STOCK VALUES.

The following table will serve to show to what enormous extent the depreciation in American stocks has been going on during the last year or a little less. It compares values of some of the leading stocks in the New York Stock Exchange last Friday with the highest prices reached by the same securities during the year 1902, which were mostly in September. That the heavy losses have not been followed by consequences, both in the United States and Canada, worse than those which have actually taken place, is a subject for surprised congratulation. An estimate as to the money value of stocks in New York now compared with last September, makes difference somewhere near $5,000,000,000. The comparison is as follows:

	Highest.	Lowest.	Difference.
Standard Oil	715	595	120
Northwestern	271	160	111
United States Steel	46¾	21⅜	25⅜

THE WINNIPEG SUMMER FAIR.

Another of Winnipeg's yearly exhibitions has been held, and another record of success must be put to the credit of the public-spirited people who mainly inspire and manage the great activities that such an event gives rise to. Mr. Hodson's praise of these men in his speech on Friday was well merited. The Fair is held in a park of eighty acres or more, the property of the city, and in the northwestern part of it. At first the ground was absolutely bare prairie, and there was no means of getting at it. But now there are street cars to the very gate of the place, there are all civic conveniences, and the appearance of the grounds has been completely changed by means of trees, shrubs, flower-plots, and by the variety of buildings erected. A fire took place in the grounds early in the month, which destroyed a row of stables, nine or ten in number, but with usual Western energy they were rebuilt in ten days and used for the Fair.

I have been often asked in Ontario why the time of the Winnipeg Exhibition was changed to an earlier date, thus making it a summer instead of a fall Fair. The principal reason was that the farmers are too much engrossed with their work in the autumn to leave the farm. Harvest work in Manitoba is heavy work and hurried work, for the farmer is usually short-handed. So the managers found they could not get the farmers to Winnipeg for the fall Fair, and a few years ago they changed the date to July.

The Fair has been a successful and instructive institution. It is hard to know where to begin to describe this year's. The stock parade, always an uncommon sight, was perhaps most striking this year. Cattle were shown in extraordinary numbers; their quality and appearance attracting the loud applause of the many Americans, whether visitors or new settlers, who witnessed the imposing array of fine stock for the first time. Horses were well in evidence, too, whether of the show sort or the working sort. The disappointing feature among the animals was the comparative scarcity of sheep. Many sales of animals have been made at

the Fair grounds to incoming settlers, I am told. And the display of field implements was very extensive. Naturally enough, where farmers by the thousands are their only customers, the makers of reapers and binders and threshers, rakes and drills, ploughs and harrows, have samples of these things galore at every such event. And it is a good time for the farmer to select them. It must be remembered too, that the big United States firms which make field implements are now largely represented among the manufacturers of Winnipeg and other Canadian cities. Not to be kept out of so great a future field of operation by customs duties on their American made machines, they erected factories in Canada in different cities and now produce their implements here. In keeping with the progress of the day toward the extinction of the horse as a power, people of the Western States are applying their ingenuity to the application of compressed air, gasoline, steam and electricity to field implements. But while it is true that an automobile mower has been shown in Canada in successful operation, no machine is yet produced at a popular price to do its work. The average farmer will not pay $500 for the machine.

So much of the area of the grounds is taken up with the race track (or rather the show track), the platform, show attractions and pavilion, and the Midway, that I may almost say they occupy half the whole space. Folks must be amused, you know—farmers' wives and children, *certainly*; the farmer himself, *if you can*. The buildings, of course, take much space, for besides the Main Building, the Agricultural, Dairying and Horticultural buildings, there are necessarily a whole lot for animals and there are subsidiary structures besides. The Dairy Building, intended now among other things to show dairy processes in operation, though it has been enlarged is still too small. Great interest is taken in what goes on within it, because Manitoba farmers realize to-day the importance of the cow in any scheme of mixed farming. This province is doing better in the way of fruit culture, too, than people would have admitted possible twenty years ago. But a very large proportion of what is shown here consists of small fruits, such as strawberries, raspberries, currants and gooseberries.

In the Main Building of the Exhibition is to be found a great variety of manufactured goods from all parts of the Dominion; woolens from Nova Scotia and Manitoba; foodstuffs from Niagara and Winnipeg; Brantford machines and Galt machines; exhibits from Toronto and from Montreal; United States exhibits as well. It is perceptible, however, that the proportion of manufactured goods produced in Manitoba has grown, for there are factories in Winnipeg to-day and there are likely to be more to-morrow. It would make this letter too long if I were to attempt a list of exhibits in this building, so I shall generalize. Two departments struck me as important; one the display of manual training work by scholars of the Winnipeg schools, an excellent illustration of improving skill in using tools; and another the exhibition of work from the Indian schools. In this building is the Art Gallery, where the works of local artists, in oil and water-color, are on show, and also a sale-collection of paintings by Ontario artists. The latter meet with good success at our fairs, I am told, in disposing of their wares, for people are growing better able to afford such delights as good pictures.

To accommodate the throng of visitors that a Winnipeg Summer Fair always brings, the authorities took great precautions this year, remembering the crowded discomfort of former years to many visitors. Weeks before the opening day, a committee canvassed the city and made a list of rooms available in private houses for Fair week. They by this means added accommodation for 12,000 or 14,000 to the number that hotels and boarding-houses would hold. And yet people were sleeping in the parks and on kerb stones; fifty persons slept in one room at a certain hotel. Citizens were hospitable to an extreme, and in this way comfort was brought to many who must otherwise have had nowhere to lay their heads. Besides the number of strangers, Americans and others, who have thronged here this time, the Fair week is a great season for the assembling of provincial or other associations of various kinds and it is a great shopping time as well, the cheap railway rates of the week inducing numbers to come to the city—wives, sisters, cousins, aunts, and even children. Such an air of bustle, of holiday, of flag-flying, of bands parading—on the day I was there I heard six bands, three of them from the States—Winnipeg looked her best, and the weather was favorable for a warm welcome.

Only on Friday, the day before the closing, was there any rain, and then it was a torrent which spoiled the evening fireworks. The record for attendance is estimated to have been surpassed this year. Great crowds witnessed the horse races; and in those crowds, as indeed anywhere they could get a half chance, thieves and swindlers operated, and made "hauls" in spite of the vigilance of the police. This Fair, which finished yesterday, in all probability has surpassed any previous one in its value as an advertisement to Dakotans and Minnesotans of the progress of Winnipeg and the great future of our Northwest.

Winnipeg, 26th July, 1903. ADMIRAL.

AFFAIRS IN NOVA SCOTIA.

The end of July sees all branches of trade more than usually active in Halifax and the province. Prosperity attends the labors of farmers, fishermen, miners, and lumbermen. Railway construction causes money circulation in the Shore counties. The apple crop promises to be large, equaling that of 1901, when 450,000 barrels were available for export. Wholesale houses find their customers well supplied with cash and, as a rule, able to meet their indebtedness as bills of goods fall due. No important financial disturbances are in evidence, and the outlook for fall trade is as good as last year.

The tourist season is now at its height, and country as well as city is literally overrun with these welcome visitors. Every incoming steamboat and train is crowded with people coming to spend a more or less protracted holiday "in the Provinces." In addition to the British North American Squadron, of which Halifax is headquarters, one French and two German warships have been at anchor in the harbor for some time. While this makes lively times in society circles, it has its business advantages as well. Not only must the warships be provisioned, but the Tars spend their earnings freely when they come ashore. The mechanics employed at the dockyard are working a day and a half in each twenty-four hours, and will continue to do so until September, when the British ships will be ready for their annual Southern cruise.

The problem of how to prevent the further depletion of the lobster industry appears to have been successfully solved. The lobster has become commercially extinct, save in the coast waters of our Maritime Provinces. Even here they are much less numerous than formerly, and only the wise precautions of the Dominion Government has prevented their extinction here also. The establishment of close seasons, artificial propagation and the prohibition of taking spawn lobsters have to some extent been effective. The latter provision proved impossible of enforcement. This year the experiment was tried of buying the spawn lobsters of the fishermen and impounding them in a large water enclosure to be liberated at the opening of the close season to propagate in the natural way. The experiment has proved a perfect success, the adult lobsters being in perfect condition, the eggs being in all stages of development, and the waters of the pound teeming with vigorous lobster fry.

The general manager of the Bank of Nova Scotia, Mr. H. C. McLeod, arrived in the city last week in his yacht "Gloria," having successfully made the cruise from Toronto to Halifax. At Charlottetown he was joined by W. E. with cash, and, as a rule, able to meet their indebtedness as companied him to Halifax. Mr. McLeod will leave in a few days in the "Gloria" for New York, arriving there, with his party in time, it is hoped, to witness the races for the America's cup.

The annual meeting of the Trinidad Electric Company, Limited, in which many Canadians are interested, was held in this city last week, the president, Mr. John F. Stairs,

presiding. The tramway and electric plant owned and operated by the company is in Port-of-Spain, Trinidad, a city of some 80,000 inhabitants. The profit and loss account at the end of last December, about eighteen months after the company's organization, showed a balance of $3,636.27, after paying all current charges, including interest on bonds. For the first six months of 1903, the net profit was $42,569.34, which, deducting $18,000 for interest on bonds leaves a balance of $24,569.34. The board of directors elected for the ensuing year is as follows: John F. Stairs, William Gordon-Gordon, Charles Archibald, W. B. Ross, K.C.; R. E. Harris, K.C.; and B. F. Pearson. All the above, excepting William Gordon-Gordon, are residents of this city.

The Halifax Electric Tramway Company is spending about $200,000 in improvements. The machinery and fittings are being removed from the works at the Northwest Arm to the gas works property on the harbor front, and when this is completed, the site on the Arm will be offered for sale.

The opening of a new mining school at Glace Bay calls attention to the fact that this province possesses a very excellent system of mining instruction. Mining schools are maintained at the principal collieries, whereby young men, without loss of employment, by occupying their spare time in study for one or more terms, may qualify for overmen, managers, or first, second or third-class engineers.

A strong company of Boston capitalists, one of whom is H. M. Whitney, have taken hold of about thirty square miles of coal deposits at Port Hawkesbury and will proceed to develop the property. A mine will be opened at Port Malcolm, which will be made the shipping port. Mr. Whitney is expected to visit the locality in August.

The paramount public question in Halifax business centres is the Grand Trunk Pacific project. The Board of Trade last week by resolution reaffirmed its position that the eastern terminus should be at Moncton—a neutral point so far as Halifax and St. John interests are concerned. The resignation of Hon. A. G. Blair called for varied expressions of feeling. In opposing the construction of a direct line of railway across New Brunswick to Moncton, he opposed the only policy that can give Halifax a share in the winter port trade. At the same time business men here are not all enamored of the idea of placing the road under Grand Trunk control, as they fear means will still be discovered to divert the bulk of the through business to the present ocean terminals at Portland. With the addition of a short line across New Brunswick to Moncton, Mr. Blair's policy for the extension of the Intercolonial westward would have met strong support from business interests here.

Industrial conditions at Sydney are not as promising as could be wished. Five of the open-hearth furnaces of the Dominion Iron and Steel Company have been closed and the night shift on the blooming mills has been taken off. The reducing of the blooming mills to one shift will cut down the output one-half. Hitherto it was 13,004 tons per month, hereafter it will only be 6,000 or 7,000 tons. The reason assigned is that prices of steel billets in the United States have been lowered and the demand has fallen off. The completion of the finishing mills still requires the provision of considerable new money. For a moderate expenditure manufacture can be carried forward to a point at which the entire product will be marketable either at home or abroad. The possibility of the practical side has now been pretty thoroughly tested and the question involved now is said to be chiefly one of finance.

[Despatches of 29th July modify the statement as to the closing of furnaces and the discharge of men.—Ed. Monetary Times.]

By the redistribution bill Nova Scotia loses two members. The Conservative party will be the weaker by one member, since Pictou County is to be no longer a double constituency, while the fighting chances in Cape Breton have perhaps not been materially disturbed by the rearrangement of the representation there. Nova Scotians are consoling themselves for the loss of representation by the expectation that the future Premier of Canada, no matter which party wins in the next election, will be a Halifax man.

Halifax, Nova Scotia, 27th July, 1903.

OUR ST. JOHN LETTER.

The shareholders of the St. John Street Railway Company decided at a meeting on Monday afternoon to increase the capital stock to $800,000. The original value was $500,000, but this was low, and the company has now in progress very extensive improvements that will entail an outlay of perhaps near a quarter of a million dollars. The branch line out Douglas Ave., opened last summer, has proved such a success that it became necessary to double track it, and that will be completed in a few days. Then an extension of the service to Carleton is to be commenced and a circuit of about five miles will be added to the line. Extensions of the line in the city proper are also to be undertaken, and valuable additions made to the power plant.

The Inglewood Pulp and Paper Company have had scalers going over their timber lands burned in the recent forest fires. The reports are that the property is or was a finer one than even the owners knew. There is standing about two hundred million feet, every stick of which was killed by the fiery blast. The only way in which this lumber can be saved is to cut it as speedily as possible, otherwise inside of three years it will be destroyed by the worms. It is expected that large crews will be sent into the woods this winter to chop down this forest, and once in the rivers and lakes it can be kept for a longer time than standing dead in the forests. Many other New Brunswick lumbermen will have to send large crews into the woods to cut down burned timbers. This means that there will be a heavy demand for woodsmen, and that the lumber cut of the coming winter will be an unprecedentedly large one.

The machinery in the big pulp mill at St. George, in Charlotte County, built by American capitalists, was started to-day. It is generally believed that the owners of this mill will also erect a paper mill in the near future, as experience has shown that it is much more profitable to manufacture the pulp than to ship it to the paper mills.

The new and immense warehouse of T. H. Estabrooks, the St. John tea man, is rapidly approaching completion, and in a few weeks it will be ready for him to occupy. The Canadian Drug Company, whose premises were destroyed by fire, have awarded a contract for a new building on Mill street, adjoining the Estabrooks building. These structures are near the railway station and will greatly improve the appearance of a locality in which many of the buildings are small wooden structures. The new Carnegie Library, work on which is progressing, is not far away, and there are rumors of other big buildings in this vicinity.

The city of St. John has been negotiating with a naval architect from the United States for the construction of a modern ferry boat for use in the harbor. He has recommended a steel hull with propellers at either end, and wants to have the vessel made in England, shipped out here in sections and reassembled. No decision has as yet been reached, and as the job is one worth in the vicinity of $75,000, it may pay some Canadian firms to investigate it.

There is, of course, great interest here, not only in the Grand Trunk Pacific project, but in the future course of Hon. A. G. Blair, who represents this constituency in Parliament. A phase of the situation that is causing some talk is that relating to the newspapers. Shortly after Hon. Mr. Blair entered Parliament, he bought, or a syndicate of his friends bought, the Daily Telegraph. That paper has since been his personal organ, and, of course, the mouthpiece of the Liberal party in the province. Now the Telegraph is siding with Mr. Blair in the railway dispute, and there is anxiety in the Liberal ranks over the matter. Mr. Blair, after the last provincial election, talked of securing an evening organ also, and since his break with his colleagues talk along this line has revived. Only a few days ago his agent Mr. David Russell, of Montreal, came to St. John, and it is understood so arranged matters that the announcement any day of the purchase by him of the St. John Gazette would not occasion surprise. The Gazette is the organ of the local Government, and as the local leaders are opposing Mr. Blair's railway policy, it is not likely that his organs will support them. If Mr. Blair buys the Gazette and takes it and

the Telegraph into opposition to the provincial leaders, they will be without a newspaper in St. John.

News of a most cheering nature comes from the oil fields of New Brunswick. New boring machinery is constantly being added, and now there are about thirty producing wells. To-day it is announced that the managers are arranging for the erection of a small refinery. All those interested are most hopeful of the future, and in fact sanguine that New Brunswick has a great future as an oil-producing district.

* * *

St. John, N.B., 28th July, 1903.

INSTITUTE OF BANKERS IN SCOTLAND.

It is somewhat astonishing, when we recall the disposition of British folk to scatter themselves among the colonies, to find that out of a list of 1,382 Members and Associates of the Institute of Bankers in Scotland for the present year, only 47 are to be found in the colonies or in foreign countries. This we learn from the Annual Report of the Institute, Edinburgh, 1903. And it is still further a curious thing, when it is remembered how many Scottish graduates in banking, from the early days of the Bank of British North America have served in Canada, and reached good positions in banking circles, that only six of all this lengthy list, of June, 1903, are to be found in Canada. These six are: members, John S. Batchan, C. B. of C., Dawson, Yukon Territory, prizeman with honors, 1892; James Cameron, member with honors, C. B. of C., London, Canada; Allan Neilson, member with honors, B. B. N. A., Montreal; Charles M. Stewart, C. B. of C., Barrie, Ont.; James Brownlee, associate, C. B. of C., London; William McNaughton, Royal Bank Can., Klondike, associate; David Muirhead, C. B. of C., Windsor, Ont., associate. Lest any one should ask to what colonies or foreign countries the other 41 have gone, we may tell him that 30 have preferred South Africa, and have spread themselves over Cape Colony and Natal, but are mainly at Johannesberg and Cape Town. The others have gone to Brazil, to China, to India, to Australia and New Zealand. Some day, perhaps, when such intelligent folk as bank managers and clerks can rid themselves of the dread of Canada's climate which seems to overwhelm Old Country folk even to this date, we shall find a larger percentage in the Dominion of members of the Institute.

The examination papers of candidates for admission to the Institute last March, consisted of questions and examples in French and German, and the translation of these languages; questions in British History and General History; the British Constitution and Government, and English literature. The candidates had to give a short account of the Star Chamber, the Mutiny Bill, the Government Ship Money arrangement and Poyning's Law. They had further to "Name what you consider the outstanding bulwarks of constitutional liberty, and briefly justify each." (Eh! Michty! but this last was prepared by an essentially Scottish mind). Their task in general history was as follows: 1. Write a short account of any four of the following:—Dandolo, Jenghiz Khan, Charlemagne, Don Carlos, Surajah Dowlah, Voltaire, The Medici. 2. Summarize your knowledge of any one of the following: The growth of Italy from 1859, the Congo State, the History of Poland, the Hague Conference. 3. Write briefly on any four of the following: The Aryans, the Suez Canal, the Monroe Doctrine, the Edict of Nantes, Tyrants, Board of Control, the Communists, the European Concert. 4. Add a note to explain the historical importance of: Lutzen, Marathon, Byzantium, Hapsburg, Plevna, Wagram, Crete, Sedan.

In English Literature, the following were the questions asked of the candidates: 1. Name the authors of any four of the following, and give a brief extract of the trend of the work you select: Utopia, The Tattler, The Rape of the Lock, Endymion, The Princess, Lycidas, The Faerie Queen. 2. What do you mean by the following? Give a well-known instance of each: epic, elegy, sonnet, tragedy, ballad, satire. 3. Give an outline of the literary life of any one of the following: Chaucer, Pope, Swift, Milton. 4. Trace the growth of the novel; or, What are the characteristics of nineteenth century poetry? 5. Where are the following quotations taken from? Can you continue any of them? (a) "Full many a flower is born to blush unseen." (b) "A thing of beauty is a joy for ever." (c) "Water, water, everywhere." (d) "Stone walls do not a prison make." (e) "Breathes there the man, with soul so dead." While one may not expect the average Scotch lad to be familiar with Keats or Lovelace, or in a much greater degree with Gray or Coleridge, it is a safe bet that every one of the associates would know where to find that last quotation, and could continue it.

INSURANCE ITEMS.

Mr. J. W. McKenzie, Canadian manager of the Maryland Casualty Co., of Baltimore, Md., left this city Monday for the East. Mr. McKenzie will make a tour of the company's agencies, and expects to be absent about six weeks. He reports gratifying progress in connection with the planting of new agencies and business secured.

News was received to-day of the destruction by fire of Messrs. Smith Bros.' saw-mill at Fredericton Junction. This is the seventh New Brunswick saw-mill burned this year. The property was insured for only $2,000, and the loss will be about $10,000. The expectation is that the Messrs. Smith Bros. will rebuild, and the majority of the other burned mills have been or will be rebuilt. There is doubt, however, about the Knight mill at Musquash, for the forest fires have destroyed its source of supply. Indeed, the whole future of Musquash village looks blue. The Dunn Brothers' pork packing establishment will be moved to Fairville, just outside the city of St. John, and the mill will not be built. These were the employments of the villagers, and kept in the vicinity a hundred families. So far, only eight or ten of those who lost their homes in the sweep of the recent forest conflagration will rebuild and will devote themselves to farming. The others will seek new homes and new employments.

TRADE OPPORTUNITIES.

Imperial Institute, London, July 17.—An English house, making essences, cordials, mineral waters, etc., would correspond with Canadian firms prepared to take up sale of the same. A company making colored prints, almanacs, showcards, etc., wishes to hear from Canadian dealers in such goods. A firm with offices in Constantinople, Cairo, and Alexandria is open to represent makers of goods in Canada, suitable for the Turkish and Egyptian market.

—On the afternoon of Tuesday last, the Montreal Trust and Deposit Company held a special general meeting, at which it was decided to increase the capital of the company to $1,000,000, of which $525,000 will be paid up in cash. The board of directors has also been increased to twenty-one members by the election of fifteen influential business men of Canada, whose names will shortly be announced. This old company will now occupy an exceptionally strong position, and is reasonably sure to command a large share of business throughout the Dominion.

—The latest monthly report of the Department of Trade and Commerce of Canada is an interesting document. It contains much information in the way of trade statistics. Accompanying the report are a series of diagrams illustrating the remarkable growth of exports in certain commodities since Confederation year (1867) to date. It also contains valuable reports from the Canadian commercial agents in the West Indies, Australia, England, S. Africa, Norway and France. We are told that the reports can be had free upon application to the Department at Ottawa, and Canadians who have friends or correspondents in England would do well to procure such an illuminating publication to send them. A comparative table in the report shows the growth of the Dominion in material activity and wealth in periods of ten years.

AMOUNT OF
AGGREGATE TRADE OF CANADA
With all Countries, 1902.

READER,

HANG THIS UP IN YOUR OFFICE.

—The Victoria Board of Trade has elected officers as follows: President, Mr. C. F. Todd; vice-president, Mr. S. J. Pitts; secretary-treasurer, Mr. F. Elworthy.

The liquidators of the Atlas Loan Company, of St. Thomas, Ont., have applied for permission to bring action against the Metropolitan Bank, to recover for the benefit of creditors, securities valued at $91,991, which, it is claimed, were given to the bank while the company was in an insolvent condition. They also want to recover the sums of $25,000 and $5,093 paid under similar circumstances.

—A merchant in a central part of Lambton County, Ont., writing on Saturday last to the Editor of this journal, gives the following information on the subject of crop prospects in that part of Southern Ontario: "The weather is now fine for the crops, which, taken all round, may be called good. If favored with same growing air for a few weeks, it would go far to make up for the comparatively cold season so far experienced. We hope we shall have plenty of grain to handle this year, and not a repetition of the last two poor years. There won't be much wheat hereabout, however, so little was sown last year."

—The case of Henry Graves & Co., engravers, of London, Eng., against Mr. G. T. Gorrie, of Toronto, in which the former endeavored to restrain the latter from publishing copies of the famous picture by Maud Earle: "What We Have We'll Hold," has been decided in favor of defendant by the Judicial Committee of the Privy Council of Great Britain. This was in accordance with the judgment of three Canadian courts from which the case had been appealed. The contention of plaintiff was, that the picture had been registered under the Imperial Artistic Copyright Act, and that this copyright extended to the colonies under the clause "dominions of the Crown." The defendant denies this, with the above result.

—At the Ontario Crown Lands Department timber sales, probably to be held in December, which promise to be the largest held since 1885, seventy-five townships or about 900 acres of provincial land will be offered. Disposing of the timber will make room for the advancing settlement along the line of several new railroads—the Temiskaming & Northern Ontario, the Bruce Mines & Algoma, and the Central Canada. Since Confederation there have been fourteen timber sales in Ontario, disposing of 10,818½ square miles. The largest sale was the north shore limits in 1872, when 5,031 miles were disposed of but the price was the lowest, averaging but $117.79 per mile. In 1892 633 miles were sold for $2,315,000, an average of $3,657, the highest average received in any sale. In 1881, 1,379 miles were sold for $733,675, or $532 a mile, while in 1887, 459 miles were sold for $2,859 per mile. The last sale held was in September, 1901, when 399¼ miles were sold for $732,787, or $1,835 per mile. In December, 1899, 360 miles were sold for $723,550, or $2,010 per mile.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, July 30, 1903, compared with those of the previous week.

Cities	July 30, 1903	July 23, 1903
Montreal	$18,125,371	$21,538,948
Toronto	12,758,823	14,204,293
Winnipeg	3,934,147	4,503,489
Halifax	1,544,715	1,677,669
Hamilton	872,601	1,027,567
St. John	946,177	1,200,023
Vancouver	1,450,085	1,666,388
Victoria	642,431	502,194
Quebec	1,575,978	1,711,362
Ottawa	1,608,421	1,969,275
London	724,133	898,580
	$44,182,882	$50,899,788

Cheap Electric Power
Free Factory Sites
Low Taxation

PETERBOROUGH, Ontario,

offers the above and many more advantages to manufacturers who are looking for sites for their industries.

When looking over Canada a few years a representative of THE ROTHSCHILD BANKING HOUSE STATED THAT PETERBOROUGH was destined to be one of the greatest manufacturing centres of the Continent on account of its Water Powers, Shipping Facilities and Natural Resources, Peterborough's great industrial growth during the last two years shows the coming fulfilment of the Rothschild prediction. Thousands of horse power are available for large or small users.

THE MUNICIPAL CORPORATION OF PETERBOROUGH

Are offering valuable inducements to responsible manufacturing concerns locating there.

Low Freight Rates to Manitoba. — — — — **Low Export Freight Rates.**

PETERBOROUGH is on the Canadian Pacific Railway, Grand Trunk Railway and the Trent Canal. Is seventy miles east of Toronto on the route to Montreal and Ottawa, on the main line of the Canadian Pacific Railway; the Grand Trunk Railway has several branch lines radiating therefrom; the Trent Canal, now rapidly approaching completion, will connect Georgian Bay and the Upper Lakes with Lake Ontario, by short route navigation to the seaboard—a steam tug canal with barges three times the capacity of those of the Erie Canal Has, with its suburbs, a growing population of 15,000. Peterborough has recently secured many new factories, three of which are the largest of their kind in Canada. Apply to

Pure Egyptian Cigarettes.

THE gross earnings of the C.P.R. for the month of June last were $4,152,610; working expenses, $2,906,555; net profits, $1,246,055. In June, 1902, the net profits were $846,737. For the eleven months ended 30th June, 1903, the figures are as follows: Gross earnings, $43,957,373; working expenses, $28,120,527; net profits, $15,836,845. For eleven months ended June 30th, 1902, there was a net profit of $14,085,912.

Commercial.

MONTREAL MARKETS.

Montreal, 29th July, 1903.

Ashes.—Business continues of limited proportions, but receipts are so small that high-level prices are maintained, and $5.60 per cental could be realized for first pots of good tares. Pearls are very scarce and are wanted, but in absence of any recent business it is very hard to determine a quotation.

Dairy Products.—The butter market rules about steady at last week's prices under fair demand. Finest to fancy Townships creameries are quoted at 18¾ to 19c. per lb., with prices ranging down to 15c. for good dairy. Cheese is rather dull and heavy, and Quebec makes are notably easier at about 8¾ to 8⅞c. Townships are quoted at 9¼ to 9⅜c., and Ontarios at 9½ to 9⅝c. Cheese exports last week were figured at 102,048 boxes, being 36,800 less than same week a year ago. Of butter there were exported 17,870 packages, as against 28,117 packages at same date in 1902.

Cements and Firebricks.—Importations of German and Belgian cement are still being hurried in, and in great quantity. For the week ending to-day, the figures are 49,075 bags and 8,140 bbls. Of English cements, receipts for the week are 1,540 bbls. Importations of firebricks are 160,000. A good steady business is being done at firm prices in both.

Dry Goods.—City retail trade is quiet at the moment, but in wholesale circles travellers are reported as sending in good orders from country districts, and the warehouses are all busy already with the despatch of fall goods. It is understood to be practically settled that prices for all lines of cotton goods for next spring's trade will be further advanced, and circular advices to this effect from the mills are looked for next week.

Groceries.—Sugars are down again, the local refineries advising a cut of 10c. a cental in all grades to-day, making present factory prices for standard granulated 4.15, and yellows from $3.40 to $4, in bbls.; bags 5c. less. This reduction is largely due to the fact that importations of Russian refined sugars have been somewhat free of late. Country dealers have been rather bare of stock, and the demand has been very brisk, the refineries having had all they could to keep up with orders, but matters are now a little quieter in this respect. There is comparatively little doing in molasses just now, but quotations are stiff at 38 to 39c. for goods of last year's crop, and some importers ask former figure in quantity. Of new crop there is practically no stock here. Prices for new pack of tomatoes and corn have not yet been established. A sale of 4,000 cases of gallon apples to Europe is reported. A cable relating to China green teas, just to hand, reports an easy market, with prices in buyers' favor. Foochow

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance:

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

orders for China blacks are being placed on about the same basis as last year. Ceylons and Indians are reported firm, with a somewhat short crop, but quality is said to be specially good. Ceylon greens are selling freely. The Japan market is on about the same level as last year, good mediums being quoted at 18c., and common at 16c. per pound.

Hides.—No change is reported since a week ago. Dealers are generally paying 8½c. per lb. for No. 1 beef hides. Calfskins are still quoted at 11 and 9c. per lb. for Nos. 1 and 2 respectively. It is expected lambskins will be advanced next week to 40 or 45c. each.

Metals and Hardware.—The week has not developed any specially new features. Heavy metals are quieter, but in general hardware there is quite a good movement. Some moderate transactions are reported in Summerlee pig iron at $21 for No. 2, selected; of Gartsherrie and Eglinton there is some stock here, $21 being quoted for the former, and $20.50 for the latter. For English iron, $18.75 is quoted, but fair lots could be done at fifty cents less. Bars rule steady at $1.95 to $2. Scotch boiler plate from stock is quoted at $2.10, but some fair orders for import are said to have been placed at something less than $2; American boiler plate would cost $2.20 to $2.25. Sheets are not quotably lower, but holders seem more anxious to sell. Tin, lead, and copper are not specially changed.

Oils, Paints and Glass.—Business is hardly so active as it was, though a fair movement for the season is reported. As anticipated last week, there has been a decline in linseed oils, and it is reported boiled has been quoted as low as 53 cents. We quote, as follows: Single barrels, raw linseed oil, 51 to 52c.; boiled, 53 to 54c.; net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 73c., single barrel. Olive oil, machinery, 90c.; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gallon; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands) $5 to $5.15; No. 1, $4.75 to $4.87½; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼-4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, July 30th, 1903.

Chemicals, Drugs, etc.—The comparative firmness in quinine, opium and morphine continues. In these items in the local market, a fairly good business for this time of the year is passing; otherwise, trade is a little on the dull side. Prices, however, keep up well. The New York market for drugs at the present time is quiet. There was less demand from the large buyers of quinine. Some little export demand for opium is being manifested, but only a very small jobbing business is reported. Manchester advices recently to hand spoke of a dull demand for chemicals in Great Britain.

Dry Goods.—As may be expected at this time of the year, the wholesale houses are a little quiet just now, though no complaint can be made as to the amount of business being carried through. Prices in practically all lines of dry goods remain very firm.

Flour and Grain. — Practically no change has taken place in the flour and grain market since last report, and quotations remain the same. Little business is being done in wheat or other grains, while flour, millfeed, oatmeal, etc., keep in fair demand.

Fruits and Vegetables. — Wholesale fruit merchants report a heavy week, with large quantities of raspberries and other fruits being sold. Red and black currants and huckleberries are rather scarce and a little higher priced. Apples in baskets are becoming more plentiful, and sell at 20 to 25c. Cucumbers are easier, at 20 to 35c. per basket. California fruits are not particularly plentiful just now. Plums and peaches are firm, but large quantities are expected shortly. Watermelons sell freely at about 25 to

It is revised and reissued four times a year.

Price Five Dollars.
Delivered Carriage Paid.

30c. Bananas are quoted at $1.50 to $2.50 per bunch; cocoanuts at $3.75 per sack; late oranges at $4 to $5 per case; pine-apples at $3.25 to $4 per crate; Canadian tomatoes at 75c. to $1.10 per basket; beans at 30 to 35c. per basket.

Hardware.—Shortages still exist in some articles, such as poultry netting, cut shingle nails, and some lines of hinges and bolts. Business is still very active and prices very firm, for all lines of seasonable goods. Metals are in good demand and the easiness of pig iron of two or three weeks ago seems to have passed away.

Hides and Skins.—The supply and demand for hides in this market are both about normal. Lambskins and calfskins keep fairly steady in price. Tallow is a little easier owing to accumulation of stocks. A fairly good movement is going on in leather.

Live Stock.—The run of cattle at the market this week was light, and as the demand for the most part was good, they were disposed of easily and quickly. Prices were well maintained, and in some cases inclined higher. Especially was this the case in export cattle. Extra choice fetched $5 to $5.20 per cwt., ordinary, $4.60 to $4.90. For butchers' cattle, too, the feeling was firmer, at any rate for the really good specimens. For others the demand was only middling, as usual. Not many stockers and feeders were wanted. The milch cows, of which there were not many offering, brought about $30 to $50 each. Receipts of sheep and lambs were moderately large, but trade was brisk. Prices were steady with a firmer feeling. The price of hogs went up sharply by about 45c. per cwt.

Provisions.—Stocks of butter are accumulating somewhat owing to heavy deliveries and the comparative absence of demand for export. Prices are easy, no great change in them has taken place. A dull market exists for cheese. The quantity of eggs coming in is considerable, but the quality of a large proportion is poor. A better tone prevails in the hog market. Hams and other smoked meats are in very good demand, owing to the warm weather. Prices are very firm.

Wool.—A little better export enquiry for fleece has developed of late, and prices rule a little firmer. The clip is reported to be smaller than usual this year. Pulled wools are in fair demand.

What Probate Reveals

Hundreds of men deemed wealthy die every year poor, leaving their families penniless.
To avoid so great a calamity take out a policy, while in good health, in

Head Office—WATERLOO, ONT.
The Mutual Life OF CANADA

Its policy-holders constitute the Company, elect the Directors, control its funds, and receive all the profits. A policy in it pays.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

The Government Report Shows

That the Canada Life Assurance Company had a larger amount of New Business paid for in Canada in 1902 than any other native Company. In this, as in other respects, the Repor places

The Canada Life First.

The Sun Life of Canada is
"Prosperous and Progressive."

Even among the many record-breaking years the Sun Life of Canada has had, 1902 takes a place in the front.

Business written in 1902, $15,685,686 22.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company

has no equal

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay $5.00 for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over $100,000 a year by doing neither one.

For sample copy send 10 cents to PRINTERS' INK, No. 10 Spruce St., New York City.

Mercantile Summary.

The Temiskaming and Northern Ontario Railway Commission offers direct to public tender, $2,750,000 of 3½ per cent. 30-year gold bonds, payment of principal and interest on which is guaranteed by the Ontario Government. They will be equivalent to Government bonds, with the added security of the railway and the land grant of 20,000 acres per mile.

What is described as the most northerly railroad in the world, that between Lulea and Narvik, in Scandinavia, has just been opened by the King of Sweden and Norway. The new line, besides possessing considerable strategic importance, will have for its main object the facilitating of shipments across the Atlantic of the rich iron ore which can be found in the above region.

The England Tannery, at Knowlton, Que., has been completely destroyed by fire. New machinery had recently been installed, and there was no insurance on the property, which was of considerable value. On the same day, A. N. Whitman & Sons' general store and fish warehouse in Canso, N.S., were burned down at a loss of about $40,000, covered by insurance.

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Mercantile Summary

The customs returns for Winnipeg for July were $266,347; those for July, 1902, were $178,858.67; or the large increase of $87,489.33.

The Prescott, Ont., Elevator was on the 31st ult. sold in the Ottawa Court House at public auction, to Mr. W. L. Marler, for $28,000. Its original cost was $150,000.

The Fredericton, N.B., Gas Company has sold out its electric light plant to the city for $15,500. The latter will put in some new machinery and begin operations in October.

We acknowledge the receipt of a lithograph illustrating "The Goodrich Rubber Man's Vacation." It represents a golf club-house and grounds, with appropriate figures and accessories, among them a charming reproduction of the "Helen," with her arms clasped behind her head, whose life-size portrait has enchanted so many. But the foreground of the lithograph is taken up with the Goodrich automobile from Akron, Ohio, with its smiling mascot in front and four lovely maids in Juliet costumes being driven by "Our Artist." The legend attached, in slightly mechanical rhyme, is as thus:

A little of Nature; A sprinkling of Art,
Some sunshine (bottled) and rubber
enough to play its part.

The first annual meeting of the United Typewriter Company, Limited, Toronto, was held last week, with President W. H. Shaw in the chair. As a result of the first 6 months' operations, a dividend at the rate of 7% per annum was declared, and the sum of $7,360 added to rest account. All the old directors and officers were re-elected. The company have made arrangements to increase materially the sale of the well-known Underwood and Empire typewriters, and it is believed that the results at the next annual meeting will be even more gratifying. They are about to purchase the Snowden Chambers, a five-story building on Adelaide street east, which will be renamed Typewriter Chambers, and used as business headquarters.

The outward cargo of the steamship "Lake Manitoba," which grounded in a fog outside Montreal harbor, but by being lightered was released, unhurt, on Sunday last, was a valuable one, and appears to have sustained no damage. It is interesting to make a list of the various merchandise she carries to the Old Country: Wheat, bushels, 65,528; corn, bushels, 24,053; flour, sacks, 2,705; flour, barrels, 120; oatmeal, bags, 300; deals, ends and boards, 69,011; firewood lumber, pieces, 3,303; leather, packages, 43; hay, bales, 4,205; wood-board rolls, 241; pulleys, crates, 91; fittings, cases, 23; Swiss food, cases, 25; typewriters, 11; chrome, iron, 150; phosphorus, cases, 150; sundries, 3; cheese, boxes, 7,496; canned meats, cases, 1,051; lard, packages, 373; meats, packages, 2,268. Add to this nine packages of express matter.

THE Winnipeg Electric Street Railway Co. are about to put in nearly two miles of street railway in St. Boniface.

MR. F. H. CLERGUE, of The Soo, and Anglo-American Development Co., Fort William, Ont., are to join forces in the development of the Kakabeka Falls. Their proposal is to supply Fort William and Port Arthur with power for lighting the streets and municipal buildings, at $15 per horsepower. The company is to pay for the present town electric light plant and appliances at a valuation to be agreed upon, the present valuation being $80,000, the company to reserve the right to sell power to manufacturers and other industries, which are expected to be induced to come, owing to the good facilities offered.

Mercantile Summary.

THE Labelle Lumber Co.'s mill at Labelle, Que., has been destroyed by fire, at a loss of about $16,000; not insured.

THE Montreal Street Railway has decided to issue $1,000,000 new stock to shareholders at par for permanent works.

THE stock of H. A. Cox & Co., of Carman, Manitoba, consisting of men's furnishings, was sold on Saturday, the Free Press says, for 68½ cents on the dollar.

THE Canadian Pacific Railroad proposes to establish a new freight schedule on products of the Northwest and Pacific coast shipped to oriental points. This is supposed to be in order to anticipate a similar action on behalf of the Great Northern Railway with regard to Puget Sound ports.

A YOUNG man named Joseph Y. Trudel, formerly a clerk at St. Tite and at St. Narcisse, in the Province of Quebec, began business for himself, in dry goods and shoes at Shawinigan Falls, last autumn. His capital was limited, and he has already reached the length of his tether, and made an assignment of his estate.

ELZEAR BEAUCHEMIN, dealer in boots and shoes at Roxton Falls, Que., recently failed, has arranged a composition at the rate of 55 per cent., on liabilities of about $2,000.——The recent assignment of Alphonse Nadeau, carriage maker, at St. George de la Beauce, Que., is being contested by the inspectors to the estate, on the ground of alleged fraud on the part of the insolvent.

AN assignment has been made by Frank Poor, dealer in men's furnishings at Prescott, Ont. He was reported last February as offering 50 cents on the dollar.——G. L. Pouliotte, a new beginner in the storekeeping line at Rockland, Ont., has assigned. He was formerly clerk for the W. C. Edwards Co., and began on his own account in the spring of 1902 on a small capital, said to be partly advanced by his father.

A MINNEAPOLIS capitalist has closed a deal whereby he takes an interest in the Hastings Shingle Manufacturing Company of Vancouver, to the extent of about $125,000. This company owns a shingle mill on Burrard Inlet, which is the largest in the Province, besides other mills on False Creek, at Whatcom, Sumac, and other points in the State of Washington. The mills will be managed as heretofore, by Mr. Jas. A. McNair.

THE affairs of Julien Lalonde, general dealer, Routhier, Ont., have been undergoing investigation by an accountant, and at a meeting of creditors, held a few days ago, he made an offer of 35 per cent. cash, on liabilities of $2,500. He had been unsuccessfully in business about ten years ago at Fournier, Ont., and compromised at 50 cents. He subsequently was a lumber jobber for several years, before restarting business at his present location.

TORONTO painters, who have been on strike for about nine weeks, have now declared their willingness to return to work at the reduced rate of 30c., which the master painters have all along declared was as much as they could afford, though for a short time they paid 35c.

A WINDING up order has been applied for and granted in the matter of the Sheffield Cutlery Co., Limited, of Montreal. The business was originally started in a small way, some four or five years ago, by J. D. Couture, who sold out to the present organization about 1901. The company was incorporated under Quebec laws, with an authorized capital of $10,000.

MR. D. G. BOYD, inspector of mines for the Michipicoten district of Ontario, speaks brightly of the prospects there. He says that at the present time there are six mines producing gold ore, but these only begin to tap the region's immense resources. The country is teeming with copper and iron, and these, he opines, will be more lucrative minerals for investment than gold. The copper occurs in the two forms of native and sulphide. The former is confined to the islands and shores of Lake Superior, and the leads found in Canada are a continuation of the leads found on the upper peninsula of Michigan. The main lead from Keewenaw Point passes evidently under Lake Superior and reappears on Michipicoten Island, where it skirts the north shore and seems to disappear. It is almost impossible, even for a professional mining man to tell the difference between the ore on Keewenaw Point, in Michigan, and that on Michipicoten Island, yet the former has been turned into millions of dollars, while the latter has been practically untouched. What is needed is capital.

Mercantile Summary.

JOHN BALLANTINE & Co.'s machinery business at Preston, Ont., has been taken over by a company, to be known as John Ballantine & Co., Limited, with a capital stock of $80,000.

FOR a great many years, J. E. Weston has been engaged in the furniture business at Tillsonburg, but for some reason has made little headway. In June last he was burned out, and is now offering creditors 30 cents on the dollar, which has been accepted by all creditors, and he has received his discharge.

IT is anticipated that the Pacific Cable will have to face a loss of something like $1,060,000, up to December 31st next. The expenditure for the first year, while the line was still under construction, was $600,000, of which Canada pays $166,661. The estimated loss on the current year of $460,500 makes the total deficit $1,060,000.

O. MOSHKOVITCH ran a dry goods business at Belleville. He also used the style of the Bell Dry Goods House. Last April he made a statement that he had a stock on hand of $5,000, and owed $3,000. He is a Russian, and previous to coming to Belleville had been peddling outside of Montreal for about eight years. Owing to the failure of a Montreal house he has been compelled to assign.

A NUMBER of years ago Danford Roche started a retail store in Newmarket and made money. About 1876 he removed to Toronto, but he stopped in October, 1887, when he had accumulated liabilities of nearly $100,000. The stock was sold to his mother, and again in 1895 he failed, this time owing $35,000, which was settled at 30 cents on the dollar. This closed the Toronto business, and he afterwards opened places in Ottawa and Brantford. About a year ago he closed out these branches, and in December, 1902, formed a joint stock company under the name of Danford, Roche & Co., with an authorized capital of $40,000. Since that time Mr. Roche has been in charge. Latterly several judgments have been obtained against them, and they are now offering creditors 50 cents on the dollar, payable on the 1st of September.

DESCRIBING the big new machine recently installed in the Canada Paper Company's factory at Windsor Mills, a Montreal paper says: The paper is 30 per cent. wider than any heretofore made in this country, being 141 inches or eleven feet nine inches in width when first off the machine. The first roll made was afterwards cut into two sheets of about 70 inches each, being the first of this width ever made side by side in Canada. The machine itself is 200 feet long, and stands in a building 260 feet long by 50 broad. "An idea of the wonderful growth of the paper-making industry in this country can be imagined by comparing the changes that have taken place since the present general manager of the company, Mr. F. J. Campbell, entered its service some twenty-two years ago. The widest sheet made at that time was little more than half the width of that turned out by this very remarkable machine."

A SCHOONER has arrived at the port of St. John, bringing 30 immigrants from the Cape de Verde Islands, who propose settling in Canada. They are all Portuguese people, men well built, and good workers, according to the reports. They are all well dressed and are possessed of sufficient means to provide for themselves.

Mercantile Summary.

THE Middleton and Victoria Beach Railway running from Middleton, N.S., where it connects with the Dominion Atlantic and Central Railways, to Victoria Beach, on the Annapolis Basin, will, it is announced, be made a part of the Halifax and Southwestern system, it having been purchased by the owners of the latter.

RECENTLY—just before the provincial election—the Manitoba Government issued an order-in-council that the Canadian Northern Railroad would have to reduce their rates on grain by 10 cents, that is, make a 10c. rate from Winnipeg as a basing point. A report from that city, however, states that the railroad refuses to put this reduced rate into force.

THE Canadian-American Coal Company is gradually getting its property at Frank, Alberta, into good condition again. The new shaft is down over 100 feet, and new machinery is arriving every week. A correspondent of ours, writing from the neighborhood of the fallen mountain recently, says that in his opinion, formed from the nature of the ground and from the force with which huge rocks have been ejected, something more than a mere landslide is required to account for the catastrophe of a few months ago.

A CANADIAN railway builder having a Government subsidy for the completion of thirty miles of road within six months, came to New York last week to secure his rails He judged from the tone of the stock market and the prices of steel shares that he might get a good bargain. He not only found that he could get no rails at a discount from the stated price of $28 per ton, but that he could get no deliveries this calendar year because everything was engaged. He was willing to pay $30 per ton, delivered within six months, but could not place the order. The nearest delivery that was offered to him upon any rail account was June, 1904. He accordingly cabled to Germany and placed orders for rails there.—Wall Street Journal.

A STATEMENT as to the present position of the Consolidated Lake Superior Company has been given out to the shareholders; it shows that out of the $35,000,000 capital held by that company, expenditures have been made as follows: Iron and steel plants and their accessories, $4,438,300. Mining properties, $1,082,000. Ferro nickel reduction works at Sault Ste. Marie, $499,700. Transportation interests, $9,482,200. Two pulp mills, $1,024,000. Water-power development, Michigan side, $6,423,600. Water-power development, Canadian side, $953,800. Sawmills and lumber operations, $268,700. Tagona water and light plant, $321,000. Office buildings and other real estate, $296,900. Materials and supplies on hand, $3,000,000. Total, $27,790,200. About $7,000,000 worth of stock remains in the treasury. The matter of raising the loan of $1,750,000 is still being worked on.

PETERBORO Town Council has granted a franchise to the Peterboro & Ashburnham Radial Electric Railway Company, in which the American Cereal Company is largely interested. According to the agreement, five miles of the line are to be equipped and in operation by July 1st next, and it will afterwards be extended to Ashburnham, Lakefield, Young's Point and Chemong.

Mercantile Summary.

BY-LAWS were carried in Parry Sound, Ont., on the 3rd inst., in favor of voting $10,000 for improvements to the water-works, and $3,000 to aid in building a steel bridge.

THE town authorities of Roseau, the capital of the island of Dominica, B. W. I., are taking steps to put in a fire-fighting equipment, there being none at the present time.

A BY-LAW to raise $50,000 for the purchase of a suburban park, was carried by the ratepayers of Winnipeg; but one to provide $60,000 for improvements to the General Hospital did not receive a sufficient percentage of the whole vote.

MESSRS. Reginald C. Brown & Co., Toronto, who a few days ago removed into more convenient premises at No. 38 Toronto street, will in addition to handling English securities, have a New York Stock Exchange connection. They will also deal in high-class Canadian industrial enterprises.

WE receive from Montreal some recent statistics about that interesting and distinctively British suburb of that city, Westmount. According to the municipal census returns of Westmount the population is now 9,470. The number of dwellings occupied are 1,931; dwellings vacant, 77; dwellings being built, 30. There are ten churches. The heads of families are of the following nationalities: British Canadians, 695, French Canadians, 99; English, 500; Scottish, 236; Irish, 99; French, 11; Americans, Germans and others make the total number of heads of families 1,759.

IT is made known by Mr. Frank G. Walsh, superintendent of the Bell Telephone Company's western lines, that Mr. John R. Richardson, for many years Mr. Walsh's "right hand man" in the telephonic world of Winnipeg, had been promoted to the position of manager of the Winnipeg office, taking effect on 1st inst. Mr. Richardson has been with the Bell telephone people almost continuously since their opening of business there, and has earned his promotion. Mr. H. E. Brockwell, who has been with the company for many years, becomes superintendent of service in Winnipeg, and Mr. C. D. Hancock, superintendent of construction, all under General Superintendent Walsh.

THE UNITED STATES WOOL SITUATION.

Domestic wool is steady and quite firm, notwithstanding a temporary stock market panic. Wool has been hardening in price even under these conditions, as the following diagram will show, and at a time when values for similar wool abroad had begun to fall. This wonderful strength of our seaboard markets was shown at a time when a stringent money market prevailed, which induced caution on the part of many, and forced the withdrawal from market of some who were dependent upon bank accommo-

dations. In view of the enormous shrinkage in values of stocks, bonds and some kinds of merchandise, Marshall Field, of Chicago, may claim to have established a reputation for foresight, when some weeks ago he declared that "as the crest of the wave of prosperity that began in 1896 has been reached and passed, his store would restrict its purchases." Yet, taking all in all, we fail to see any evidence that general business has passed the high tide of activity, while there are many evidences that the tide of general prosperity has reached a higher level than ever before, and continues to expand. There is certainly no evidence that business activity is on the down grade. Railroad earnings during the past month eclipsed all previous records, and they are an unfailing barometer of the extent of business.

The immediate and greatest obstacle the wool trade has to contend with is the lack of demand for textiles. The American Woolen Company at their initial opening recognized this when they offered their new goods at last year's prices, although fine wool is now 4 per cent. dearer and coarse grades 14 per cent dearer than at this time last year.

TORONTO STOCK TRANSACTIONS

Stocks have been easier this week in sympathy with the weakness in New York. Two more failures of stock-broking houses in that city made matters worse, and brought about a new low record for some properties. Dominion Coal made a break here on the rumor that the dividend would be reduced from 8 to 6 per cent., and Dominion Iron showed considerable weakness owing to reports of its forthcoming separation from the Coal Company. The volume of business all told has been small, partly owing to small business passing and partly to the holiday season. Details on the week are as follows: Bank of Ontario, 30 at 128-9; Toronto, 2 at 233½; Commerce, 4 at 158½; Imperial, 52 at 229-230; Dominion, 1 at 232½; Hamilton, 11 at 221-2; Brit. Am. Ass., 5 at 90; West. Ass., 50 at 90; Consumers' Gas, 20 at 208; Can. N. W. Land,, 225 at 96½; C.P.R., 935 at 120¾-122¾; Toronto Elect. Light, 17 at 133½-4; Can. Gen. Elect., 16 at 150; Bell Telephone, 3 at 158; Rich. & Ont. Nav., 135 at 87-91; Tor. Rail., 80 at 99-100; Twin City, 640 at 90½-95; Can. Perm.. Loan, 155 at 120; Sao Paulo, 10 at 86¾; Northern Nav., 10 at 130½; Dominion Coal, 1,015 at 83½-90; Dom. Steel, 195 at 10-11; Preferred, 15 at 35-38; Lake Superior, 25 at 3; and Nova Scotia Steel, 50 at 86½.

UNITED STATES BUSINESS MORALITY.

Mr. James Weir, of the widely known engineering firm of G. & J. Weir, Cathcart, near Glasgow, Scotland, and who is making a tour of this Continent, has the courage to call in question the basis for American braggadocio regarding the manner in which that nation is "getting the world's trade." As to American competition in Britain, says Mr. Weir, it does not amount to a "row of pins." His own firm are leaders in pumping machinery, and what is known as auxiliary machinery for ships and other large plants. They beat American firms in all parts of the world. In many cases American machinery is being thrown out as old iron, and being replaced by British-made machinery. His firm had a few years ago obliged a well-known American firm with plans and drawings of certain machinery. The firm made designs from these plans, then came to Britain and tried to palm the work off as American, but it was such a barefaced steal that it defeated its promoters. His firm is now engaged on work for yachts of American gentlemen, who frankly admit that they prefer to pay the 45 per cent. duty levied on British machinery, which for the purposes required is superior to American. Many similar orders for the very best machinery were placed in Britain. Referring to the St. Louis Fair, Mr. Weir said scarcely a solitary British manufacturer of repute would exhibit, because the designs would be stolen by American firms. There will only be some general exhibits from Europe, but all manufacturers in France, Germany, and Britain would positively refuse to exhibit.

RELAXATION.

"My employment," said a Detroit business man, "is very trying to my nerves, and after a day in the office I am compelled to resort to something of a different nature for relaxation. In summer I exercise with the lawn-mower or the hoe, in winter with the snow-shovel or some other seasonable implement. The result is sufficient calmness of nerves to enable me to sleep.

"I know a man who does exactly the reverse. After a day's work he rushes home, shuts himself in his room for an hour and sleeps or reads a cheap novel. Then he appears in the bosom of his family without a trace of nervous irritation. Such a course would drive me to drink. He says my plan would send him to his tomb. The moral is that every man must fit his relaxations to his peculiarities."—Detroit Evening News.

—Mrs. Ogden Goelet, of New York, though a very wealthy woman, is much averse to extravagance and positively shudders at anything that savors of ostentation. Not long ago she gently reproved a rich young girl friend on account of an expenditure that was both silly and huge. The girl answered airily: "Yes, I suppose it is extravagant, but then I can well afford it." Quoth Mrs. Goelet: "Reasoning by analogy, would I be justified in supposing that you would excuse your cook for oversalting your omelet because salt is cheap?"

Sealed tenders will be received for the purchase of The Paisley Pork Packing Company Limited's premises and plant, situate in Paisley, by Hector Cowan, assignee of Company, up to and inclusive of 31ST AUGUST, 1903. Premises and plant are up to date, and neighboring country a first-class hog producer. Lowest or any tender not necessarily accepted.

For particulars apply to

HECTOR COWAN, Assignee,
Paisley.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their circular, dated Aug. 1st, 1903, say:

The crisis in Wall Street appears to have reached its climax, and from now on improvement may be reasonably expected, accompanied, of course, by the usual set-backs incidental to convalescence. Experts seem to agree in diagnosing the ailment which has attacked the stock market with such severity as financial gastritis—the inevitable result of an ill-advised attempt to swallow an immense quantity of indigestible securities. Singularly, the attack has been most severe upon those who took part in this sumptuous meal; but fortunately, owing to vigorous constitutions and heroic applications of the hydropathic or liquidation treatment, the disease did not become sufficiently acute to develop symptoms of hysteria or panic. The unhappy patients have suffered severely by their underwriting commitments; nevertheless a valuable lesson has been learned, and the experience should have its value to observers and all interested. The most satisfactory feature of the last few days has been the easier rates for time money This demonstrates reviving confidence on the part of bankers who are obliged to anticipate the future. While the high figure at which loans continue to stand in the weekly bank statement is a matter of concern to some observers, who have been anticipating a sharp contraction as the result of recent liquidation, bankers do not show any anxiety in this respect, probably because they now have their resources unusually well in hand and profitably employed. There are three factors accounting for this high level of loans which are sometimes overlooked, viz., the large increase of banking capital in New York, the large amount of railroad paper outstanding and the increased extent to which big industrial establishments under the trust system now borrow in New York instead of near the mills, as formerly. A good bank statement is anticipated this week, partly on account of payment of the Pennsylvania loans and partly because Treasury disbursements have been exceeding receipts for some time past. Stock market liquidation must also have strengthened the banks much more than has yet appeared in the weekly statements. Besides these factors gold is now on the way here from Australia, and in the present condition of the European money markets any emergency here would quickly start gold imports to this centre. The local money market, therefore, is in much improved condition. Very soon crop demands will assert themselves; but the banks are well prepared for these and the present outlook is that no special inconvenience will be caused thereby. Hereafter the tendency of prices ought to be conservatively upwards for really good stocks. More reactions are to be expected because of further liquidation on the part of concerns that were recently tided over. But sales of this character cannot be very large after such a thorough house-cleaning as we have just passed through.

THE GRAND TRUNK PACIFIC PROJECT..

A Transcontinental Railway wholly through Canadian territory, connecting with Atlantic ocean vessels at Quebec in summer and at St. John or Halifax in winter, is a proposition which the average Canadian hears with approval. The proposed location of the Grand Trunk Pacific, north of Lake Nepigon and near Lake Abittibi, will develop valuable portions of Ontario and Quebec, while its route from Quebec to Maritime Province ports is a considerable saving of distance as compared with the Intercolonial. The country will shortly require, in fact already requires, greater railway facilities for grain-carrying eastward, for our far west prairie country is filling up fast. And the rate at which settlers are going into the more northerly parts of Quebec, and to the Temiskaming Railway route of Ontario, promises well for the exploitation of both these provinces. Extension to the Pacific is not a matter of such immediate moment, however valuable the route may be in the future both for the development and service of the Peace River country and for Oriental trade. Besides, that part is the particular concern of the Grand Trunk Pacific Company, for the Government proposes to build only the portion from Winnipeg to salt water.

The Premier's exposition of the Grand Trunk Pacific bill in the House last week was eloquent and stimulating in its insistence upon the value of the project to the great future of the country, the richness of the territory which it would open up. But at the same time it was not satisfying to the business mind which concerns itself with ways and means, terms, and immediate return. We cannot but think that the difficulties of the design were understated by Sir Wilfrid, and its financial aspect made to appear much too easy. What he said as to the need for an all-Canadian rail route between the two oceans, to realize Canada's independence of the United States, will find an echo in many minds. Doubtless his experience at Washington with the huxtering politicians of that capital and their refusal to treat this country fairly, has cured him of his former complaisance towards the Americans, and confirmed his resolve that we shall be independent of them.

As a grain-carrying route from Manitoba and the Territories to the Atlantic, however, and as a means to relieve the pressure felt after successive harvests to get the wheat forward, the proposed route cannot fulfill what its advocates claim for it. The all-rail haul is too long. Eighteen hundred miles to the Nova Scotia or New Brunswick coast is too great a distance over which to haul wheat from Winnipeg at a profit. And only during five winter months, when the route by the lakes is closed, could the road be utilized for the supply of the millers of Eastern Canada. Spur lines would have to connect the main line with the Lakes and the River St. Lawrence to secure partial water carriage.

Those who condemn absolutely the present Governmental scheme for a trans-continental railway make much of the sterile country it will pass through, and the many rivers it must cross in Northern Ontario and Western Quebec. But they cannot deny that the route is vastly better and of more future promise than the hundreds of miles of barren rocky waste traversed by the Canadian Pacific Railway from Nipissing to Nepigon. And as to the croakers who say that such a road can never pay, they may be reminded of the prophets of evil who declared, twenty years ago, that the C.P.R. could never earn enough to pay for the grease on its wheels. The fact is that once we have determined upon this work as a national necessity, we must be content to wait for years for direct profit, and satisfy ourselves with its indirect benefits as inducing settlement. Not for a decade or two hence may we look for its carrying cattle and grain and doing Oriental trade.

As to the question whether the Government of Canada should build, own, and operate the section of the road from Manitoba to the Atlantic, or lease it to a company to be operated under Governmental safeguards, at a yearly rental of three per cent., we are of opinion that the latter is the preferable method. The experience we have had of Governmental management of railways does not encourage the hope that it can be successfully applied in the present case. But the control of the road's traffic by means of commis-

sioners or otherwise is intended to prove a security to the public against excessive freight charges. The provision made for the settlement of possible disputes by arbitration is besides a desirable feature of the agreement.

It must be said that the terms are favorable for the Grand Trunk Pacific Company. They have indeed given rise to the saying, current on the streets: "The Government is about to build this road and make a present of it to the Grand Trunk." Such is not necessarily the intention—indeed a careful reading shows various stipulations whereby the country is protected. But while provisions are made in the agreement for recouping the country its outlay for interest on the bonds for the mountain section of the road, the adequacy of these provisions is open to question. "After seven years the company shall pay the interest," Sir Wilfrid says, "if the proceeds of the road are sufficient to earn three per cent." This means presumably that if the net earnings are sufficient, this interest is to be paid by the company. But how is it to be decided when the company's "earnings are sufficient." Who is to decide upon that which can be afforded and cannot? and what is the method of book-keeping to be? Of course it is to be expected that a company undertaking to put a railway through a practically unsettled and largely untried country looks to get the most favorable terms possible to compensate it for the risk. If in the near future the road when built, by the development and settlement of our northern territory and by the creation of trans-continental foreign trade, justifies the sanguine predictions of its sponsors, the Canadian ratepayers of 1920 will need to make no fuss about its cost. At the same time, it is the duty of the people's representatives in Parliament to see that the country is not placed at a needless financial disadvantage by too great bounties or concessions.

It was to be expected that a trunk line of railway which leaves the two principal cities of the country out of its route would not want for severe criticism from residents of the cities thus passed by. But we cannot see adequate reason for the bitterness shown in the Maritime Provinces over the proposal to construct a short Canadian rail route from the Maine north boundary to tide water. The thing has been repeatedly proposed before, and the territory to be served warrants it. Why pretend that it will "parallel" the Intercolonial, and ruin it? Whole counties of New Brunswick separate the two roads. The Intercolonial, valuable as it is as a local road, will not bear comparison with the short line as a carrier from the Lakes to the sea, even if extended westward.

CROP PROSPECTS.

In British Columbia, the spring wheat promises well, a yield of 35 bushels to the acre being estimated. Oats and barley also look well. The hay crop will be heavy, and pastures are good. In Manitoba, according to our telegram of yesterday noon, the weather for the past week has been cool with plenty of rain, just the kind of weather needed to head out grain nicely. Barley cutting is now general, and promises to be good quality with an average yield. With favorable weather wheat cutting will be in full swing in another week. The general opinion of grain men and others is that while the yield in the territories may equal that of last year, Manitoba's crop will be about eighty-five per cent. of last year.

So far as Ontario is concerned, the promise is very good. The severe drought of May and early June has been relieved by the periodical rains since, and while hay in many sections, especially in the east, is light, yet for other crops, except, perhaps mangels, and in some places, corn, the outlook may be said to be bright. Quebec was a worse sufferer from the drought than Ontario, and hay, that mainstay of the habitant, will, in many cases, be but half a crop. Other crops also, in that province, were too far gone, when the welcome rains came, to be turned into really good ones. The yield of cereals may perhaps be described as two-thirds to three-quarters of an average good crop; peas and corn, about two-thirds; roots, barely two-thirds; tobacco, little more than half; while potatoes look very fair, having received but slight injury. In the Maritime Provinces, the drought of early summer was also felt; but as the season there is rather later, crops had time to recuperate when the rains came. Hay, however, is light. The Nova Scotia fruit crop promises to be fairly good. In Prince Edward Island, the indications are for fair average crops, though pasturage is poor.

THE ONTARIO TOBACCO CROP.

Our attention was last week directed to contradictory articles on the subject of the tobacco crop in the Ontario counties of Essex and Kent, in two Montreal journals, Le Moniteur de Commerce, for example, writing on the 17th July stated that "the rumor of the tobacco crop of Ontario being short is absurd * * On the contrary, it has the best possible appearance * * * In the counties of Kent and Essex there are about 5,000 acres devoted to tobacco culture. If the temperature continues favorable the yield will be 1,200 pounds per acre, or a total of 6,000,000 pounds." This view was pronounced, by Le Prix Courant of July 24th, to misrepresent totally the real state of the case. According to the latter journal, whose information was derived from persons on the spot, "there is not a thousand acres planted to tobacco in the two counties of Kent and Essex; the plants have failed by reason of deluges of rain, which lasted all the spring. The growers have for the most part been unable to plant, and have sowed beet roots to replace the tobacco. The harvest looks miserably, and will be the smallest for six years; there will certainly not be harvested more than 1,000,000 pounds of tobacco in the two counties."

In order to ascertain the true state of the case, and knowing that heavy spring rains had prevailed in Essex, we made enquiry of various persons in both counties. The replies to our enquiries, as given below, are reassuring, and our information is that the report of 1,000 acres of tobacco this year is a gross underestimate. Messrs. Walker Sons, of Walkerville, themselves tobacco-growers, write on August 5th:—

We have no hesitation in stating that the account contained in the article of the 17th July, in Le Moniteur de Commerce is the more nearly correct one. We have no knowledge of Kent, but assume that the conditions cannot be very different from those prevailing in Essex. As regards our own tobacco crop, the prospects are most favorable, the weather during the planting out season was most favorable, and we never saw the crop give better promise. With continued good conditions, we have every reason to expect 2,000 pounds to the acre. As to other parts of the county we have not the same exact knowledge, but our manager returned yesterday from a short tour of inspection and reported "acreage larger than last year, quantity probably about the same, quality will be better, if weather conditions continue favorable." We are unable to tell you, however, what the acreage was last year, or what it is this, or what the yield per acre will probably be. The variety we grow in North Essex is a coarse, heavy plant, yielding a heavier crop than the finer varieties grown in the south of the county. If more detailed information would be of service to you, we may be able to furnish it a little later on."

Messrs. Falls Brothers, of Amherstburg, replying on 4th August to our enquiry, say:—

"Replying to yours of to-day, re tobacco crop, in conversation with one of the growers near here, he informed us that his crop and his neighbor's never looked better, and that he had only seen one lot which was not doing as well as his. This particular field had been damaged to some extent by heavy rain, but he believed it would come along and be as good as his. Since receiving your telegram, I interviewed Mr. Auld, the member for the riding, and he said that the crop was coming along all right and he believed that there would be just as much tobacco as ever to sell in Essex County. This favorable view may be somewhat exaggerated, but I do not think that in the vicinity of Kingsville and Leamington, in this county, the crop will be any lighter than heretofore."

A correspondent in Chatham whom we had asked about the state and extent of the crop in Kent County replies that it is impossible to get satisfactory information about the actual conditions for some days yet. But what we have learned from a prominent buyer of leaf negatives the story told to Le Prix Courant, about the total area in tobacco being less than a thousand acres.

THE DRY GOODS TRADE.

As is usual, July and August are proving themselves to be the busiest months for the shipment of fall goods, and the wholesale houses report that they are even busier than last year, though that had held the record, so far. The volume of trade just now, however, is subject to some diminution on account of the holidays; so many people interested in the trade, both among travellers and among retailers, being in the country or away from their usual business. From what we can gather, retailers will do wisely to place their fall orders early for most lines of staple goods, for the reason that prices for repeats are likely to be higher, more especially for cottons. The price of raw cotton has dropped considerably during the last two weeks, but this can hardly make much difference in the values of cotton goods for some time to come, as the latter were made from high-priced staple, and indeed are even now considerably below a parity with the raw material. The only thing to give a strong direction to the price of raw cotton will be the appearance of the new crop. A good many people believe to-day that there is more of the raw material in the market than dealers as a rule will admit; while others believe the advances are due to a real scarcity. So far as we can judge, we would say that while speculation has no doubt had considerable influence in the rise of prices, yet the truth will probably be found to lie between the above alternative.

One thing should be borne in mind when discussing this point, namely, that this fibre is being put to many more uses now in the manufacture of textiles than in the past. In the United States, for example, and elsewhere for that matter, it is used very largely in making what are deceptively called woolen goods. Machinery has now become so perfect for the purpose of manipulating cotton in conjunction with wool that the admixture can hardly be detected by any but experts. The same is the case with silk; now, cotton can be mixed with it in such a way as almost to defy detection.

The linen market is exceedingly firm, and the advances therein may be said to be more healthy, or at any rate less speculative, than is the case with cotton. But this is to be expected, as the greater portion of linen textiles is manufactured in Great Britain, or Europe, where speculation does not cut so large a figure as it does in America.

One pleasing feature which we have had occasion before to remark upon, is the growing popularity of Canadian-made dress goods. These stuffs, while usually of a very quiet, unpretending nature, are found to wear well and look well. Zibelines in small flakes have been especially asked for, while light-colored homespuns also are favorites. Some dealers have almost confined themselves to such lines of articles, and we believe they have met with encouraging results.

HEALTH MEASURES.

An effort in the direction of public safety from a dreadful disease has been made in the organization of the St. Francis League for the prevention of tuberculosis. This was done at a meeting in Sherbrooke, Quebec, on Friday last. A good number of medical men and a gratifying representation of citizens of the Eastern Townships were present. The meeting appointed Dr. J. O. Camirand president of the League, and Mayor Farwell, Mr. Justice Lemieux, Dr. T. L. Brown, Messrs. L. E. Panneton, K.C.; J. S. Mitchell and W. S. Dresser, vice-presidents. The executive is composed of seven Sherbrooke doctors, and one from each town in the district.

The object of the society is to prevent the spread of the disease of tuberculosis, commonly known as consumption, by distributing literature regarding the means to be adopted for its prevention; by assisting needy consumptives; by securing legislation such as will tend to limit the spread of the disease. A committee of medical men was appointed to draw up suggestions to aid the various committees in the work. This journal has repeatedly urged the need of restrictive measures to repress this dire disease. There are various ways of combating it. People must be taught that the spitting of consumptives is a source of danger. Thousands of spores may be set free to fill the air with poisonous germs from the sputa of a

single consumptive spitting in a street car. And the modern methods of isolation of patients and their outdoor treatment should be taught to those who do not know that this disease can be combated successfully.

The health measures taken by the authorities of the Province of Ontario have been of such effect that this Province has a right to claim that its mortality per thousand from contagious diseases of 0.43 was lower than in any other country in the list, including Great Britain, in which Scotland was lowest, with a mortality of 0.47 per 1,000. In New Jersey the rate per thousand population of deaths from smallpox, diphtheria and scarlet fever was 0.72; whereas in Illinois and Massachusetts it was 0.80. The chairman of the provincial board of health, Dr. H. E. Vaux, says that the increasing adoption of regular systems of sewerage and waterworks by many towns, notably Stratford, Listowel, Woodstock, and Southampton, has had much to do with the reduced number of cases of typhoid fever.

TO FETTER STOCK-BROKERS.

Like many so-called temperance advocates and other people who cling to the belief that every evil can be cured by legislative enactment, Mr. Bourassa in his parliamentary attack on stock-brokers the other day showed himself fond of somewhat intemperate language. It is easy to agree with him in his statement that speculation sometimes leads to crime, though many other things, under given circumstances, do that also, when allied with weak minds. For example, the anxiety to get something to eat when hungry, a very proper desire, occasionally leads to stealing. Even religion may conduce to crime. Most depends upon the man and upon the circumstances moulding him. It may be admitted, too, that the excessive tying up for speculative purposes of money which ought to be in constant use in the productive industries of the country is an evil which ought to be discouraged; also the entry of loan companies into the hazardous trafficking of violently fluctuating railroad and industrial stocks with the money which their clients believe is safely invested in real estate. But we do not think, taking the stock-brokers as a whole, that they constitute quite such a "low-down" profession as Mr. Bourassa and some other gentlemen would have his hearers imagine. It is perhaps not going too far to say of some of them, that in capacity, straight dealing and honesty of purpose, they rank with the most noted professors in other branches of financing. One trouble springs from the fact that the public is given to the habit of cuffing the dealer in gold bricks only when his offer of quick riches turns out a snare and a delusion; in too many cases, success would have disarmed criticism; at any rate there would have been no public complaint. Without calling in question for an instant the opinion that loan companies should not have the power to gamble in stocks, as St. Thomas institutions did to their cost, we cannot help reflecting upon one phase of the matter as it affected the St. Thomas investors. If everything had gone well, if stocks had continued to rise in value, if there had been no Ames failure, and no subsequent failure in St. Thomas, if the investors there had received the big interest they were looking for, should we have heard their great outcry against stock speculation? Nay, verily; the managers would have been clever men, and the public would have been glad to pocket the pleasing results of their genius. As it was, however, the plans of these "great financiers" went awry; and thenceforward nothing was bad enough for them. "If successful, the principles upon which you make money are good enough for us," we can imagine hearing the pleased shareholders quietly saying—"But if you fail—woe betide you and your dishonest methods." And so with the great mass of stock-brokers' clients. They are ready enough to pocket the results of a successful coup, but hate to bear the consequences of a miscalculation, and then cry out against their advisers as being lacking in honesty and good business principles.

Doubtlessly, Mr. Bourassa's efforts will be viewed with a good deal of sympathy, but this, we apprehend, will be more on account of his aims than of his methods. Perhaps his idea of licensing brokers may prove to have something in it, and perhaps the increasing of margins to 25 per cent. would do something to keep out of the arena the people who cannot afford to speculate, which probably is all that can be legitimately hoped. But this is just where the shoe pinches. On what system can the supervision of margins be carried out? And will the weekly (or would they have to be daily?) reports of brokers to the Government keep out the man who cannot afford to gamble, when that is just the kind of entertainment that his whole soul craves? Such a system might indeed help him in one way: He would be able to make a nearer guess as to the amount he is likely to lose. For at present, stock speculation on margin is only inferior to horse-racing, as a means of betting against chance, in that in the latter the victim does at least know how much he is booked to leave on the ground, whereas stocks have a contempt for such mild privileges.

It appears to us, however, that beyond a few safeguards calculated to prevent gambling with the money of other people unknown to them, little can be done by Parliament to check speculation, which seems to be inherent in human nature. Probably the only remedy lies in a continued campaign of education of young men and others, including clergymen and widows, as to its worse than uncertain nature. Let them realize that a successful issue to their venture is not merely a matter of toss-up, but that the chances are a hundred to one against it, and they may at length see its folly, though, as Mr. Tarte remarked in the debate on the subject, it is hard for a young man to desist when he sees the example set by many older men, and by those in high places. At any rate, he may eventually be led to see that the risking of any sum in excess of what he can quite easily afford to lose, for the mere pleasure of the game, is equivalent to throwing it in the river or the lake. Perhaps he will continue to speculate on this basis—for the fun of the thing, as one may say. But in this case he will have come to realize the nature of the thing he is doing, through and through; and then, we suppose, speculation as an incentive to crime will have lost its power, which Mr. Bourassa would perhaps say was his main purpose in raising the discussion.

Bourassa would perhaps say was his main purpose in

FRATERNAL INSURANCE DISCUSSED.

It appears to be dawning upon the minds of managers of fraternal societies in the United States that the rates of premium, or whatever the members' contributions are called, for the furnishing of mortuary or sick benefits, will have to be increased. Following the Pennsylvania bill, which was defeated, a bill has been introduced on the other side of the line, known as the Fletcher bill, prepared by a committee of the State Insurance Commissioners, of which Hon. Geo. W. Fletcher, of Maine, was chairman, which threatens the status, not to say existence, of some of the fraternal societies. This bill provides that fraternal insurance societies shall create a reserve fund on the same principles as those used by the old line life assurance companies. In order to establish this fund it will be necessary to increase the rates charged to members.

Delegates from twenty or thirty fraternal organizations of the United States held a convention in Montreal during several days of this week, under the name of the Associated Fraternities of America, to discuss this bill among other matters. They had been invited to meet in Montreal, by the Societé des Artisans Canadiens Francais. It was expected that Mr. Fletcher would himself be present on the occasion to explain his bill fully, but he did not come. The body in question, the Associated Fraternities, that is, was organized, we are told, about three years ago with the idea of combating the National Fraternal Congress, which is to meet in Milwaukee next week. There must be two Richmonds in the field, then.

The opinion was frankly expressed by several of the delegates that with advanced rates the volume of business secured by the fraternal organizations must decrease and produce a consequent reduction of revenue. Others, more sanguine, hold to the idea that even with the advance, the fraternities will have a rate between 20 and 30 per cent. lower than the cheapest insurance which old-line companies can offer. Most of the fraternal representatives assembled in Montreal cling to the latter opinion, and indeed statistics were quoted at the meeting to show that the fraternal system was growing at a most rapid rate in the States. A uniform bill for the recognition of fraternal orders was submitted and discussed. The president's address advised the appointment of a committee to attend the meeting of the insurance commissioners, to present the Associated Fraternities' bill and views, and try and have them incorporated in the commissioners' bill. He also urged that, if this failed, they should oppose the bill in each state. Some people are hard to convince, and it would appear that the majority of this convention is of that class. "Be warned by experience," say the insurance commissioners, and the old-line companies. "No, we won't," answer the believers in fraternal insurance at present rates, "we want to buy experience of our own."

—The Commercial Agent for Canada at Birmingham, Mr. Ball, reports that he is kept very busy by enquiries about Canada and Canadian trade from firms throughout the Midlands and from individuals. He addressed the Chamber of Commerce at Chesterfield, a manufacturing town near Sheffield, on the 17th July, and was well received.

JURISDICTIONAL DISPUTES IN THE LABOR WORLD.

When trades unions are at loggerheads with contractors things in the labor world are bad enough; but when unions or parts of unions come to loggerheads with one another, it is just as certain to delay work. The secretary of the Chicago Building Contractors' Council, Mr. E. M. Craig, describes the effects of jurisdictional disputes and agreements, in last Saturday's issue of "Domestic Engineering." The body of which he is secretary has had remarkable success in getting a settlement made under which the building trades of Chicago have enjoyed nearly three years of amicable and satisfactory relations with one another. But of late trouble has begun over what part of certain construction work should be done by one trade, and what part by another. Here is a specimen or two:

In the past two years there have been disputes as to whom a certain class of work belonged to, between gasfitters and the electricians over electric wire conduit work; between the plumbers and the steamfitters over certain pipe work; between the ornamental iron men and the elevator men over certain iron work for elevators; between the sprinkler men and the steamfitters over fire sprinkler systems; between the cement finishers and the laborers over cement and concrete work; between the plumbers and the marble men over the setting of marble fixtures, and between the carpenters and the laborers over the building of scaffolds, centres and concrete boxes. A truce was declared some months ago between the gasfitters and electricians, whereby the gasfitter is now permitted to do conduit work, he being temporarily while doing this work a member of the Electrical Workers Union. The steamfitters and the plumbers in Chicago had a trade agreement prior to 1900, but it was broken in that year, and since then frequent differences have arisen. After long negotiations, a truce has been reached, to last for two years, and under it this pipe difficulty between the two trades is smoothed over.

But the carpenters and the laborers have now a dispute, the carpenter is asserting his claim that any wood work requiring a hatchet and saw in its erection is carpenters' work. This claim conceded would prevent the mason contractor from having his laborers erect the scaffold for his bricklayers, and make cement boxes for concrete foundations and the centres for arches in buildings, all of which from time immemorial has been done by the laborers.

The employees are drawing lines a little too tight. Take for instance the condition of affairs in elevator or "lift" construction: "The elevator man is properly a millwright, but he will soon have no trade at all, if the unions persist in their demands. The carpenter will get all the wood work, the steamfitter all the pipe work, the ironsetter all the iron work, and the sheet metal worker all the metal work, in which event this one trade will be legislated out of existence, not by the employers but by the employees. The only interest the average employer can have in these trade disputes is to get them settled to the end that the progress of a building shall not be interrupted. No employer and no employee has a right to restrict any line of work to any one individual or body of men."

An illustration of the narrowness and selfishness

of unionists in such disputes was given us the other day by a Canadian manufacturer. "The electrical workers made a kick some three or four months ago because plumbers were engaged to lay or to hang conduits for electrical wiring in houses. The fact was that the electrical workers concerned did not understand laying the conduits, did not know how to handle the proper tools for the purpose, and in their ignorance broke many tools." A little give-and-take between such dog-in-the-manger workmen would save much trouble.

A CLOAK COMPANY FAILS.

A Montreal failure which is exciting more unfavorable comment than any for a good while past, is that of the Imperial Cloak Co., whose affairs are now in the hands of their creditors. A statement prepared by an expert accountant shows the concern to have obligations of $78,046, and the deficiency of assets reaches some $48,000. The business was started four years ago, with Ike Haltman and Jacob Cohen as the registered proprietors, the former of somewhat uncertain antecedents, and the latter a practical costume maker, formerly employed by the S. Carsley Co. They turned out a good line of goods from the factory, and though they started on small capital, their output steadily increased, and they found customers among some of the largest wholesale merchants in the dry goods line. Reports as to their unmethodical business ways and the low prices at which they sold goods were current from time to time, but they succeeded in getting fair lines of credit from a number of leading mill agents and woolen wholesale men. Indeed they are reported to have some fifty to sixty creditors. It would now appear as if Haltman had been preparing for a coup for some time past, because when some of the leading creditors, becoming uneasy, took steps to put an accountant into the office of the cloak company last week, Mr. H. disappeared, and it is surmised he must have taken a substantial amount away with him.

OUR AUSTRALIAN LETTER.

The returns of the trade of New South Wales for 1901 and 1902, if compared, will give some idea of the effect of the drought upon the trade of this country. Its effects were not apparent until the end of 1902. The harvest of 1901-2 was a good one, and hence helped the trade of 1902. The trade inward and outward was as follows:

	1901.	1902.
Imports,	£26,928,218	£25,974,210
Exports,	27,351,124	23,544,051

Imports exceeded the exports last year—not a common thing for this State. The chief increases of imports are in foodstuffs, which were in the respective years

	1901.	1902.
Value	£1,102,081	£3,648,038

The largest increase in this line was in food not for man but for beasts, the fodder bill having gone up from £94,810 in 1901 to £1,509,788 last year.

There were decreases in exports in all the leading items of produce, as the following shows:

	1901.	1902.
Butter and Cheese .....£	455,451	£ 131,090
Grain and Flour	1,088,225	810,852
Meats	900,601	581,007
Wool	9,035,437	7,306,810

The export of flour and wheat was mainly in the early part of the year, from the harvest of 1901-2. As compared with 1900 the figures show even worse results, the imports being £954,008, and the exports £3,807,703. As the imports of foodstuffs increased by two and a half millions, the decrease of other merchandise was over three and a half million pounds. The trade this year will show still worse results, though the high price of wool will help out the exports greatly. Experts still hold that the Australian export of wool will be 300,000 bales below that of last year. At ordinary prices this would mean a loss of three million pounds sterling, but the increase in price will make the net loss not a third of this figure.

It is not surprising in view of these statistics that trade is very dull and is not much more than marking time with the best houses. There is, however, hope. The rains continue to be good over most of the Continent, there is plenty of grass, and the crops never looked better. Australians are, therefore, busy "counting their chickens," though it will be some months before a head can be seen, and that in this uncertain climate means much.

There are exceptions. At Broken Hill, the centre of the great silver-lead mines of Australia, the water has given out and most of the mines have had to shut down for want of water for their boilers. Five thousand men are thus thrown out of employment. The Government is bringing in water by train from South Australia for domestic purposes. There are prospects of a shower in a day or two, it is reported. The rainfall is curiously restricted. Up the Coast there was nearly twelve inches during June, while Sydney has had about half the average, and the southwest country not a drop. So you have a division among the prophets. While farmers are troubling their minds lest the railways will not be able to move the huge crops they anticipate, a large number of pastoralists fear that the drought is by no means broken. It is foolish to anticipate the evil; to-day the general prospects are good.

Stories from the Pacific slope of the United States told us of a great steamship line of cargo steamers of mammoth size that were to trade between the American port of Seattle and New Zealand and Australia. The stories were credited to have the inventive genius of United States newspapers; but sure enough a little time ago Mr. Alley, the promoter of this magnificent scheme, turned up. Appreciation of the situation here led Mr. Alley to announce the new scheme as a great British line with headquarters at Vancouver. Mr. Alley seems to have one of these sanguine temperaments which launch great schemes without first considering the cost or the results. He went much quieter than he came, for he probably learned something about Australian trade and the difficulty of getting payable cargo for his mammoth ships, even could he get people willing to invest in such a line. Here he could not get a prospect of either. A cable states that since his return the scheme is again from Seattle and San Francisco, with Vancouver left out. Vancouver need not feel much hurt.

Prices are slowly tending downwards in foodstuffs, and it is expected they will quickly go lower. Holders of wheat and flour are holding out grimly, but if more wheat and flour is on order than the country needs, as the bear element contends, there must come a break soon and a bad one. Any further buying just now is out of the question. It is doubtful whether even Manitoba flour can face the heavy duty after November, when local flour may be down to six pounds per ton. Before the next dry time comes Canada may be in a much better position to do the trade than it was last season. It got very little profit out of what was done, and even less glory. There has been disappointment and trouble over three out of four shipments from Victoria and Vancouver, flour excepted, owing to failures to carry out the contract either in quantity, quality, time or terms of the agreement. Some United States firms are in a still worse position. Many of the British Columbia troubles were due to circumstances which the exporters could not control, but some United States exporters are credited with actions not quite honest, and have been penalized in damages by the courts in consequence.

Canadian trade is likewise marking time. "Sorry, but can't fill my home orders just now, and therefore can't spare goods for Australia for some time." Such is the tone of the letters received here. Goods are coming though, some direct and some not, as the following paragraph from Sydney News shows. It is in reply to a query of a correspondent: "What else do we get from Canada than cereals? His experience must be limited, if he is not aware that for ten years the steamers have had full cargoes from Canada, and that, too, during seasons when we had some of the best crops that Australia has produced. He may not be aware that a very large proportion of the goods carried by the steamers arriv-

ing from New York (foreign-owned boats some of them) is of Canadian manufacture, and also that the steamers of the White Star and North German Lloyd lines carry Canadian merchandise from Australia, via New York to Liverpool and Bremen, and transfer to their steamers at the respective ports." F. W.

Sydney, New South Wales, 1st July, 1903.

NEWFOUNDLAND HAPPENINGS.

The activity of Bell Island, off the coast of Newfoundland, is just now very great. A thousand men are employed there—550 on the works of the Nova Scotia Co., and 450 on the works of the Dominion Co. Since the season opened there has been an average of one steamer per day loaded there, and this record is likely to be kept up as long as the season continues open, and the weather fine. The steamers engaged in the work take between four and five thousand tons each. The facilities for loading are so perfect that the steamers take on board one thousand tons of ore per hour—the largest boat not occupying more than five hours in loading. It is expected that the total output of ore will be as large, if not larger, this year than last. From May the first to the first of the present month 250,000 tons of ore were shipped from Bell Island to Rotterdam, Pictou, and Glasgow.

A representative of Harmsworth Brothers, the extensive English publishers, was in New York last week on his way to Newfoundland. His errand is to look over the lumber and coal areas available in the western part of the Island, with a view to starting the manufacture of paper pulp there. "He ought to reach here," says the Trade Review, "by the end of the month, when he will make a thorough exploration of the available territory. Should the project materialize it will mean employment for thousands of men, for the Harmsworths do nothing on a small scale."

The whaler "Puma" operating at Chaleur the past eight weeks, has secured 82 fish, most of them large sulphur-bottoms, and is now about to return to Rosiru for the fall fishery. Manager Porter and P. Morrissey, who arrived here Saturday night from Chaleur, say that the whaling voyage this year will be a record one. One hundred men are now employed at Chaleur.

The St. John's Herald, of 27th January, announces the arrival from Balena of the steamship "Glencoe," with a large cargo of whale oil and fertilizers. At the time she left there was no bait along the coast to Burgeo, and seven American "bankers" were there waiting for squid and nine at Point aux Barques. "During the past week at Holyrood and Trepassey fish struck in in good quantity, and a great improvement in the voyage resulted. One of the Sutton's to date has trapped 550 qtls. at Trepassey, and hook-and-line men especially are doing well. On the south coast in mostly all the harbors the fishery has been good."

Respecting the codfish situation, the St. John's Trade Review said on the 25th ult.: "A month ago it looked as if the opening figure for codfish would be $4.20 per quintal for prime merchantable, but from the feeling of the market to-day, we think first quotations for prime new fish will be $4. We would not be surprised to see a slight advance later, but the largest handlers realize the mistake made last year by sending the price soaring in the early season, thus causing the natural reaction later."

As near as can be ascertained, the quantity of codfish held in the city, at this writing, is about 30,000 quintals, and this will pretty nearly go down to zero by the time the new fish has appeared in any appreciable quantity. We, therefore, start well, as far as local markets are concerned. The rush to market will not be as great as usual, because the season for fish arriving to the city in quantities will be much later this year, owing to backward weather.

The following summary is made from the reports of Government officers on the Island, and is furnished by Mr. Murphy, Minister of Marine and Fisheries: "From present outlook the North Atlantic cod fishery is going to be away behind this year. Unless the unexpected happens, the Newfoundland and Labrador shortage will amount to 200,000 quintals. The French fishery will be short 250,000 quintals, and, from what we can learn, Gloucester will be short 60,000, and Nova Scotia 100,000 quintals. All this ought to make for keener buying in the consuming markets, and paying prices for fishermen and merchants."

FINANCIAL MATTERS.

We learn that the "Parody on the Modern Bank Prospectus," copied by us on July 3rd from an American paper, which had credited it to the New York Evening World, was really the production of Dickerman's Counterfeit Detector.

The Decimal Association of London, England, established to promote the adoption of a decimal system of weights, measures and coinage in the United Kingdom, have forwarded a lengthy circular to Mr. Younge, secretary of the Canadian Manufacturers' Association, bearing on the matter.

About four months since, the Standard Loan Company, of Toronto, took over the business of the Aid Loan and Savings Company. Now the former company has taken over the Ontario Loan and Investment Company. By this transfer, the Standard Loan's assets are increased from $750,000 to $1,000,000, the total capital stock subscribed being $800,000, with $500,000 paid up. The negotiations for the change had been going on for some time, due to the fact that the management wished to have the deal carried through strictly in accordance with the provisions of the Loan Corporation Act, thus escaping some of the difficulties of an ordinary amalgamation. The result is that the Standard Loan Co. obtains a legal title to the assets of the Ontario Loan by direct purchase of the same at a fair valuation.

C. C. B., City.—The abstract we gave last week of certain features of the Report of the Institute of Bankers in Scotland must not be taken as attempting to touch upon all the features of the examinations of that body. A ninety page pamphlet filled with reports of committees, examination papers, rules, and a syllabus of examinations cannot possibly be boiled down into a single column of the Monetary Times. Nor had we any intention of exhibiting slightingly the labors of so important a body and their results. We could only seize upon a few of the salient features of what it meant to pass an examination before them, and we chose English Literature. There are plenty more subjects. For instance, associate candidates have to be examined in arithmetic, geography, algebra, book-keeping, exchange, clearing house work, negotiation of bills and cheques, the history and practice of banking. Candidates for membership are examined in political economy, stock exchange transactions, foreign exchange, principles of bankruptcy, and other legislation, conveyancing, branch supervision, and mercantile law, to say nothing of modern languages, general history and literature.

At a meeting of bankers in Clay Centre last week, says the Kansas City Journal, F. P. Blake, responding to the toast, "Securities," told of a pretty young widow who got into financial straits and borrowed from his bank $20 on the security of a fine Jersey cow. It nearly broke her heart, she said, to pledge the animal, which was almost as dear to her as her children. Then came a long period, in which she renewed the note time after time, sometimes paying interest and sometimes not, and always distressing the bank officers with her sorrowful talk. "One day," proceeds the story, "she showed up in a more sorrowful frame of mind than usual, and with more tears and wetter tears also, than usual, announced that she had given up the struggle. The cow was dead, and she was wearing her life out under the weight of a debt unsecured, and which she saw no prospect of ever being able to pay. She wanted it discharged. The cashier took to the woods, telling Blake that it was no use for the bank to monkey longer with that paper; to treat the woman as nicely as he could, making her burden as light as possible, dry up the fountain of tears, then go over to the Registrar of Deeds' office with her and have the mortgage released. All of which Blake did in his smoothest and most gentlemanly

way. Just as they were coming out of the court house curiosity got the better of him, and more as a space filler than anything else, he said: "Madam, now that this is all settled, when did your cow die, and how did it happen?" She had wiped her tears away by this time, and was radiant and smiling, a poem in contradictions. Turning to him, she said: "My dear boy, you tell that sweet cashier of yours that the butcher killed the cow two years ago."

In reply to an enquiry from Annapolis, N.S., about the Loan and Savings Company, Limited, of Montreal, we would say, it was chartered by the Quebec Government 23rd February, 1901, authorized capital $125,000, with power to issue $1,000,000 bonds. The prime mover appears to be A. Millette, an ingenious young man, who last year floated the Transit Insurance Company. He states that $125,000 was subscribed, and 10% paid in, in cash. The board consists of H. M. Bolger, of the R. & O. Navigation Company; T. Millette, I. L. Lafleur and Dr. Hudson.. Two years ago they had their $12,500 on deposit in a local bank, but that we are told has since been withdrawn. They profess to do a general loan and savings business, "on mutual principles," whatever that may mean, and to have on hand applications for some $40,000 of loans. What success such a concern can have remains to be seen. This is the concern which was refused registration in Ontario a week or two ago.

The Dominion Bank branch in Montreal this week moved into its commodious new quarters in the ground floor of the Guardian Assurance Building on St. James street.

Owing to the large number of gilt-edged investments at present before the British public, several of the leading London stock underwriting firms declare they will no longer handle colonial or corporation loans, until such time, at any rate, as the old issues shall have become fully absorbed.

UNITED STATES RECIPROCITY.

That there is at the present day a genuine growth of feeling in the United States in favor of a fair treatment of Canada is tolerably evident, among other signs, in the recent action of the National Furniture Association at its recent convention in New York. At one of its sessions, Mr. E. N. Foss, of Boston, reminded his audience that Canada was the largest purchaser of American manufactures in the world, and insisted their best customer should be treated justly. The demand for closer trade relations was based upon broad foundations, first among these being the need by American manufacturers of cheaper raw material. The following resolutions were the result of a prolonged discussion: Resolved, that the Furniture Association of America regards with approval the action of the United States Government in seeking to reconvene the Anglo-American Joint High Commission for the purpose, among others, of negotiating a reciprocity treaty with Canada. That it is the sense of this convention that reciprocal relations, beneficial to both countries, should preferably follow the general lines of the removal by both countries of the duties on some or all of the natural products of each, and such mutual extensions of the free list and reductions and changes of the duties on the manufactured products of both as will give to each as low a rate of duties as is given to any other country

INSURANCE ITEMS.

The Montreal municipal authorities have at last resolved that the city must have three new fire stations. Tenders for the three new stations—one at the Point, one in the centre of the city, and the other in St. Mary's Ward, have been ordered to be called for. Station No. 19, concerning the site of which there has been much controversy, it has been decided, shall be built on the corner of Fullum and Langlois streets.

A. R., Hamilton.—The following is the paragraph concerning Ottawa fire rates, as it appeared some days ago: "Ottawa, July 29th.—Following upon the decision of the Council to permit the resumption of lumber piling within the city limits, comes the announcement that the several fire insurance agents have been advised of an increase in the rates all round, including dwellings and business houses. The increase on dwellings, even in the best portions of the city, will be on the three-year rate $2.50 per $1,000."

A Chicago paper tells a story of an unhappy young wife, who, on finding that her husband had insured his life and not hers, saw in this a proof that he no longer loved her, because if he had she thought he would have insured her life instead of protecting his own. This may be called a feminine view of the business.

Says a writer in the Philadelphia News: The opinions of men who have attained to an eminent position in any business or profession through sheer hard work and persistency (the possession of fitness for their chosen vocation being taken for granted), in reference to what they regard as being the chief factors in their success, should carry great weight. As an illustration of this somewhat trite remark, we may quote a sentence from an address delivered by Geo. H. Gaston, vice-president of the Metropolitan Life. Said he: "I believe in a day's work every day, and that sustained industry is the force which accomplishes things and brings them to pass."

At the meeting held in Montreal, to welcome the Fraternal Society delegates, a speech was made by Senator Cloran, in which he cited some statistics the accuracy of which we feel disposed to question. For example, referring to the Societe des Artisans Canadiens Francais, at whose invitation the convention had met in that city, Senator Cloran said that in Quebec there were 160,000 members, with assets of $400,000, annual receipts of $261,000, and expenses of $199,000, showing the society to be in a flourishing state. Quebec province was strong in fraternal orders, as out of a population approximating 1,600,000, there were 200,000 members of fraternities. Last year the death benefits paid in the province amounted to $800,000, and sick benefits to $150,000. Mr. J. A. Mercier, insurance inspector for the province of Quebec, extended a welcome from the Provincial Government.

FOR DRY GOODS DEALERS.

Mr. Wm. Morton, of Belfast, Ireland, secretary of the Flax Manufacturers' Association, has again written the Ontario Department of Agriculture, asking as to the possibility of securing a supply of fine fibre for the Belfast factories. In Canada the flax is grown for seed only, and if fine fibre is to be shipped, the flax must be cut young.

An Englishman has perfected a process for manufacturing silk out of wood, by means of drawing the pulp through very fine tubes by hydraulic pressure. Samples seen in Stettin, Germany, where one of the proposed plants is to be erected, are said to be very soft and of a pleasing cream color. Each thread is made up of eighteen separate strands, each one of which is scarcely visible to the naked eye. It is said to take color easily, and to have, when woven, the appearance of real silk, but it is not so strong. The price of the fabric recently went up to nearly $7 per pound.

John Macdonald & Co., Toronto, are getting their stock in shape for the anticipated rush of customers during the coming Dominion Exhibition. They are showing special lines in every department, amongst which may be mentioned tapestry, Brussels and hemp carpets, men's neckwear and underwear, dress and ready-to-wear goods, ladies' walking and dress skirts. Their stock of Bellwarp worsteds and serges is large, and they call special attention to their Bellwarp worsted trouserings. Other popular numbers are in towellings, linen tablings, etc., both domestic and imported.

—Canadian imports keep up remarkably. The receipts from customs duties at our two chief ports of entry, Montreal and Toronto, during July of the present year, exceeded two millions of dollars. We copy the figures for that month of 1903 and of the previous year: Montreal, July 1903: $1,305,460; same month 1902: $989,185. Increase, $316,275. Toronto, July, 1903: $903,294; same month, 1902: $745,180. Increase, $158,114.

—The following officers for the ensuing year have been elected by the Institute of Chartered Accountants of Ontario, whose annual meeting was described in our issue of 24th July: George Edwards, president; W. T. Kernahan, first vice-president; W. B. Tindall, second vice-president; David Hoskins, secretary-treasurer; Wilton C. Eddis, chairman of board of examiners. The council has been already named. Together with the before-mentioned officers, G. O. Merson was re-elected assistant secretary, librarian and registrar.

The industrial side of the Nova Scotia Exhibition is being well looked after this year by the new Commissioner, Mr. W. J. Clayton, who reports that all the space in the Machinery Hall and the Main Building will be occupied largely by Nova Scotian manufacturers. Mr. Clayton believes that this will make a valuable object-lesson, showing that as a field for manufacturing this province is second to none in the Dominion. Undoubtedly in many lines, where nearness to the supply of raw material and cheap steam power are essentials, the Nova Scotian manufacturer has a marked advantage. One town, which has gone into manufacturing to a considerable degree, is Amherst. The effect of this upon the growth and prosperity of the town may be estimated from the fact that the customs duties collected there last year were nearly three times the amount collected in 1896.

—At a meeting of the Montreal Corn Exchange a week ago Mr. George A. Thomson in the chair, Mr. T. A. Crane nominated Mr. John Torrance as the Association's representative on the Harbor Board, and this was seconded by Mr. Robert Reford, who spoke of Mr. Torrance's valuable services. Mr. A. G. McBean nominated Mr. Alex. McFee. He had, he remarked, nothing to say in disparagement of Mr. Torrance, but he thought a little new blood would not do any harm. The result of a vote showed that Mr. McFee had obtained 35 votes, and Mr. Torrance 32. The former was therefore declared elected. Mr. Edgar Judge proposed the following vote of thanks to Mr. Torrance, and this was seconded by Mr. Joseph Ward, and heartily accorded: "Resolved that the Montreal Corn Exchange Association takes the opportunity afforded by the retirement of Mr. Torrance from office of Corn Exchange harbor commissioner, to accord to him its most sincere thanks for his able services in that position during the past nine years, and the Association also records its grateful appreciation of Mr. Torrance's independent and outspoken attitude on many occasions when such was greatly needed in the interests of the port."

—They tell us now that the two big industries of Sydney, the Dominion Coal Co. and the Dominion Steel Co., are about to be separated. Why were they ever put together? This is a question repeatedly asked, but to which we have not seen a satisfying answer. The Coal Company was an established and successful concern; the other was a project —its commercial success yet to be demonstrated. There has been more or less glamor thrown over the Sydney steel-making project from the very first, and we do not say it is all the fault of the management. But the newspapers and the sanguine public went into a glow of patriotic pride over what was to be an object lesson to the whole world, of Canada's resources and skill. And when the shrewd folk who were in the deal saw how enthusiastic the investing public were, they kindly permitted—not to say welcomed and coaxed—said public to invest. And the army of the stock market welcomed them too. The projectors, however, did not know all that there was to be known about steel-making. The early steps taken were faulty and expensive, and it will take time and money to put the thing right. It is to be wished that less stock-jobbing and more scientific and coherent management may characterize the future of this extensive enterprise.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, August 6, 1903, compared with those of the previous week.

Cities	August 6, 1903	July 30, 1903
Montreal	$19,449,841	$18,125,371
Toronto	12,961,870	12,758,823
Winnipeg	4,305,312	3,934,147
Halifax	1,958,965	1,544,715
Hamilton	1,063,977	872,601
St. John, N.B.	1,127,119	946,177
Vancouver	1,472,349	1,450,085
Victoria	645,364	642,431
Quebec	1,851,156	1,575,978
Ottawa	2,168,812	1,608,421
London	911,189	724,133
	$47,915,954	$44,182,882

A. H. HOOVER, PRESIDENT.
R. SHAW WOOD, 1ST VICE-PRESIDENT.
WILLIAM DINEEN, 2ND VICE-PRESIDENT.

ROBERT E. MENZIE, TREASURER.
ALEX. DAVIDSON, M.D., MED. DIRECTOR.
SIDNEY H. PIPE, ACTUARY.

THE Accumulation Policies issued by the Sovereign Life Assurance Company of Canada are absolutely free from conditions, and guarantee the most liberal Extended Insurance, Paid-up and Loan Values annually, after being two years in force. First-class contracts can be secured by reliable energetic men as Managers, District and Local Agents throughout the Dominion. Address with full particulars and references.

A. H. HOOVER, President and Managing Director.

PRODUCE OF CANADA EXPORTED

SHIPBUILDING IN THE UNITED STATES.

According to the Marine Review report on shipbuilding in the United States, not a single contract has been let for a vessel for the foreign trade of the United States during the past two years. This is certainly a remarkable condition in a country with such an extensive foreign trade, and The Review considers that Government aid is required as much to encourage shipbuilding as the tariff is required to assist the development of other industries. Except on the Great Lakes, where the industry is peculiarly protected by the coasting regulations, there is little of an encouraging nature to report. During the fiscal year ended June 30th last, 1,536 vessels of 456,076 gross tons were built in the United States, compared with 1,657 vessels of 473,981 gross tons for the previous fiscal year. Vessels now under construction indicate a further lessened output for the coming fiscal year. The principal decrease for the past year has been in steel steamers built on the Great Lakes, which number 41 of 131,660 tons, compared with 52 of 161,797 tons for the preceeding year. On the seaboard only 18 ocean steel steamers of 101,471 gross tons were built, five being for the over-sea trade, but this was the largest output of this type in the history of shipbuilding in the United States.

—Brown—"Why do you want me to pay in advance? Are you afraid I won't bring the horse back?"

Liveryman—"No, no; not at all. But you see the horse might come back without you."—Atlanta Journal.

THE Ontario Tack Company's factory, in Hamilton, was on Friday last burned to the ground at a loss of over $40,000; insurance $20,500.

Commercial.

MONTREAL MARKETS.

Montreal, Aug. 5th, 1903.

Ashes.—The situation is unchanged, and owing to the scarcity of stock, values rule high, dealers being ready buyers of No. 1 pots at $4.55 to $4.60. In pearls there has not been a transaction for some time past, and second pots would probably bring $4.10 to $4.15.

Cements and Firebricks.—A good steady distributive business is reported in these lines, and there has been no variation in quotations since opening of the season. Receipts for the week ending to-day are 5,577 barrels of German and Belgian cement, and 46,300 firebricks.

Dairy Products.—Prices for both butter and cheese are rather irregular, but on the whole the level of quotations is a little above that of last week. Some holders are said to be asking a little over 19c. for choicest Townships creamery, but 18¾ to 19c. seems about the regular quotation, with about 18½c. for Quebecs, and 15c. for Western dairy. Quebec cheese is firmer at 9⅛ to 9¼c., while Townships are steady at 9¼ to 9⅜c., and fine Ontarios at 9½ to 9⅝c. Cheese shipments last week aggregated

99,817 boxes, about 30,000 less than a year ago. Butter shipments were only 8,124 packages, as against 27,727 packages for same week of 1902.

Groceries.—Sugars are reported firmer again in New York, but local quotations are as revised last week, the factory price for standard granulated being $4.15, with yellows ranging from $3.40 to $4. Both the refineries report good demand The demand for teas is improved, and some fair-sized transactions have been reported between houses since last report. Representatives of Japan houses also report the placing of some good orders, and late cables from Yokohama indicate a little firmer market for cheaper lines. In spices, pepper keeps moving upwards, All lines of parafine candles are advanced a cent per pound. Canned salmon is stiffer, and quotations have been temporarily withdrawn by packers on the Pacific Coast.

Hides.—As anticipated last week, lambskins have been now advanced to 45c. Very few calfskins are now coming in, but there is still quite a fair stock in warehouse. There is still much competition between hide buyers and prices paid range from 8½ to 9c. for No. 1.

Leather.—No recent change of any kind is reported. The local demand is of a moderate, but fairly steady character. Sole is steady on the basis of 23½ to 24c. for Mfrs.' No. 2, as to selection. Splits and black leathers show no change in prices. Dongolas are firm, with manufacturers reporting continuously enhancing values of raw goatskins.

Metals and Hardware.—Owing to the liberal importations of English bar iron local rolling mill men are easier on domestic bars, and quotations may be made 5c. lower, namely, at $1.90 to $1.95. This is about the only new feature in the metal market. Some fair-sized sales of English pig iron are noted at $18, but from $18.50 to $18.75 appears to be about the usual figures for jobbing lots. Summerlee is quoted at $21 for No. 2, and $20.50 to $21 for No. 1 Eglinton and Gartsherrie. Sheets and plates are somewhat easier, though some jobbers profess to still get $2.40 for black sheets, and $2.50 for Canadas. A round transaction in copper is reported at 14¼c., but in an ordinary way 14½ to 14¾c. is asked. Ingot tin is quoted at 30 to 31c.; lead at $3 to $3.05, though some business is said to have gone through at $2.95, net terms, for a round lot. Iron pipe is steady at $4.81 for inch. The hardware trade report quite a scarcity of bolts, and a difficulty in getting deliveries from manufacturers.

Oils, Paints and Glass.—Linseed oil continues to show a weak market, though quotations appear to vary more or less. Turpentine is somewhat firmer. The demand for seal oil has apparently altogether died out here; not a single barrel of new oil has been brought in here this season, and prices are altogether nominal. Business in Cod oil is also very limited, and no Newfoundland oil has reached here yet, the little stock here being from Gaspe. We quote, as follows: Single barrels, raw linseed oil, 52 to 53c.; boiled, 55 to 56c.; net, 30 days, or 3 per cent. for 4 months' terms. Turpentine, 75 to 76c. single bbl. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gal.; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $5 to $5.15; No. 1, $4.75 to $4.80; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, Aug. 6th, 1903.

Chemicals, Drugs, Etc.—Opium has gone up a cent or two owing to reports from primary market, where the crop is said to be the smallest on record for fifteen years. Quinine is fairly steady. General trade is pretty good for this time of the year. In New York not much

change in conditions has taken place during the week.

Flour and Grain.—A steadier market prevails for flour, and the price for 90 per cent. patents has gone up a little, exporters now paying $2.82½, middle freights. Manitoba flour is steady. Oatmeal is a little on the quiet side, while millfeed is steady. For wheat the demand is fair, and prices keep firm, though no actual changes in quotations have taken place. The same holds good with regard to other grains. None of the new crop has begun moving yet.

Fruit. — Raspberries are becoming scarcer, and offerings are not of very good quality, it having been affected by the heavy rains. Not many red currants are now coming in, and they sell at about 60c. per basket. Early apples and peaches are becoming more plentiful, but the demand the last few days cannot be dsecribed as good. Early plums sell at 40 to 50c. per basket. Canadian tomatoes sell at 60 to 70c. per basket, and canteloupes at 60 to 75c. Other fruits are active and prices are as follows: Bananas, 75c. to $2 per bunch; cocoanuts, per sack, $3.75 to $5; lemons, 300's, $3.50; oranges, late Valencias, $4.50 to $5; watermelons, 25 to 35c.; pineapples, $3.50 to $4; California peaches, $1.50 to $2 per case; plums, $1.25 to $1.75; pears, $2.50 to $3 per case.

Hides, Skins, and Leather.—The receipts of hides are fairly good for this time of the year, and the demand, too, is pretty good. Lamb and sheepskins are firmer. Calfskins are quiet. Tallow is easy. In leather, trade just now is quiet, but is expected to improve as soon as the farmers get through with their work.

Live Stock.—The cattle market this week was dull, and receipts light owing to a delay on the railroad. Prices for export cattle were well maintained. The demand for butchers' cattle dragged, owing to the poor quality of those offered for sale. Not much demand was experienced for feeders or stockers. The run of milch cows was only fair. Calves showed an advancing tendency. Sheep and lambs were dull under heavy receipts, and prices became a little easier.

Hardware.—For all seasonable articles the demand is very good, indeed, and wholesalers consider the present fully up to any previous season they have experienced. Some lines of building materials have advanced in price recently, while with others a difficulty has been experienced in getting deliveries made to time. In metals, the movement may be considered good.

Paints and Oils.—Lubricating oils are in good demand and they have an advancing tendency in the market. Coal oil is very firm also. Turpentine maintains its price well. Linseed oil is in good demand at the recent decline in price of 3c. per gallon. All lines of builders' materials, such as putty, paint, oil, etc., sell readily.

Provisions.—For butter, there is but little enquiry for export, and with some accumulation of stocks, under heavy deliveries, prices are easy. Business going on in cheese is fair. Offerings of eggs are large, and prices easy. The demand for hops is dull, it only being bought for immediate requirements. The trade in hams and other smoked meats is brisk, and the market is distinctly firm.

What Probate Reveals

Hundreds of men deemed wealthy die every year poor, leaving their families penniless.
To avoid so great a calamity take out a policy, while in good health, in

Head Office - WATERLOO, ONT.
The Mutual Life OF CANADA

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at he bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Assurance Company
has no equal

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay **$5.00** for an annual subscription to **Printers' Ink** and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over **$100,000** a year by doing neither one.

For sample copy send 10 cents to **PRINTERS' INK**, No. 10 Spruce St., New York City.

Mercantile Summary.

J. W. Barchard & Co's box factory, in Toronto has been badly damaged by fire, at a loss of about $5,000, fully insured.

At the town of Etchemin, near Levis, Que., Joseph Vermette follows the occupation of a lumber culler, when work in that line offers itself, and has also run a little grocery business for several years. He has, however, now had to assign, and he owes about $900.

In 1893, J. M. Couillard succeeded his father in a fairly established general store business at Beauharnois. A year or two ago he removed to Ste. Martine, but this step has not resulted favorably, and he has consented to assign on the demand of Hodgson, Sumner & Co., of Montreal. Liabilities are about $7,000, and he claims apparent assets of $11,000.

Jacob and Emile Schwartz, respectively father and son, who last fall combined forces, as manufacturers of leather goods at Montreal, under the style of the J. & E. Schwartz Mfg. Co., have already agreed to disagree, and the son has taken an action to have the partnership annulled, petitioning the court to take possession of the firm assets until the matter be adjudicated on. As a result of this litigation a leading creditor has filed a demand of assignment.

THE GREAT WEST

PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

The Selection of an Executor

Of proven integrity, ability and experience is the paramount duty of every man possessing property of any description.

To choose an executor on grounds of personal friendship only is to jeopardize the estate and the welfare of those dependent thereon. Such a person may have no capacity for the duties of the office, may not live to perform them, or may become a defaulter.

A corporate trustee offers ability, security and experience in the discharge of these important duties at a minimum cost.

Don't Delay Making Your Will.

The greater the efforts the longer the time spent by an individual in accumulating property for his family or other purposes, the more important becomes the duty of making a will. It is a duty that is sometimes put off until too late to be performed. We will forward free, for the asking, to any address in Canada, the various forms of wills.

Mercantile Summary

THE Montreal grocery jobber, L. A. Cloutier, whose failure as a result of stock speculations we recently reported, has arranged with creditors at the rate of 30 cents on the dollar.

IN the early spring of last year Adelard J. Lacerte began storekeeping in a small way at St. Severe, in St Maurice county, Quebec. He was previously a farmer, and the *denouement* usual in such cases has taken place, his assignment being announced.

THE Ontario Construction & Supply Co., Limited, of Toronto, capital stock $100,000, has been incorporated for the purpose of carrying on a railway and mining construction business. Among the provisional directors are A. J. McComber, of Port Arthur and H. L. Drayton, Toronto.

MR. JOHN ABELL, the well known manufacturer of agricultural implements, etc., Toronto, passed away last week in the 81st year of his age. He was the founder of the Abell Engine Works at Woodbridge, afterwards removed to Toronto, and which were taken over a few months ago by the American-Abeli Engine & Thresher Company.

THE courts having decided that the Montreal Park and Island Railway could not legally build an electric line on the main road of Longue Pointe municipality, to connect with the lines of the Chateauguay and Terminal Railways, the Chateauguay & Northern Railway Company have made the offer to do this work.

MR. DAVID HOSKINS, F.C.A., whose election to the secretary-treasurership of the Institute of Chartered Accountants of Ontario was noted in our last issue, has opened an office in Manning Chambers, Queen street, in this city. It is his intention to engage in a general auditing business, devising of systems of accounts, financial valuing.

ACCORDING to returns recently published by the Grand Trunk Railroad, that company has in the first half of the present year turned out the following equipment: From Montreal shops, 20 Richmond compound locomotives, 144 30-ton box cars, 24 caboose cars, 35 cheese cars, 10 baggage cars, 60 long, 10 first-class cars. From London shops, 400 flat cars, 14 caboose cars. From Port Huron shops, 329 flat cars, 22 caboose cars. In addition to the above 163 10-ton box cars were received from the American Car & Foundry Company.

OTTAWA city furnishes this week the following group of minor failures. F. D. Graham, formerly a barkeeper in the Windsor hotel, and who started to keep bar for himself last fall, has already assigned to W. A. Cole.——A. E. Saunders, grocer in a small way, has assigned owing less than $1,000.——The assignment is also noted of Joseph Laliberte, haberdasher. Last spring Joseph also made a venture in the hotel line, under the style of J. Laliberte & Co., with poor results, and the consequences as noted above.

On the Preference Stock, two per cent.
On the Common Stock, three per cent

Warrants for the Common Stock dividend will be mailed on or about 1st October, to shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Thursday, 1st October, to shareholders of record at the closing of the books at the Company's London Office, No. 1 Queen Victoria Street, London, E. C.

The Common Stock Transf r Books will close in Montreal, New York and London, at three p.m., on Tuesday, 1st September. The Preference Stock Books will also close at three p.m., on Tuesday, 1st September. All books will be re-opened on Thursday, 8th October.

By order of the Board.

CHARLES DRINKWATER, Secretary.
Montreal, 10th August, 1903.

Mercantile Summary.

THE statement of the liquidator in the matter of the Strathcona Rubber Co., Limited, of Montreal, shows the merchandise liabilities to be about $29,300, and privileged claims $2,400. Apparent assets are shown to the amount of $36,-147.

MESSRS. Robt. E. Menzie, J. F. Brown, and others of Toronto have been granted a provincial charter under the name of the Menzie Wall Paper Co., Limited, of Toronto, to make and deal in wall papers, interior decorations, etc., and to erect and operate pulp and paper mills. The concern is capitalized at $250,000.

ONE of the elevators of the St. Lawrence & Great Lakes Transportation Co., in the Louise Basin, Quebec, was on 6th inst., almost totally destroyed by fire. It was used to transfer cargoes from the Wolvin Company's vessels to the seagoing ships, and vice versa. The loss, including damage done to a number of barges in the vicinity, was about $25,000, partially covered by insurance.

SEVERAL small grocery failures are reported from Montreal as follows. Pierre Meunier, for eighteen years an employee of the Montreal Water Works, thought he would try his chances in the lottery of retail grocery business, but has drawn a blank. He only started last fall and already has assigned.——George Hobson, who has assigned on demand, owes about $2,000. He began three years ago.—— Consent to assign has been filed by J. D. Pilon, a small dealer in the eastern suburbs.

THE Grenfell Investment Co., bankers, have opened an office in the town of Grenfell, Assiniboia, and intend to do a general banking business, special attention being given to the collecting of farmers' notes as well as any drafts from wholesale dealers, or others that may come their way. The company takes over the banking business of C. R. Tryon & Co. The manager of the business is MR. James Young-Thomson, who has resided in Grenfell for years.

A NEW YORK syndicate headed by Messrs. Prentice, Patterson & Miller, are forming a company to be known as the American Rare Minerals Company. They have been looking over the old smelter site at Kingston, and examining the mineral deposits in its vicinity with a view to erecting a smelter there. Mr. M. Delano, a mining engineer, of New York, is also said to be looking into the question of establishing a smelter in that city.

THE Canadian Pacific Railway, which purchased some time ago, the Ottawa, Northern & Western, and the Kingston & Pembroke lines and has since then spent a good deal of money in making improvements thereon, is said to be about to make new bond issues on their account. After this is completed, the bonded indebtedness will be rearranged, and the companies affected will lose their present names and become regular divisions of the C. P. R.

IT is said that the Bon Marche, the greatest department store of Paris, has the largest kitchen in the world, employing sixty cooks and a hundred kitchen boys to serve the food for 4,000 employees. The smallest kettle in the place holds 75, and the largest 375 quarts.

MR. J. A. CAMERON, of Ottawa; Mr. H. E. Davidson, of Watertown, Mass., and others, have received a Dominion charter empowering them to form a company, under the style of the Library Bureau, of Canada, with a capital stock of $150,000, for the purpose of manufacturing and dealing in all kinds of furniture and fittings for libraries, banks, offices, public buildings, etc.

A SPECIAL despatch to the Halifax Chronicle says that the ratepayers of Sydney at a public meeting last week, decided to borrow $75,000 for the purpose of extending the sewer system of the town, $50,000 of this amount will be devoted to the building of a separate system for Ward Five. The same paper is informed that the Nova Scotia town of Liverpool is advertising for tenders for $35,000 four per cent. thirty year debentures.

"What this great United States of Americay needs," said Phil Osifer, "is not a more elastic but a more adhesive currency."

BURK'S FALLS, (Ont.,) ratepayers have passed a by-law to raise $30,000 for a first-class system of water works, to be put in during the coming fall.

A LETTER of Saturday last, from Amherstburg, says: "Several nice showers since I wrote you re tobacco will help it greatly; weather being very warm will help it further."

WE are told that the Canadian Show Case Co., of 92 Adelaide street west, Toronto, is so crowded with orders as to make it necessary to keep the shop running every night until ten o'clock.

THE city of Stratford announces that it is prepared to enter into negotiations with any company willing to establish an electric line there. A franchise was granted for this purpose some time ago, but it has now expired.

THE Grand Trunk Railroad is said to be interested in a new line of freight steamers to ply between Chicago and Goderich, where it has extensive terminals. The route, it is believed, would prove a popular one for the shipment of grain for export.

H. L. COOMBS AND CO., manufacturers' agents, St. John, N. B., are reported as having stopped payment. At a meeting of creditors held several days ago, a statement was submitted showing liabilities of $7,192, with nominal assets of $4,957.

A NEWS ITEM from Niagara Falls, says that Canadian capitalists will construct a large steel plant on the Welland river at Chippewa making use of power from the Canadian side of Niagara Falls, and making the steel by the Ruthenberg electric process.

THE Montreal Star is authority for the statement that Messrs. Brown, McFarlane & Co., a big Glasgow (Scotland) firm of turbine engine manufacturers, are making arrangements with the Canadian Pacific Railway Company for the installation in the latter's lake boats of turbines, which have the advantage of reducing vibration to a minimum. Mr. McFarlane looks forward to the day when all steamships on the great lakes will be fitted with them. Factories are to be established in this country, so the report goes, for their manufacture.

A NEW process has been invented in Lockport, N. Y., for the electrical treatment of magnetic iron ores. Should it prove as successful as is anticipated it is likely to prove of great value in the development of Canada's mineral resources, which include such enormous beds of magnetic iron in both Ontario and Quebec. There is no fuel in convenient proximity to these deposits, but, there are plenty of water powers, which could in many cases be easily utilized for the development of electrical energy. An official of the Dominion Department of the Interior is investigating the matter.

Manufacturing and Wholesale Stationers.
43 to 49 Bay Street, Toronto.

Mercantile Summary.

ON the 10th inst., a large and enthusiastic meeting was held in Embro, near Stratford, Ont., in favor of the proposed electric railroad. The enterprise will cost $350,000.

A NEW steel freight steamer, the "Tadousac," built for Messrs. Waldie & Wright, Toronto, was launched at the Bertram ship-yards in this city on Wednesday last. She is 260 feet long, with a 43 foot beam, depth 28.6 feet, and draft 17.10, Her capacity is 120,000 bushels of wheat, and she is designed to carry grain from Port Arthur and Georgian Bay ports to Mantreal.

A SYNDICATE composed of Dr. A. Wills, of Dawson city, and some Parisian capitalists, have bought the Belleville (Ont.) Rolling Mills for about $70,000, and have a further capital of $25,000 for the purpose of putting them into first-class repair, and for operating them. Probably, smelting works will also be established in conjunction.

THE steamship "Manchester Trader," of the Montreal-Manchester Line, went ashore on the 11th inst. off Anticosti in 18 feet of water and, it is stated, in clear weather. Reports to hand say that she in likely to prove a total loss. Both the ship and cargo are heavily insured. Among the latter are 391 cattle, 446 sheep, 10,000 bushels of oats, 10,000 bushels of corn, 4,650 boxes of cheese, 2,245 packages of butter, 275 standard deals.

A NEW YORK paragraph announces the death, on Saturday last, of William E. Dodge, the New York millionaire and philanthropist. He was a member of the New York metal house of Phelps, Dodge & Co. and was between seventy and eighty years of age. He was one of the founders of the Union League Club and well-known as foremost in charitable work. His son, Anson G. P. Dodge, was for years a prominent Ontario lumberman.

MR. JOHN MACKAY, who for the past four years has been part-owner of the Woodstock Sentinel-Review, has been appointed business manager of the Toronto Globe, in succession to the late Chas. W. Taylor. Mr. MacKay is still comparatively a young man, but he has had a long and varied newspaper experience, and his friends have formed great expectations as to his success in his present position.

THE five red foxes, which for a couple of days have been on exhibition in the window of the Dominion Express Co., Granville St., Halifax, have been looked at by thousands of people. These foxes are three months old and were obtained. we are told, by the Empire Tobacco Company at a large cost from an Ontario farmer who caught them when a week old. They are to be on exhibition for a few days at Sarre's store, Barrington street. The Empire Tobacco Company is using the foxes, it seems, to advertise their red' fox chewing tobacco, and these little animals are one of the many novel means of advertising that have been adopted by this company to popularize their product.

THOMSON BEATTIE, - Manager

Mercantile Summary.

THE Canadian Pacific Telegraph Co., has just completed the laying of forty miles of cable between Bamfield and Alberni, on the west coast of Vancouver Island. This will give the company an alternate connection between the land and cable lines, and will prevent the possibility of delays through accident. During the last two years 10,000 miles of line have been built.

IT is said that the Canadian Pacific Railway has made a final selection of the lands reserved for it in Manitoba and the North West, which will place at the disposal of the Dominion Government over 10,000,000 acres which has been kept back from settlement, in order to enable the railroad to make a choice. The land chosen is situated in what is known as the semi-arid belt, lying alongside the main line of the C. P. R., and consists of about 2,950,000 acres. The company also propose to take another tract of about 100,000 acres of semi-arid lands adjoining the irrigation tract of the Alberta Railway & Coal Company. The tract along the main line of the company, as now decided upon, is about 150 miles long by 50 miles in width, extending eastwardly from Calgary to Langevin Station, and bounded on the north and south by the Red Deer and Bow rivers respectively. The cost of irrigating these semi-arid lands has been estimated at about $3.50 per acre.

TORONTO'S FINANCES.

The Toronto city treasurer has issued his annual statement. It shows that the financial year began with a balance on hand of $587,988. Receipts from ordinary revenues, taxation, sale of debentures, etc., amounted to $7,496,993. Disbursements, which include redemption of debentures and sinking fund investments, amounted to $6,977,146, leaving a balance (including sinking fund deposits) of $1,107,835. The bonded debt of the city on December 31st 1902, was $21,035,443, inclusive of such revenue-producing debts as waterworks, local improvement loans, etc. The gross debt increased during last year $86,405 and the net debt increased $85,407. In considering the city debt, the value of its various revenue-producing assets should not be overlooked. The value of such property is estimated at over $13,000,000. The total revenue from city properties not including the waterworks was about $100,000, besides which there was a revenue of about $358,000 from licenses, police court fines, cattle market fees and street railway percentage, etc.

ONTARIO MUNICIPAL ASSOCIATION.

The annual meeting of the Ontario Municipal Association was held in Guelph on the 12th inst. Mr. Ross Slater, of Niagara Falls, the president, in the chair. The opinion of the meeting was expressed very strongly against the interference of the Dominion Parliament with provincial and municipal rights, and a resolution was passed to the effect that members viewed with alarm the attempt which was being made by railways to deprive municipalities of their just rights to control their own streets and highways, as proposed by the bill now being presented at Ottawa, respecting the Toronto and Hamilton Railway. Some remarks were made, mostly of an adverse character, on the new assessment bill, proposing to replace the personality tax by business and house taxes and changes in the income tax. The revenues of most municipalities, it was feared, would be gravely affected. The Association expressed itself as in sympathy with the creation of a Dominion Good Roads Department.

THE PORT OF MONTREAL.

That Montreal is the second largest grain shipping port on this continent is one of the interesting facts to be gleaned from a little pamphlet, "Facts About the Milling Industry," compiled by the Northwestern Miller. Last year the grain shipments from this port were 19,934,278 bushels, being surpassed only by New York, with a total of 36,766,743, while New Orleans was third with 18,511,069 bushels. Bearing in mind that the port of Montreal is only open for seven months in the year, these figures show that while it is open it ships within 40,000 bushels a week of the quantity shipped by the greatest of the United States ports.

Moreover, the increase in shipments from Montreal over the previous year, 5.75, was greater than recorded in the case of any American port, Galveston being the port showing the next largest increase, 2.40 per cent. These are figures which are well worth study by some of the western Ontario newspapers which are given to disparaging the port of Montreal. Not only is it the second largest grain port on the continent, but its exports of grain are growing faster than those of any other port, despite the fact that its business has all to be done in seven months, while that of other ports last twelve. Not only is it the second largest, but it is the largest dairy shipping port on the continent by a very large margin, and

also one of the leaders in the shipment of cattle. This, too, despite the fact that it is only open seven months in the year. What does all this prove? It proves that notwithstanding that the expense incurred by the steamship companies running to Montreal is much greater because of extra insurance, the necessity of securing other runs for the vessels employed in the Montreal trade during the winter months, and the fact that for five months the capital invested in the facilities of the port does not earn interest, the position of Montreal, the furthest inland of all American ports, makes it pre-eminent. It is not so because inducements have been offered to ships to seek this port. It is not so because the facilities supplied for handling cargo are superior to those to be found elsewhere. It is not so because local capital has made it so artificially, though the merchants of Montreal have done wonders in the face of discouragements. It is so because the geographical position of Montreal is what it is. It is so because Montreal stands at the head of ocean navigation, the port nearest the heart of the great traffic-producing centres of the continent. It is so because it is the natural meeting place of inland and ocean navigation, Montreal does not exist for Canadian traffic alone. Millions of dollars, worth of United States produce pass annually over its wharves.—Montreal Gazette.

LEAMINGTON
BUSINESS COLLEGE

The growth of this school has been phenomenal. In five years it has grown to be one of the largest schools in Western Ontario. Our instruction is high-grade and thorough, and our graduates are in demand by business men. Healthful place to live. Centre of peach belt. Board low. Railway fare up to $10 allowed on tuition.
Write for catalog "M 1."
Fall term begins Sept. 1, 1903.
Canada's Best School.

TORONTO STOCK TRANSACTIONS.

The volume of trading carried through during the past week has been considerably larger than of late. A strong feature has been the very large number of C.P.R. shares which have changed hands, and, in spite of numerous bear raids it has held remarkably steady, and, in fact, has risen several points. Details were as follows: Bank of Toronto, 29 at 232½; Commerce 8 at 138½; Imperial, 41 at 228½; Dominion, 20 at 232; Hamilton, 3 at 218; Traders, 41 at 137; Brit. Am. Ass., 40 at 90; West. Ass., 15 at 90; C.P.R., 23,705 at 119-125⅛; Tor. Elect. Light, 7 at 132; Can. Gen. Elect., 55 at 149; Rich & Ont. Nav., 65 at 83¾-85; Tor. Rail., 142 at 93½-5; Can. Per. Loan, 160 at 120; Sao. Paulo, 140 at 83-5; Imperial Life, 80 at 150; Dom. Coal, 803 at 80-84½; Nova Scotia Steel, 250 at 83-5; Dom. Steel, 1160 at 8½-10; Bonds, Twin City, 1,915 at 88⅛-92½; $2,000 at 60½-61; Lake Superior, 270 at 3⅛; North Nav, 25 at 128¼; St. Lawrence Nav., 10 at 126; and C.N.W. Land Pref., 100 at 97.

FINANCES IN THE UNITED STATES.

Henry Clews & Co., New York, in their circular dated August 8th, 1903, say: Continued liquidation has carried the stock market down to new low level records. For the time being intrinsic values received scant consideration; the better-class securities as usual being sacrificed to protect those which were practically unsalable under existing conditions. Much of this liquidation was forced; by which is meant that the enormous shrinkage in values compelled lenders to sell collateral often at serious sacrifice in order to cover loans. This compulsory liquidation must have cancelled an enormous volume of obligations of all sorts, and to that extent the situation has been greatly improved. But the losses thus imposed have been exceedingly severe; and, while the worst of the crisis has probably been seen, the downward movement gained such a momentum that it is difficult to check until all the weak spots have been thoroughly eliminated. One of the remarkable features in connection with the depression of the last few weeks is the absence of panicky symptoms, notwithstanding the extraordinary declines; nor is there now any reason to anticipate panic, because prices are too low and sound conditions prevail outside of Wall street. Another potent reason, however, for absence of panic is the skilful manner in which the campaign of liquidation has been conducted. Some of the more powerful interests may have been instrumental in forcing the decline; nevertheless, strong parties have invariably stepped into the breach and stopped the downward movement when it became too threatening, thus giving those in difficulties a fair chance to readjust themselves. Without this powerful restraint there is no doubt worse conditions might have followed, and to this extent the Street is indebted to the community-of-interest idea, which in times past has come in for more than its share of abuse. The men who dominated vast aggregates of capital knew better than any others the great expansion in all sorts of obligations which culminated in 1902; they, too, knew better than any others that the legitimate growth of business imperatively called for vast outlays of new capital, which could not be deferred and which must impose a strain upon the money market that would fall disastrously upon all speculative constructions. No doubt, with the foresight which their position gave them, they prepared in advance for the event now occurring, and which have been anticipated by all experienced

observers, who wondered not so much at the approach of the day of reckoning as at its long postponement. Less concern is shown about the future of the money market, forced liquidation in stocks having done much to solve that problem. Loans remain at a high figure, causing some perplexity; but bank reserves are rising, and beyond question the banks are in a much stronger position than for some time past. Crop demands should now be met without particular strain, and gold imports will soon be facilitated by increased offerings of produce bills. Altogether, the situation is one that warrants an effort to restore confidence. Liquidation may not be entirely over, but the worst has been experienced, and the situation is infinitely safer to-day than a year ago, when prices were at the top and confidence was strongest. Such a contrast should encourage, and not depress.

DEATH OF MR. J. S. LOCKIE.

It was with a sense of genuine sorrow that many business men of Toronto heard of the sudden death, on Saturday last, of James Smart Lockie, manager of the Imperial Trusts Company of Canada. Mr. Lockie was a very estimable man. His experience was wide, his judgment good, and he had a fund of precedents and anecdotes, the essence of which he could bring to bear on current events in a way that was instructive as well as interesting. The circumstances of his painful illness and death are distressing in the extreme.

The deceased gentleman had many friends in Canada, and commanded, as he deserved to command, great respect among financial men in Toronto. His banking career began, we believe, in the Bank of British North America, of whose New York branch he was manager for some years. On his appointment to the Toronto branch of the Bank of Commerce, he returned to Toronto. After several years he gave up the position and went south. Eight years ago he came back to Toronto, and was appointed manager of the Imperial Trusts Company, which position he held at the time of his death. Mr. Lockie was 62 years of age.

THE BRITISH SHIP COMBINE.

The agreement of the International Marine Company with the British Admiralty and the Board of Trade provides that the British companies in the combine shall remain on an equal footing with other British companies in respect to any military, naval or postal services that the British Government may require from the British Mercantile Marine. No British ship in the combine shall be transferred to a foreign registry without the consent of the president of the Board of Trade. The vessel shall continue to be officered by British subjects, and carry the same proportion of British sailors as is prescribed in the case of any other British ship engaged in the same line of trade. The vessel shall still be subject to hire or purchase by the Admiralty on the same terms as existed prior to the combination. At least one moiety of the tonnage built or acquired during the continuance of the agreement shall be registered as British. Any company hereafter taken into the combination shall be subject to the same terms. The British companies included in the combine shall continue to be British companies, qualified to own British ships and at least a majority of their directors shall be British subjects. Nothing shall be done to jeopardize the existing British register on the right of a vessel to fly the British flag.

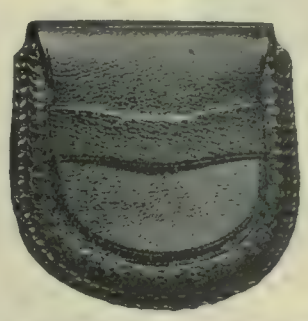
FOR DRY GOODS DEALERS.

A big syndicate has been formed in Boston, Mass., under the name of the United States Cotton Co., with a capital of $40,000,000, for the purpose of manufacturing cotton goods. Mr. H. C. Bacon, of Boston, is named as president.

An old Scotswomen had rather the better of a young clerk in a Yonge street store yesterday morning. Receiving rather an abrupt answer to an enquiry, she looked at the youth attentively for a moment and passed out, with the remark, "Man, ye mind me o' the sweep that stuck in ma granny's lum; you're ower big for yer job."—Globe.

In the British House of Commons the other day, an investigation was requested into the reshipment of American cotton from Liverpool to New York, thus increasing the farmers' price of cotton in England, and as to the effect of the system of future options on the price of cotton. The president of the Board of Trade made reply that information to hand did not indicate any recent increase in the re-export of cotton, and Right Hon. Mr. Balfour remarked that he knew no objection to the suggested enquiry at to future options.

HAND PLAITED
LEATHER GOODS FOR MEN.



The hand plaited purse or card case is the latest novelty.
They are beautifully made in pig skin and morocco.
The prices are from **65c.** to **$3.00.**

THE WESTERN GRAIN CROP.

A copy has been sent us of the report upon the crop prospect of Manitoba and the Northwest Territories, prepared at the request of the Winnipeg Clearing House Association. It bears date 4th August, and was received just too late for last issue. We give it in full, however, as a valuable condensed statement of the outlook for the grain crop at more than a hundred points in our prairie country. Harvesting will be general during this week and next at all but a few places in Manitoba. In the Territories it will average some days later.

Analyzing the return, it is seen that at only eight or ten points out of ninety-two in Manitoba are the prospects considered "unfavorable" or "poor:" in the main they are good; for though the word used to express the prospect is in numerous places "fair," it can be seen by looking at the next three columns that the estimated yield of these districts is just as much to the acre as many which are marked "good." The expression, "very good," or "excellent," is used where the estimated yield of wheat is 20 to 30 bushels; that of barley, 30 to 40 bushels; and of oats, 35 to 50 bushels to the acre. The average of wheat expected in the province, as nearly as can be made out, is 18 to 20 bushels per acre; at only a dozen points is it placed at 25 to 40.

The estimates made on August 4th at three points in Alberta, three in Saskatchewan, and sixteen in Assiniboia, bear out the forecasts made in our previous reports of crop prospects, namely, that the Territories will give larger relative yields than Manitoba. Strong terms are used to describe the probable yield this year, "Very good"—"excellent"—"never better"—are common. Nowhere is the crop of wheat estimated at less than 18 bushels to the acre; at most places it is 20 to 35; the average is about 24. It is interesting to remark, too, that the places promising the greatest yields are in the more distant Territories of Saskatchewan and Alberta.

Recent information from the West, derived both from letters and from callers, continues to be of a very reassuring kind. It is universally agreed that the Territories will have a record yield of grain. We give below our weekly telegraphic despatch about Manitoba prospects, which left Winnipeg at noon yesterday: "Weather during past week cool and cloudy with frequent showers. The recent wet weather has done a great deal of good in maturing the late grain. The wheat in the main is ripening in splendid form. The cutting of barley and oats is now in active swing, and wheat cutting will be general in course of the next few days."

THE PROVISION TRADE.

At the present writing, trade in butter seems to be almost dead, with nothing moving. Up to date, the exports have totalled only about 63,000 boxes, as against nearly 135,000 boxes for the same period of last year. Fully as much, even if not more than as last year, has been made in this country, so the accumulation of stocks must be very large. Country merchants indeed are pressing for bids, but no one is anxious to touch the supplies at the prices asked. This is probably the root of the trouble; the disinclination of British dealers to pay anything like the prices which must be realized in order to make a profit on the article, after paying for it here, allowing for freight, insurance charges, etc. It would be unwise to forecast the ultimate outcome of present conditions. It is interesting to gather, from figures recently published, that the export of butter from Denmark to the United Kingdom during last year was 1,890,000 cwt. Of this a fair quantity was in tins. Prices ranged from 1s. 1½d. per Danish pound (a little heavier than ours) in November, to a fraction less than a shilling in August. It is worthy of note, too, that in Denmark the most strenuous efforts are made to ensure the absolute purity and cleanliness of all milk products. Attention is constantly paid, too, to a diminution in the cost of manufacture.

In cheese the prices realized on the various boards throughout the country have not taken full effect in the local market. Some dealers seem to think

that the advance has been rather too rapid, and that a recession is within the bounds of possibility. The make continues to be large, probably, indeed, the largest for this time of the year in the history of the business. Pastures have been exceptionally good.

The receipts of eggs are increasing, while the quality also is said to be improving. Though there has been no quotable change in quotations, there is a tendency toward higher prices.

The active demand for all lines of smoked meats continues. Some of the stocks are now in small compass; more particularly does this apply to hams, the indications for which point to higher prices. Lard remains steady, though packers as a rule apparently do not miss offers at any reasonable price. Pork and its products hold very steady, under the good demand which is usual during the summer season, a state of things accentuated by the recent 50c. rise in live hogs.

BRITISH FIRE OFFICES.

A group of fire underwriting companies, which take as much as a hundred millions of dollars in net premiums in a single year, and pay out fifty-three millions of dollars for fire losses, deserves attention. The group referred to consists of twenty-three British companies which are doing business in the United States, Canada, and various parts of the world, as well as in the British Islands. A recent issue of the London Economist devotes a page or two to the review of the thirty-seven British companies which are doing fire business, and makes a separate table of amounts and percentages for the twenty-three doing foreign and colonial business. The Economist considers that last year was a remarkable one, owing to the manner in which nearly every part of the world in which the great British companies now operate contributed its quota of profits to the general results. "In Canada the profits earned were altogether exceptional, and are not likely to be repeated. In the United States the year began badly with heavy losses, but, after the first three months, improved so much that larger profits have been earned than in any one year during the last decade." The review deals only with the gross surpluses of premiums over claims and expenses. It gives the following figures: "During 1902 [calendar year], thirty-seven British fire insurance companies, small and large, received £21,542,294 in premiums. The claims, paid and outstanding, were £11,200,549, or 52 per cent. of the premiums, and the total expenses and commission were £7,423,216, or 34.46 per cent. The gross surplus of premiums over claims and expenses was thus £2,918,529, or 13.54 per cent. of the premiums. In the year 1901, thirty-seven companies had premiums of £20,160,187. The claims were £12,839,740, or 63.69 per cent.; the total expenses, £6,861,386, or 34.03 per cent.; and the gross surplus a poor £459,061, or 2.28 per cent. of the premiums. Much of the increase in premiums during last year was due to the higher rates obtainable in the United States and Canada, and the most noticeable feature is the drop of nearly a million and three-quarters sterling in the amount of the claims. This reduction was, of course, directly due to the lighter experience in regard to fires."

Union	516,555	254,624	49·30	185,856	35·90	14·80
Total (23 companies)	20,356,660	10,659,172	52·36	7,023,114	34·50	13·14

"The great improvement in the position of the international companies may be seen by taking the comparative figures for the same twenty-three offices in 1901. The premiums were then £19,082,076, the claims £12,331,247 (64.63 per cent.), the expenses £6,505,753 (34.09 per cent.), and the gross surplus £245,076, or 1.28 per cent. of the premiums. In 1901 the Caledonian, Manchester, Patriotic, National of Ireland, and Union all did very badly, but by a revision of their business the position of all of them has much improved, and the Caledonian and the Union have fully returned to their former standing."

The policy of adding to reserves instead of distributing surplus earnings in extra dividends is thus commended by the Economist: "The British fire insurance companies have for many years past merited respect for the financial prudence with which they provide for the future, and their moderation after the prosperity of 1902 is to be commended. They have used their abundant surpluses to increase reserves rather than to add to the dividends of shareholders. The total dividends paid amounted to £1,950,569—of which as much as £1,343,921 was provided by the interest on investments—and the reserves for unexpired risks and other permanent fire funds have been increased by £1,356,883." It is thus seen how important and valuable a part is played by interest on investments among the sources of revenue possessed by fire underwriting bodies.

PROSPECTS FOR CALIFORNIA DRIED FRUITS.

The state of the market for Californian dried fruits is beginning to have interest for grocers and others. The opening prices for several lines have been named, but these, for the present at any rate, should be looked upon as merely nominal; so many things enter, or should enter, into the calculation before any true estimate of the situation, so far as this market is concerned, can be made. In spite of the opening prices having been named, there is a degree of uncertainty existing as to what figures the buyers will eventually

settle down to. It may be said, however, that apricots are decidedly higher and that the present prospects are for a continuance of the upward movement rather than for a decline. Peaches and prunes are also higher, but not to such an extent as in the case of apricots. So far as actual operations are concerned, however, matters are in abeyance, both sellers and buyers resting on their oars. Last year, it will be remembered that there was a general congestion of cars all over the United States, and that this affected the Christmas trade to a considerable extent. In the case of dried fruits from the Pacific Coast, dealers received their stocks so late that in many cases they had considerable stuff to carry over. This has made many buyers, particularly in the East, extremely chary of how they begin operating. In the meantime, the producers are holding very firm, and show no signs of making concessions to induce purchases. It looks as if the prune crops of France, Bosnia, Servia, etc., will all prove more or less failures. The California fruit crops also, taken all round, promise to be lighter than last year, though in Oregon probably the yield will be a full one. Pacific growers are probably taking the general shortage into consideration, and feel inclined to occupy a stiff position.

But, as intimated before, it would not be wise to make any very definite forecast. Even if the state of things to be expected in the States were settled, which it is not, the Canadian market could furnish problems of its own. Much depends upon the crops of other and more staple fruits. In the United States, there is always a fairly dependable market for dried apricots, prunes, etc., although even in that country they are hardly looked upon as being among necessities. Here, on the other hand, an extra large crop of apples as for example was the case in 1902, means a considerably diminished demand for dried fruits. The price, too, of these goods, makes a great difference; a really material increase in values bringing about an almost total check to the consumption. These factors have all to be known and thoroughly digested in order to arrive at a useful estimate as to the probable course of the market.

THE FIRE WASTE FOR JULY.

The fire losses for Canada and the United States during the month of July, according to the New York Journal of Commerce, were $12,836,600, or an increase of $2,800,000 over the same month last year, bringing the total loss of the year 1903 up to $96,603,850, or only a little over half a million dollars less than in the corresponding portion of last year. The following comparative table shows the losses of the last three years:

	1901.	1902.	1903.
January	$16,574,950	$15,032,800	$13,166,350
February	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,300
May	22,380,150	14,866,000	16,366,800
June	9,590,000	10,245,350	14,684,350
July	15,740,000	10,028,000	12,838,600
Total	$104,666,150	$97,123,850	$96,603,850

FRATERNALS SLIGHTLY DISCOURAGED.

It is natural to expect to hear eloquence when a number of United States people get together in convention. The average American is a ready speaker, in public or in private. In the convention last week of the Associated Fraternities at Montreal, which we have already described in part, the speaking was both free and forcible. Mr. McKay, of Cleveland, made a speech on the legislative outlook, in which he referred to the Fletcher Bill concerning the regulation of assessment societies somewhat flamboyantly as follows: "The bill to which I refer can never pass, for there is no legislature on the top of God's green footstool that will ever consider absolutely wiping out 400 associations, protecting over 4,000,000 people.

Nevertheless, Mr. McKay has the sense to perceive that all is not well in the assessment fold. And he has the pluck to say so, in the following words, as reported by the Montreal papers: "It seemed to him that some check should be put upon the organization of so many fraternal orders. There was no demand for them. The people of the country, he said, are not rising up and demanding them, and the most of those orders that had come into existence during the last ten years had been through some person or persons who sought for themselves some office in them. Looking at the great number of fraternal societies already in America, and the things they promised to their members, he thought that the Associated Fraternities should take a step which would provide for the consideration of many of them, thus doing away with sharp rivalry and undue competition."

Some of the superfluous ones of which he complains are already out of the way, as our tabulated compilation of June, 1902, showed. When we shall have completed the nineteenth year of "Counterfeit Life Assurance," which we hope to do next week, its publication will show further decline. Meanwhile, we note a few of the efforts made to meet the inevitable: The Order of Select Knights has increased its rates to members of all ages. The Ancient Order of United Workmen has advanced its rates very materially, arranging to levy upon all members ten assessments in addition to their monthly dues. This comes heavy upon the old members. The Court of Honor made a marked increase in rates besides charging a per capita tax, which does not, however, affect old members. The Order of the Golden Cross and the Union Fraternal League advanced their rates at all ages. And the Protected Home Circle has increased both membership fee and per capita tax. In the case of the Mutual Protective League, the membership was divided, the older members being permitted to remain at the old rates and an increase being charged the newer members. This tendency appears to be general in those fraternal orders whose affairs are conducted with reasonable prudence.

—Our Mr. Wales informs us that the Molsons Bank at Trenton will open a sub-branch at Frankford shortly.

—The branch of the Ontario Bank, which was opened at Trenton, Ont., last February, will be moved into new and up-to-date premises in that town on the main street near the post office in a few days.

A MONTREAL LETTER.

In view of the great doings and the unusual features which we are told are to characterize your Toronto Exhibition this month, King's presents, and Princess Louise presents, and Lord Dufferin's presents on view, and the Coldstream Guards' band forbye—it may seem a small thing that we are to have an Exhibition in Montreal next year. But such, I believe, is the case, and it will mean a good deal to this city. The Board of Trade, the French Chambre de Commerce, and the City Council, together with the Council of Arts, the Business Men's League, and many other bodies of an industrial and agricultural kind in near-by places have come together to carry out the purposes of the Montreal Industrial Exhibition Association, which has received incorporation from the Legislature of Quebec, and it has already a Government grant of $12,000. It is to have a hundred members, so as to spread not only the responsibility but the interest of the enterprise. I only hope that we may not discover that "in numbers there is weakness." Anyhow the bulk of the work of getting up such a thing will be sure to fall upon the willing few. The provisional directors under the charter are named as under: Hon. F. L. Beique, Hon. L. J. Forget, Hon. J. D. Rolland, Hon. H. B. Rainville Mayor Cochrane, G. E. Drummond, R. Wilson-Smith, Henry Miles, Ald. Laporte, T. Gauthier, and J. X. Perrault.

Montreal shows great commercial activity. The harbor is busy, and the congestion on the wharves which has caused so much delay and trouble to our merchants ever since the navigable season opened is slowly being bettered. In spite of all that you may hear, in Parliament or out of it, about Montreal Harbor, the traffic continues to increase. There is much building proceeding all over the city. Figures published this week state that since 1st January, and up to the end of July, the value of buildings erected has been $3,652,000 as compared with $2,125,000 and $2,105,000 in seventh months of each of two preceding years. The railways appear to be over-run with work, and are widening their borders both in town and in the outskirts. I was told last night that the Grand Trunk so urgently wants a portion of the site of the Merchants' Cotton Company, at St. Henri, that they are paying $30,000 for a piece of land on which one of the company's building stands—which, of course, will have to come down.

A meeting of hardware wholesale dealers, delegates being present from all over the Dominion, was held here today, the principal purpose of the meeting being the shortening of selling terms, as proposed by the rolling mill men, nail manufacturers, etc., which we referred to several weeks ago. It will be remembered that the manufacturers proposed curtailing terms to 60 days, or 2 per cent. off for cash. The jobbers in their discussions to-day favored fixing the limit of their terms at 90 days, instead of 4 months as heretofore, or 2 per cent. off 30 days, and it is expected that the manufacturers will make their terms to coincide.

A change is made in the directorate of the Canadian Pacific Railway in the shape of an addition to its numbers. The new members are: Hon. George A. Drummond, Hon. Robert Mackay, Mr. R. G. Reid, and Mr. David McNicoll, who is now vice-president and general manager of the company, and Mr. Clarence W. Mackay, of New York, son of the late John W. Mackay, of cable fame. This leads me to notice also that the seat on the board of the Bank of Montreal, vacant by the death of Mr. Andrew Gault, has been filled by the appointment as a director of Senator Robert Mackay, president of our Harbor Board, who resigns his seat as director of the Merchants Bank of Canada to join the board of the larger bank.

I do not know whether you receive the Montreal Gazette, but that journal for Monday last contains in an editorial article some striking figures about this port quoted in part from the Northwestern Miller. These comparisons show that the quantity of grain shipped from this port last year was almost 20,000,000 bushels—a large part of it United States grown—while New York's grain shipments were 36,766,000 bushels, and those of New Orleans, the third largest grain shipping port on the Atlantic Coast, 18,511,000 bushels. I will cut out the article and send it to you, for it deals with our shipments of cattle as well as grain, and shows that we do more shipping export business here in seven months than Philadelphia, Boston or Galveston do in twelve.

You have no column for amusements (why have you not?) as some financial and insurance papers have. Therefore, I suppose I must not describe the Valois regetta or the Westmount games, or the Forest and Stream amusements. But the gatherings of various groups of mercantile or financial folk for purposes of competitive recreation are getting to be so numerous, in Ontario as well as in this and other provinces, that I predict you will have before long to print a column entitled "Sport." A friend, who heard the letter read and took down some sentences from it, was telling me on Sunday night about a remarkable pronouncement by that able divine, Mgr. Bruchesi, which was given out from the Roman Catholic pulpits of the east end yesterday. His subject was Sabbath desecration; and his condemnation of it was severe. He called the goings-on at the Sunday gatherings in the French quarter "profane amusements, which are an intolerable scandal." These "pagan amusements, organized by greedy speculators, lead people to desert mass and break the family tie." Swimming matches and horse-races by day; dances at night; and the abuse of alcoholic liquors by men and women, young and old, "all without an efficacious moral safeguard," the Archbishop declared to be an affront to the Almighty; and he called upon the municipal authorities to pass by-laws to prevent such desecration of God's Day. The worthy prelate's words were needed, for some of the places he condemns witness far more demoralizing exhibitions than the comparatively harmless hand-concerts at the Sohmer Park.

Mount Royal.

Montreal, 12th August, 1903.

OUR HALIFAX LETTER.

The official circular, issued last month by the Demerara Chamber of Commerce, indicates that things are coming our way, so far as the sugar trade is concerned. Three years ago only a few hundred bags of Demerara sugar came to Canada, nearly all the output being marketed in New York. The circular alluded to says that no freights are now offering for New York, nearly all the sugar being shipped to Canada. Up to July 16th, there had been shipped to St. Lawrence and Maritime Province ports over 17,000 tons of sugar from that colony, and it is probable that the total shipments to the Dominion for the year will be over 50,000 tons. The following is a comparative statement of new molasses exports from Barbados to July 16th, 1902, and 1903, respectively:

	1902. No. Puns.,	1903. No. Puns.,
United Kingdom	393	193
United States	1,443	629
Newfoundland	14,843	12,936
Montreal	11,881	656
Quebec	4,388	1,822
Maritime Provinces	8,531	8,020
Total	41,479	24,256

In 1902 there were 3,900 puncheons shipped from Barbados, after July 16th, and the most reliable information places the quantity remaining for shipment this year at 3,500 puncheons, nearly all of which will go to the Maritime Provinces. It is only necessary to compare the quantities sent to the St. Lawrence in 1902 and 1903 to see that there will be the greatest scarcity of molasses this year that Canada has ever experienced, especially as the season of 1902 was commenced with larger stocks in the importers' hands than in 1903.

The town of Amherst is having trouble over its sewers. Mr. Clarke, who had the contract for putting in the system, and who, it is alleged, raised the levels, has been ordered by the Town Council to discontinue work, and his contract has been cancelled. The town is advertising for 500 laborers and ten foremen, and proposes to complete the work by day labor. The contractor in the meantime has brought suit for heavy damages, and the end is not yet.

Mr. E. L. Thorne, general manager of the Union Bank

Promise of Crops in Manitoba and the Territories

The figures and statements on this page are those furnished by correspondents of the Bank Clearing House of Winnipeg. They refer to 92 points in Manitoba and 22 in Assiniboia, Saskatchewan, and Alberta. The average yield of wheat expected in Manitoba is 18 to 20 bushels to the acre. In the Territories it is about 24 bushels. Harvesting has begun in Manitoba, but in the Territories it will be general towards the end of the present month. The table gives average yield of wheat, barley, and oats, expected per acre; also the dates at which harvesting will be in full swing:—

of Halifax, is back at his desk, after a four months' trip to the West Indies and to Europe. He found the affairs of the branch at Trinidad in a satisfactory condition.

The perennial agitation for a better steamship service for the transportation of Nova Scotian apples to the English market, has resulted in the Canadian Pacific offering to put on fast boats on the St. John and London route to call at Halifax, providing not less than 6,000 barrels of apples are available for each sailing at not less freight than three shillings per barrel. This business is now handled by the Furness-Withy Company, under Dominion subsidy. There will probably be about 400,000 barrels this season for export, but with the two interests competing, it may not be possible to give the C.P.R. the guarantee required. The Halifax Board of Trade and the Fruit Growers' Association are now working on the project, and something may come of the negotiations.

Mr. Harry Piers, curator of the Provincial Museum, is now going through Nova Scotia making arrangements with mining men for a display of the mineral wealth of Nova Scotia at the forthcoming Exhibition from September 9th to 17th. It is intended to make this a permanent exhibit of a character that will advertise the mines of the province, and bring them more prominently to the notice of capitalists.

The new steamer for the Halifax and Canso service is receiving her finishing touches, and will make her first trip in a few days. It was expected to have her on the route early in the season, but the builders were late in handing her over to the company. The new steamer building for the Halifax and St. John service is also nearing completion, and will go into commission this autumn. She is a fine, strongly built steamer, constructed especially for the severe strain of this rather difficult service.

A revival of interest in West India trade matters has been aroused by the presence in this city of a number of prominent business men from Trinidad and other colonies in the last fortnight. You have already heard, I see, from Mr. T. Geddes Grant. Mr. C. W Meaden, superintendent of Government stock farms in Trinidad, has been in the province for some time, and together with Mr. W. C. Jardine, a prominent Trinidad planter, has visited different sections for the purpose of purchasing improved stock. With the co-operation of B. W. Chipman, secretary of Agriculture for Nova Scotia, Mr. Meaden has secured a number of choicely bred animals. There is considerable advantage in buying these in Canada, as they can be landed in Trinidad at a cost of about $20 per head for freight, as against £20 from England.

Halifax, August 10th, 1903.

OUR PACIFIC COAST CITIES.

A correspondent, who had spent some days in Vancouver and Victoria last month, is much enamored of both. He says Vancouver is by far the busier and more up-to-date of the two places, but both have charms. We quote from his letter, dated 25th July: "At present Victoria is thronged with tourists from all parts of the world. It may well be described as 'the most beautiful Canadian city,' and 'the gateway to the Orient,' and all that, but it certainly is not an easy place for a drummer to get orders or for a business man to do business quickly. The people lead easy lives, do not worry, and very generally enjoy themselves. The flowers have assumed their most gorgeous bloom, and the lawns and hedges are always in the pink of condition. The 'Englishman' predominates, and as a natural sequence cricket is *the* game of sport. Even business men close their offices early to engage in this pastime. The retreats for recreation around Victoria are easy of access, beautiful beyond description, and during the summer months a large number of people toss their keys to the janitor, their care to the dogs, and betake themselves to some metropolis of nature, where, amid the leafy bowers and purling streams, they may sleep, smoke and fish, while extracting the ozone from the pine clad hills of British Columbia. Thus do they lead gentle and long lives. Victoria is the home of many retired English naval and military men, and other persons of note, who have selected this place from their world-wide travels, as the most desirable spot of all the globe in which to enjoy the declining years of a busy life. The memories of a trip to Victoria will ever remain fresh in the minds of those fortunate enough to visit the place."

NEW NEWS FROM LABRADOR.

The president of the Halifax Board of Trade was in Labrador last week, and came home with a very different idea of its summer climate from that with which he set out. He did when starting very much as the young lady of Dayton, Ohio, did when invited to spend June and July in Toronto. She took her heaviest clothing and her furs—and she was considered in Dayton a normally intelligent girl too. Mr. Dewolfe took his heaviest winter clothes in July to Labrador, "cold and pitiless Labrador" as some poet has called it. But when he reached Hamilton Inlet, which serves to divide that territory from Quebec province, it was 98° in the shade on the ship's deck, and he had to put his wetted handkerchief in his hat to ward off sunstroke. Therefore he thinks people should know that there is real summer up there. Referring to the lumber operations of Labrador, Mr. Dewolfe heard glowing accounts of the quality and quantity of spruce there. While he could not say whether they were exaggerations, he declared that in certain places he saw the biggest logs he ever saw in his life. He tells the Chronicle, that Alfred Dickie of Stewiacke cut about one million and a half feet of lumber last year, and this year he expects to increase that amount, intending to erect another mill there very shortly. It looks as if the interior of Labrador might some day see a wonderful development.

Mr. A. P. Low, of the Dominion Geological Survey Department, has been in Halifax for some time fitting out the sealing steamer "Neptune," for a two years' expedition to Hamilton Inlet (Labrador), and Hudson Bay regions. This exploring party is being sent out by the Federal Government to search for iron ore on the Labrador, to gather data regarding Hudson Bay navigation, and the possibilities of shipping by that route, and to make other researches. Two American expeditions will also visit portions of the great northern peninsula this year. The first is that of Mr. Leonidas Hubbard, of "Outing," whose objective point is the Nauscopee tribe of Indians. This party has already gone north. The other expedition is that of Col. Willard Glazier, who was north last year, and is returning there again this season. He will try to reach the Grand Falls up the Northwest River from Hamilton Inlet. Very few white men have seen these falls, which have been described as exceeding in grandeur those of Niagara.

ROWLEY SENTENCED.

George Rowley, ex-manager of the Elgin Loan Co., of St. Thomas, Ont., who has confessed to having forged, stolen money, and perjured himself, has been sentenced to twelve years' imprisonment in Kingston Penitentiary. The judge, in his address, commented on the fact that while, in meting out this punishment, he had taken into consideration the facts that Rowley had gone on from bad to worse in the hope of repairing his first losses and without the personal gain of one cent, and that he had done all in his power to straighten out matters, yet the prominent position of the criminal, both socially and in the church, would make the result of his crime very far-reaching. Others holding similar positions of trust would have to be deterred from such lapses, at whatever cost to the individual. The reading of the statement made by Rowley from notes in his own handwriting made some dramatic moments in the court-room, and strongly reminds the admirers of Wm. Dean Howell's of certain parts of the "Quality of Mercy." Some passages in Rowley's confession deserve to be committed to memory by many people in the present day of stock

speculative excitement. For example, in telling the story of his first temptation, Rowley said: "In an unguarded hour, I was induced to place a part of this money on an investment of a speculative nature. It appeared so easy to make a little extra money under the circumstances. But, although I did not realize the danger at the time, your Honor will believe me when I tell you I now know that that hour, and not this one, was the most critical one of my life, the parting of the ways, and up to that time the only step taken which I desired to keep secret from those I love best."

He then went on to say how if that first investment had proved a failure he would have been lucky, for he would not have entered the speculative arena again. Unfortunately, however, it proved successful, and that success paved the way to all his after-misery; for in the second attempt to make money easily, which naturally followed the first, he failed, losing all made before and a little more. After that it was the thrice-told tale of further investments to make good the previous losses, of deceitful hope leading deeper and deeper into the mire, of perpetual slavery covering up the tracks of crime, of tortured efforts to keep his face to the world, finally, the breakdown of the criminal—and a weak one withal—before the relentless fate pursuing him. Bearing Mr. Howell's book in mind, we would not say that fact is stranger than fiction, but that the best fiction and real fact bear a wonderful likeness.

HE "WANTED TO KNOW."

A case in which an auditor made an apparently proper objection to expenditure which he could not understand or justify, is related in the August issue of the Incorporated Accountants' Journal, of London, England. The difficulty arose between the parish council of Hawick, Scotland, and its auditor, and the official seems to have justified what in American slang would be called his "kick" about some items of expenditure. Here is the story: At a meeting of the Parish Council a letter was read from the Local Government Board, asking what the council had to say against being surcharged with a sum of £12 10s., to which the auditor had drawn attention, in the event of the board declaring the same to be illegal. One of the items was a contribution of £9 towards the maintenance of the House of Refuge. Mr. J. G. Winning, the chairman, said he was not clear as to whether the Local Government Board had any right to force these matters. There was no doubt of the benefit of the place to the town. The auditor's objection was that the house was used for the accommodation of able-bodied tramps and others who were not proper objects of parochial relief. Before finally disposing of the matter, it was resolved to make a joint representation to the board by the town council and the parish council. The other item was £3 10s., a subscription to the cottage hospital, which the auditor maintained was not for the benefit of the poor of the parish within the meaning of the Poor Law Act, in respect that paupers were not received into the hospital for treatment. The chairman said that assistance was given to those who for the time being were unable to work, and it was resolved to ask the Local Government Board to give the matter further consideration.

FINANCIAL ITEMS.

It is agreeable to read that Mr. Bliss, the Governor of the State of Michigan, declares that he has been wrongly reported as favoring the speedy release from prison of Frank C. Andrews, who wrecked the City Savings Bank, of Detroit, sentenced to fifteen years' incarceration. What he said, in reply to an interviewer, was: "I have been asked on all sides by friends to consider the matter of Andrews' release, but I have told them that I would not consider it until the depositors in the wrecked City Savings Bank, the people that suffered in the dealings of that time and the men who have been trying to straighten out Andrews' affairs, should come in a body and petition for his release." Nor is it true, says the Detroit Evening News, that the Union Trust Co. management desires to have Andrews freed to assist in the elucidation of his affairs or those of the wrecked bank. The shares in which he speculated so heavily and which mostly served to bring about his downfall, Amalgamated Copper Stock, which was quoted as high as 110 some time last year, was last week as low as 38.

The new building on St. James street, in Montreal, to be occupied by the Bank of Ottawa, promises to be a handsome one. The contract for it has been awarded to a Chicago firm; and some of the stone is already on the way, and excavation of the foundations has begun. It is to be ten stories in height. The two lower stories are to be built of Stanstead grey granite, the remainder of grey canyon stone from near Cleveland, Ohio, or similar to the stone of which the Liverpool, London & Globe great office building in the same city is built.

A meeting of the directors of the Canadian Pacific Railway was held in Montreal on the 10th inst., at which some important business was done. For one thing, it was decided to increase the dividend on common stock from 2½ to 3 per cent. for the half year. The usual 2½ per cent. dividend on preferred stock was declared. The results of the railroad's operations for the fiscal year ending June 30th last were: Gross earnings, $43,957,373; working expenses, $28,120,527; net earnings, $15,836,845; other income, $1,286,812; total net income, $17,123,658; less fixed charges, $7,052,197; less amount applied against ocean steamships, $150,000; net revenue available for dividends, $9,921,460.

E. T. Hooley, whose rise to financial notoriety and temporary wealth was a feature of London business circles a few years ago, has apparently "struck bad luck." The British Attorney-General lay has instructed the director of public prosecutions to investigate some of Hooley's transactions as promoter of the Sapphire Corundum Mine, of Canada. In the course of the hearing of a suit to recover money paid in connection with the deals, Justice Darling charas fraudulent and declared "it was a grave reflection on the courts of this country that such a thing could occur in the middle of London. Thimble-rigging on a race course was a simple crime compared with the transactions of these people with millions instead of peas."

A St. Thomas man has reminded the Journal, of that city, that some years ago the Ladies' Aid Society of the First Methodist Church issued a booklet of "Favorite Quotations of Citizens of St. Thomas." In the light of subsequent events two at least are of special interest. The favorite quotation of George Rowley, the self-confessed defaulting ex-manager of the Elgin Loan Co., was as follows: "We live in deeds, not years; in thoughts, not breaths; in feelings, not figures on a dial. He most lives who thinks most, feels the noblest, acts the best." The favorite quotations of A. E. Wallace, president and manager of the defunct Atlas Loan Company, were Macaulay's words: "Succeeding generations change the fashion of their morals with their hats and their coaches; take some other kind of wickedness under their patronage, and wonder at the depravity of their ancestors." Very curious reading this, when we consider how far from their high moral or intellectual ideals these two men were led by following false lights and by confused notions of financial ethics.

LIFE ASSURANCE.

The Sun Life Monthly puts a question pithily when it says: It may sometimes be hard for a man to meet the life assurance premiums as they fall due, but how would your wife meet the bills which would fall in daily should she be left alone?

It is announced that preliminary arrangements have been completed for the annual meeting of the National Association of Life Underwriters, to be held in Baltimore from Tuesday, October 13th, to Thursday, October 15th, next.

A company is being organized in England to insure all forms of motor carriages against break-downs and damages

due to accidents. This is a novel form of accident insurance, but from the increasing use of automobiles in England the promoters think they will have a large field for their special line of work. It is estimated that there are between 6,000 and 8,000 motor cars in use in the United Kingdom. The policy contract will cover damage to the carriage wherever it occurs. Periodical examinations of the carriage will be made, and accidents and breakdowns thus averted. Where they occur the policy will apply.

It is impossible not to admire the extent and vigor of an agency staff of a life company which can write $55,000,000 life insurance in a single month. But this is what the New York Life agents did in July. President McCall and vice-president Perkins have built up an agency system wonderfully well adjusted to the securing of good results without excessive expenditure.

The Equitable Life Assurance Society shows a shrewd appreciation of human nature when it makes rewards, such as trips abroad, one of its stimuli to renewed exertion in the interests of the company. One day last week some seventy of the Equitable Life Company's agency force from Pittsburg arrived at the Windsor Hotel in Montreal, on a two weeks' vacation. Thence they went to Plattsburgh, Lake Champlain, Saratoga and the Hudson to New York. Whilst in Montreal they were in charge of Mr. Edward Schmidt, superintendent of agencies for the Province of Quebec. The trip has been given them by the company as a return for specially good work done by them.

The Modern Woodmen of America, formed at Rock Island, Illinois, in 1883, has grown to be one of the large fraternal societies of the United States. At the close of 1901 it had 631,000 members. It held a convention the other day, when 469 delegates were present, and the question of increasing rates of assessment came up, their present rates being confessedly inadequate. Upon being canvassed, 254 favored an increased rate, but only 171 voted openly for it, because they thought that to raise rates would cause 100,000 or 200,000 members to leave the society. A compromise plan was adopted which is described as removing to a great degree the inequalities of their present, inasmuch as the rates more nearly conform to the risk assumed at each age.

It is not long since we gave a partial list of the many fraternal associations of the United States and Canada, whose names were the more curious and striking. But now we are able to make another beautiful list which seems to us to be almost new. The following organizations are represented at the convention of the "Associated Fraternities of America," in session this week in Montreal: American Ploughmen, Logansport, Indiania; Bankers' Fraternal Union, Cleveland; Brotherhood of American Yeomen, Des Moines, Iowa; Daughters of Columbia, Chicago; Fraternal Tribunes, Rock Island, Ill.; Grand Fraternity, Philadelphia; Highland Nobles, Des Moines, Iowa; Home Guards of America, Van Wert, Ohio; Knights and Ladies of Columbia, South Bend, Ind.; La Society des Artisans, Montreal; Loyal Mystic Legion of America, Hastings, Neb.; Modern Brotherhood of America, Mason City, Iowa; Modern Order of Praetorians, Dallas, Texas; Mystic Toilers, Des Moines, Iowa; Mystic Workers, Fulton, Ill.; National Protective Legion, Waverly, N.Y.; Order of Americans, Greensbury, Pa.; Sons and Daughters of Justice, Minneapolis, Kan.; United Moderns, Denver, Col.; Modern American Fraternal Order, Effingham, Ill.; Fraternal Choppers of America, Des Moines; Equitable Fraternal Union, Neenah, Wis.; Independent Order of Lions, Portland, Oregon; Fraternal Bankers of America, St. Louis. The officers of the association in session at Montreal are: Mr. C. H. Robinson, of Philadelphia, president; Mr. W. R. Edison, of St. Louis, vice-president; and Mr. Edmund Jackson, Fulton, Ill., secretary-treasurer.

The very good impression created by Canadian flour recently at the Osaka Exhibition in Japan is being remembered now, when there is an estimated shortage in the Japanese and Corean wheat crops of about 30 per cent. Canadian dealers are advised to look into the matter.

FIRE INSURANCE ITEMS.

Mr. J. Philip Bamford, of New York, has been appointed general manager for Canada and the United States of La Gardienne Fire Insurance Society of Paris.

According to Mr. George H. Tyson, of San Francisco, the Pacific Coast fire losses for July will exceed one million dollars, making it one of the largest month's losses in the history of the Coast. The increase in Pacific Coast losses to the end of June is $2,500,000 over 1902.

Mr. W. H. Stratton, of Hartford, Conn., manager of the Factory Insurance Association, is ill with Bright's disease, and not expected to recover He recently returned from London, Eng., where he had gone to attend the convention of the British Fire Prevention Committee.

The Alliance Insurance Co., of London, Eng., are applying for power to do business in the State of Illinois. The business of the Imperial Insurance Co., which was recently merged in the Alliance, is in several of the States to be liquidated by the latter's agents in Chicago, Messrs. Lyman, Otis & Co.

It is perhaps nothing more than amusing to hear that in an Ontario community, Trenton to wit, the suggestion has been seriously made, to tax the insurance companies, that they shall help to maintain the fire-fighting equipment of the place. It is possible that these people think as some other people do, that fire insurance is a very profitable business.

The following very neat little story, with a moral, is told by Mr. George W. Dewey, secretary of the Niagara Insurance Co.: There was an old woman who came to one of the company's southern agencies to insure her house and furniture. "We haven't had no insurance fer five years," she explained. "We hev jes' been dependin' on the Lord; but I says to my old man, I says, thet its terrible risky, I seys."

The New York Insurance Press and the Ottawa Free Press are carrying on a controversy respecting the increase of rates in the much-burned capital of Canada. The Free Press seems to think that the companies should stand still with their hands in their pockets and watch without protest a place which boasts of hundreds of acres of lumber piles eating up their hard-earned dollars. An increase of rates to counterbalance in some degree the heightened risk is mercenary, and not to be thought of for a moment, our Ottawa contemporary thinks. Such a position may be generous, but is hardly business.

Reports of one hundred and twenty-eight electrical fires, losses aggregating $471,700, have been received during the last quarter by the Electrical Bureau of the National Board of Fire Underwriters in the United States. The board gives the following summary of fires caused by electricity. Twenty-eight fires were caused by the grounding of circuits, of which thirteen were on awnings, metal work, and roofs of buildings, and ten were on gas pipes. Reports have been received of twenty fires due to crosses of telephone, telegraph and signal wires with high potential circuits. Five fires were occasioned by open link fuses not enclosed in cabinets. Ten fires are reported as due to short circuit in flexible cords. Ten fires were caused by lightning, in four of which the lightning entered over wires, and in two cases over sprinkler pipes. Five fires were occasioned by overheated rheostats. two of which were on electric cars. Three fires were due to overheated pressing irons. Five fires in show windows were reported.

FREE TRADE ZONES IN ITALY.

We have received from the secretary of the Cobden Club what appears to be a circular letter, entitled "Free Trade Zones in Italy." Mr. Harold Cox says: "There is a movement now in progress in Italy which has an important bearing upon the controversy raised by Mr. Chamberlain. At a meeting of the Union of Italian Chambers of Commerce held in Rome, on June 28th and 29th, resolutions were passed demanding the immediate establishment of free trade zones in the chief maritime cities.

The following are the principal regulations proposed: 1. All goods may freely enter these zones without paying any customs duty, and may equally be sent out free of duty if destined for export. 2. The manufacturing and other handling of goods in these zones will be exempt from all customs formalities and duties. 3. The necessary buildings of every kind will be allowed within the zones. 4. Food and drink consumed within the zones will pay the proper taxes. 5. These free zones are to be established solely to favor exportation, and only in those cases in which no harm can be done to the existing home industries. Any goods sent from these zones into the interior of the country will be subject to customs duties under the maximum tariff, augmented by a surtax."

The above summary explains the scheme. The Italians have discovered that duties upon imports make it difficult to do an export trade. The Italian Chambers of Commerce therefore propose that factories and workshops shall be established at the sea ports in zones free from all customs duties. There is already one such zone on a small scale at Genoa. The free area is surrounded with lofty iron railings, and armed policemen are constantly on the watch to prevent smuggling. This will serve as the type for the more extensive scheme now proposed.

"The scheme," comments Mr. Cox, "is chiefly of interest to Englishmen as showing how protection breaks down in practice by its own weight, and how protectionists are driven to all kinds of subterfuges to escape the logical consequences of a false theory. This free zone plan will obviously be injurious to many Italian manufacturers in the interior, for they will be unable to continue—in face of the competition of the free zones—any export trade that they may have already developed."

FOR GROCERS AND PROVISION DEALERS.

Linseed oil, both raw and boiled, has declined in price three cents per gallon. There is a fair demand.

A Toronto company has just received a charter from the local legislature to act under the name of the Ontario Live Stock Company, Limited, capital stock of $300,000.

The Lakeside cheese factory near Harrington, Ont., has been totally destroyed by fire, including a large part of the July make of cheese. The loss was about $2,000, insured.

The Russians are said to be preparing to engage in salmon fishing off the Siberian coast, on a large scale. Canneries will be erected at Pankara and Barankroff Bays, on the Siberian coast.

The growing crop of opium in Turkey-in-Asia is now estimated at not more than 2,500 cases, the smallest yield for fifteen years. Last year it was 10,500 cases, while in 1893 it was only 2,845. Prices are very firm.

The shipments of dairy produce seaward from Montreal last week were large. They consisted of 105,737 boxes of cheese, making the total shipments of this navigable season 1,156,463 boxes, which is 249,000 boxes ahead of last year to same date. The total quantity of butter shipped was 119,444, which is less than in the corresponding period of 1902.

M. Louis Parisot, an eminent French chemist, has discovered a liquid which, he says, will keep eggs quite fresh for a period of twelve years. If he can do it for one year he has fortune enough, but many others have thought they had the trick and failed. Early last year, it is said, he placed a large number of new laid eggs in this liquid, and he took the precaution to get a magistrate to witness the proceeding and to affix to the tank his official seal. At the expiration of twelve months the magistrate witnessed the opening of the tank, and the eggs were found in excellent condition. Four, which were selected hap-hazard from the tank, were at once boiled for eating, and were found to be in first rate condition and of excellent flavor. Later on the inventor had another triumph, some eggs which had been in the liquid for four months were successfully hatched, eight out of twelve which were placed under the hen proving fertile. M. Parisot states that he can preserve a thousand eggs with his preparation for the sum of fifteen cents.

A Yokohama (Japan) report of last month, says: "Like first crop teas, second crop teas are a litle earlier than usual in coming on the market. Owing to dry weather during the flush the leaf is short and the cup character a little earthy. The country merchant, however, has seen the avidity with which first crop teas were taken this year and remembers the extraordinary demand for second crop teas at advancing values last year, but forgets they were needed then to make good the deficiency of a very short first crop. An effort is being made by influential tea men to effect an agreement amongst growers to cease picking August 1st, just after the best of the third crop has been gathered. This is not for the purpose of maintaining prices, but for the ultimate good of the gardens. The steady deterioration in the quality of Japan teas noticed in the past five years is forcing the conviction that the gardens have been cropped too closely.

TRADE OPPORTUNITIES.

The following is a list of enquiries received at the Commercial Agency of the Dominion of Canada at Birmingham from 31st May to 11th July.

Among British buyers, one wants to buy wooden handles for chisels, awls, and other tools; another to buy cider apples. A Liverpool house would buy large quantities of soap-boxes, 14¼ by 11½ by 8½ inches; ends, ¾in. thick; tops, bottoms and sides, ⅜in. thick; sides and ends in one piece, tops and bottoms in two pieces, to be packed in shooks and bundles by wire. Another Liverpool house asks for shippers of mica, plumbago and graphite. Flour merchants ask for 200 to 250 barrels per day of flour from a Canadian mill. A Birmingham house asks for firms in Canada who make roofing materials in galvanized iron, building materials, agricultural and gardening implements, and general hardware for export to South Africa. A firm dealing in salmon, poultry, and game would like to arrange for regular shipments.

A steam plough maker, who has a new plan, wants to dispose of it in Canada, and would correspond with traction engine makers. A firm who are agents in Britain for the Australian woods, karri and jarrah, which are suited for paving, would like to correspond with Canadian firms.

Agents in Canada are wanted by a British maker of paints; of sanitary tubes, firebricks, glazed bricks, etc.; of syringes and horticultural sundries; of guns and rifles; of mirrors; of electroplate wares in the rough; of military specialties.

A firm of British mattress makers would buy from Canada about twenty standards per month of pitch pine scantlings, varied sizes. He seems not to know that Canada does not produce pitch pine. One man asks if cattle are exported direct to South Africa; another as to his prospects of setting up in Canada a factory of spades and shovels. A Canadian asks as to the English market for wood flour, and the purposes it is used for.

Canadian Buyers ask about blades for pen-knives; brass and steel tubes for bedstead making; Russia iron sheets. Canadian Sellers would dispose of wooden handles, veneers, etc.; pork in barrels or boxes; bath tubs and enamel ware; canned salmon; raw furs.

Canadian Agents offer for the following lines of goods: dyestuffs, oils and drugs; rifles, guns, saddlery hardware and cutlery; paints, oils and glues; tanners' supplies and dyestuffs; pig iron, copper, steel. Canadian firm making wagons and dump carts would appoint an agent in Britain. Another desires to buy tapered tubing, to take the place of wooden tongues of wagons.

From the Canadian Government Offices in London we receive the following memoranda of enquiries: A London firm of grain brokers wish to act as agents for a reliable firm of grain merchants in Canada. Names of shippers of Gaspe dried codfish are asked for. A South Africa firm enquires through its English agents about Canadian-made disc ploughs, mealie planters and manna-sowing machines. A Belfast firm desires to represent Canadian milling firms which export flake and cut meal, etc.

The Imperial Institute, London, send us the following enquiries received by the Canadian Section: A company making edge tools wishes to hear from Canadian makers who

can supply hickory handles for same, in quantity. Manufacturers of sauces wish to hear from Canadian firms prepared to take up the sale of their goods. A Liverpool house exporting grocers' sundries and specialties wishes to hear from Canadian importers of same.

—Recent reports speak well of the probable future of Nova Scotia gold mining in several localities. One instance given is that of the Baltimore and Nova Scotia Company's property at Caribou, where a 40-stamp mill has just been put in. Work on that property lately has been confined to the 800-foot level, though the company has levels at every 100 feet. Three hundred and fifty tons of ore lately taken from the former depth has been found to contain 32 dwts. per ton or a total yield of $11,200. The ore is expected to increase in richness the deeper it goes, and the company proposes shortly to deepen the level to 1,000 feet.

—The amount of shipping which passes through the Canadian Soo canal in the four months ending with July 31st last, was 2,305,118 tons, compared with 2,155,696 in the same period of 1902, and 1,331,011 in 1901. The freight carried amounted to 2,602,496 tons this year, 2,174,688 in 1902, and 1,663,358 in 1901. While this is a good showing, the relative increase, comparing with the American canal, is still better. In 1901, the Canadian Soo carried 2,872,516 bushels of wheat eastward, or 21.14 per cent. of the whole, while in 1903 the quantity was increased to 14,710,655 bushels, or 57.55 per cent. This year nearly 46 per cent. of the whole quantity of flour went by way of the Canadian canal, against 20 per cent. only in 1901. The eastbound freight travelling through the United States Soo canal shows a decrease.

—It was stated last week by Mr. L. B. McFarlane, superintendent of the Bell Telephone Co., that that company has not less than twenty-seven miles of conduit in the city of Montreal containing 648,266 feet of duct, besides another 100,000 of duct in the branches leading into lanes and other points of distribution. The company has found that while, generally speaking, the original cost of laying a conduit is five times as much as one of poles and wires, the expense of maintenance is only about 15 per cent., owing to the immunity from storms and other sources of damage existing above ground. The principal danger and cause of deterioration in underground stock so far, Mr. McFarlane says, has been found to be from electrolysis, as a result of so much electric current going back from the trolley car tracks to the power-house. The current follows the lead coverings of the telephone cables, and where it leaves the cable electrolytic action sets in, resulting in the lead covering being eaten off the cable. Only the watchfulness of the company's engineers prevents serious damage in this connection. The most serious objector to the use of a common conduit by low potential concerns like telegraph and telephone companies and high potential electric light and power systems, is well known to be the difficulty in maintaining complete isolation between the two, particularly in the manholes.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, August 13, 1903, compared with those of the previous week.

Cities	August 13, 1903	August 6, 1903
Montreal	$21,851,027	$19,449,841
Toronto	14,570,710	12,961,870
Winnipeg	4,016,099	4,305,312
Halifax	1,995,560	1,958,965
Hamilton	1,095,150	1,063,977
St. John, N.B	1,185,601	1,127,119
Vancouver	1,322,470	1,472,349
Victoria	837,184	645,364
Quebec	1,385,820	1,851,156
Ottawa	2,073,687	2,161,812
London	816,706	911,189
	$51,150,014	$47,915,954

Cheap Electric Power
Free Factory Sites
Low Taxation

PETERBOROUGH, Ontario,

offers the above and many more advantages to manufacturers who are looking for sites for their industries.

When looking over Canada a few years a representative of THE ROTHSCHILD BANKING HOUSE STATED THAT PETERBOROUGH was destined to be one of the greatest manufacturing centres of the Continent on account of its Water Powers, Shipping Facilities and Natural Resources, Peterborough's great industrial growth during the last two years shows the coming fulfilment of the Rothschild prediction. Thousands of horse power are available for large or small users.

THE MUNICIPAL CORPORATION OF PETERBOROUGH

Is offering valuable inducements to responsible manufacturing concerns locating there.

Low Freight Rates to Manitoba. — — — — **Low Export Freight Rates.**

PETERBOROUGH is on the Canadian Pacific Railway, Grand Trunk Railway and the Trent Canal. Is seventy miles east of Toronto on the route to Montreal and Ottawa, on the main line of the Canadian Pacific Railway; the Grand Trunk Railway has several branch lines radiating therefrom; the Trent Canal, now rapidly approaching completion, will connect Georgian Bay and the Upper Lakes with Lake Ontario, by short route navigation to the seaboard—a steam tug canal with barges three times the capacity of those of the Erie Canal. Has, with its suburbs, a growing population of 15,000. Peterborough has recently secured many new factories, three of which are the largest of their kind in Canada. Apply to

Its Success Tells All.

—The New York Tribune says that ten airship builders intend to compete for the $100,000 prize offered for aerial cars at the St. Louis Purchase Exposition. These machines differ widely in many features. A mining engineer of Monte Vista, Col., is building a machine of aluminum, 30 feet in diameter, with a length of 150 feet.

—A strike of bartenders in a whole district is not exactly a trivial thing. The bartenders of Fernie are out on strike in an organized body for a fixed wage scale of $70 a month and board. The strike threatens to extend to all the Kootenay towns. At present the Fernie hotel proprietors are themselves serving customers.

—Two trade excursions arranged for by the wholesale trade bureau of the Detroit Board of Commerce are attracting unusual interest. Some 50,000 circulars have been sent out inviting country customers of the wholesale trade. These excursions are of interest not only to the wholesale trade, but are of value to all classes of business men in Detroit. President C. D. Delamater and Secretary A. D. Mitchell, of the bureau, are a special committee on the matter.

In Halifax, the wholesale liquor and grocery business of Dillon Brothers has been sold to H. B. Mackasey and D. C. Woods, who are to conduct it under the firm name. Mrs. P. Dillon, who started the business on a small scale about fifty years ago, and who continued until a few days ago to retain her interest therein, owing to the death of her sons, now retires. Mr. Woods was thirty-one years in the employ of Dillon Brothers, and Mr. Mackasey about ten years, so they know the business well.

—The bright little 3-year old daughter of a business man who had kissed him good-bye in the morning said, "Pa, where are you going?"

"To the office," he replied.

"What for?" asked the little miss.

"Oh to make bread and butter for my little girl."

As he descended the steps she turned to her mother and whispered, "Oh ma, I do so wish he would make cake instead."

According to the Montreal Gazette, the Londonderry Iron & Mining Company, at Londonderry, Nova Scotia, has its plant almost completed, and work will begin on or about the 10th of September. By that date furnace A will be ready and will have a capacity of 150 tons of pig iron daily. The plant will include the following: Three hot blast stoves, six boilers, two blowing engines, one hoisting engine, two stone and ore crushers. The furnace is to have the following dimensions: Height, 75 feet; back, 17 feet; hearth, 10 feet; stock line, 11 feet.

WHY SO SHORT?

The following comment from Commercial Intelligence, London, Eng., is one of the very few adverse criticisms we have noted respecting the forthcoming Dominion Industrial Exhibition: "The projectors appear to have made the same mistake as some promoters of similiar undertakings continue to make in England, that is to say, their aims are great, but the general arrangements are not in consonance with them. The object of

the exhibition has been expressed as 'to impress upon Canadians as well as visitors from other countries the greatness and variety of Canadian resources and the rapid development of every department of industry.' But as the exhibition is to remain open for fourteen days only there is not much inducement for manufacturers to incur heavy costs in forwarding exhibits. No doubt very interesting collections will be brought together, and visitors who happen to be on the spot will be able to gather useful information; but surely Ontario could and should do something better than seems likely to result from a fourteen days' run."

MONTREAL MARKETS.

Montreal, August 12th, 1903.

Ashes.—In potash there has been further decided advance, owing to some enquiry from England, and the dearth of receipts. For first pots the quotation is now $5.75 to $5.80, with seconds ranging about $5.25. Of pearls there are only two brls. in store, and no recent transactions are reported.

Dairy Products.—The cheese market has developed quite a fair degree of advance since last report, with finest Ontarios generally quoted at 9⅞c., though some holders ask 10c. Township is, if anything relatively stronger than Ontario, and is quoted at 9¾ to 9⅞c., while Quebec goods are quoted at 9½ to 9⅝c. The higher prices have somewhat checked the demand. The butter market is a dull one, with little present request from English buyers, and 18½c. is about the outside limit for finest Townships creamery. Last week there were shipped 105,737 boxes of cheese, making total shipments for the season to date 1,156,463 boxes, some 249,000 boxes ahead of the same time last year. Of butter 21,549 pckgs. were shipped, making the total to date 119,444 pckgs, some 96,000 pckgs. less than for same period of 1902.

Dry Gods.—A good many travellers are taking their holidays just now, but those who are out are doing well, and the demand for fall goods is reported active from all sections, and the wholesale warehouses are all displaying much bustle. In city retail quarters trade is dull, and it is reported that there is a much larger number of people out of town than usual, though whether they can all afford the luxury of a costly summer vacation is another question. General remittances are hardly so free, but payments on the 4th inst., which was a fairly heavy day, were well met, some of the larger houses reporting 65 to 73 per cent. of customers' paper as being met.

Groceries.—Business is seasonably quiet, and there is little of special interest in the situation. Teas are again quieter, and cables from primary points indicate no changes. The refineries report continued good demand for sugars with prices steady at $4.15 for standard granulated, and $3.45 the lowest for yellows, these being brl. prices, bags 5c. less. Molasses is very firm at 39 to 40c. for Barbadoes. Syrups are in fair request at 2½ to 3c. per lb. The canners' combine have made a quotation for wax beans at 82½c. to the trade; prices of tomatoes and corn are not yet fixed.

Hides.—Nothing that can be called new has transpired since last report. Competition between hide buyers is still keen and prices paid butchers range from 8½ to 9c. per lb. Calfskins remain steady at 11 and 9c. per lb. for Nos. 1 and 2 respectively; lambskins 45c. each.

Hardware and Metals.—Merchants are hardly so busy as they were, but report a good movement, i.e., for August, and the larger heavy metal houses also report satisfaction with the demand, considering the time of the year. The decline in the price of bars referred to last week is confirmed. Ingot tin is stiffer at 31½ to 32½; copper weaker at 14¼c.; lead rather firmer at $3.05; spelter steady at $5.75; antimony, 7¾ to 8c. Blacks sheets are reported a little firmer in Britain, with local quotations at $2.40 to $2.45; Canadas, $2.50; Ternes, $7.25. In other lines no changes are noted.

Oils, Paints and Glass.—Trade in these lines has now assumed a quiet phase, as is usual in August. Linseed oil is reported a little firmer in London to-day, but not enough to effect local prices, which rule easy. Turpentine is also a little firmer in the South. In other lines there is nothing new. We quote as follows: Single barrels, raw linseed oil, 52 to 53.; boiled, 55 to 56.; net, 30

days, or 3 per cent. for 4 months' terms. Turpentine, 75 to 76c. single bbl. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gal.; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $5 to $5.15; No. 1, $4.75 to $4.80; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

Wool.—Importers of raw wool report a comparatively light business, and since the reduction on yarns to 15 per cent. millmen are using a much larger proportion of imported yarns for the manufacture of tweeds, etc., instead of making the yarn themselves. Capes are quoted at 18 to 20c., and some business is reported in Natals at 26c. Fine B. A. scoured would cost about 45c., and ordinary 30 to 35c. per lb.

TORONTO MARKETS.

Toronto, August 13th, 1903.

Chemicals, Drugs, Etc.—Opium and quinine both continue firm, and the former still has a distinctly upward tendency. General trade is moving fairly freely, and prices are well maintained.

Dry Goods.—This being the holiday season both for travellers and for the retail merchants, the volume of business has not been particularly large, though fully up to the average for this time of the year. Prices of all staple goods are firmly maintained. Payments have been good.

Flour and Grain.—The flour market is steady with an inclination upwards. The price of 90 per cent. patents is $2.87½ to $2.90 in buyers' bags, middle freights, with extra choice brands a few cents higher. Manitoba flour is steady. Not much business is being done in oatmeal. Bran and shorts are steady. For wheat the demand is a fair one, but prices remain unchanged and quotations for other grains are likewise unaltered.

Fruits and Vegetables.—The fruit trade has had an active week of it, and while offerings have been large, the demand was sufficient to dispose of it without any dragging. Raspberries are about over and have sold for 7 to 7½c. Thimbleberries are becoming more in evidence. Apples, too, are becoming quite plentiful, and prices have dropped to about 13 to 20 cents per basket. Early peaches are coming in in more liberal quantities. They sell around 20 to 30c. per basket. Canadian tomatoes still fetch 30c. per basket, or a little more, they are rather slow in ripening this year. Cukes are 15 to 20c. per basket. California fruits are a little higher in price, in view of smaller arrivals.

Groceries.—Sugars have made no further change, and the movement is rather slow. Teas in the London market—that is Ceylons and Indias, for Chinas cut comparatively little figure there nowadays—are decidely strong in all grades. Here, however, the tea trade is very quiet and buyers hold aloof. It is remarkable indeed to what an extent Canadian tea buyers can hold back on a rising market. In canned vegetables, peas are the only new goods coming into the market yet. In the other lines, prices remain nominal. Opening prices for dried fruits have been fixed in California, but it is too early as yet to forecast as to what direction the market will take. Buyers and sellers hold apart for the present. General trade is not very brisk, travellers being on their holidays. A fair sprinkling of mail orders continues coming in however.

Hides, Skins and Leather.—A steady market for hides prevail, under fair receipts and average demand. Lamb and calfskins keep steady. Tallow is still dull. Leather conditions have improved somewhat and more enquiry is noted.

Live Stock.—Trade at the cattle market this week was duller. Few export cattle offered, but prices dragged as vessel space is short. A good demand was noted for butchers' cattle, but good animals were scarce. Stockers and feeders were not plentiful, nor was the demand good. Milch cows were quiet.

Wool.—We hear of no sales for export and trade is very dull. The ideas of holders of fleece and buyers are divergent. Pulled wools are steady.

What Probate Reveals

Hundreds of men deemed wealthy die every year poor, leaving their families penniless.

To avoid so great a calamity take out a policy, while in good health, in

Head Office - WATERLOO, ONT.

The Mutual Life OF CANADA

Its policy-holders constitute the Company, elect the Directors, control its funds, and receive all the profits. A policy in it pays.

The Government Report Shows

That the Canada Life Assurance Company had a larger amount of New Business paid for in Canada in 1902 than any other native Company. In this, as in other respects, the Repor places

The Canada Life First.

The Sun Life of Canada is "Prosperous and Progressive."

Even among the many record-breaking years the Sun Life of Canada has had, 1902 takes a place in the front.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	660,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

SOME MEN PAY

$10,000 for an expert to manage their advertising. There are others who pay $5.00 for an annual subscription to Printers' Ink and learn what all the advertisers are thinking about. But even these are not the extremes reached. There are men who lose over $100,000 a year by doing neither one.

For sample copy send 10 cents to PRINTERS' INK, No. 10 Spruce St., New York City.

Mercantile Summary.

For the past three years a small business in clothing and dry goods has been carried on by M. Goldenberg, at Grande Mere, Que., but his assignment is now noted,

A Syrian, named A. Salhani, who for the past two years has carried on a small business in groceries and fancy goods in Montreal, has assigned to G. A. Stiles.

A grocer, named J. D. Pilon, has been in business in Montreal about two years. Some few months ago he decided to get married, taking money out of the business for house furnishings etc., and now he has decided to fail, with his wife figuring as a creditor for $3 000 and a relative for other $1,300, total liabilities being $6,600.

Upon the demand of his father, N. Trudel, an assignment has been made by Louis Trudel, who is a hardware retailer in Montreal. Liabilities as filed in court, are shown at some $33,000, his wife figuring as a creditor for some $10,000, under her marriage contract. He has been in business about seven years, but is not considered to have shown good management, and the account has been described as a dragging one.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a 20 per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Mercantile Summary

WE are told that E. B. McDermid, chartered accountant, of Nelson, B. C., has sold a half interest in his brokerage and insurance business, to Chas. F. McHardy, and the new firm of McDermid and McHardy has purchased the business of Harry H. Ward, and are making a live bid for business in Nelson.

THE Allan Steamship Company is having built a new Atlantic liner, longer than any vessel at present running between Montreal and Great Britain. It is to be 20 feet longer than the Bavarian, the Allan Line's present premier steamship, and will be one foot wider. She will be capable of averaging seventeen knots across the Atlantic, thus landing the mails between Father Point and Moville in about five days and eighteen hours.

THE insolvency is noted of J. L. Aubert, & Co., general dealers at Thetford Mines, Que. They bought in the autumn of 1900 the insolvent stock of Mrs. J. Pelletier, at St Samuelde, Gayhurst, with whom Aubert had formerly clerked, and removed it to present location. The firm have been reported slow pay almost all along, allowing themselves to be sued at times for petty amounts. The liabilities are stated at $8,334, with estimated assets of $5,330.

AN assignment has been made by G. E. Tourigny, saloonkeeper and bottler at Victoriaville, Que. He was originally a clerk in the local branch of the Jacques Cartier Bank, and about two years ago succeeded to the bar business formerly carried on by his mother, subsequently going into the bottling business. His habits have, it is reported, not been such as to insure success in any business. He is said to owe $7,629, with assets of only $2,400.

THE Belleville Portland Cement Co., Limited, is the name of a new concern which has received a charter from the Ontario Legislature. Its authorized capital stock is $2,500,000 and its aim is to manufacture, buy and sell, and to otherwise deal with portland cement, marl, kirselguhr clay, putty, whiting, bricks, lime, paints, fertilizers, deodorizers, drain and other tiles and stone and gravel and artificial stone, also to acquire lands, generate power, and construct trainways, pipe lines, docks, elevators, etc. The provisional directors are, James S. Lovell, Ernest W. McNeill, Richard Richardson, Stanley R. Wilkie, and Miller Lash, of Toronto.

THE Municipal Reform Association, of Montreal, has passed resolutions, favoring, among other things, the civic ownership in Montreal of conduits for underground wires. A resolution was adopted, which strongly urged the city to make no further contracts with the Light, Heat and Power Co., till it is established that light cannot be purchased as cheaply or more cheaply elsewhere. A civic incline railway service to the mountain top is advised, and lower rates to St. Helen's Island are also called for.

Dividends for the half-year ended 30th June, 1903, have been declared as follows:—

On the Preference Stock, two per cent.

On the Common Stock, three per cent

Warrants for the Common Stock dividend will be mailed on or about 1st October, to shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Thursday, 1st October, to shareholders of record at the closing of the books at the Company's London Office, No. 1 Queen Victoria Street, London, E. C.

The Common Stock Transfer Books will close in Montreal, New York and London, at three p.m., on Tuesday, 1st September. The Preference Stock Books will also close at three p.m., on Tuesday, 1st September. All books will be re-opened on Thursday, 8th October.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal, 10th August, 1903.

Mercantile Summary.

THE output at the Crow's Nest Pass collieries has increased largely of late. For the week ending with the 14th inst., the daily average was 2,770 tons, while last year in the corresponding week it was only 796 tons.

THE Buss-Gray Molybdenum Mining and Reduction Co., of Ontario, Limited, of which Mr. W. J. R. Gray, of Brantford, Ont., and a number of Buffalo capitalists are at the head, has received a charter. Its authorized capital is $1,000,000, and headquarters at Fort Erie.

THE Metropolitan Stock Exchange, a corporation with a Massachusetts charter, has received permission to sell stocks, and do a commission business in bonds, in Ontario. It will not do a banking business, nor will it be allowed to employ a greater capital in this province than $100,000.

THE Connell Coal Company, of Scranton, Pa., which recently bought the mines of the People's Coal Company, has now bought the latter's business in Toronto, and will carry it on under the management of Mr. Ed. Wheeler. The charter of the People's Company has been cancelled by the Lieut-Governor-in-council.

THE R. & O. Navigation Co.'s steamer "Montreal," which was burned some months ago, is to be rebuilt. The old hull will be taken to Levis, and overhauled in the dry dock there, after which it will be taken to Sorel and the upper portion of the ship built in the company's shops, after the same design as that of the burned vessel.

THAT well known prospector, traveller, and talker, J. B. Carlile, has reached Toronto again, and is to be seen in the business quarter with his pockets and his black bag bulging with papers. He tells us of various schemes of fishing, etc., that he has floated in the far West, but what he is trying to float now, is a coal deal. According to his scheme, parties (himself included) have bonded twelve square miles of farm land around Comox, which he says is surrounded by the Dunsmuir coal property, and he thinks there is millions in it as a coal proposition.

MR. THOS. SOUTHWORTH, director of Immigration and Commissioner of Forestry for Ontario has just returned from a trip through the Temiskaming district. Settlers, he says, are not pushing farming much, as they are paying more attention to their timber, which yields them a good profit. They are taking advantage of the regulation which gives permission to the settler who has been on his land six months, and has two acres under cultivation to cut all timber on his holding but pine. Three large firms have already paid out $175,000 to these settlers for timber, which includes spruce, tamarac and balsam. The Eddy Company purchased this year 20 000 cords of pulpwood in the district, all but 3,000 of which was secured from the settlers.

THE report of the finding of platinum, near Wabigoon, Ont., is confirmed from expert sources.

THE New Brunswick Electric Telegraph Company held their annual meeting at Rothesay, last week, and declared a dividend of 4½ per cent. for the last six months. The old board of directors were re-elected, and at a later meeting Louis J. Almon was elected president and D. C. Dawson secretary.

A BRITISH COLUMBIA dispatch says that bricks of gold have been made from the Waterloo mine, in Camp McKinney, during the past forty days, which total in value nearly $8,000. The mill is running with five stamps, and treating about twelve tons per day. In addition to the gold brick, $3,630 has been received for shipments of high-grade ore to Trail.

Mercantile Summary.

A BRIGHT side-light on the present state of prosperity in this country is cast by the fact that last week in the province of Ontario not a single business failure was reported, and this week only one.

THE Marstrand Company, Vancouver, are about to make additions and improvements in their brewery at a cost of $20,000. A two-story addition for storage purposes, and a 20-ton ice-making plant will be erected.

THE water board of Windsor, Ont., has decided to purchase a new pump from the Snow Pump Co., of Buffalo, N. Y., for $17,619. The pump is guaranteed to supply 5,000,000 gallons of water in twenty-four hours.

MESSRS. Flavelle and McLaughlin, of Lindsay, Ont., are contemplating the erection of a large flour mill at Fort William, Ont., and are carrying on negotiations with the council of the latter place, having that aim in view.

THE yearly statement of the Grand Trunk Railway, published this week in London, states that the net receipts for the year just passed amounted to £783,000, and the surplus to £254,000. The sum of £5,000 is carried forward, and full dividends on guaranteed first and second preference stocks declared.

A RAILROAD running out of Chicago, the Great Western, has now begun to issue a mileage book at the straight two cent rate, upon which the purchaser or any other person, may ride. It is believed that other lines centering in that city, which have for some time past given a non-transferable book, will follow the Great Western's example, which is said to be proving very profitable.

THE circumstances surrounding the failure of E. Fair & Co., who kept a general store in Collingwood, Ont., are somewhat tangled. The firm is a successor to Melville Fair & Co. It seems that the late T. W. Fair left an estate valued at $75,000, half of which was to be divided between five or six children, and the other half was to go to his widow, Elizabeth Fair, who on September 1st, 1885, was regarded as sole owner of the business. In February, 1897, a surplus of $56,000 was shown over liabilities of $23,000. For several years past they have held considerable unremunerative real estate. They have been carrying a good sized stock for which for some time past they have shown considerable disposition to get behind in payments; and have not been forward in making a statement as to their position. They have now assigned. The liabilities to the trade are said to be $12,000 to $15,000, but will probably be found to be more. Besides this, the estate of the late T. W. Fair may claim $30,000 or $40,000, which sum, it is said, has been used by the executrix in the business contrary to the provisions of the will. A number of prominent houses, chiefly of Toronto, are interested. A meeting of creditors is called on the 31st, inst.

LIMITED,

Manufacturing and Wholesale Stationers.

43 to 49 Bay Street, Toronto.

Mercantile Summary.

THE Vancouver, B. C., Electric Co., has begun work on its new power house on Lake Beautiful. Two transmission lines are being constructed, either one of which will be sufficient to supply the immediate wants of the city, thus insuring continuity of service, in case of difficulty with either circuit.

SEVERAL of the large state quarry concerns, in Wales, are reported to be planning to move to Newfoundland, as the former have become almost exhausted except for deep mining. Welsh slate has been known as the best in the world, but experts who are prospecting and working Newfoundland beds on Trinity Bay and Bay of Islands, say Newfoundland slate is superior to Welsh, besides being easier to quarry.

THE syndicate of Hamilton, Ont., capitalists, known as the Hamilton Brewing Association Limited, has succeeded in closing the several deals required in order to take over the three local brewing establishments. The common stock issue of the new company will be about $600,000. Already the price of beer has been increased by $1 per barrel. and already, we understand, there is talk among hotel men of erecting a rival brewery, and selling beer at the old figure of $4.50.

THE following is a list of patents recently granted to Canadian inventors in Canada and the United States; Canadian—G. H. Layng, nut locks; E. Myers, kindergarten apparatus for teaching musical scale construction; E. R. Marshall, pool ball rack, and registers; R. Porter, combined hay, grain and stock rack; E. R. Marshall, pool game racks or triangles; E. R. Marshall, pool ball racks and registers; J. Stevenson progressive lumber drying kilns; W. S. McLeod, pump valves and valve seats; W. Lilly, bag holder; E. Morton, kettles, or other vessels for cooking food by boiling; W. J. D. Cummings, bag fasteners; J. F. Templeton, pneumatic stackers; J. J. McLean, cultivators and seeders; J. Coulter, collapsible packing cases; E. V. Labonte, painting and cleaning apparatus; J. G. King, grain dryers; F. A. Demers, knitting machines; R. E. Painchaud, combination child's table and baby walker; S. B. Paterson, card cornering machines; C. E. Getz, time indicating device. United States—W. T. Bennett, compound steam engine; J. G. Elderken, raft; J. E. Fortin, thermostatic alarm; D. R. Gardiner, traction engine platform; E. Hendenstrom, recording compass; A. L. Schram, covers for jars or analogous vessels; H. Spurrier, trolley; H. S. Thornton, vapor burner; H. Tolcher, monocycle; T. Buchanan, railway tie; E. Dawe, sleeping berth; A. J. Gilmour, sectional book case; W. Hamilton and W. Holme, automatic driver brake retainer; G. H. Laying, nut lock; W. J. Linton, controller for hydraulic air compressors; C. B. Mansell, rein holders; D. A. Poe, linotype machine.

Mercantile Summary.

WHITBY, Ont., citizens have carried a by-law to spend $65,000 in taking over the local electric light and waterworks systems and running them themselves.

ON Friday last, the ratepayers of Cayuga voted on a by-law to loan $8,000 to aid a tannery, glove and suspender factory. The by-law was carried by 118 to 12,

MR. JAMES Ross has resigned from the presidency and directorate of the Dominion Iron and Steel Co., in view of the negotiations now going on respecting the relation of that company with the Dominion Coal Co.

ON the 18th inst. a fire took place in Hespeler, Ont., in the new Henry block, the largest business building in the town. The chief damage was suffered by Keeler Co., dry goods, loss $5,000, insured total loss about $10,000. On the same day, fire broke out in the Great Northern Railway's workshops, on the Louise embankment Quebec. The machine shops and several cars were consumed. The loss is between $60,000 and $70,000, fully covered by insurance.

THE Peterborc Hydraulic Power Co., of Peterboro has placed a contract with the Westinghouse Electric & Manufacturing Company of New York, for a considerable quantity of equipment to be installed in its new power house on the Otonabee River. The power will be utilized to drive the mill of the American Cereal Co., owned by the Quaker Oats Company in Peterboro, and also to operate several other manufacturing plants in the town, besides the Peterboro Light & Power Company. The contract calls for a 1,500 kilowatt generator, to operate at 2,240 volts, 60 cycles, 150 revolutions per minute, to be directly connected to water wheels; also two 125-volt direct current, direct coupled exciters of 75 kilowatts capacity each, together with switchboard consisting of a large generator panel and two exciter panels.

WHAT A BUSINESS MAN OUGHT TO BE.

National Association of Credit Men.

The Right Reverend Boyd Vincent, Protestant bishop, in addressing the National Association of Credit Men, took for his subject: "What a business man ought to be."

Of course, for me to undertake to discuss such a subject from a purely business standpoint would be an impertinence. It would be "carrying coals to Newcastle" with a vengeance. For you could all probably give me pointers on such a point of which I never dreamed. But looking at the subject, not so much from the business standpoint as from the moral standpoint; not so much in the light of mere business success as in that of business character; not so much with regard to what a business man can make as to what he ought to be—then,

perhaps, a minister of the Gospel can talk about that with some propriety.

And the first thought which occurs to me is the value of what I may call Self-Respect in Business. I once heard a man can't believe in other men, it's people to believe the Gospel; and his answer was, "First believe it yourself." So, if a business man wants other people's respect, he must first respect himself. In other words, it is not enough that he should be honest simply because "it's the best policy," and because he wants to keep out of the sheriff's hands, but because he is too honorable a man, because he has too much respect for himself—for his own manhood—to stoop to what is even dishonorable and mean, to say nothing of what is dishonest. Perhaps a man doesn't realize at first how important a factor such self-respect is in mere business success.

But, then, there's another side to the matter. If a man wants other people's respect, he's got not only to respect himself, but he's got to respect other men, too. When I hear a man say that he's lost all faith in the virtue of women, I not only wonder what sort of a mother and sister and wife he has had, but I know instantly what sort of a man he is himself; and I wouldn't touch him afterwards, in any relation in life, with a ten foot pole. And so, if you ever hear a man say that he no longer has any faith in men's business virtue and see him act as if every other man was a scoundrel until he is proved innocent—I say, don't you ever trust that man again in business matters. He stands instantly self-condemned. For if a man can't believe in other men, its because he can't believe in himself. But when he knows that he not only can be, but is, an honest and honorable man himself, and demands that others shall believe that of him, then he will be just as ready to believe as much of other men, too, until he is compelled to believe the contrary. Undoubtedly, there are scoundrels and dead beats in the business world, just as there are in the ministry, and in every other relation in life; and because "credit" is so indespensable in the modern business world, such an association as yours for self-protection is a clear necessity. But what I want to beg of you is not to make exceptions the rule, and not to let any number of scalawags destroy your faith in the honor and trustworthiness of men as a whole.

The last thought is the value of Good Manners in Business. I believe in making money—righteously; and I believe in spending it—conscientiously and nobly. But only think what the dangers are in making it. Think how the spirit of selfishness it engenders can utterly per-

vert a man's whole nature and disposition. Think how many a man, who is the kindest father, and best neighbor, finds himself in business shriveled up into a narrow and hard man and degenerated also into a mean and unmannerly man. But why, just because a man is a busy and anxious man, should he think himself justified into being a ruffian and a brute towards his employees or towards other business men? I have known men, and so have you, men otherwise highly respected for their ability and character, who have utterly ruined themselves in business by their roughness and profanity. You wouldn't stand such things for a minute from your own employees or from other business men. Why should you expect them to stand it from you? To say nothing again of your self-respect, never forget what a good investment there is, even in business, in "that grand old name of gentleman."

CONGRESS OF CHAMBERS OF COMMERCE.

This week's assemblage in Montreal of the delegates from all the British commercial world to the Congress of Chambers of Commerce is an occasion of serious import to the Trade of the Empire. In numbers this first gathering in a colonial city surpasses any similar previous gathering of the kind. And the spirit of it has thus far been shown to be eminently fair, when the divergent views of the delegates are considered.

The Canadian speakers struck a firm note of loyalty, and even aroused enthusiasm by declaration of the principle that the colonies should assist the Empire in providing for their defence. They were not so successful, however, in getting the Congress to accept their view of Imperial reciprocity, which is the subject creating by far the most discussion. An influential section of the Congress, namely, the majority of those from the United Kingdom, sees in this a violation of the doctrine of free trade, and cannot be got to believe that any results will flow from its adoption which can compensate for the addition of a penny or two per bushel to the price of wheat in England. Apparently they flout the possibility of so increasing industrial activity in a country that larger wages can be paid and a trifling increase in the price of the loaf neutralized. Yet this very principle they will find is tenaciously held and its working demonstrated by publicists in the United States and other of Great Britain's industrial rivals. Indeed it was illustrated in the anecdote related by Mr. George Hurst, of the Bristol Chamber.

Said Mr. Hurst:

A certain man from Connemara came down to ask me for work. He got a job by which he was able to earn from twenty-three to thirty shillings a week. After working three or four weeks, he went one day to a man who dealt in eggs and groceries and such things, and he said: "Well, now, Mr. Graham, what is the price of your eggs?" and Mr. Graham said, "They are thirteen for a shilling." "Why," exclaimed the man in astonishment, "in Connemara we can get eggs at thirty-six for a shilling." "Then why didn't you stop there?" "Because I couldn't get the shilling."

The gentleman who tells this story was himself trained in the British free trade school, but is open-minded enough to see that while Britain has to-day got free imports she is very far from having free trade. There are many, however, who cannot contemplate any change in England's attitude, and who are made to shudder, as Sir William Holland admitted he "well nigh shuddered," by the bare mention of any change in fiscal relations with the colonies lest it might provoke a tariff war between the United Kingdom and the United States. Hence it must be a matter of great difficulty to reach a resolution on Imperial Reciprocity which can be subscribed to by all. A word from India in connection with possible grain duties proves of interest. It was stated by Sir Edward Buck, delegate from the Cawnpore Chamber, that "any encouragement which could be given to the export of food grains, especially wheat from India, was of big value to that country."

And it is significant to find in yesterday's cablegrams Sir William Harcourt writing to the Times to say: "Without a taxation of food there can be no colonial preference; without colonial preference there can be no stable alliance of the colonies; without loyalty on the part of the colonies the fabric of the Empire would be dissolved."

So engrossing has been the question of the fiscal policy resolution, the carrying of which is (on Thursday) freely predicted, that other subjects debated perhaps failed to receive due attention. Fast steamship service between Canada and the United Kingdom was the subject of several resolutions, but the one moved by Mr. Robert Reford, of Montreal, and seconded by Mr. J. E. Dewolf, of Halifax, was given a general tenor. Namely that it is important in the general interest that the United Kingdom and her colonies should adopt a policy to secure and retain lines of steamships for fast mail service as well as for the "development and control" of trade between the colonies themselves and between them and the Mother Country. A strong plea was made for the Halifax and Galway route, as offering the shortest sea voyage between the Dominion and the British Islands. Mr. Reford's views upon this route have already been made known to readers of the Monetary Times. They were supplemented by Mr. Dewolf and by members of the Old Country delegations, who dwelt upon the importance

in these modern days of the fastest possible sea communication.

The metric system of weights and measures received quite prominent notice, its adoption, and not only its adoption but its compulsory use in the United Kingdom, being suggested by a resolution emanating from the Birmingham Chamber. It is significant that so large a manufacturing centre as Birmingham, and one doing so large a business with foreign countries as exporter, comes forward with this proposal. Those who think that, whether on this side the Atlantic or the other, the metric system is a minor matter for British, or American, or Canadian export merchants to consider, may learn from the resolution offered and the unanimity with which it was adopted, what is thought by world-wide merchants of the convenience to a large proportion of foreign traders of this system. The resolution is as under:

That this congress, having had under its consideration the following resolution, adopted at the conference held in London during the month of June, July and August, 1902, between His Majesty's principal Secretary of State for the Colonies and the Prime Minister of the self-governing colonies of the British Empire namely:

"That it is advisable to adopt the metric system of weights and measures for use within the Empire, and the Prime Ministers urge the Governments represented at this conference to give consideration to the question of its early adoption."

Hereby expresses its hearty concurrence therewith, and urges upon the Government of the United Kingdom the necessity for legislative measures being taken in the interests of British trade and commerce to make the use of metric weights and measures compulsory.

The general tone of the speeches of Monday to Wednesday was, it must be said, worthy of the occasion. Some of the addresses made bore a warmth of friendliness and of loyalty to the Empire, perhaps unexampled in a commercial assembly. But mere eloquence—though it was offered in plenty—did not captivate these hard-headed and often blunt-spoken representatives unless there was behind it good sense and practical proposals. And to certain of the delegates any proposals that bore even slightly a protective character were manifestly repugnant. But the interchange of views was in a high degree educative and calculated to broaden narrow views and to dispel ignorance of each other's needs. The resolution on the broad fiscal question, as eventually submitted, ran as follows:

It is resolved, that in the opinion of this Congress the bonds of the British Empire should be materially strengthened and a union of the various parts of His Majesty's dominion greatly consolidated by the adoption of a commercial policy based upon the principal of mutual benefit, whereby each component part of the Empire would receive a substantial advantage in trade as the result of the national relationship, due consideration being given to the fiscal need of component parts of the Empire. That this Congress urges upon His Majesty's Government the appointment by them of a special commission composed of representatives of Great Britain and her colonies and India to consider the possibilities of thus increasing and strengthening the trade relations between the different parts of the Empire and the trading facilities within the Empire and with foreign countries.

—The United Kingdom has cheap telegrams, but they cost the Government something. The cost of operating the British telegraph service last year was £4,317,371. This was £593,506 more than the receipts. If interest on the £10,867,644 spent in acquiring the service was added, the deficit would be £892,365 or nearly $4,500,000.

THIEF CATCHERS AND THIEF LOSERS.

This community is fortunate in having on its police force a man who will evince the forethought and resolution of Police Constable Forrest, which resulted last week in the capture, red-handed, of three desperate burglars, Quackenbush, Murphy and Doyle, in a house on Sherbourne Street. Fortunate, too, in having upon its fire brigade a man like Sam Ridout, who although under no obligation to do so except the feeling that every man ought to help in the cause of justice, intercepted the redoubtable jail-bird, Quackenbush, when the three had broken away from the gaol authorities, and after a hard struggle was instrumental in his re-arrest. But what shall be said of the arrangements for supervising prisoners at the city hall and at the gaol door itself? It now appears that one of a group of women, lounging round the door of the police court, passed a steel saw to Quackenbush which he used to saw asunder the hand-cuffs which fastened the three desperate characters together, and thus they were able to make separate breaks for liberty. We cannot refrain from saying that it is poor encouragement for detectives to use valiant discretion and for citizens to assist at the risk of their lives in the capture of felons if the felons, at the very door of the court which convicts them, are allowed, for lack of proper watching, to be supplied with the means of escape. This is clearly a weak link in the chain of justice at Toronto.

COUNTERFEIT LIFE INSURANCE.

AN EIGHTEEN YEARS' RECORD.

During the past twenty years we have given annually a record of results of the preceding years in assessment life assurance associations. Herewith we give the figures respecting thirty-five such societies, most of them running back eighteen years, covering from Jan. 1st, 1885, to Jan. 1st, 1903, inclusive, giving the varying number of the membership and the generally increasing cost to the members.

These and hundreds of other such societies now defunct, all started up with the idea that what is called a reserve, or accumulation of funds, (such as is held by regular life companies) was wholly unnecessary. Their promoters proclaimed that the reserve could better be left in the pockets of the members, to be called for by special assessments whenever increased deaths required it. This idea has now, by hard and dangerous practical experience, been wholly exploded. Every assessment society of any standing has survived thus far only by increasing its rates, until these rates are now, in very many cases, considerably higher than those used for term insurance by the regular companies. In some cases they are higher than those charged by the best companies for straight life policies. Eventually they will all have to charge more (on account of lack of receipts from interest) than the level premium companies do, or else die a lingering death, as so many of them are now actually doing.

In proof of this, turn to the record of those two large associations, the American Legion of Honor, of Boston, and the Knights of Honor, of St. Louis. The Legion started in 1878, and in twelve years boasted of a membership of 62,574, which, with heavy assess-

ments, has now dwindled down to 6,002 on January 1st, 1903. In the past twelve years its net death losses have grown from $13.31 per $1,000 of insurance carried, to $53.00. In other words, the membership has fallen off nine-tenths (62,574 to 6,002) and the cost to each member has quadrupled. What wonder that immediate dissolution is looked for, and that nothing but the $441,776 of funds on hand holds the sickly and aged remnant together a few months longer? Likewise the Knights of Honor, once having 137,753 members, has now but 53,580, and the net cost per $1,000 certificate has grown from $14.60 then, to $29.90 now. This society has only the trifle of $46,476 of assets now on hand, or about 87 cents per member. And there are others in a still worse predicament.

In reading the following tables, it is to be noted that $4.00 is added to the net "cost per $1,000" of each society, to represent the average expenses. Some spend more and some less, but by using this fixed figure for the expenses in all the years, the increase in the mortality rate is indicated by the difference between the former years' figures, and those of 1902.

CROP PROSPECTS.

The following table, based on returns to the Ontario Department of Agriculture from 2,000 special correspondents, gives the area and estimated yields of the principal crops this season.

Crop.	Year.	Acres.	Bushels.	Yield per acre.
Fall Wheat	1903	666,595	16,969,634	25.5
	1902	748,592	20,033,666	26.8
	1882-02	908,809	18,443,293	20.3
Spring Wheat	1903	252,855	4,862,711	19.2
	1902	303,115	6,048,024	20.0
	1882-02	452,482	7,092,213	15 7
Barley	1903	709,839	24,203,970	34.1
	1902	661,622	21,890,602	33.1
	1882-02	623,019	16,494,873	26.5
Oats	1903	2,645,965	110,125,099	41.6
	1902	2,500,758	106,431,439	41.6
	1882-02	2,002,468	70,611,052	35.3
Rye	1903	179,277	2,978,641	16.6
	1902	189,318	3,509,332	18.5
	1882-02	119,883	1,963,300	16.4
Peas	1903	407,133	9,179,345	22.8

	1882-02	2,417,094	3,451,600	1 43

Summarizing the information to hand from all parts of the province, it may be stated that the general results of farming operations for the year will be very good, in fact, only a little behind those of last season, which all round might be described as the best on record for twenty years. It is worth observing that the average yield of hay and cereals during each of the latest years is above the average of the ten years 1883 to 1902. Peas and beans are the only exceptions in the table to this statement.

Harvesting of wheat is going on in many parts of Manitoba and at points here and there in the Territories, while oats and barley have been pretty generally cut in Manitoba. The yield, as will have been made evident by our previous articles on this topic, is bountiful. We append our usual crop telegram from Winnipeg. It is dated noon of Thursday, 20th Aug. "Weather in nearly all sections of Manitoba and the Territories during the past week has been cool and wet; and though not favorable for cutting it has had the effect of giving the grain a new chance to head out. For this reason the prospects have brightened and the yield will be even heavier than anticipated three weeks ago."

SHOES AND LEATHER.

The fall trade in boots and shoes, which has now begun in earnest, promises good results; judging by what has already been accomplished they will be ahead of last year. One feature, however, of the present season's trade is that it is not so subject to periodical rushes as in former years; orders are more frequent, but for smaller quantities. This, on the whole, is of some advantage all round. It reduces to a minimum the chances of over-stocking; goods are kept fresher; deliveries are more punctual; and closer relations are brought about between wholesaler, manufacturer and retailer, which is a thing always to be valued. As to prices, they remain steady, which is not to be wondered at in view of the high cost, not only of hides, but of the material required for making linings. Cotton drills and ducks have made heavy advances in price during the past few months, and this has affected the boot and shoe manufacturers in the way many of them had not bargained for. British manufacturers are trying to meet a similar source of trouble—the enhanced cost of labor and raw materials, for at a meeting of their association in Leicester recently, the statement was made that during the previous few months, leathers had advanced 7½ to 30 per cent., according to grade, kips, 20 to 25, glace kid, 15 to 20, and American sides from 7½ to 70 per cent; not only this, but that there was a probability of very firm conditions prevailing for some time to come.

Referring to styles in Canada for next spring, we believe, from present indications, that there will be a marked recrudescence of the tan shoe. Its practical withdrawal from the trade, so far as we can judge, was by no means warranted by any unpopular disfavor into which it had dropped. Many sales, indeed, were lost to retailers, we have reason to believe, by the fact that their stocks and designs of tans were so extremely limited. There are many advantages possessed by this useful form of footwear which warrant the claim sometimes made for tans, that they are the summer shoe par excellence. Apart from this, there are not likely to be any great novelties offered in the way of styles, which are likely, we think, to take a middle course, as regards both men's and women's shoes. That is to say, referring now more particularly to women's boots, the over-wide toe will be followed by one a little narrower, though by no means like the old razor-toe. Plainness will be favored, rather than over-elaboration, though patent caps will be used. People have probably by now realized that patent leather is not so good in wearing quality as it looks in appearance, and boots and shoes made of that material will probably show a considerable falling off in the demand. For women's shoes, the French heel will likely be still more popular than in the past. There seems to be a leaning on the part of some manufacturers in favor of black linings, which do away with the trouble arising from soiled goods.

For this time of the year, when fall orders have mostly been filled, the leather trade is very fair. The sorting trade has probably been above the average during the last month. Prices continue very firm, in keeping with the high cost of raw hides, but there seems to be little probability of a decline in either these goods or the finished article. Talk is still heard about the contemplated forming of a black-leather Tanners' Association, but that trade seems quite unable to get together, and so far as we can discover, the idea is likely to remain in statu quo for some time to come. The general trade in leather seems likely to improve rather than recede during the remainder of the year, and the export trade to England is rather more than usually brisk, in spite of the reports of dullness over there.

TRADE WITH BELGIUM.

In the last four years the aggregate trade of Canada with Belgium has averaged $4,600,000 per annum. In 1901 it reached $6,590,000, and dropped to $4,110,000 last year because of diminished imports from Belgium rather than diminished exports to her. Sugar is the item which occasions the remarkable drop in imports, for while in three preceding years we bought $2,217,000 worth of sugar a year, our purchases of that article from her fell in 1902 to $325,000, and purchases of it from Germany went up correspondingly. Our other principal purchases from Belgium are Portland cement, $119,000; window glass and plate glass, $586,000; metal goods, $286,270; drugs and chemicals, paints, paper, precious stones, fancy goods, etc., etc., to a total, sugar included, of $1,665,000 in 1902 as compared with $3,783,000 in 1901, and $3,301,000 in the year 1900.

What Canada sends to Belgium consists of a lesser number of articles, and usually of a kind to be described as products of the field, forest, and mine, together with some few manufactures. We have shipped to her, between 1898 and 1901, considerable quantities of buckwheat, corn, oats, pease, wheat, and sometimes rye. During the last two years, namely, 1901 and 1902, our shipments of wheat to that country have increased to 1,379,000 bushels and 1,737,000 bushels respectively, valued at $963,000 and $1,324,000. Lead ore, asbestos, lime, and other mineral substances made up a total last year of $371,000; seeds, $185,000; wood and wood goods, $102,000; hay, fruit, lobsters, potashes and animals, brought the total of our exports to $2,444,450.

In a recent communication to the Canadian press, Mr. W. A. Mackinnon, chief of the fruit division at Ottawa, recently showed what he regarded as a favorable opportunity to extend our trade with not only Belgium, but with Holland and Germany.

Just now, it appears, good opening for trade exists in fresh, dried and evaporated apples in Germany, where the latter pay a duty of $1.25 per 110 pounds and the former enter duty free. (It is true that an act has been passed imposing a duty on fresh fruit from Canada, but it has not been brought into force, and will only become operative by Imperial proclamation). Large quantities of evaporated apples from the United States are sold annually in Germany, and as the quality of the Canadian goods is admitted to be better, there is no reason why we should not be able to compete with the Americans. In Holland, only fancy, evaporated apples are wanted. The duty is 5 per cent. ad valorem for both fresh and dried fruits. Belgium will take considerable quantities of both dried and fresh fruits, particularly Spy, Baldwin and Greening apples in boxes. Fresh apples are free of duty, but 18 per cent. ad valorem is collected on dried and evaporated goods.

We remark upon the above paragraph that Canadian export of dried apples to Belgium was as much as 338,600 pounds, or say 170 tons, in the year 1899, falling away to some 61,000 pounds each in the two latest years. Of fresh apples in barrels or boxes we sent only a few thousand dollars' worth. Here is another item with respect to which we might wake up. There is practically no cheese made in Belgium, but that country takes annually 23,000,000 to 32,000,000 pounds of Dutch cheese, 6,500,000 pounds of Swiss Gruyere, and 2,100,000 pounds of fine cheese from France. Mr. Mackinnon tells us that Canadian cheddar cheese, if mild, will sell even in competition with the best Holland. "It would bring about 20 cents per pound retail, leaving an ample margin for profit after paying freight and commission, and the duty which is slightly over one cent per pound." It is particularly to be noted that only a mild cheese is wanted. Tinned meats, game, poultry, and tinned tomatoes are also in demand.

It is well-known to foreign merchants that the merchants as well as the consumers of Belgium and Germany are very conservative in their tastes and methods. "Americans and Canadians will buy and test a new article simply because it is new, but with the European consumers the opposite is the case. The merchants over there have their trade established and are content. Why should they change? We must show them that it would be to their advantage to do so." The recommendation is made that Canadian shippers send over liberal samples of their food products for distribution. They will find it profitable to do so, and to quote prices freely. At first, says Mr. Mackinnon, goods would have to be shipped on commission, but when a footing is gained business can be done on a cash basis. "It is, of course, necessary above all things that goods shipped shall be carefully packed and true to sample, as this is the only way to gain and hold the confidence of the merchants."

We are informed that the agent for Canada in Belgium, Dr. D. Treau de Coeli, 75 Marche St. Jacques, Antwerp, will be glad to answer enquiries and to give all the assistance in his power to enable Canadian shippers to make satisfactory connections in that country. If liberally supplied with samples, he will see that these are properly stored, and distributed to the best advantage as occasion offers. These suggestions about possible increased trade with Belgium ought not to be thrown away upon our export dealers in dairy produce, fruit, meats and poultry.

POSITION OF THE LUMBER MARKET.

Matters in the lumber trade, so far as the local market is concerned, have changed but little since last report. There is a good demand for building both in Ontario and Quebec, and prices keep very firm. Hardly so much demand is being experienced from Manitoba and the North West as a few months ago, but this may be accounted for no doubt by the fact that farmers have had to leave building for more immediately pressing work.

Conditions in England changed considerably during the early part of this month. According to the Timber Trades Journal, the spruce market keeps very firm, and all the available stocks have been cleared for first-open-water loading. The cargoes from time to time coming forward are all sold, and among the stocks here there is nothing in first hands for the trade to select from. The position of the Canadian import is quite abnormal, the trade usually counting upon a much lower port consignment about this time, but this season fewer cargoes of the kind have come forward than has probably been known in the experience of the oldest member of the wood trade. "The pine market has been exceptionally free from market cargoes, though a few parcels of the inferior grades have been sent by the liners, we cannot hear of a single shipload sent on consignment. On the spot prices are very firm with the exception of 4ths, which have undergone some slight depreciation, a considerable portion of last year's imports being still in dealers' hands." Agents complain of the difficulty of getting enough shipped

at Quebec and other places of both pine and spruce to meet their customers' demands. Hence values are tending upward.

According to Farnworth and Jardine's (Liverpool) last wood circular, the arrivals from British North America during July were only 30,464 tons register as compared with 42,159 tons register during that month last year. A continuance of the quiet trade prevailed. Arrivals for the most part were moderate, deliveries fair and stocks as a rule not heavy. Values rule high with a good deal of hand-to-mouth buying. Ocean freights ruled very low. As to Canadian pine timber—of waney arrivals, moderate, and again, chiefly on contract, the deliveries have about kept pace, and stocks are moderate; values are very firm. Square—a light import, but the demand is quiet, and stocks sufficient; values are steady. Red Pine—the stock is adequate. Oak has arrived more freely, but the demand is very quiet, and the deliveries have been disappointing; prices steady. Ash—There has been very little enquiry. Pine Deals—The arrivals have been fairly moderate, the deliveries have kept pace, and stocks are not too large; prices are unchanged. Red Pine deals in limited demand; the stock is sufficient. New Brunswick and Nova Scotia spruce and pine deals—The arrivals during the past month show a reduction; the deliveries have been satisfactory, and stocks are not excessive. Birch.—Arrivals small, chiefly from Quebec; deliveries fair, prices are firm. Planks.—The arrivals have been light, and stocks are in a moderate compass; prices still continue low. British Columbia and Oregon Pine.—No arrivals; the demand is quiet, prices steady, and stock is ample. Pitch pine stocks are still heavy, consumption moderate.

TOBACCO PROSPECTS.

Our reference the other day to the prospects of the tobacco leaf crop in South Western Ontario has brought us a number of communications on the subject. One of these may be found elsewhere in to-day's issue; another, which we cannot print in full, takes a more favorable view. Then there is the Ontario crop report for August, received on Wednesday last. This says, respecting tobacco: "Most of the tobacco raised in the province is grown in the counties of Essex and Kent in the west, and in Prescott and Russell counties in the east. Correspondents do not report very fully concerning this crop, but western returns were to the effect that it was rather backward owing to the late planting and cold, wet weather, although otherwise looking well. The reports from Eastern Ontario were more favorable as to general condition, but some replanting had to be done on account of drought."

It was perhaps to be expected that the views of persons would differ as to prospect for leaf. Of the two opinions we quoted on August 7th, one may have emanated from the grower, who desires to emphasize short crop and consequent high prices, the other from the buyer, who wishes to set forth an immense yield as a ground for low prices. We have now information from a source which is open to neither of these influences; the opinion of a man who has been many years in the business, and who knows the subject well, but has now gone into other business. He says that last year's crop was light owing to wet weather and this year's will also be light owing to shortage of plants, but will be of better quality if weather conditions are favorable. The Government policy of 1897 has resulted in an increase in the growth of tobacco in this country of from 500,000 lbs. to 5,000,000 lbs., and that the Government could still further aid the industry if it chose to do so. He states that comparatively little is grown in Kent and that the bulk of the Ontario crop is grown in the townships of Mersea, Gosfield, and Colchester in Essex county. The variety so grown is almost exclusively White Burley, and the crop is purchased by the following concerns: The American Tobacco Co., of Granby, Que.; The Erie Tobacco Co., of Windsor, Ont.; McAlpine Consumers Tobacco Co., of Toronto; The Rock City Tobacco Co., of Quebec; the whole crop being manufactured into chewing plug, and the firm first named being by far the largest purchaser.

Under ordinary circumstances North Essex is unsuited for tobacco growing, but we are told that the Walker Sons do grow a particular variety for a particular purpose. While the crop of Essex this year promises well, there is no chance, so our informant says, of a yield of more than 2¼ million, the yield being probably less than 1,000 lbs. per acre, whereas an average yield is 1,300 or 1,400 lbs. per acre. This year the acreage prepared was larger than last, but owing to cold weather the young plants in hot beds did badly, and when planting out time came there was a heavy shortage of plants. The weather during planting out time was however peculiarly favorable, and the plants at the present time look well but are a little backward. Everything depends on the weather being hot during the next six weeks. [He writes during last week]. Should it be so, the quality will be good and the yield probably equal that of last year, but nothing can be stated with certainty until the crop is actually in the barns. Wet cold weather in August, or early sharp frosts later on might destroy the crop effectually."

MUNICIPAL POWER PLANT.

Mr. R. J. Parke, of Toronto, who some months ago was requested by the city engineer and a special committee of the city council to investigate the question of a municipally-owned electric power plant at Niagara, has issued his report upon the subject. The cost of developing the power is not touched on in detail, more than to say that it would approximate to from $4,000,000 to $6,000,000, according to the number of horse power developed. The cost of a double transmission line from Niagara Falls to Toronto would be about $900,000, including $200,000 for a 100-foot right of way. This is upon a basis of a voltage of 22,500, which, in view of the close proximity of the line to Lake Ontario, would probably be as high as should be used for the present. The suggestion is made that the power be delivered at a terminal or main receiving station, somewhere on the western city limits and from thence distributed throughout the city by means of five sub-stations. The amount of power required for various purposes would total about 13,750 kilowatts, though this would not all be required at one and the same time, so that 10,000 k-w. would be the amount which would require to be purchased from the producers. This estimate does not include the power which might be required for the Toronto Railway Co., approximately another 10,000 kilowatts.

The capital cost of the enterprise is estimated at $230,000 for the chief terminal station, and $366,000 for the five sub-stations, buildings $70,000, underground distribution system, $566,559; overhead ditto, $483,000; engineering supervision, etc., $100,000; total cost, $1,785,641. The annual cost of operation, including interest on bonds at 3¾ per cent. is estimated at $283,955. The present rate charged for electric power in Toronto ranges from $60 to $100 per horse power. Mr. Alex. Dow, of Detroit, an expert electrician to whom the report was shown, assumes that it would cost $10 per horse power at Niagara, and, allowing for loss in transmission, etc., $18.96 at the receiving station in the city, or relatively less if a larger amount were required. Altogether with the expense of distribution, the retail cost of energy would come to $38.16. The suggestion is made, however, in view of the fact that losses in distribution, etc., vary very much according to what service is employed, that a well considered rate schedule should be formulated in accordance with which each class of customer should bear his own proper share of the expense.

THE MONTREAL BOARD OF TRADE BUILDING.

FROM A CORRESPONDENT.

These are great days for Montreal. The town is very full, and we are getting no end of compliments from visiting tourists and from commercial swells all over the world. By these I mean of course the delegates to the Commercial Congress that is being held in Windsor Hall. There are some 540 of them, and about 240 are from the United Kingdom and British territory outside of Canada. It is to be expected that you will have a minute account of the proceedings from

some source inside the Congress, so I shall not attempt to describe them.

Luckily the weather is fine, and the city looks well, having had its streets cleared of much of the disfiguring dirt that made us so ashamed of them in the early spring. The mountain view is continuously lovely, and the great river is always here. Then our visitors are many of them housed under the roofs of prominent citizens in up-town streets, and they do not need to see what is noisome or ugly about down-town Montreal. American travel is "not what you would call thick," as a hotel keeper expressed it to me, but there are a good many visitors. We have every year more or less "Conventions" of mercurial Americans, from candle-makers to candy-pullers, and even Christian Scientists, and they made things lively while they stay.

On Monday there was a brief but interesting function at the new Board of Trade building, which is a really substantial and handsome one. It was officially opened by Lord Strathcona and Lord Brassey. Or perhaps I ought to say it was officially declared open by Lord Strathcona, that fine old Scotch-Canadian we are also fond of, and Lord Brassey —Brassey of the "Sunbeam"—Brassey the president of the Congress—Brassey, a son of the member of the Peto, Brassey and Betts firm that built much of the Grand Trunk Railway—Brassey the handsome, frank ex-governor of somewhere—made a few neat remarks.

It was a pretty sight, outside or in. The main entrance was arched over and hundreds of electric lamps were grouped and festooned over it. Inside there was abundance of light, too, and decorations of laurel wreaths. Maybe that was to typify victory; the victories of Commerce, let us say, perhaps there were olive wreaths and festoons, too; isn't it olive that signifies Peace? The reception was held in the Exchange Hall, a handsome place panelled with crimson, and something like twelve hundred people crowded into it. There were banks of shrubs and ferns in the corners, flags scattered over the walls, and crimson rugs on the floor. And there was music. Never again probably will it look so trim and clean.

The proceedings were not tedious: they were soon over. The address of Lord Strathcona, who was introduced by Mr. A. J. Hodgson, the president, was given with his usual simplicity and directness. He spoke of his pleasure in revisiting Montreal, complimented the Board on their fire-proof building, (very tactically omitting to mention that its predecessor had been *called* "fire-proof" too), and paid a compliment to Senator Drummond upon what he had done for the Board and for commercial interests of the city? He made a comparison of the Montreal of to-day with the Montreal he knew when first he came to live in it. "Even then," said he, "it was a great city." Eleven years ago, when I laid the corner stone of the former Board of Trade building on this site, it was a great city. But if it was great then, how much greater is it now, with its population of 350,000, and with its extensive harbor and communications. How important to the Dominion of Canada and also to the British Empire!"

Messrs. Henry Miles and A. McFee came in for some deserved praise as energetic aiders in the task of reconstruction, and the reference to the portrait of Mr. Robert Archer, happily rescued from the fire which destroyed the former building and hung in the council room of the new one, evoked satisfied remark. Lord Brassey, upon being called on said a few words of appreciation, and praised the judgment which had dictated the presence of ladies at the reception.

MOUNT ROYAL.

Montreal, 18th August.

AN EARLY FRONTIER MERCHANT.

It was the intention of the late William McGregor, former M.P. for North Essex, to print for the information and encouragement of the young men of that county, brief biographies of various local men who had made their mark along the Detroit or St. Clair frontiers. His design was not carried out because of his sudden death in May last. But shortly before that event Mr. McGregor sent to the Editor of this journal memoranda he had made about the career of a man who was prominent in the commercial and political life of the County of Essex in the fifties and the sixties, the late John MacLeod. These have been supplemented from other sources, and we now present as complete a brief record of that notable gentleman's career as we have been able to compile from various sources.

John MacLeod was born of Highland Scotch parents in Edinburgh early in the century, ran away from home at fifteen to be cabin boy on an Atlantic sailing vessel, and landed at Pictou, Nova Scotia, near which (at Roger Hill) he taught school. Coming west about 1833 by the Erie Canal from New York, he struck hands in Detroit with a fine specimen of a Nairn Scotchman, the late James Black, dealer in grain, and expounder of Robert Burns. In the "rebellion year" 1837 he brought his newly married wife to Amherstburg, and there set up a small general store on his own account. Amherstburg was then a military post, the 43rd Regiment occupying Fort Malden, just above it, and a point at which the steamers used to touch on their passage from the Upper to the Lower Lakes. Naval as well as military stores were kept there, a large trade at retail existed and MacLeod was on hand to do it.

He was an unusual character; bold, quick and defiant, but tender-hearted and good to his friends. Full of life and spirits, given to practical joking and many kinds of wild fun, as a vent to his tremendous energy, yet never drinking intoxicants. An enterprising merchant and an impudent smuggler, friendly with nearly every one, and an especial favorite with the Americans across the river, but a thorough Britisher all his life long, and an expounder of the virtues of Canada and the glories of Scotland to the citizens of Detroit. With all his frolics, he did not lose sight of the main chance: he worked hard and presently began to make money. Soon he was buying goods by the thousand pounds' worth in Montreal, where he was known to the Ogilvys, the Mulhollands, the Mackenzies, the Thibaudeaus, the Cuvilliers, and others of the Old Time merchants of that city. And many a convivial "circus" he had at Dolly's restaurant or at Hogan's when he visited Montreal once a year. He was a director of the first Canada Southern Railway Company, about 1857. In due time, having become an extensive merchant and having stores at Windsor, Chatham and Goderich, MacLeod was elected in 1858 member of the Legislative Assembly, which then met alternately for four years each in Quebec and Toronto. There he came under the spell of John A. Macdonald, who took a fancy to the dashing, restless Highlander, whom he appointed one of his Parliamentary whips. MacLeod died at Amherstburg in 1887.

The most active portion of Mr. MacLeod's business life was between 1840 and 1860, and it is apparently to this period that Mr. McGregor's references mainly apply. He thus tells what he knew of the various activities of the subject of the sketch at that time:

"In the early forties Mr. MacLeod was a great man commercially. He was part owner of the "Earl Cathcart" steam propeller; built the "Thomas F. Park" brig; owned the schooners "Conductor" and "Industry," also the old-fashioned, flat-bottomed "Jolly Farmer." He had in that stirring old town—more stirring then than now, I guess—a first class commercial flouring mill, a large saw mill, a fine whiskey distillery, a large general store, a potashery, where the negroes used to sing all night, and a soap and candle factory. MacLeod's firm, part managed by George Murray and Henry Middleditch, had all appliances for carding wool and making cloth. They had a cooper shop, several warehouses, and a great big barrack for their men. They had a big farm in Malden Township, a share in a foundry along with Alex Jones in Amherstburg, and dear only knows what else. He bought in the early fifties the largest schooner on fresh water lakes, called the "Fame," which he bought while a wreck on Lake Huron and refitted. He shipped cargoes of County of Essex oak and elm to England in the "E. S. Adams" and the "T. F. Park" between 1850 and 1860 and brought back in these sailing vessels cargoes of British merchandise. He was an excellent business man, as well as a splendid companion,

knowing this dear old County of Essex well, and should be remembered by his old friends and made known to new admirers. Some folk remember him well in Detroit, where he owned important real estate for years.

"What I would like the young men of Essex to take notice of is that Mr. MacLeod was a worker, a hustler, a sort of compeller of things, if things would not come his way. He was not like that chap in Shakespeare who kept on letting 'I dare not' wait upon 'I would like to.' He dared, and dared a good deal, and dared often. And then he was a man who relied upon himself. He had nobody else to rely on. There was no silver spoon in his mouth when he appeared on this hemisphere, or the other one either, and he just had to hoe his own row, as so many more have had to do in this Canada. But he had the right sort of stuff in his make-up, and he made a name for himself and a position for himself—and then his constituents did the rest. So young men, if this Scotch boy, with a common school education, John MacLeod, could get to be a successful merchant and manufacturer and a Member of Parliament, the chances are just as good for you. But I said in my list of mottoes; The world makes way for a determined man, so I say to you now, in another motto: "Do not wait for opportunity, but make it."

FREE RAW MATERIALS.

The proportion of our imports from the British Islands, which are raw materials for the use of our manufacturers and therefore admitted free of duty, is but small as compared with those from the United States. Of imports from Britain the percentage is 28.33 free, while of imports from United States the percentage is 50.19 free.

Of the dutiable imports, all from the United States came, of course, under the general tariff and paid full duty. But of the British goods dutiable, four-fifths came under the preferential tariff. The British possessions whose goods shared in the preference given by Canada were the British East and West Indies, Australia and the Fiji Islands. Of the goods which obtained the preference, $35,163,000 came from the United Kingdom and $2,450,000 from those colonies.

Purchases by Canada from the British Empire in all parts of the world amounted last year to $65,007,080—that is $20,028,027 free and $44,979,053 dutiable— as compared with $54,039,090 in the fiscal year 1901-2. The total of Canada's trade with the British world was $206,983,717, where in the year preceding it was $183,109,710. There has thus been substantial growth, both in exports and imports, for the exports grew from $129,070,620 to $141,976,637.

The quantity of anthracite coal imported into Canada last year was 1,456,713 tons, valued at $7,028,664, which is at the rate of $4.82 per ton, declared value for the year ended with June, 1903. Part of this quantity, 62,038 tons, came from Great Britain, but 1,394,675 tons came from the United States.

Among the goods imported into Canada free of duty last year are some items which will appear strange to those who are not engaged in the particular line of manufacture to which these imports apply. For instance: china clay, pipe clay, fire clay, and other clays, to the value in all of $176,000, were brought in from the United States and Great Britain.

"Precious stones in the rough" appear in the free list, and the quantity of them imported rises to the value of $246,294. They came mostly from France. This is apart from diamonds unset and diamond dust, the value of which was $884,854. These were bought most largely in Holland; about a third of them in Britain and the United States.

Canada produces, and even exports minerals in considerable variety. Indeed, one hardly expects to find in her list of imports gypsum, flint, emery, fuller's earth, alumina, pumice stone, and nickel. We are great producers of nickel, but somebody in Canada must need to import it, in some shape or form, for 4,502 cwts. of it were brought into Canada from the United States.

If we were to tell the average man that Canada imports from the United States four million dollars' worth of different kinds of wood, the average man would laugh an unbelieving laugh, and say, "no, but we send the States a dozen millions' worth of woods." Yet the former statement is true. And this four millions does not include fence posts, railroad ties or logs, of which we imported $521,000 worth. We buy hickory hubs and spokes, cork-wood, cherry, chestnut, walnut, oak, mahogany, pitch pine, and even white ash. All this illustrates among other things, the growth of the furniture industry of Canada. It is, of course, to be remembered that we do not produce all the woods that our furniture makers use.

Of the 7,994,702 pounds of wool imported into Canada free of duty last year, 568,000 lbs. came from Great Britain, 307,000 lbs. from the United States, 283,000 lbs. from France, and 81,000 lbs. from other countries. Its total value as entered was $1,239,998 and the American wool cost 13.7 cents per pound, the English 14.7 cents, the French, 20½ cents.

Tobacco leaf is another article in the free list which foots up a considerable total. From the United States came 12,565,828 pounds, a quantity perhaps more realizably expressed when we say it is equal to 6,283 tons, at a value of $2,241,000, an average value of 17¾ cents per pound. This is mainly made in Canada into plug tobacco. Then we bought last year 654,660 pounds of tobacco from England, at 22 cents or over, while the tobacco from other countries cost nearly 26 cents a pound.

The quantity of coke Canada bought from the United States last fiscal twelve months was 241,000 tons, costing $4.78 per ton. The United Kingdom supplied the Dominion with 15,638 tons, which cost $4.50 per ton.

A very considerable item, indeed, among the free imports of Canada is drugs, dyes, chemicals, and medicines—the blue-book does not *say* "patent medicines," but probably they are largely meant. Of aniline dyes, aniline salts, and alizarine we buy $417,000 worth. Antimony, alumina, borax, brimstone, cream of tartar, are further large items under the category of drugs. Gums (for chewing gum), gums for office use and gums to fill druggists' shelves or bottles, quicksilver, saltpetre, soda ash, caustic soda and various other forms of soda, sulphate of copper, tartar crystals, terra japonica, are under this head, and the total comes to something large.

Some noteworthy increases in Canada's exports to distant countries are observable in the 1903 return. Exports to Brazil, for example, which were $496,006 in 1902, were $701,100 last year. To Chili we sent merchandise worth $153,035 last year and only $68,269 the year before. Japan's purchases from us, though not yet great are growing; they were $293,277 in 1902 and $325,811 in 1903. Among European countries, Holland increased her Canadian purchases from $320,241 to $619,329; Norway and Sweden from $100,328 to $268,851; Denmark from $106,360 to $167,161; Portugal from $105,495 to $164,184. But neither France nor Germany increased their purchases from us. The United States bought almost exactly as much this year as last.

BOWMANVILLE.

The retrospect of a quarter of a century which we find in the editorial columns of the Bowmanville Statesman, contains some interesting reminders. It is twenty-five years since Mr. M. A. James became proprietor, editor, and publisher of that journal. The subscription of the paper is more than doubled in that time,—it is now 2,121—the office and premises has been enlarged and fitted with steam-power, and the paper has been correspondingly improved. Mr. James is fairly to be congratulated upon his journal, whose good standing in its own territory is vouched for the support it receives from both advertisers and subscribers. Some of his notes respecting Bowmanville deserve remark. Ground has been broken for new municipal buildings which will be a credit to the town, the old town hall being structurally dangerous, having been pulled down. The municipal officials have temporary offices over the market buildings, where the council room will also be found. The-fire hall, hose-tower and belfry have been taken down. The old Disciples' meeting house is being rapidly converted into a commodious fire-hall. Since 1878 much has been done for the improvement of Bowmanville. That period has witnessed the erection of high and public schools, the Methodist, Congregational, and

Disciple churches and Salvation Army barracks; the new rubber factory, the new foundry, and large additions to the organ and piano factory, which is an extensive industry; many good residences and several business blocks, including the handsome Balmoral hotel.

FLAX FIBRE.

Editor of Monetary Times.

Sir.—My attention has been directed to a little article on page 182 of your issue of August 7th, in which it is stated that in Canada flax is grown for seed only. You will no doubt be pleased to correct this statement upon being informed that in the counties of Essex, Kent and Lambton there are about three thousand acres of flax grown this year for the fibre. Within the last year or two a couple of flax mills have been established in the county of Essex, one of them in our thriving little town of Essex. The flax fibre produced here is, I am informed, of first-class quality, and is not excelled anywhere in Canada. Mr. A. H. Raymond, the owner of the flax mills here, has 1,200 acres this season of excellent flax. A reference to the above facts in your journal may be of considerable value to those of your readers who are interested in flax.

Yours truly,

E. A. WISMER,
Secretary Essex Board of Trade.

Essex, Ont., 14th August.

ACKNOWLEDGMENTS.

It is characteristic of our present King that, tactful himself, he has always had sensible and kindly servants. Among his *entourage* the type-founders possess distinction, and on the principle that *noblesse oblige*, when they do a thing it is done nicely. It was a happy thought of Messrs. Miller and Richard, of Edinburgh, to present to certain of their Canadian customers so convenient an instrument as a Werkzeugtaschencheere with which to while the happy hours away. Concerning the varied utilities of this ingenious present we have only space to say that it is serviceable as a destornillador in the kitchen, and a lime-ongles in the boudoir, while equally convenient as a marking-wheel in the sewing-room, and a cigarrenabschneider in the smoking-room. Even the sportsman will applaud its advantages as a tira-cartuchos, and the school boy welcome it as a messerklinge. Mr. R. L. Patterson, the Canadian representative of His Majesty's Type Founders, has now proved afresh that, like the portly personage in Dean Ramsay's delicious story, he is "a man, as well as a magistrate." In the role of Universal Provider he has given his troops of friends an instrument, the varied uses of which appeal to the many-sided men of whom his customers are so largely composed.

When one modestly asks for some specific physical information about New Brunswick, while he expects a reply, he is hardly prepared to receive a small library of pamphlets. However, we are not complaining. On the contrary, we wish to thank the Crown Land Department of that province cordially for the following: "The Province of New Brunswick, Canada, its Resources and Advantages," by James Hannay, D.C.L., 207 pages, illustrated. This, as might be expected from its authorship, is an admirable handbook of the Province; "Gun and Rod, in New Brunswick," by W. K. Reynolds and others, with "River Fishing and Game Birds in New Brunswick," by D. G. Smith, Fishery Commissioner, sent us by the Chief Game Commissioner; (with map); "Saint John, the City of the Loyalists," and "New Brunswick, the Land of Cool Breezes and Enchanting Scenery,"—the last two issued by the Tourist Association, of St. John, if we do not mistake. Should one wish to read philosophically and to acquire a knowledge of the resources of New Brunswick for a business man, whether he looks for lumber, pulp, water-power, minerals or field wealth, he may do so from these books. And if he wants to know where to go for moose, caribou, bear, game birds or fish, in their seasons, he may also learn here. And if he simply wishes to go for a short trip from north of the St. Lawrence to the sea, for boating, driving, wheeling, loafing, he can still be accommodated, and delighted, by following the advice of the St. John Tourist Association.

Full as the air is of Chambers of Commerce Congress talk about the grand old weather-beaten principles of Free Trade and about the brazen, semi-revolution proposals of that "enfant terrible" Chamberlain, how can one devote space today to anything else? Still wheels must move, the business world must go on, whether there is speechifying at Windsor Hall or no. And so we find in our mail specimens illustrating the product of the Canada Paint Company, Limited, one of them a dainty fan for a Cinderella hand, the other a little packet of liquid aluminum, for decorating radiators, stove-pipes and other exposed metal surfaces. These have been prepared by the company, we are told, for distribution in myriads as souvenirs at the Toronto Fair next week, and are produced entirely by the various departments of the company's works in Montreal. We cannot reproduce the "Paint Proverbs," or the curiously and wonderfully made poetry which accompanies the gift, but we have given the facts.

INSURANCE ITEMS.

"The busiest business in the land." Such are the terms in which industrial insurance is spoken of by an American insurance journal.

The date of the next annual meeting of the National Association of Life Underwriters is 13th to 15th October, and the place is Baltimore.

It is stated by the Rossland Miner that Mr. W. G. Carpenter has left the staff of the Bank of B. N. America and is going to Trout Lake, where he will engage in the insurance agency business as a member of the firm of Baillie, Vars & Carpenter. The firm has offices at Camborne, Trout Lake and Poplar Creek.

A ceremony of interest to the recipient and his friends took place last Saturday evening at the King Edward Hotel, Toronto. This was the presentation, by the head office staff of the Canada Life Assurance Company, to Mr. P. C. H. Papps, A.I.A., of a case of sterling silver. F. Sanderson, M.A., F.F.A., made the presentation of the officials and staff, and a number of others gave brief congratulatory speeches. It is understood that Mr. Papps is soon to leave the ranks of the bachelors.

Automobiling is an expensive luxury, thus far, not only because of the expense of buying a machine and keeping it in order, but because of collateral facts. For instance, according to the New York Sun, casualty companies are unwilling to write policies on chauffeurs for large amounts. And "the superintendent of one of the large insurance companies in this city (New York) authorizes the statement that a twenty-year endowment policy, for example, will cost a chauffeur, that is, a professional operator of an automobile, $2.50 annually more than the regular rate, and $5 more than the regular rate will be charged for a straight life policy."

Experts have made the estimate that as much as twenty per cent. of the fire losses in the United States and Canada are due to arson. Insurance Commissioner Dearth, of Minnesota, expresses the belief that if the insured was prohibited by law from insuring his property for more than 80 per cent. of its value, the moral hazard would be practically eliminated, and he instances the low rates at which Minnesota township mutuals—which will not insure property for more than three-fourths of its value— have been able to do business, in support of his position. On the other hand, as the Investigator remarks, such a prohibition might work grievous wrong to sundry conscientious insurants.

At a meeting of the Montreal board of the Liverpool and London and Globe Insurance Company, held on the 13th inst., the following resolution was passed: That the directors at this their first meeting since the demise of their late respected chairman, Mr. A. F. Gault, desire to place on record their sense of their having by his decease lost a valued colleague and personal friend, whose counsel and ripe judgment were at all times at the disposal of the company during the thirteen years that he was a member of the board. That a

copy of this resolution be forwarded to Mrs. Gault, with the directors' expression of their sympathy and deep regret at her irreparable loss. At the same meeting Mr. Wentworth James Buchanan was appointed chairman of the board.

FINANCIAL ITEMS.

Our readers know that William Weir, formerly president of La Banque Ville Marie, was sentenced to a long term of imprisonment for malfeasance in submitting incorrect statements of his bank's affairs to Government. Also, they may remember, he was released because it was said "he could not live, and he wanted to die at home, poor old man." Well, for a man so near death he is pretty enterprising, for we cut the following from a daily paper: "Kemptville, Aug. 14.—Ex-President Weir, of the Ville Marie Bank, Montreal, was married on Wednesday to Mrs. E. C. Scoville, of Oxford Mills. The marriage was the culmination of a courtship of a score of years."

Seeing amongst a group of curiously-named assessment companies the "Bankers' Life Association," of Omaha, Nebraska, we wondered greatly how a group of men so astute as bankers are supposed to be, and as well up in the science of finance, could associate themselves as a "pass-the-hat" concern. But we hear, later, that the company in question has dropped the word "Association" in its title, and substituted the word "Company." It is now called the Bankers' Reserve Life Company. What is more important, its policyholders came together in Omaha, Monday, July 27, and without a dissenting vote, adopted amended articles of incorporation, placing the business of the company on a legal reserve basis. The association was organized under the stipulated premium law of 1895, but has been charging regular rates and maintaining a reserve. The State authorities approved these articles, and they went into effect this month. Thus the bankers have seen with the eyes of common sense the weak point of assessmentism.

FOR GROCERS AND PROVISION DEALERS.

The raspberry crop in Britain has been a failure this year, and jam manufacturers there are offering $165 to $175 per ton for pulp delivered in London. A good demand exists also for blackberries, that crop having partially failed likewise.

The salmon run in both Puget Sound and Columbia River has been very light this season, though recent reports claim an improvement during the last few days. A light pack is more than probable, as even should the run become heavy now the capacity of the canning plants is limited. The season so far as Northern British Columbia is concerned, is now over, it being a little earlier than on the Fraser.

We hear that some forty farmers have been summoned for various amounts of stock in the Farmers' Co-operative Packing Co., of Brantford, which they have not paid up. They claim that the stock was subscribed for under false pretences, as they were promised as good a price for their hogs as anyone else was paid, which promise, they allege, has not been kept. Hogs were purchased from them, too, they say, at a certain price, and when the company came to settle, a lower price was paid them..

FOR DRY GOODS MERCHANTS.

Suckling & Co.'s fall dry goods sale to the trade, in Toronto, will begin on September 2nd, during Exhibition week.

Sir William Holland, of Manchester, who is one of the delegates to the Trades Congress in Montreal, is one of those who believe that the West Indies have a great future before them for the cultivation of cotton. There is no doubt that both soil and climate conduce to the raising of a very superior quality of the fibre.

The quantity catalogued for the fourth auction sale of ostrich feathers in London, was 77,500 pounds, against 86,000 pounds in June and 63,000 pounds in July last year. Some decline from the extreme prices of wing feathers in last sale was anticipated, but with active competition throughout and a continued large demand from America prices were fully maintained, and dark goods were even dearer. Trade bought much more than for some time past, France largely, and Germany fairly. Good quality sold very firmly, and other kinds were about steady. Femina—All qualities sold firmly, except narrow, and grey and dark 10 per cent. dearer.

ONTARIO TOBACCO.

Editor Monetary Times:

Dear Sir,—Having read in your publication of August 7th, the various views of writers regarding this year's tobacco crop in Essex and Kent county, I surely think they are rather misleading,—I beg to say I have been all through the country, and have given great attention to the growing crops. I am satisfied the crop of leaf tobacco will (if we have a late fall), certainly not be over 1,250,000 lbs., should we have an early fall we can look for not over 600,000 lbs. I consider the yield will be about 1,000 lbs. to the acre, and it will be short in leaf; but I think it will be good color and comparatively free from worm and grasshopper holes. May be this will prove of a little guidance to you regarding the crop.

Ernest Bailey.

Kingsville, Ont., 17th August.

—The demand for dwellings is unusually active in Montreal, those of modern type in good residential quarters being especially in request. Sales of real estate in suburban municipalities for July amounted in value to $180,989, while the transactions in real estate in the city for that month amounted to $732,838. St. Lawrence Ward and St. James, showing the largest amounts. There were 108 building permits issued in Montreal during July, i. e. 66 permits for new buildings (mostly dwellings) $495,775, and 42 permits for enlargements alterations and repairs; total $533,247, for July.

—At a meeting of the Executive of the Commercial Travellers' Association of Canada, Mr. J. F. Flockhart of Sydney, N. S. W., laid before them a proposal for the federation of all the Commercial Travellers' Associations of the British Empire. Organization would, he said, be along much the same line as that of the Congress of Chambers of Commerce held this week in Montreal, and the idea is that such a scheme would not only tend to the advantage of all the various trades represented, but that it would help to bring the Empire closer together.

—It is very agreeable to hear, as we do from our agent now or recently in the far west, that business is again reviving in the Kootenay towns, as a result of the recent bounty measure passed in Parliament, protecting the owners of silver lead mines. Also writing from Macleod on Aug. 8th, Mr. Cliff tells us that "the large ranchers around Pincher Creek are complaining bitterly because so much land is being fenced in by new farmers, and now their cattle have not the same range to run. Land in this section has greatly increased in value during the last year."

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, August 20, 1903, compared with those of the previous week.

Cities	August 20, 1903	August 13, 3
Montreal	$20,478,348	$21,851,027
Toronto	14,275,049	14,570,710
Winnipeg	3,146,296	4,016,099
Halifax	1,685,112	1,995,560
Hamilton	.....	1,095,150
St. John, N.B.	1,053,505	1,185,601
Vancouver	1,369,124	1,322,470
Victoria	659,788	837,184
Quebec	1,874,754	1,385,820
Ottawa	.....	2,073,687
London	818,130	816,706
$	.....	$51,150,884

Its Success Tells All.

—"That man, sir, is one of the greatest figures in the financial world."

"I want to know!"

"Yes, sir. He's the patentee of predigested securities." — Detroit Free Press.

—The manufacturers of spruce lumber in Quebec and New Brunswick, are in a very comfortable position in respect to the disposal of their output. The danger of a large percentage of the log production being hung up has been lessened only slightly by the recent rains. There promises to be a shortage in the spruce supply. It is claimed that the demand is larger than ever known at this season of the year, and that manufacturers are receiving new orders daily. Many of these they are compelled to refuse on account of having their stock sold largely in advance. There has been heavy buying in Nova Scotia for the South American market, the prices for spruce ranging from $14 to $18. Deals are selling at $14 at the mill. The West India trade is also taking a considerable quantity of stock. The price of New Brunswick cedar shingles still holds around $3.40 to $3.50 for extras, on Boston rate of freight. A few manufacturers are said to be selling even as low as $3.35, but this cannot be said to be the market price, while indications point to an advance in the near future.—Star.

Commercial.

MONTREAL MARKETS.

Montreal, August 10th, 1903.

Ashes.—The strong market reported last week is still held, and dealers are apparently quite ready to pay $5.80, or perhaps a little more for first pots of good tares, while seconds would be quoted at $5.25 to $5.30.

Cements and Firebricks.—Arrivals of German and Belgian cement continue large: last week the figures were 29,790 bags, and 4,739 brls, and for the week ending to-day, 12,000 bags, and 8,879 brls. The receipts of English cement for the two weeks are only 700 brls., and of firebricks, 93,525. A good steady business is reported at firm prices.

Dairy Products.—Last week's shipments of dairy produce seawards were liberal, eleven steamships having taken out 115,270 boxes of cheese, as against 39,368 boxes for the same week of 1902, and 16,698 pkgs. of butter, as against 11,621 pkgs. at same date a year ago. In butter, there has been a firmer tone to the market since a week ago, and finest Townships creamery is held at 19c., or a shade over in some cases, nne Quebecs bringing, it is said, 18¾ to 19c. The local cheese market has also developed considerable strength, while the cable yesterday also showed a firmer market abroad. Finest Ontarios are now quoted at 10¼ to 10½c.; Townships, 10⅛ to 10¼c., and fine Quebecs at 10 to 10⅛c.

Dry Goods.—Quite a large number of outside buyers are reported to be in the city this week, some of them from as far west as Regina, but a good many of them seem more on pleasure bent than business, while some have been attracted by the Boards of Trade convention now sitting. City retail trade is quiet, but collections in this quarter are being well kept up, all things considered. Values in all line are firmly held.

Groceries.—Since last writing the sugar market has taken a firmer tone, and granulated and other lines of hard sugars have been advanced 5c. a central, making the present factory figure for standard granulated $4.20, in brls. Soft sugars and ordinary yellows have not been altered. New York is reported stronger, and raws show some little advance. A cable from Malaga to-day quotes blue fruit at practically the same figures as last year. Sultanas are easy, and have

receded 2s. below opening figures. Advanced samples received to-day show excellent quality, and a new feature this year is the shipping of cleaned sultanas which open very attractively. Currants continue firm. Reliable opening prices for new Valencias have not yet been received, but the crop is reported an average, say about 25,000 tons, though it is expected that the fruit will be small owing to dry weather. Shelled almonds have receded a little since earlier quotations. Grenoble walnuts still remain at opening low quotations, but the crop is not expected to be as early as usual, and first shipments will hardly be made before November.

Hides.—Not a change of any kind is reported. For No. 1 beef hides, the quotation is 8½ to 9c.; while lambskins are unchanged at 45c. each, and calfskins at 11c. per lb. for No. 1, and 9c. for No. 2.

Leather.—For the past fortnight, the market has been a quiet one, in sa far as local demand is concerned, no notable transactions being reported. Values, however, are all well held, manufacturers' sole being quoted at 23½ to 24c., according to selections; slaughter, 27 to 28c.; Western splits, 19 to 21c.; Quebec ditto, 15 to 17c.; grained upper, 14 to 16.; waxed ditto, 32 to 35c.; patent cow, 16.; calfskins, 16 to 23c.

Metals and Hardware.—The revision of credit terms in these lines, to which we referred at length last week, have gone fully into effect. There will be no more 4 months credit, the limit being 90 days, or 2 per cent. off for cash in 30 days from shipment. These terms have been fully agreed on by both manufacturers and jobbers. Trade continues to be very well sustained for August, some of the larger hardware houses reporting business almost as active as in June. With regard to values, few changes are reported. Copper went off at the end of last week, and was quoted as low as 13¾c., but has recovered and the jobbing figure is now 14¼c. Tin is firmer at 32 to 33c.

Oils, Paints, and Glass.—Linseed oil took a decided turn downwards after last writing, and is being jobbed at 50 and 53c. for raw and boiled respectively. Turpentine has gone up a couple of cents. In other lines there is no news. We quote as follows: Single barrels raw linseed oil, 50 to 51.; boiled, 53 to 54.; net, 30 days or 3 per cent. for four months term. Turpentine, 77½c. single barrel. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gal.; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $5 to $5.15; No. 1, $4.75 to $4.80; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, August 20th, 1903.

Chemicals, Drugs, etc.; — Turpentine has advanced again. Quinine and opium both continue firm, with no particularly new feature to report. Business on the whole is very fair and prices are well maintained.

Dry Goods.—There has been a lull in the activity of the dry goods trade during the past few days, no doubt in anticipation of the rush which is sure to take place at Exhibition time. Wholesalers are engaged in shipping fall goods. Dress goods of high quality are being asked for in large quantities, and there is no weakness displayed as regards price. Friezes have been especially in good demand, and will likely be extremely popular next winter.

Flour and Grain.—Not much flour is being offered in the local market, and the market presents firm prices. The ordinary price offered for ninety per cent. patents is $2.90 in buyers' bags, middle freights, but holders are standing out for 5c. more at the least. Manitoba flour is steady, millfeed is in better demand, though prices keep at about the same figure. Oatmeal is in fair

J. J. W. Deuchar, F.F.A, F.I.A, General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

demand. Wheat here has made no change as to prices, and little business in being done. In Minneapolis, according to a recent dispatch, there was on Monday last a quick advance of 3½c. which brought the price up to $1 per bushel, for immediately available wheat, the mills having to close down for lack of it.

Fruits and Vegetables.—The wholesale fruit merchants report a very heavy week's business, with offerings of some sorts of domestic fruits larger than usual. Prices may be quoted as follows. Thimbleberries, 4½ to 5½c. per box; huckleberries, $1 to $1,25 per basket; apples 12½ to 20c. per basket; crab apples 15c.; peaches, white, 20 to 25c. per basket; yellow 25 to 50c.; pears, Bartlett, 30c. to 40c., other kinds 20 to 25c.; plums 20 to 25c.; Canadian canteloupes, 60 to 75c. per basket; tomatoes, 30 to 40c.; bananas, which have advanced owing to the damage by storms in the West Indies, 75c. to $3 per bunch; cocoanuts, per sack, $3.70 to $5; oranges, late Valencias, $4.50 to $5; lemons, Sorrentos, $4 per case; pineapples, $3.50 to $4; watermelons, 15c. to 25c. each; canteloupes, 60c. to 75c., cucumbers, 15c. to 20c. per basket; celery, 35c. to 40c. per dozen; corn, 8c. per dozen; pineapples, small cases, $1.80 to $2; large, $3.50; Rockford melons, $3.50 to $4 per case.

Hardware.—The manufacturers of screws have made a new price list, though they have retained the old discounts. Some lines are a little lower, and some a little higher, but taking an average all-round stock, the price will be found to range about 5 per cent. higher. Business in shelf hardware is good, and there is a large demand for agricultural implements. Sporting goods and builders, hardware also are moving out in large quantities, though, so far as the latter is concerned, the season is early as yet, and the probabilities are that business will show up even more heartily later on. Trade in metals is good, and prices continue steady. In Glasgow, Scotland, only a small business recently has been transacted in the pig iron market. Cleveland warrants have dropped.

Hides and Skins.—Sheep and lambskins rose about 5 cents during the week, but hides show a rather easier tendency. Calfskins are unchanged. Tallow is dull.

Live Stock.—There was only a light run of animals at the cattle market this week, and trade might be described as dull. Owing to the dull state of the British market, the demand for export cattle was not strong, though a fair number were bought to fill up space. For butchers' cattle, the feeling was a little stronger, and prices for good stock were well maintained. Prices for stockers and feeders were easier, though receipts were few.

Provisions.—While dairy rolls of high quality are scarce, the offerings of other grades of butter are quite heavy. Prices are but little changed from last report. A steady market prevails for cheese at 10½c. Eggs continue at about 14c. or 15c. per dozen, with liberal receipts. Receipts of spring chickens are a little more heavy, but dealers want more. The price is 11c. to 12c., while turkeys and young ducks are quoted around 10c. Smoked meats continue at firm prices under a steady demand.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION,

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

INSTITUTE OF ACTUARIES

STAPLE INN HALL, LONDON.

COLONIAL EXAMINATIONS.

NOTICE IS HEREBY GIVEN:—

1. That the Annual Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa and Cape Town, on Friday, 15 April, 1904, and on Saturday, 16 April, 1904. If necessary the Examination will be continued on Monday the 18 and Tuesday the 19 April, for Part IV.
2. That the respective Local Examiners will fix the hours of the Examinations, and inform the Candidates thereof, and of the address at which they will be held.
3. That Candidates must give notice in writing to the Honorary Secretaries in London (England), and pay the prescribed fee of one guinea, not later than 31 January, 1904.
4. That Candidates must pay their current annual subscriptions prior to 31 December, 1903.

(By Order) F. SCHOOLING, GEO. TODD. } Hon. Secs.

T. BRADSHAW, Supervisor in Toronto, Can.

Mercantile Summary.

It is stated that a deal has been closed whereby the Grand Trunk Railroad Company acquires the lines of the Wisconsin Central Railway, thus bringing it into Minneapolis.

The attempt of the directors of the Consolidated Lake Superior Company to raise money by means of a bond issue not having proved successful, a general reorganization is talked of.

The output of pig iron for the present year of the United States Steel Corporation is estimated at about 8,800,000 tons. Last year it was 7,975,350 tons and the year before, 6,803 988 tons.

A Canadian syndicate, we hear, has bought about half of the pine lands owned by the Michigan Land and Lumber Co., in Algoma, estimated to yield about 70,000,000 feet of lumber. The sale includes the company's entire outfit of camps, horses, materials, &c., and the price was $300,000.

The shipments of ore from the Rossland district of British Columbia for the week ending August 22nd, were: Le Roi, 5,500 tons; Centre Star, 1,620; War Eagle, 960; Kootenay, 330; Le Roi No. 2, 810; Giant, 30; Spitzee, 30; Jumbo, 150. Total 9,480 tons; for the whole year to date, 343,657 tons. There was considerable increase in shipments from Le Roi, owing to the blowing in of several additional furnaces at the smelter.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Mercantile Summary

As the result of pressure from law suits on several overdue bills, A. A. Lefebvre, dealing in agricultural implements, harness, &c., at Labelle, Que., has filed consent to assign.

THE Allith Manufacturing Co. makers track door hangers and other varieties of hardware, have taken over the building in Hamilton formerly occupied by the Leitch & Turnbull Elevator Co., and will therein start a branch factory.

LAST January, E. N. Gagnier, of Windsor Mills, Que., who had had some years experience as clerk, which does not seem to have been of much benefit to him, started on his own account in the grocery line. Already he is reported as having assigned.

VERY low freight and treatment rates have been secured for shipping ore from the Winnipeg mine, Wellington Camp, B.C., to the Montreal and Boston Copper Co.'s smelter, and, as a consequence, operations are to be re-commenced. A ten-drill plant has been installed, we are told.

A LITTLE more than two years ago, a young farmer named Herodias Drouin, began storekeeping at Beauce Junction. He has made, as was to be expected, about the average running in such cases, and is now reported insolvent, owing debts of about $3,000, and showing nominal assets of $2,200 to pay them with.

WE hear that C. Vallee & Co., haberdashers, Montreal, are asking an extension of two, four, and six months on liabilities of $3,400. It is claimed for them that they have assets of $7,250. Vallee was formerly unsuccessful in the dry goods business, and has latterly been doing business under cover of his wife's name.

A DEMAND of assignment has been made upon Azene Larose, wife of S. A. Larose, doing a retail dry goods business in Montreal, under the style of S. A. Larose, and the liabilities are said to be about $13,000. S. A. Larose failed before in 1901, owing $18,000, and got no settlement. The stock was subsequently bought in for his wife.

A COMPANY has been organized in Oklahoma, it is said, under the name of the Pan-American Railroad Co., with a capital of $250,000,000, for the purpose of building a gigantic trunk railroad to connect Hudson Bay and British Columbia with Buenos Ayres, Argentine Republic. A multiplicity of branches is said to be contemplated. A sister corporation, the American Town Site Company, having an alleged capital stock of $10,000,000, has also, the story goes, received a charter. There is nothing in the despatch throwing doubt upon the sanity of the projectors, but our readers may believe exactly what they please as to the story.

BUSINESS troubles among Montreal traders are reported as follows: Henri Dessaints, formerly a clerk in Manchester, N. H., and in the grocery business on his own account for a year or two in this city, has assigned. L. Beaulieu & Co., in the same line of business, has consented to assign. Mr. Beaulieu, who has been doing business in his wife's name, was formerly a hotel keeper, unsuccessfully, at Windsor Mills, Que. A demand of assignment has been made upon J. Lucas & Co., printers in a small way, who are said to owe about $2,200. L. D. Carignan, dealer in coal and wood, who failed several weeks ago, is making an offer of 15 per cent. on liabilities of $12,000 or more.

Mercantile Summary.

It is reported that L. Herman, in the clothing line at Sydney, is an absentee. He is supposed to have gone to New York. He has left very little in the way of assets.

During the past year in Saskatoon, Sask., there have been erected a $17,000 flour mill and elevator, a $15,000 hotel, a large stone block, a building for the Bank of Hamilton and many other substantial buildings aggregating in value at least $100,000.

For some thirty years, S. F. Granville, now an elderly man, has carried on in a small grocery way in St. John, N. B. Twice he is reported to have failed in former years and now again he has compromised, this time at 30 cents on the dollar. His present liabilities are small, only about $1,200 or thereabout.

Late Nova Scotian failures are reported as follows: M. A. Otterson, formerly a cutter in Halifax and elsewhere, with a considerable experience, started in a general tailoring way at Middleton in the fall of 1901. The next year he opened a branch at Laurenceville, which was thought to overtax his small capital. Now he is reported as having assigned.

A vessel which, it is said, will be larger than any plying on fresh water, is to be built for a syndicate in which A. B. Wolvin is a prominent figure. Its cost is to be about $500,000 and it will be built by the American Shipbuilding Co., at Lorain, O. Its capacity will be 10,000 tons of freight and its length will be 560 feet over all, beam 56 feet and depth 32 feet. It is to be ready for the opening of navigation next spring. The Americans are always trying to build a "biggest vessel" these forty years

From Quebec City we hear of a couple of late failures. Fleury & Douville, jobbers in tobaccos and cigars, have approached their creditors with an offer of 25 per cent. on liabilities of about $10,000. But some of those interested seem inclined to require explanations before acceding to this request. The present firm dates from only June last, succeeding to Jobin & Fleury, who started business in the fall of 1901. Hector Breton, in the retail grocery trade for the past twelve years without previous default, is reported to have assigned.

E. R. Moffatt, general dealer of North Sydney, writes his creditors, through his solicitors, asking them to accept 35 per cent. of their claims, which are estimated to aggregate $14,000. He was involved once before in 1888, and then effected a compromise arrangement. ——L. W. Gilvary, general dealer at Gabarus, is reported to be offering 25 cents. ——A Chinaman who calls himself Benjamin Samuels, and has been running a restaurant and fancy goods business at Yarmouth, has assigned. He chose rather a suggestive European name to disguise himself.

The Canadian Pacific Railroad has received a number of the engines built for it in Scotland, besides hundreds of new freight cars, with the help of which it hopes to handle the Northwest crops satisfactorily. The Canadian Northern Railway Company have also received over thirty new locomotives from Kingston, Ont., besides about 1,300 new box cars, each with a capacity of 1,000 bushels of wheat. The greater readiness of these two railway systems, which handle by far the greater portion of the crops, together with the fact that harvesting has begun some ten days earlier this year than last, should facilitate matters very considerably during the coming season.

The St. Lawrence Hall Hotel at Cacouna, Que., has been destroyed by fire. The loss was about $20,000, partly covered by insurance.

The Duck Mountain Lumber Company, of Manitoba, have purchased the Hamburg lumber limits at Boggy Creek, Man., and will put in a 30,000 capacity saw mill.

The Ratepayers of Regina, Assa., have decided in favor of putting in water, sewerage, and Electric Light systems to be operated by the city. Moosejaw is thinking of adopting a similar course.

A Fleet of steamers will be put upon the Red River. Messrs. D. E. Sprague, J. M. Ross and others of Winnipeg are forming a company to be known as the Red River Navigation Company for this purpose.

The Canadian Pacific Railway has let a contract for the diversion of its main track at Clan William station, twelve miles west of Revelstoke, B.C., on account of the heavy snowslides which sometimes occur there. The cost of the undertaking is estimated at about $95,000.

Lake and rail freights rated to Montreal are still weak. The freight on corn from Chicago to Montreal, water route, is 3½c. per bushel. Several thousand bushels of corn are reported coming from Chicago to Buffalo at 1⅜c per bushel, and from Buffalo to New York by canal at 3⅞c.

Mercantile Summary.

VINCENT & MACPHERSON'S furniture warehouse at Brandon, Man., has been burned down, at a loss of $7,000, partially insured.

THE death of Dr. Lucius Oille is a loss to St. Catharines and indeed to Ontario. He was a man of much intelligence, enterprise and public spirit.

THE second convention of the wine and liquor dealers of the province of Quebec will be held at Three Rivers this year, on Thursday, September 3.

THE increase in travel between Vancouver and Victoria, B.C., has been so great of late that the new steamer, the "Princess Victoria," has been already put on without waiting for the finishing touches to be put on her construction.

NEWS comes from London, Eng., of the death in that city of Mr. R. A. Smith, who for many years was manager of the Allan line in Montreal. He left the service of the Messrs. Allan about 1890, and has since resided mainly in London.

ON Tuesday evening, 18th inst., a fire broke out in the Great Northern Railway workshops in Quebec City which destroyed the buildings, with machine shop, 1 tender and 10 cars. Loss, probably $75,000, well covered by insurance in the Law, Union and Crown company.

THE Swedish steamer "Ovidia" arrived at Halifax early on Sunday morning from Rotterdam with steel rails for the I. C. R. and a quantity of general cargo. The steamer has about 2,500 tons of rails. After discharging she will likely load deals for the United Kingdom.

SOME moneyed men in North Sydney and Antigonish, N.S., are securing an option on what is believed to be a very valuable deposit of mica at Bay St. George, Newfoundland. The area in which the mica has been found is five miles or more in extent, near the Reid Railway line, and it is said that samples of the mineral show that it exists in the form of good sized sheets.

ON Tuesday last, the seventeenth annual convention of the International Association of Factory Inspectors opened in Montreal. About seventy-five delegates from eastern American states, and from Canadian cities, were in attendance. Papers read on child labor, the safety of employees in factories, and fire escapes. Mr. James Mitchell, of this city, who has been twice president of the association, presided. The Hon. Lomer Gouin, provincial minister of public works, and the acting mayor of the city, welcomed the delegates.

THERE is scarcely anything in the modern house so useful and economical as the up-to-date hot water heater, which acts so promptly and efficaciously, and makes possible any amount of hot water on a moment's notice, any time. These heaters of to-day are exceedingly simple, and can be installed at a very small cost in any house that has gas; this, too, without seriously dismantling any part of the house. They are neat and compact, and once installed add greatly to the appearance of the home. As they are lighted only when hot water is needed their economy will be appreciated, while at the same time they do not keep the house hot and unpleasant as does the old method of heating water. The James Morrison Brass Manufacturing Company, Limited, of Toronto, make these instantaneous heaters, and are issuing an interesting booklet on the subject, which will be sent on request.

Manufacturing and Wholesale Stationers.
43 to 49 Bay Street, Toronto.

Mercantile Summary.

MESSRS. SUTCLIFFE & MUIR are putting up a large modern flour mill at Moosomin.

IN 1897 R. A. Teasdale commenced in the tailoring business at Massey, Ont. From the first but little progress was made, for he had only a limited field of operation. His assignment to R. D. Schooley of the same place is announced.

THE firm of Geo. Wilson & Co., planing mill owners, of St. Catharines, recently assigned to G. B. Burson. A statement made by this company on July 7th of this year showed nominal assets of $133,000, with liabilities of about $103,000. On July 27th, the storehouses with contents were destroyed by fire, the loss being estimated at $40,000, while the insurance carried amounted to $25,000. The last report at hand is to the effect that assignment has been made.

THE following companies have received Ontario charters; the Lake Ontario Steamship Co., Limited, Hamilton, capital $150,000; the Sunbeam Incandescent Lamp Co. of Canada, Limited, St. Catharines, capital $100,000; the Consolidated Stores Co., Limited, Toronto, capital $50,000, to prepare, buy and deal in groceries: the Sudbury Power Co., Limited, Ottawa, capital $400,000, to manufacture and deal in waterpower, electric, pneumatic and other powers, also in electricity.

AT a meeting of the shareholders of the Grand Trunk Railway in London, England, assent was gained to the proposal of the directors to create an issue of 4 per cent. guaranteed stock, increasing the amount from £5,200,000 as at present to £10,000,000. This means of providing money was proposed, it was explained, so as not to have recourse to the issue of perpetual debenture stock, thereby adding to the fixed charges of the company, and so as to strengthen the junior securities. The money will not be employed in extending the road to the Pacific.

HALIFAX LETTER.

In a comparatively new country like Nova Scotia it is somewhat unusual to find a firm continuing uninterruptedly in business for almost 100 years. While in the private office of Bauld Bros. & Co., wholesale grocers of this city, your correspondent noticed upon the walls the portraits of three generations of the family and elicited some interesting information regarding the history of this firm. In 1816 Wm. Bauld, senior, established the business on the present site, being joined ten years later by his half brother, John Gibson. About 1850 Wm. Bauld, junior, was admitted to partnership and the style of the firm was changed to Bauld, Gibson & Co.: In 1880 Henry G. Bauld, the present senior partner, became a member of the firm and in 1900 his two brothers, Alfred and William C., were admitted to partnership. The fourth generation is represented by Stanley Bauld, son of Henry G., who holds a junior clerkship and as time rolls on may naturally expect to succeed to his father's interests.

I had an interview recently with Mr. S. M. Brookfield, manager of the Halifax Dry Dock. A lot of new machinery has been added to the equipment of the dock this season, this being rendered necessary by the changes in ship building in recent years. When this dock was first built steel ships used only 12 foot plates while now 30 foot plates are not uncommon. To give an idea of the class of machinery now required it may be said that the freight alone

on two machines installed this year amounted to $1,000, and that there were three castings in these machines weighing 33,000 lbs. The Halifax dock is now one of the best equipped on this side the Atlantic and is able to secure large jobs in competition with repair shops in the United States. Mr. Brookfield emphatically denies that the cost of repairs at Halifax is greater than elsewhere.

About 300 persons left Halifax this week on the Farm Laborers' excursion to points in Manitoba and the North-West and large numbers went from other parts of Nova Scotia. Many of them were clerks and others of little service in the harvest field who were tempted west by the exceedingly low fare of ten dollars. Year after year these cheap excursions take large numbers of our people to the West and many of them never return. With so many industries in our own province seeking development at the present time, the East can ill afford to lose any portion of its population. The

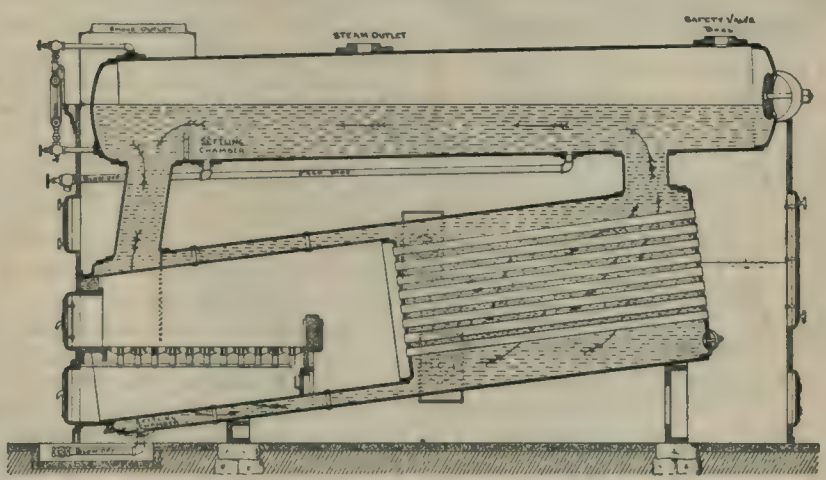
Combines the Best Qualities of Other Boilers.



The Mumford Standard internally fired boiler combines to a remarkable extent the best features of the Scotch and English types of internally fired boilers, together with the lighter weight, less floor space and more perfect circulation of the best boilers of the American water tube type.

The construction throughout, except the tube sheets, is cylindrical and spherical, requiring no stays; the boiler is supplied with an outer steel casing or for brick setting as desired by the customer.

The steam and water space is divided between two cylindrical shells; the thickness of plate is not so great as in the Scotch marine type, and the expensive and troublesome rear combustion chamber is avoided.

ORDERED that a Special General Meeting of the Shareholders of The Monetary Times Printing and Publishing Company, Limited, be held on the 10th day of September, 1903, at the hour of three o'clock in the afternoon, for the consideration of the By-law, and if the Shareholders approve of same, for the confirmation of a By-law authorizing the Directors to borrow eight thousand dollars from the Canada Permanent Mortgage Corporation, and to mortgage or pledge the real or personal estate of the Company, and for the transaction of such other business as may be transacted at a general meeting.

Toronto, 18th August, 1903.

WANTED

A young man as Cashier for Loan and Savings Company. Must have previous experience. Apply fully, stating salary expected, to P. O. Box 655, Winnipeg, Manitoba.

Government expedition to Hudson Bay in charge of A. P. Low, sailed from this port on Saturday. The departure was witnessed by a large number of people and previous to her sailing, photographs were taken of the "Neptune," her officers and crew as well as of Captain Moodie and his mounted police.

For over forty years a mysterious cattle disease has decimated the herds in Pictou and Antigonish Counties. It has lately broken out in the eastern end of Kings County, P. E. Island. Dr. Pethick, veterinary expert of the Department of Agriculture, was in the province last week in connection with the disease, and it is stated that the result of the Government's investigations renders it possible that the weed "willie" is the cause of the disease which is officially known as hepatic corrhosis. The spread of the disease outside of the localities where it has been so long confined calls for vigorous action for our farmers are face to face with the danger of having cattle raising practically extinguished. The weed alluded to has hitherto been allowed to grow and seed unmolested.

Nova Scotia apples have made their first appearance on the Halifax market for the season, a consignment of August pippins being readily disposed of at $2.25 and $2.50 per barrel. The prospects are for a good crop in excellent condition, and the scarcity in Great Britain and on the Continent should keep prices up.

The Boards of Trade of the towns of North Sydney and Sydney mines have been amalgamated and there is some talk of the amalgamation of the towns themselves. The united towns would have a population of upwards of 15,000.

The town of Pictou has purchased the gas works in that town of the Corporation controlling this franchise, and the ratepayers have voted $30,000 for the purpose of installing a civic lighting plant. Nothing will be done before the end of the year.

The Halifax delegates to the Annual Meeting at Charlottetown of the Maritime Board of Trade, have returned and report a very successful gathering. The delegates were surprised at the magnitude of the engineering work in the construction of the railway bridge across Hillsboro River at Charlottetown, which has been in progress for the last three years, and when completed will be about one mile in length, accommodating railway, team and foot traffic.

Next week schools re-open throughout this province. Many sections have been unable to secure teachers. Not long ago teachers were

REACHING FOR THE BEST.

IT'S significant of the value of honest construction and perfect workmanship of goods bearing the J.M.T. trade mark, when we state that there are in use to-day throughout the Dominion over 1,000,000 valves bearing this trade mark.

These valves range in all sizes, and are in use on steam, water, gas, ammonia and sulphite.

Durability is the chief characteristic of these valves, and when you consider their extremely long life, the J.M.T. valve is the most economical valve to buy.

Correspondence will develop some facts relative to our steam engineering specialties, which are of equal importance to us both

SPECIAL ANNOUNCEMENT.

In the Main Building of the Toronto Exhibition will be found, near the South entrance, the exhibit of the

CANADA PAINT COMPANY,
LIMITED.

The attention of the public is particularly drawn to this exhibition of **Varnishes, Colors, Gums, Stains, Paints** and **Lead** products.

Interesting novelties from **all parts of the world** appertaining to the business will be on view, and the products of the

Canada Paint Company's mines and **manufactures** will be shown and explained.

The officers of the

CANADA PAINT COMPANY

in charge of the exhibit will be happy to answer any enquiries.

very plentiful and trustees had only to place an advertisement in the papers to secure a number of applications from which to make choice. The present scarcity is due to several causes. Several have left for the North-West to go into teaching there at better salaries. A few went to South Africa. But the chief cause of the scarcity is the industrial development of the Province which has opened up so many lucrative positions to young women that they are unwilling to continue the calling of teaching for the paltry remuneration offered in that profession.

The Board of Directors of Dalhousie College have added an assistant Professor of Metallurgy to the staff of the school of mining. The appointment has been given to Mr. F. H. Sexton, a graduate of the Massachusetts Institute of Technology and since engaged in researches on the Metalography of iron and steel. Mr. Sexton will begin his work at the opening of the College in September and his labors will, no doubt, be of advantage to the mining interests of the province.

The finding of a valise at Glace Bay containing about $70,000 worth of bonds besides other valuable papers in a store, has caused excitement here. The bonds were supposed to be those of the Preachers' Aid Society, of Boston, recently stolen. After the Boston police had been communicated with and an officer had started for Glace Bay it was discovered that the bonds found were worthless imitations evidently made out by some business college student by way of practice.

It is reported that Mackenzie & Mann have offered $15,000 a mile for the Cape Breton Co.'s railway which runs from Port Hawkesbury to St. Peters, a distance of 30 miles. The road cost $30,000 per mile but is only partially completed, having been affected by the failure of the Dominion Securities Company last year.

Halifax, Aug. 24th, 1903.

THE EDITOR'S SONG.

How dear to my heart is the steady subscriber,
Who pays in advance without skipping a year;
Who lays down his dollars, and offers them gladly,
And casts 'round the office a halo of cheer.

Who never says: "Stop it, I cannot afford it!"
Or, "Getting more papers each day, than I read;"
But always says, "Send it, the whole outfit likes it—
In fact, we regard it a business need."

How welcome is he when he steps in the sanctum,
How he makes "our heart" throb, how he makes "our eye" dance!
We outwardly thank him—we inwardly bless him—
The steady subscriber who pays in advance!

—Business World.

LOSS ALL AROUND

There are nearly 200,000 idle workmen in New York city to day because of strikes and lockouts. There is a daily loss of $700,000 in wages It is estimated that nearly $600,000,000 in capital is tied up by the stoppages. The banded employers are organizing sympathetic lockouts as a means of antagonizing sympathetic strikes. In the meantime, business is paralyzed, and the prosperity of the country threatened. Matters are not so bad in Philadelphia, but they are bad enough, and there is a threat of graver disturbance which thoroughly unsettles all calculation for the future and brings speculation to a standstill. Out of such a state of things no advantage can be reaped by anybody.—Philadephia Record.

FINANCIAL REVIEW.

Unless there is some large financial movement of an unusual character in the months of July and August, it is seldom that there is anything in the bank statements of those months that calls for special remark. It is a time generally known as "between seasons," in mercantile phrase. The great expansion of bank circulation required to move the crops has not yet begun. Discounts are quiet: so, as a rule, are deposits and reserves. The business of Canada is largely a business from harvest to harvest; and this may be said even taking into account the vast development of the Dominion in recent years in other directions. For a month or two before harvest, therefore, matters are comparatively quiet in the financial sphere, though there is usually abnormal activity in shipping.

But now that we have come to the time of harvest another year is opening before us, and the character of the year will more largely be governed by the results of the harvest than by any other of the many factors in the position. It goes without saying that all eyes are now turned towards the North-West, for that portion of the harvest bulks more largely than all the rest put together. Upon that, therefore, more than upon any other cause, will depend the character of the coming year. Even as we write, the conditions of this great problem have begun to be worked out. Some things are certain, others are still matters of doubt. It is certain that the area of wheat sown is largely in excess of that of last year. Immense as the crop of last year was (we might even call it enormous), that of this year would largely exceed it if the returns per acre were as great as last year: and if the average quality were as high, and it were harvested in equally good condition, the return would be almost fabulous.

Something is known already on these points. To begin with, it seems certain that the yield per acre will be less than last year. But, on the other hand, the increased quantity sown will make up for this, or nearly so. It is most probable also that the average quality will not be as high as last year, even with the best of weather for harvesting. This last, however, is the most critical element of all.

By the time that this reaches our readers, the harvest of the North-West will be well under way, and an immense element of doubt as to its yield removed. So far, nothing unfavorable has happened to any extent, but every day's weather will be watched with anxiety; for a severe touch of frost in a single night may do damage to the extent of millions. Heavy rains, hailstorms or rust, if they are spread over wide areas, would produce the same effect, though not perhaps to the same degree. The weather, therefore, during the next week or ten days, may make or mar to the extent of many millions of actual value.

But now, supposing that the harvest is well gathered in, what will be its bearing upon the financial condition of the country? An important question indeed; let us try to grasp it clearly. Manitoba and the North-West, in that case, will have in possession immediately available for sale or use over one hundred bushels of grain. The value of this, where it stands, can scarcely be less than thirty-five to forty millions of dollars. Let us bear in mind that this forty millions is not forty millions' worth of land, or forty millions' worth of houses, mills, factories and such like—that cannot be turned into money without an enormous application of labor and a considerable lapse of time, but forty millions' worth of merchandise—salable merchandise that the world wants and will be eager to buy; in fact the most salable, and the most readily convertible into money of any description of merchandise that the world knows. It will be, indeed, almost as good as forty millions in gold.

This will be in the possession of the people of North-West Canada within a few weeks, and it will be for them to distribute it through the channels where it will be the most useful. There will be debts to pay—for agricultural implements, for store goods, for instalments on land, for borrowed money. There will be a large amount, millions indeed, available for improvement of land, the building of houses and barns, the purchase of stock, and numbers of things that make for improvement of productive capacity. After all this, there will be, beyond doubt, an immense sum still remaining over and above which will be available as permanent savings. This will largely be deposited in the branches of banks so widely scattered over the whole country, and will swell the rapidly increasing volume of their resources. All this will set in motion a thousand wheels of transportation by land and water of manufactures and commerce, of banking and shipping and employment of labor, its benefits extending across the Atlantic and, stimulating many avenues of business there likewise.

All these we may call the direct financial effects of the ingathering of such a harvest, if Providence wills that such an enormous blessing be vouchsafed to us. And let

us remember that this is an absolutely new thing in the world. It is marvellous to think that within so short a period as thirty years ago the productive capacity of all these vast regions, so far as cereals were concerned, was absolutely *nil*. If any country in the world will have reason at this season for profound thanksgivings to the Giver of all good, that country will be Canada; for in addition to all we have outlined above, it must not be forgotten that the Fall Wheat crop of Ontario is proving a most abundant one; that the spring crops of both Ontario and Quebec are promising well; that our hay crop is a full average, while our wonderful dairy industry is reaping a perfect harvest of wealth from the high prices that much of its product has realized. It is well that our English cousins and friends are seeing us at such a time as this—which will make itself very distinctly manifest in the bank returns of the coming year.

We present below a condensation of the monthly statement of Canadian banks for July, 1903. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities; average holding of specie and Dominion notes, etc.:

Canadian Bank Statement.

You cannot foresee the coming of an accident, but you should have foresight sufficient to provide protection for yourself and your family when it gets here. If you want your memory and your grave kept green after you have been the victim of a fatal smash-up, leave an accident insurance policy among your effects.—T. I. P.

THE MANITOBA CROP.

The news from our prairie country continues to be satisfactory. Weather is fairly good for harvesting which is in full swing. Between 8,000 and 10,000 harvest hands have arrived at Winnipeg to help the farmers. The first wheat of the new crop was received in Winnipeg on Wednesday last, coming from Altona, south of Winnipeg and close to the Dakota border. It is a fair sample, but badly cleaned, grading No. 2 Northern. The Annual Report of the Northwestern Grain Dealers' Association was issued yesterday, and contains the following estimates. Presumably some pains has been taken in compiling them. They make out that the wheat area is 3,123,663 acres and that the yield will be 57,163,032 bushels. Oats 1,101,333 acres, yield 40,438,921 bushels. Barley 381,135 acres, yield 10,900,461 bushels. Flax 64,339 acres, yield 743,348 bushels. We also get the following from our special correspondent. It is dated Thursday noon. "The weather during the past week has been cloudy and cool with frequent rains. If we have favorable weather, wheat cutting will be finished in another week. Nearly all points report that the yield will be much better than was expected earlier in the season."

FURTHER ADVANCES IN COTTON GOODS.

On Saturday last the Canadian Colored Cotton Mills Company announced further advances in their productions of from ½c. to 1c. per yard, equal to from 5 to 7½ per cent. The articles affected are tickings, cottonades, denims, shirtings, galateas, oxfords and apron ginghams. There was also an advance of 1c. per yard in flannelette sheetings. These were all in addition to enhanced prices which have been from time to time announced in these columns. A heavy advance has also taken place in prices of cotton yarns and carpet warps of 3c. per pound, which amounts to 15 per cent.

These increases cannot be described as altogether unexpected. It is true that recent news as to raw cotton tells of a series of breaks, but it must be remembered that for some time past manufacturers of cotton textiles have been selling goods at a price which left but the barest margin for profit, and that now they are working on raw material which cost considerably more even than when they bought previously, though it was then expensive. The whole cotton situation is a serious matter, of which the closing down of mills in both Great Britain and the United States gives evidence enough. The final outcome is difficult to forsee. It is true that speculative influences have been largely responsible for the troubles with which the mills have been confronted, but behind the speculation there seems bound to be some far-reaching cause for the scarcity.

And probably this scarcity will be found to be in large measure a natural one, that is, one which has not been brought about altogether or even mainly by manipulation for gambling purposes—though no doubt this has actuated the conditions—but a scarcity which has been brought about by the fact that the world's supply has not kept pace with the consumption. It should be remembered that the people not only of the United States and Canada, but of Europe as well, have been more than usually prosperous during the last few years, and that this in the ordinary course of events would tend to cause their wants to be larger than usual. Not only this, but oriental nations have shown an increasing disposition to like "civilized" garments made of cotton, and moreover in China and

Japan there are many spindles now engaged in turning out goods on the spot. all further increasing the demands on the market for raw cotton.

So far as one can see now, and providing that the present prosperous state of things among the wage-earning classes of the world continues, there seems to be only one remedy for the prevailing high prices. It is a very radical one too—nothing less than a great augmentation in the sources of supply. Something is to be expected along this line, we suppose, from the Southern States, but it must be remembered that the soil in many localities there has been rendered poor by over-cropping. Probably it will be found in the end that this season's scarcity will have given a wonderful impetus to attempts to grow cotton in other parts of the world, which are being looked upon with considerable favor by the British, French and German governments. The West Indies and some parts of Africa give promise of becoming valuable fields for the future culture of cotton on an extensive scale. In this prospect Great Britain and the British Empire have considerable interests at stake.

BRITISH COLUMBIA MINING.

When the great advance in Canada's output of precious metals during recent years is borne in mind, the relative importance of our mineral products comes into greater prominence. Minerals come third now instead of last in order of value among the six categories into which our exports are divided in the blue books. In two fiscal years last past, mineral exports are put down at $31,064,000 and $34,947,000, respectively—ten years ago they were but $6,060,000.

But ten or a dozen years ago the Kootenay mines were all but unknown, at all events they were hardly a factor in our mineral product. Much enterprise and much capital have been put into the Kootenays since then, and with varying results, as always happens in the development of new mining fields. To-day, after floods, strikes and other set-backs, it is possible to state, presumably on account in large degree of the Government bonus to the silver-lead industry, that "it may be fairly assumed that prospects are brighter than they have been for some time past, and the effect of generally improved conditions should be shortly apparent." This is what the Mining Record says, referring in particular to the boundary district of West Kootenay, but similarly favorable language is used by the same journal with respect to Rossland, to the Duncan-Lardo country, to the Fish Creek and Camborne area; while "on the Coast the outlook is now better than it has been for years. The Tyee mine at Mount Sicker is at length in a position to earn substantial dividends; operations have been resumed at Lenora; the Texada mines are making regular shipments; the Britannia mine at Howe Sound is soon to be extensively operated," and so on.

Referring in particular to the Rossland camp, the August "Mining Record" says that its favorable showing is due to the satisfactory performance of four large mines (whose returns are as a rule chronicled in the newspapers from week to week), but that several other mines have entered the productive class. Sanguine expectations are held of the results of economic treatment of the low-grade ores of the district by using economic methods of concentration. The plant being put in for this purpose at the LeRoi No. 2 is to be in commission early in October. If this succeeds, it will "mean very nearly as much to British Columbia as the demonstration of the uses of cyanide of potassium as a means of recovering values from tailings had in the case of South African mining."

As to coal and coke, too, there are better tidings. "The adjustment of the labor troubles at Ladysmith has greatly stimulated coal mining activity on Vancouver Island, and the Crow's Nest collieries have now made ample provision to supply the local market with coke, . . . danger of further labor troubles or complications is entirely remote." All four furnaces are now in commission at the Granby smelter, and a second furnace has been blown in at the Boundary Falls works. So great indeed has the aspect of mining affairs in British Columbia altered for the better that, as our contemporary phrases it, "the entire situation has changed to one of bright promise."

COUNTERFEIT LIFE INSURANCE.

An Eighteen Years' Record.

SECOND ARTICLE.

Continuing the subject of Assessment Life Insurance from our issue of August 21st, we proceed to give below the remainder of the thirty-five instances chosen from the principal among the many such societies in existence in the United States and Canada. These tables will show still further how the cost of insurance in these organizations commonly increases with their age, and how generally the flight of years brings with it a decrease in their membership. We repeat that in reading the following tables, it is to be noted that $4.00 is added to the net "cost per $1,000" of each society, to represent the average expenses. Some societies spend more and some less, but by using this fixed figure for expenses in all the years, the increase in the mortality rate is indicated by the difference between the former years' figures, and those of 1902.

That great society, the Ancient Order United Workmen of America, becoming alarmed at its increasing death losses, and the rapidly-increasing average age of its membership, resolved to call in an expert. They appointed a committee of seven members, and they consulted an Actuary of world-wide reputation, who approved of the plan now adopted by the Supreme Lodge of America for the 451,510 members of that organization, carrying $709,030,000 of life insurance in its certificates. Supreme Master Workman Wm. H. Millar has issued an address explaining the increased rates which are hereafter to be collected by the Grand Lodges, or else they will lose the benefit of the guarantee from the Supreme Lodge. These rates per $1,000 are either from 65 cts. per month at young ages to $4.20 per month at age 55, subject to increase with age to a fixed $4.20 for life; or else a fixed life rate of $1.24 per month at age 18, and $2.05 at 35, and $4.20 at 55 or over. Each grand lodge, at next session, is to decide which scale of the two it will adopt. The reasons given for such increased rates, let Master Workman Millar explain in his own words:—

"To fulfil our contracts at existing rates would require $148,608,735 more than present rate assessments would yield—to be increased at 4 per cent. interest as against the time when it would be needed to pay claims. This deficiency arises entirely from the rates above 50 to the end of life being too low. No amount of increased membership would overcome the deficiency already accrued, for with each new member there would be added more deficiency."

The new rates thus decided upon for the American Workmen, to render that body solvent, are about three times as high as the increased rates adopted by the Ontario Workmen from July 1st, 1903, upon age 55 and over. If the $4.20 per month is just right, what about the $1.30 per month of the Ontario Grand Lodge? The Ontario Workmen have now no connection, except in name, with the larger body in the States and in Quebec, New Brunswick, Nova Scotia and Prince Edward Island, having seceded therefrom some years since.

The foregoing records show that in all cases where the society is nearly standing still, or is receding in its membership, the death losses have greatly increased—some twenty, some fifty and some a hundred fold. For instance, see the following numbers, in their order, showing increased mortality calls, as compared with their earlier records:—

No.	Name.	Increase.
1	A.O.U.W., California	$ 4 59
2	" Illinois	10 88
3	" Michigan	7 32
4	" Mass.	3 25
5	" Missouri	13 50
9	" Wisconsin	8 55
10	Am. Legion of Honor	42 20
11	Catholic Benev. Legion	10 23
13	Commercial Travellers	12 00
16	Golden Cross	4 68
18	Home Circle	7 90
19	Knights and Ladies	5 69
20	Knights of Honor	18 80
23	Knights Templars	13 93
24	Knights Templars	20 50
26	Mutual Reserve	18 40
27	National Union	8 57
28	National Provident	15 49
29	Pilgrim Fathers	6 30
32	Royal Templars, U.S.	7 80

Where there is a steady increase of the membership the growing death rate is pretty nearly covered out of sight; but it is there and will show itself more

distinctly so soon as there is a halt in the incoming of a flood-tide of fresh young lives. The following numbers have had a steady growth of members, and therefore show but a small increase, since 1885, in their death rate.

No.	Name.	Increase.
7	A.O.U.W., Ont.	$ 3 10
14	Can. Foresters	1 34
15	I. O. Foresters	1 40
22	Knights of Maccabees	2 50
25	Modern Workmen	1 85
30	Pro. Home Circle	2 09
34	Sons of Scotland	2 55
35	Woodmen of World	4 63

If the A.O.U.W. of America have a present cash deficiency of $148,608,753 to give solvency to their 451,510 members, (as stated by Supreme Chief Millar) then what about the 2,227,274 certificates held in the other 26 societies above, who are not Workmen? If they are so short of assets, on the average, their bill must amount, at the same rate per certificate, to the enormous sum of about $735,000,000. And this sum to be then accumulated at 4 per cent. compound interest until the claims mature. The outlook for anything like that sum being provided is not bright; though, as we have said, most of the associations now see the necessity of an adequate reserve, such as the statutes of every land require the regular companies to furnish their members at the back of every contract, large or small.

THE DOMINION EXHIBITION.

"There be three things which make a nation great and prosperous—a fertile soil, busy workshops, and easy conveyance for man and goods from place to place." These quaint and pregnant words of the eminent Lord Bacon have been placed by the authorities of the Dominion Exposition on the posters which advertise the Fair of 1903. And they are not badly chosen to typify the Canada of to-day. While the Fair itself is well calculated to illustrate the fertility of our soil and the activity of our workshops, our water stretches and the network of our steam and electric railways furnish the additional element prescribed by the sage as indicating the present prosperity and coming greatness of our land.

An early visit to the Fair grounds enabled us to see some striking improvements, and we strongly advise every citizen of Toronto to go early, to-day or to-morrow if possible, and see for himself and herself how the arrangements for this year's Fair surpass, in many important respects, those of any former year. At the main entrance, where used to be a single plank walk and a rambling eye-sore of a carriage building to the left, there are two substantial cement pavements and an expanse of greensward and shrubs. The wooden shed so long and so justly complained of by hollowware exhibitors, is replaced by a solid brick stove building. Machinery Hall has been improved by a portico. An admirably appointed octagonal building has been put up in which to exhibit processes of dairying, and the Manufacturers' Building, of cement and creamy brick, affords to exhibitors ample room and good light, while its proportions and exterior adornments gladden the spectator's eye. Nearly all the buildings have been freshly painted, too, in harmonious tones, with which the white gracefulness of the Art Temple makes neat contrast. In short, the whole place gives evidence of the application of enlarged plans—the following out of ideas in harmony with the progress of the country.

An excellent thing is the scheme of marking by means of huge signs in electric letters the principal buildings, another is the stringing along the length of the main avenues of colored electric lights for the guidance of strangers through the maze. What used to be the Main Building for arts and manufactures is now the transportation building filled with carriages and other vehicles. The Music Pavilion, to the south, is transformed into a Women's Building, where specimens of the handicraft o women may be viewed without climbing the stairs of the Main Building, as before. It was a happy thought to devote a part of the great space formerly filled by agricultural implements to the display of processes of manufacture. Here are hundreds of feet of shafting which serves to set in motion carpet looms, shoe stitchers and peggers, printing presses, typesetting machines, ruling machines. And a very desirable arrangement is that which places pianos and organs in alcoves, separated by real partitions from the main open space of the Manufacturers' Building.

As one of the established enterprises of the City of Toronto—it is a quarter century since it was established—the Industrial Fair has deserved its popularity and success. The grant given it by the Government of the Dominion will be of great service in assisting to make the occasion this year an unusual one, and to give it more than ever a national character. Then the display of the splendid collection of Jubilee presents of Queen Victoria, the Dufferin curiosities, and the presence of the celebrated band of the Coldstream Guards, are all unexampled features, sure to attract crowds. But to those who look for something more substantial than curios and fire-work spectacles, specimens are afforded in great variety of the natural produce and manufactures of this country which may well challenge intelligent attention. The Executive of the Fair have done their full duty this year, and have every reason to expect, as they certainly deserve, a successful result.

A CORRECTION.

In one of the latest issues of the Nor-West Farmer, of Winnipeg, an important and excellent journal, appears on article on the Dominion Exhibition which is in error in a very important particular. It is only just that this should be corrected. After some words describing the satisfaction with which the grant of $50,000 to the Toronto fair was generally hailed, the Farmer goes on to say that :

> Absolutely no efforts were being made to encourage other provinces, particularly those lying west of Lake Superior, to be represented. Inquiry elicited the fact that up to a very recent date neither the provincial governments nor the secretaries of the Western live stock associations had received the slightest intimation of any attempt to hold a Dominion Exhibition anywhere, and consequently no organized effort has been made to send western agricultural or live stock exhibits to Toronto, which will, therefore, be conspicuous by their absence.
>
> Two conclusions only may be drawn from this short-sighted line of action. Either the management of the so-called 'Dominion' Exhibition is only up to the standard of the average back country fair, or the Toronto people are trying to palm off the same old dog under a new name, simply in order to draw a snug little $50,000 from the public funds of Canada in aid of the Toronto Exhibition.

The President of the Toronto Exhibition Association informs us that the premier of each province in the Dominion, other than Ontario, was written to months ago

asking for exhibits. We have seen acknowledgements of four of these letters, signed by the Deputy Provincial Secretary of Nova Scotia, and by the Premiers of Quebec, British Columbia and Manitoba. The letter of the last mentioned is as under, addressed to the Secretary of the Exhibition :

SIR,—I have the honor to acknowledge receipt of yours under date of the 14th inst., in which an invitation is extended for the Province of Manitoba to make an exhibit at your Fall Exhibition.

I thank you on behalf of the Province for the invitation, and will give the matter the consideration that its importance demands.

Yours faithfully,
R. P. ROBLIN.

Department of Agriculture,
Manitoba, Winnipeg, 20th April, 1903.

In the face of this letter it is a pity that such a statement as that of the Nor-West Farmer was made, and that such unjust conclusions should be drawn from it. If the article had emanated from Hamilton, or even from Montreal, which places are fond of calling Toronto "Hog Town," it would not have seemed notable. But the implication is too serious to be passed by, and we therefore ask the attention of our Winnipeg contemporary to the fact that his information is incorrect.

ECHOES OF THE CHAMBERS OF COMMERCE CONGRESS.

The number of participating associations, whether Boards of Trade or Chambers of Commerce or associations of a trade or manufacturing character, is 160. All these, we believe, were represented at the Montreal meeting.

Many chambers took an active interest in the fast steamship service—not alone "The Fast Line," from Canada to the British Islands, but a quickening of mail and transport service between Mother Country and colonies generally. The London, Dublin and Liverpool chambers, the Montreal, Quebec, and Halifax boards and the Manufacturers' Association all prepared resolutions dealing with this subject.

Not only did the French chamber in Montreal, the proper name of which is La Chambre de Commerce de District de Montreal, put in a resolution favoring the application of the Metric System of weights and measures throughout the Empire, but suggested in another "The adoption throughout the Empire of the Decimal System of Currency, which already answers all commercial purposes."

That was a delightful story General Laurie told to illustrate English official ignorance of Canada. Said he: "I once had occasion to ask an official in London something about the Canadian mails, and was answered that the government sent no Canadian mails. But, said I, often and often I have myself seen them taken on at Moville. And then the official replied: Oh, that was the North American mail."

A suggestion made to us by a member of the Toronto delegation seems to us to contain food for thought. He remarked the difficulty of properly housing so large a body of men as 550 for deliberations lasting three or four days. "Now," he says, "Why do not the authorities of the Congress instruct the Chambers formally that they must limit the number of delegates from each chamber. This would lessen crowding at the Congresses and would indeed facilitate business." "Right you are," chimed in another, who had been at previous Congresses in London, "and there is another thing they ought to do. (I'll speak to Mr. Kendric Murray about it.) They ought to limit the number of resolutions to be sent in by each Board or Chamber. Why, on the last day at Montreal, when we were all anxious to get away, up comes the Belleville Board with eight resolutions! No wonder Lord Brassey called their representative "the gentleman from the progressive little town of Belleville."

In answer to subscriber, Chatham, we would say that the presidents of successive Congresses of the British Chambers of Commerce have been: J. Herbert Tritton, of London, 1886; Sir John Lubbock (now Lord Avebury), 1892; Sir Albert K. Rollit, M.P., 1896; Albert G. Sandeman, 1900; Lord Brassey, K.C.B., Montreal, 1903.

To find one's self speaking to people from the other side of the world on the floor of the gathering, and to hear the Pretoria and Kimberley men speak, as they did, of the Canadians and the South African war, gave a kind of thrill to the proceedings. Here was a man from Karachi, five hundred miles northwest of Bombay, and on the very western verge of India, next to Beloochistan; and there was a man from an unpronounceable place in the Madras Presidency, away on the other side of the Indian Ocean; and sitting next to him a delegate from Colombo, where

" * * the spicy oreezes
Blow soft o'er Ceylon's isle."

And, to say the truth, he was a very wholesome looking chap, not at all the "vile" man the poet pictured the Cingalese to be. The Jamaica, Barbados and Trinidad people sat together, half a dozen of them in all, and not inappropriately was placed next them the Auckland and Invercargill delegates from New Zealand. Opposite the West India folk were the East India folk, and alongside them Australasians from Queensland, West Australia and Tasmania.

Mr. Walton's (Barnsley Chamber) speech of Tuesday was a rousing one. He showed how Britain neglected China and Japan trade and was losing it while the United States gained it; how she neglected Persia—and by this culpable neglect Russia got her commercial hold there; and then he scored the British authorities and the British exporters for disregarding the chance Canada gave them by her preferential tariff in favor of England. The consular service of the Empire, he declared, must be reorganized and every part of the Empire ought to be represented. "Consular agents should cease to regard themselves as political agents only, and should act as trade agents." And Mr. Helm, of Manchester, showed how "perfunctory and worthless" many of the consular reports were which were sent home. The ascendency of the American consular officials abroad was well described by Mr. Ponton, of Belleville, who said they possessed discretion, knowledge, good address. Canada needs more commercial agents abroad.

Mr. A. J. Hodgson, president of the Montreal Board of Trade, who presided at the dinner, is a Canadianized Englishman to be proud of. He made an admirable chairman at the banquet on Thursday night. He and his co-adjutors must have worked early and late for weeks to get the arrangements into shape for the gathering. The literature for the "All-Canada Tour," in the shape of itinerary, instructions, sleeping-car assignments, lists of names and places for both Grand Trunk and Canadian Pacific roads is most voluminous and complete. Even the laundry of the visitors was thought of, and directions given on pages 18 of the yellow pamphlet, how the travellers are to get their clothes washed and ironed at Montreal, Toronto and Banff.

A wholesome looking lot of men, the delegates, sturdy for the most part and ruddy. When one was able, by means of formal introductions or fortunate chances, to get behind the armor of the chilly English manner, (I must expressly except fellows like J. L. Pollock of Paris and J. R. Hogg of South Shields from this "chill") they were almost uniformly found to be affable and even chatty. A superior lot of men, too. Some of them narrow of view, and with a tinge of arrogance; more of them genial, well-informed, with a quick grasp of things and with a fund of old-world experience and travel that made them delightful companions. For such men to see Canada as they are doing will do us good—and it will do them good too.

It was a great scene when, at the dinner on Thursday evening, the Montreal "Kilties," the Royal Scots Fusiliers, with their pipers, marched round the hall, in one door and out another. The effect was electrifying. The whole assembly rose to their feet and cheered, the pipes skirled, and the hearts of the Scotchmen swelled. Truly those Montreal fellows are big men in every way: they know how to do things well, and they don't spare expense. It was a magnificent dinner. The speaking was good, and it was a pleasing thing that the Parliamentary gladiators who were present forbore abuse and spoke nicely of each other. Sir Wilfrid's speech was a good one, Lord Minto's quite unexpectedly broad and strong.

Deserved attention was given by the Congress to the really admirable address of Senator Drummond, of Montreal. While tactfully avoiding irritation of the United Kingdom delegates of free trade views, he showed what had really come of the Preferential Tariff. That is to say, he showed the growth of the special rebate to British goods as from $927,000 in 1898, to $3,534,000 in 1903; and the total in six years reached $13,800,000. Again, he showed that the effect of the preference upon the West Indies was that their export of sugar to Canada grew from 10,500 tons to an average of 20,000 tons annually in three years, while this current year it will exceed 60,000 tons. His criticism of the Preference Tariff, too, was noticeable. Its action is inequitable he contends, because, "while a rebate of 33⅓ per cent. on duties of five to ten per cent. amounts to but little, a rebate of 33⅓ upon a duty of thirty per cent. may be too much and may bear hardly upon some local industries."

Saturday's meeting was an excellent one, though scantily attended, and much good work was done in discussing the embargo on Canadian cattle—a *questio vexata*—the codifying of Commercial Law; all-

British cables round the globe; board of conciliation; British interests in the Far East; commercial education. The closing scenes about noon of the fourth day were striking, though divested of much of the *eclat* that a fuller meeting would have given. The votes of thanks to Mr. Murray, the secretary, the Montreal officials and volunteer servants of the conference, who had done such admirwork, were cordial and the replies genuine. After a truly British fashion the meeting carried a resolution expressive of loyalty to King Edward, and their love for the Empire, which was sent to the King by cable. Then they sang the National Anthem, declared Lord Brassey to be "A Jolly Good Fellow," and separated.

MARITIME BOARD OF TRADE.

The yearly meeting of the Maritime Board of Trade has just been held at Charlottetown, Prince Edward Island. There was a good attendance on the opening day, Wednesday, August 19th from Halifax, Amherst, Kentville, Wolfville, Pictou, North Sdyney, Sackville, Chatham and from Charlottetown, Summerside, West Prince, South, Kings and Souris, on the Island itself. St. John was not represented, because of the British Chambers of Commerce gathering at Montreal, and the same cause probably kept other delegates away. The premie of the Province, Mr. Peters, and the mayor of the city, Mr. Warburton gave a welcome to the delegates. The president, Mr. Horace Haszard, of the Charlottetown Board, delivered the annual address. He touched upon many subjects including South African and West Indian trade relations, the acquisition of Newfoundland, Canadian steel shipbuilding, a possible increase in tourist traffic, marine and fire insurance and stock gambling. He also dealt with the Grand Trunk Pacific scheme, hoping it would afford an outlet at Canadian ports for western products.

Discussion then arose on various subjects. The unsatisfactory telegraphic service to Prince Edward Island was the first subject discussed by those present, and a resolution was passed, expressing regret that the grievance of high rates and short hours so long established, had not been remedied, urging the Government to improve the service, and asking Maritime Province representatives to press the matter in the Dominion Parliament.

A resolution was sent by telegraph to the Montreal Congress extending greetings, and expressing the assurance that their deliberations would tend to the welfare and advancement of the Empire. Discussion then arose on the subject of the fast Atlantic service. Mr. Watt of Chatham, Mr. Longard of Halifax, Capt. Read of Summerside, and delegates from Amherst, Souris and Charlottetown taking part.

Eventually a resolution was passed affirming the three previous resolutions of the Maritime Board on the subject, declaring also that it is the duty of the Ottawa government to immediately instal service equal to the fastest, with a terminus at some Maritime Province port. It was decided to ask the Dominion Government to improve the terminal facilities at Georgetown, which is believed to be the best practicable terminus for trade between Prince Edward Island and the mainland, also to grant a subsidy for a steamer to be placed on the Magdalen Islands route.

There was some discussion on the subject of Maritime Union. It was claimed by Mr. Dewolfe, of Kentville, union of the provinces on the Atlantic would make the provinces in the same position to the rest of Canada as New England is to the states of the Republic.

Officers were elected for next year as follows: Senator Wood, Sackville, president; John McLean, Souris, first vice-president; J. R. Wyman, Yarmouth, second vice-president; Chas. D. Stewart, Sackville, recording secretary; M. G. DeWolfe, Kentville, auditor; Chas. M. Creed, Halifax, permanent secretary. The annual meeting will be held, next year, at Moncton, N.B.

INSTITUTE OF ACTUARIES OF GREAT BRITAIN.

Notice is given in this week's issue that the annual examinations of the Institute of Actuaries of Great Britain will be held in Toronto on the 15th, 16th, 18th and 19th of April next, as well as at other colonial centres.

It is now about eight or nine years since the Institute first began the holding of examinations outside of Britain. That this concession of the Institute has been appreciated is abundantly proven by the increasingly large number of candidates that have presented themselves from year to year. The examinations of the Institute are not by any means to be regarded as simple. Upon referring to the success which students have heretofore met with in these examinations, it would appear that the Institute authorities desired to maintain a high standard. Below is a table setting forth the percentage of successful students for the past six years. It will no doubt be of interest to intending students:

Years.	Part I. Per cent.	Part II. Per cent.	Part III. Per cent.	Part IV. Per cent.
1903	60	19	25	37
1902	65	28	44	50
1901	59	19	33	68
1900	47	33	23	30
1899	49	34	28	34
1898	55	28	46	32

It will be observed there are four examinations which candidates are required to pass before obtaining the final degree of F.I.A., but those candidates that are successful in the first two examinations are entitled to the degree of A.I.A.

We observe that in the last examination held in Toronto there was one successful candidate from the Manufacturers Life Company of Canada, one from the Confederation Life, three from the Canada Life and three from the Imperial Life.

The late Mr. Wm. McCabe was appointed supervisor of the examinations in Toronto by the Institute when the examinations were first held in Canada, and continued to hold this office until his death. The Institute has now appointed Mr. T. Bradshaw, F.I.A., actuary of the Imperial Life, as the Supervisor. Mr. Bradshaw, who is one of the three Canadian Fellows of the Institute, has qualifications for the position, and stands well in the esteem of the life men of Toronto.

—Among the novelties at this year's exhibition in Toronto is a bank agency. The Imperial Bank has arranged to have a branch open in the grounds during the Exhibition.

—During five days of last week the customs returns show that 1,000,000 bushels of grain were shipped from Chicago to Montreal. This large quantity, which beats the record for such a period by over 200,000 bushels, is attributed to the abolition of tolls on the Canadian canals, as exporters can now handle grain for 3c. less per bushel than by lake and rail route to Boston. Exporters in United States cities are beginning to agitate to have rates to seaboard ports reduced to enable them to compete with Montreal.

According to the *Cincinnati Price Current* there is a fairly steady movement of hogs into market. Total western packing, 370,000, compared with 365,000 the preceding week, and 845,000 two weeks ago. For corresponding time last year the number was 325,000, and two years ago 385,000. From March 1st the total is 9,580,000, against 8,885,000 a year ago, an increase of 695,000. The quality compares favorably with the offerings of the recent past. Prices are moderately reduced, prominent markets at the close averaging about $5.45 per 100 lbs., compared with $5.50 a week ago, $6.85 a year ago, and $5.85 two years ago.

—The International Harvester Company has decided to manufacture iron and steel from its own ore in the Western States. It has now taken over the extensive iron deposits of the Deering Harvester Co. on the Mesaba and Baraboo ranges in Wisconsin; also the Hawkins mine at Nashwauk, which alone, according to one estimate, contains 40,000,000 tons. The company has decided to make additional extensions to its works in Hamilton, Ont. Three more large buildings are to be erected, one of them a binder twine factory of the most modern type. It states however that the immediate erection of these new buildings is dependent upon its being able to come to a satisfactory arrangement with the Street Railway and Radial companies for the transportation of workmen to the works, as it does not consider it has been properly treated either by the railway companies or the city in the past.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, August 27, 1903, compared with those of the previous week.

Cities	August 27, 1903	August 20, 1903
Montreal	$18,397,050	$20,478,348
Toronto	12,883,157	14,275,049
Winnipeg	4,121,276	3,146,296
Halifax	1,733,076	1,685,112
Hamilton	908,424	1,273,842
St. John, N.B.	1,013,854	1,053,505
Vancouver	1,319,734	1,369,124
Victoria	519,711	659,788
Quebec	1,510,245	1,874,754
Ottawa	1,921,375	2,391,512
London	658,763	818,130
	$14,932,665	$49,025,460

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending July 31, 1903.

		CAPITAL			LIABILITIES

J. M. COURTNEY,
Deputy Minister of Finance.

A Permanent Machinery Exhibition

H. W. Petrie opens up the old Cyclorama Building on Front Street West---A splendid showing of American and Canadian Machinery and Tools--Special features for Exhibition time--A cordial invitation to visitors to call and inspect this new Machinery Hall.

Those of our readers who for various reasons have occasion to use the Union Station in this city (and who have not) have possibly been struck by the signs of life and activity that characterize a building which, for over six years stood vacant, as an eyesore. Reference is here made to the old Cyclorama building. What was once a dull, lifeless and empty combination of bricks and mortar is to-day throbbing with life, due to the fact that an enterprising and go-ahead business man saw the opportunity and grasped it.

Realizing the great part tools and machinery of all kinds must play in the wonderful development now going on in our land, H. W. Petrie, who for years has conducted a growing business in new and second-hand machinery in this city, undertook to acquire the building and make of it a permanent exhibition of machinery, All know how much more satisfactory it is to see and handle what one is buying, than to transact business simply by means of correspondence. Mr. Petrie has in this addition to his plant a place where machinery men from all parts of our Dominion may call and see the very latest types of machines for all conceivable purposes.

Coming from Brantford in 1890, Mr. Petrie took the premises at 141-145 Front St. West, where his business has grown to such proportions as to make this addition absolutely necessary, giving a total floor space of 80,000 square feet, which, it must be admitted, is a remarkable area to be given to the storing of machinery.

This new Machinery Hall is to be devoted to the display of new machines, and these only, while the older premises adjoining will contain all second-hand machinery, so that if a purchaser does not find just what he wants in one department all he has to do is to step next door, where his needs can be supplied.

Many people fail to grasp fully what it means to conduct a business of such dimensions. Situated as the building is, adjoining the tracks of both the Canadian Pacific and Grand Trunk Railways it is singularly favored. While speaking of this it is interesting to note that by opening this new part a short-cut is possible to and from the platforms of the Union Station. In a short time it is the intention to show a number of machines in operation. This will be done as soon as the necessary line shafting is in position. This exhibition of machinery, besides having value as a commercial enterprise has real value from an educational view-point, and is well worth a visit. In these days of rapid invention, when the machine of to-day is relegated to the scrap pile to-morrow it is difficult oft times to keep in touch with the latest in this line. An occasional visit to Petrie's Machinery Hall will do much to keep you posted, as nothing but the very latest types of machinery will be kept in stock.

Toronto is, above all other cities most favorably situated for the distribution of machine tools. Served by good railroad and steamer facilities, adjacent to a section of our Dominion which is destined to be the great manufacturing section for years to come, and especially so when cheaper power is supplied from Niagara Falls, as undoubtedly it will. Another fact which makes it unique as a distributing centre, for machinery at least, is that it is near to the large machine manufacturing states, Ohio, New York, Pennsylvania. What city more than Toronto is entitled to have it's permanent Machinery Exhibition? Here, all the year round, those interested in things mechanical may come and inspect the very best that mechanical skill and workmanship of this continent can produce.

This new machinery emporium is 125 feet in diameter. The ground floor is covered with machinery of all descriptions. It is the intention, as soon as possible, to place a balcony all around the interior, about sixteen feet from the floor, which will be used for offices, smaller machines and supplies.

In the centre is a 15-ton jib crane, which can with great ease and facility, move machinery from one place to another.

Since Mr. Petrie entered the machine supply business he has furnished machinery for people in all parts of Canada. Lathes, planers, shapers, drills, milling machines, all kinds of wood working machinery, boilers and engines, in fact machinery of every sort for use in machine shops, foundries, saw mills and factories, are to be seen at this new and important addition to Toronto's mechanical interests.

It makes no difference what you want in the machinery line. Just make that want known to H. W. Petrie, and if it is not already in stock, you will not have long to wait. This is accomplished by a system in use by which, in the minimum of time, the buyer and seller are brought together.

In view of the fact that during the next two weeks, many who are interested in machinery of different kinds will be in Toronto, a cordial invitation is extended to all such to visit and use the new building as headquarters. Its location is next door to the Union Station. Every effort will be made on the part of the management to give visitors the best of attention.

The display of machinery is creditable and well worth a visit of any and all who have any interest whatever in mechanical things.

Its Success Tells All.

Commercial.

MONTREAL MARKETS.

Montreal, August 26th, 1903.

Ashes.—The market is steady at the last advance, and first pots of good tares will readily bring $5.75 to $5.85 ; it is said some makers with small offerings were holding out this week for $6.00, but did not get it. In pearls there is nothing doing.

Cements and Firebricks.—There have been no cement boats in this week, and receipts are restricted to 65,500 firebricks. In quotations there have been no recent changes, and a good steady business is doing.

Dairy Products.—The butter market is a pretty firm one with fair export enquiry, and 19½c. has been realized for finest Townships creamery, with about 18¾c. prevailing for good Quebecs. British cheese buyers seem somewhat disposed to avoid the present prices, but the market rules steady at 10¾c. for fine colored Westerns : Townships, 10 to 10⅛c., and Quebecs at 9¾ to 9⅞c. Eleven steamships last week carried out 96,985 boxes of cheese, and 21,371 packages of butter. The total of cheese exports to date is 1,368,718 boxes as against 1,222,480 boxes a year ago. Of butter the exports to date are 157,513 packages as compared with 245,489 packages a year ago.

Dry Goods.—Travellers in some cases are at home getting samples revised, but there is general activity in the wholesale trade, and city retail business is picking up, now that the holiday makers are getting back to the city from the country and seaside. In some quarters collections are not thought altogether so good as they should be, and in seeking to account for this, some would lead to the opinion that the losses arising from the general spirit of speculation which has prevailed during the past year,—extending in known cases to many country storekeepers,—with its attendant losses owing to the severe shrinkage in values, are now being felt more or less. As far as can be learned there is no serious ground for complaint, but the fact remains that collections are not so good as last August After writing last week, the Canadian Colored Cotton Co. announced, as we anticipated several weeks ago, a general advance in all lines of from 5 to 10 per cent.

Groceries.—The week has not developed any new features of special interest. Sugars are firm at the late advance, with an advancing market reported in raws, and a good demand, so that the possibility of some further advance is deemed not improbable. Factory prices are $4.20 for standard granulated in barrels, and $3.50 the lowest figure for yellows ; in bags the figures are 5c. less. Molasses is now held at 40c. in a jobbing way for puncheons, with the usual advance for barrels and half-barrels. Packers' selling agents have been notified to discontinue any further selling of tomatoes, corn and beans, even at open prices, as owing to the backward season and cold nights, the crop is proving very light.

Hides.—The market has been without variation for the past several weeks. Dealers are still buying beef hides on the base of 8½ to 9c. for No. 1. Very few calfskins are now coming in, but for these 11 and 9c. is the quotation for Nos. 1 and 2 respectively. Lambskins bring 45c. each.

Leather.—Export in sole leather is quite brisk just now, and there is a fair demand from local manufacturers at steady prices ;

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

of jobbing sole there is continued scarcity. Black leathers are quiet. Manufacturers of dongolas complain that present margins of profit are very small owing to the continually advancing cost of raw skins and say that there must be a revision of prices in the near future.

Hardware and Metals.—Business in these lines keeps up unusually well, and as one leading house puts it, "there has been practically no let up since January." Pig iron is barely so firm, and $21 is probably a fair quotation for No. 2 Summerlee, which is the brand most in request; English iron is quoted at about $18. The new furnace at Londonderry, N.S., is expected to be blown in next week, and the Montreal selling agents are daily expecting a telegram giving quotations for this iron, which it is said will be of No. 1 foundry quality. Domestic bars are steady at late decline of 5c., which was put into effect to check importations of English bars. Ingot tin is off again a little, and local quotations are a cent easier at 31 to 32c. Copper fairly steady at 14¼c.; lead is firmer at $3.10, and is scarce on spot. The discount on lead pipe is 35 per cent. Iron pipe is unchanged at $4.81 for inch. Boiler plate is unchanged at $2.10 for Scotch, and tank steel at $2.00. In sheets there is nothing new.

Oils, Paint and Glass.—Linseed oil is reported a little firmer abroad, but local quotations are still easy. Sales of raw have been made in fair quantity at below 50c., but 51 and 54c. seem about the general quotation for raw and boiled, in an ordinary jobbing way. Turpentine is stiffening; it is claimed there is a shortage of some 30,000 bbls. in the crop, and that it would now cost 77½c. to lay goods down here, so that an advance to 80c. is being considered. We quote as follows: Single barrels, raw linseed oil, 57c.; boiled, 54c.; net, 30 days, or 3 per cent. for 4 months' terms. Turpentine, 77½c. single barrel. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gal.; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $5 to $5.15; No. 1, $4.75 to $4.80; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs, or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65. London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, August 27, 1903.

Chemicals, Drugs, etc.—Very little in the way of new features has developed during the last week or two. Opium and quinine may be described as steady and other drugs are in about the same condition. A normally good trade for this time of the year is being carried on.

Dry Goods.—As mentioned on another page of this issue, there have been some further important changes in the prices of cotton goods. All staples may be described as strong. Trade is very good indeed and may be expected to improve still further with the opening of the exhibition with its accompanying crowd of visitors, for whom special bargains will be offered. Dress goods have been selling somewhat extra well, as, in fact, have practically all lines. Prospects for a good fall trade are described as being very good indeed.

Flour and Grain.—The flour market presents fairly favorable features, though occasional dullness is to be observed. The price of ninety per cent. patents is slightly higher than quoted last week, it being now between $2.95 and $3.00 in buyers' bags, middle freights. Bran and shorts are about steady. Wheat quotations are about the same as last week, though several minor fluctuations have taken place. Very little movement is taking place. Barley is nominal. Oats have dropped 1 to 2c. lower. Peas also are 1 to 2c. lower. Rye has gone

The Reason Why

Manufacturers Locate at

PETERBOROUGH.

A great American manufacturing concern recently erected in Peterborough a Canadian branch factory —having a capacity of 800 hands—for export and Canadian trade, and the following letter, written to the "Peterborough Examiner" gives the reason why.

"We notice in your issue of Saturday, September 27th, "1902, a statement by Mr.——— at the meeting of the "Peterborough Board of Trade, that we were induced to "locate here through the influence of one man.

"Please permit us to state that Mr.——— is incorrect "in making a statement of this kind, privately or publicly, "and evidently speaks without full knowledge, or, in fact, "without any knowledge whatever on the matter, and "in correcting this mis-statement permit us to assure "you and the public that our Company came here "**on account of the natural advantages "of Peterborough**, which are the **geographi-"cal location, railways,** the **water power,** "and the **Trent Canal,** which, we were assured "would be shortly completed, and which, when finished "and in operation, will, in our opinion, secure to Peter-"borough all the industries that your city can com-"fortably take care of."

Peterborough now offers in addition—

Free Factory Sites and Low Taxation.

Electric Power — Lowest Rentals.

N.B.—Freight Tariff has been lowered lately at Peterborough.

down a cent. and is dull at the decline.

Fruit.—Enormous quantities of fruit have been coming into the city this week and in some cases its sale has dragged, especially plums, which have had to go at 15 to 25c. per basket. Peaches and apples too are quite plentiful. White peaches sell for 20 to 30c., yellow at 30 to 60c. Pears are 15 to 40c. per basket. Grapes are beginning to arrive and sell at 25 to 50c. Cantaloupes are plentiful at 25 to 35c. per basket. The price of bananas is unsettled owing to the recent disastrous storm in Jamaica. Those now coming from that island show poor quality, though prices keep up well, Cubans are expected in increasing numbers. Other fruits may be quoted as follows: Cocoanuts per sack, $3.70 to $5; oranges, late Valencias, $4.50 to $5; lemons, Sorrentos, $3.50 per case; new crop Malagas, $3.50 to $3.75 per case; bananas, 8s., $1.40 to $1.75; 1sts, $1.75 to $2; extras, $2 to $2.50; oranges, California Valencias, $4.50 to $5 per case; sweet potatoes, $4 50 per barrel; tomatoes, 15 to 25c. per basket; corn 7 to 8c. per dozen; celery, 35 to 40c. per dozen; cucumbers, 12½ to 15c. per basket.

Groceries.—Trade in general groceries is fairly good, being up to the average for this time of the year. In sugar the movement is not particularly brisk; there has been no change in prices. Some interest is being taken in dried fruits, but up to the present not much business has been transacted, the prices still being on an unsettled basis. In canned vegetables the same holds good, the only line with which anything to speak of has been done yet being peas. In tea, Ceylon, the prices hold very firm but little actual trade is being done.

Live Stock.—Cattle for the export trade at this week's market were few in number, and trade was very dull, the prices realized being about the same as last week. Butchers' cattle, however, showed a marked improvement, though receipts were on the plentiful side. Prices inclined a little higher. Select lots sold at $4.50 to 4.70, ordinary $4.20 to 4.40. For stockers and feeders there was not an over brisk demand. Milch cows kept pretty steady at $35 to 48. The demand for calves was brisk, with not many offering.

Provisions.—In spite of heavy receipts of butter, really choice dairy rolls and creamery prints are both somewhat scarce. Cheese is a little easier and sells around 10¼c.—Eggs are coming in in fairly large quantities but prices keep steady. The market for ham and other smoked meats is quite active and is expected to become even more during the rush of exhibition visitors.

Wool.—Though better prices seem to be expected before long, by holders of wool, little business is being done either for export or otherwise.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company

has no equal!

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

THE MOLSONS BANK.

96th DIVIDEND.

The Shareholders of The Molsons Bank are hereby notified that a dividend of FOUR AND ONE-HALF PER CENT. upon the Capital Stock has been declared for the current half-year, and that the same will be payable at the Office of the Bank, in Montreal, and at the Branches, on and after the

First Day of October next.

The Transfer Books will be closed from the 16th to the 30th September, both days inclusive.

THE ANNUAL GENERAL MEETING of the Shareholders of the Bank will be held at its Banking House, in this City, on MONDAY, the 19th OCTOBER next, at three o'clock in the afternoon.

By order of the Board,
JAMES ELLIOT,
Montreal, 28th Aug., 1903. General Manager.

Bank of British North America.

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that an interim dividend free of income tax for the half year ended 30th June last, of 30 shillings per share, being at the rate of 6% per annum, will be paid on the 2nd day of October next, to the proprietors of shares registered in the Colonies. The dividend will be payable at the rate of exchange current on the 2nd day of October next, to be fixed by the Managers. No transfer can be made between the 18th inst., and the 2nd proximo, as the books must be closed during that period.

By Order of the Court.
A. G. WALLIS, Secretary.

Valuable Manufacturing Site for Sale

In the village of Weston, within two and one-half miles of Toronto Junction. Suitable for Electric Light or Power Plant, Portland Cement, Paving Brick or other industry, excellent water power on the premises ready for use, with a small expenditure. The property comprises about 26 acres of level land, all which is immediately available for use in the business, also a 250 h.p. Brown Engine in place, as good as new, with engine house and brick chimney complete. For further particulars apply to THOMAS MURRAY, 44 Rose Ave, Toronto, or to JAMES McDOUGALL, C.E., County Engineer, County Hall, 57 Adelaide St. East, Toronto.

The Canadian Pacific Railway Co.,

NOTICE TO SHAREHOLDERS

The twenty-second annual meeting of the shareholders of this Company for the election of directors and the transaction of business generally, will be held on Wednesday, the seventh day of October next, at the principal office of the Company at Montreal, at twelve o'clock noon.

The Common Stock Transfer Books will close in Montreal, New York and London, at three p.m., on Tuesday, 1st September. The Preference Stock Books will also close at three p.m., on Tuesday, 1st September. All books will be re-opened on Thursday, 8th October.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal 10th August, 1903.

Mercantile Summary.

A voluntary assignment is made by J. P. Galibois, of Quebec. He was formerly book-keeper in a boot and shoe establishment, and started in the grocery line last May.

We hear that the Montreal Street Railway Company are going to issue $1,000,000 worth of additional stock to shareholders at par. The money is needed for new equipment. When this shall have become paid up the company's paid-up capital will be $7,000,000.

Colombier Bros., of Paris, France, have signed a contract with the Dominion Government for a steamship service between Bordeaux and Canadian ports. The subsidy will be $100,000 per annum, and four steamers are to be put on the route and make eighteen trips each season. If the subsidy is increased to $133,000 twenty-four trips will be given. The service will be begun on April 1st next, and will be effective for ten years. There is a provision that if found satisfactory the service may be extended for another five years, in which case the total subsidy for the whole period of fifteen years would be $2,000,000.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Money to Loan on First Mortgage on Real Estate on reasonable and convenient terms.

W. T. ALEXANDER, - - - President.

MORTGAGE INVESTMENTS

Investors are finding it increasingly difficult to secure satisfactory Mortgages on Real Estate. The Corporation has unusual facilities for obtaining choice Mortgage Loans and is prepared to receive sums of $500 and upwards for investment in

GUARANTEED MORTGAGES

on the undertaking of the Corporation to repay principal with interest at FOUR PER CENT. per annum, payable half-yearly.

The security offered by this mode of investment, consisting as it does of—(1) The Mortgage Deed upon which the advance is made, and (2) the Guarantee of the Corporation with a Paid-up Capital and Reserve aggregating $1,290,000, afford ample assurance of the safety of the fund.

Mercantile Summary

A WINDING up order has been issued in the matter of the Dominion Carpet Co., of Sherbrooke, Que., and a meeting of creditors and shareholders is called for the 15th inst.

THE Inter-State Conference of Protectionist Associations, of Melbourne, under the presidency of Sir William Lyne, Minister of Home Affairs of the Australian Federal Government, has cabled to Mr. Chamberlain announcing that the conference is in favor of preferential trade on the basis of the existing tariff, without interfering with colonial protection.

IT was reported from Maine recently that the New Brunswick Shore Line Railway had been sold to the New York Trust Company, interested in foreclosure proceedings against the Washington County Railroad, and that the two roads would come under one management. The rumor is now stated to have been false, however, and Russell Sage still holds his interest in this line.

IT is stated that the Canadian Northern Railway, in view of the new developments connected with the Grand Trunk Pacific scheme, will build several branches in order to open up the Province of Quebec. One of these is expected to be from Montfort Junction to Arundel and another from St. Tite to St. Catherines, making between them some seventy miles of road, principally for colonization purposes.

WE understand there is a likelihood of some of the large mills in Quebec Province being operated all winter by means of a new system. In the Lawton Company's large pulp and sawmills, near Ste. Agathe des Monts, a selies of hot water pipes is being placed at the bottom of a large pond. All the logs will be placed in the pond and when thawed out will be moved right into the sawmill. This will be the first year that the mills in the northern districts have been worked during the entire twelve months. Other mills it is understood are likely to follow suit.

LATEST failures among Montreal traders are noted as follows: E. Chaput, forers are noted as follows: E. Chaput, merly a grocery clerk, and in business on his own account since January last, has already filed consent to assign, and shows liabilities of $2,200.—— Larue & Frere, a tailoring firm, are reported trying to compromise liabilities of $7,800, at 50 cents on the dollar.——Louis Trudel, hardware dealer, whose failure we lately noted, makes an offer of 25 cents on the dollar, which it is said will be accepted, as in event of the estate being wound up, large family claims would likely absorb the assets. His liabilities foot up to $33,000, his wife having a dower claim of $10,000, and his father one of $6,000 odd.——The J. & E. Schwartz Mfg. Co., makers of leather goods, whose troubles arising out of disagreements between the partners were alluded to in a late issue, has been put into insolvency, and the liabilities are figured at about $15,000.

Mercantile Summary.

GEORGE E. TUCKETT & Co., tobacco manufacturers, Hamilton, contemplate erecting an additional factory. It is likely to be located either in Montreal or Toronto.

THE Georgian Bay Navigation Company's steamer Pittsburg was burned to the water's edge in its dock at Sandwich, Ont., on the 30th ult. It was valued at $60,000, and was only partially insured. Incendiarism is suspected.

THE Cape Breton Coal, Iron and Railway Company, Limited, are busily engaged opening up their coal mines at Cochrane's Lake. The seam upon which they will first engage is over six feet thick. A space of 1,500 by 600 feet has been cleared as a site for their plant.

A CABLE from Swansea, Wales, dated August 30th, stated that all the South Wales tin plate works, controlled by the Employers' Association, closed yesterday for an indefinite period owing to wage disputes. From 20,000 to 30,000 workmen are affected.

THE firm of Buchanan & Jones, stockbrokers, of 27 Jordan Street, have just removed into new offices at 32-34 Melinda Street, Toronto. The new quarters are larger and in many other respects an improvement over those vacated.

WM. MCNUTT'S steam sawmill at Tay Creek, N.B., and the grist mill adjoining were last week destroyed by fire, also some 30,000 feet of piled lumber and 45,000 shingles. The loss was over $5,000, with no insurance.

MR. GEO. B. FRANK, who for some time past has been connected with the well-known machinery house of H. W. Petrie, of this city, has recently severed his connection with that firm to look after the interests of the Syracuse Smelting Works in Ontario. Mr. Frank is well known to the machinery and jobbing trade of Canada, and it is hoped that in his new work he will be entirely successful.

J. W. MARCHAND, general store, Beauharnois, Que., has assigned owing to complications arising out of the late failure of J. M. Couillard, of Ste. Martine. He first commenced in Valleyfield five years ago, and comprised there in 1901, at 25 cents on the dollar, removing the next year to Beauharnois.—— Andre Leduc, carriage maker of the same town, has also assigned, on demand of O. Faucher & Fils, Montreal. He owes $12,200, and shows assets of $5,570.

THE fourteenth annual convention of the Canadian Association of Stationary Engineers was held in Berlin, Ont., on the 25th and 26th ult. Several matters were discussed relating to the "good of the order" and many papers on technical subjects read. The election of officers resulted as follows: President, H. E. Terry, of Toronto, No. 1; Vice-President, J. R. Uttley, of Waterloo; Secretary, W. Inglis, of Toronto; Treasurer, J. M. Rixon, of Toronto; Conductor, F. W. Scalthorpe, of Hamilton; Doorkeeper, J. Ogle, of Brantford. The next place of convention will be Hamilton.

A New Line for Grocers and Confectioners is
Cowan's Swiss Milk Chocolate
Dainty and Delicious

Mercantile Summary.

THE town of Gananoque, Ont., is calling for sealed tenders (to be received by the 15th inst.), for the construction of waterworks and sewerage systems.

THE total duties collected at the port of Toronto for the month just passed amounted to $768,282, an increase of $122,181 over last year, which was regarded as a record up to then.

A NEW company is being organized in Cornwall, Ont., under the name of the Cornwall Paper Manufacturing Company, for the purpose of putting up a factory for making high-grade papers at the foot of Long Sault Rapids, near Mille Roches.

AT the request of the Vancouver Board of Trade and Wholesale Grocers' Association, the Canadian Pacific Railway has made a reduction of 25 cents per hundred on freight from that city to Calgary and Edmonton, so as to enable Vancouver merchants to compete with those of Winnipeg.

AN assignment has been made by Eugene Galarneau, of Pont Rouge, Que. He is a tinsmith by trade, and several years ago began retailing hardware and groceries. Recently he also went into the building of a village waterworks system, an undertaking quite beyond his limited resources. His liabilities are placed at $6,500.

THE Ontario Wind Engine and Pump Co. received from the C. P. R. an order for twelve purification plants in connection with their system. This is a unique order, and others will probably follow when the above have been installed and tested. This company have supplied the C. P. R. in the past with many of their Air Motor outfits for different points along their lines.

THE Humber Power and Light Co., Toronto Junction, is installing an auxiliary steam power at their power house on the Humber for the purpose of securing absolute service for consumers. While it will be seldom used, water power companies find this step a very useful one. The plant has been able to operate all summer all the lights contracted for, which are ever increasing. In addition to the municipal contract, which now exceeds 100 lamps, the famous Stock Yards and the Lambton Golf Club are both large consumers, and many private residences in Toronto Junction are supplied as well.

COL. MELLIS, of Huntley, Scotland, and Mr. J. Yule, of London, England, have been in British Columbia, representing an English Syndicate formed to exploit the pulp and paper industry in that province. It is probable that the mill will be located on Princess Royal Island, there being considerable water-power available in that vicinity and its proposed capacity is large, 100 tons of paper daily. The principal grades manufactured are to be news print and wrapping paper. Western Canada and Australia will be the chief markets catered for. Mr. J. J. Palmer, of Toronto, is among those interested in the enterprise.

Mercantile Summary.

A COMPANY with a capital of $100,000 has been formed, under the name of the Brandon (Man.) Brick and Lumber Co., to manufacture those articles at that place.

THE real estate, assets, plant, machinery, etc., of the Strathcona Rubber Co., Ltd., Montreal, is being put up for sale to the highest bidder under the winding up act.

A SMALL storekeeper, named N. Reid, of Ste. Philomene, Que., has made a proposition to pay his creditors 25 per cent of their claims. He is said to owe less than $1,000.

A STEAMER from Antwerp brought into Sydney on Thursday of last week a large quantity of machinery for the new rail and finishing mills of the Dominion Iron and Steel Co. On the next day a gang of men began work on the foundations for the machinery for the new rod mill. the machinery was from Germany.

ON Friday last the civic board of works of Ottawa met in order, among other things, to buy a new steam roller. Tenders were asked for, with instructions from the council that Canadian manufacturers be given the preference. Not one tender was received from a Canadian, and the order went to a Brooklyn firm.

THE Rainy River Pulp and Paper Co., of which Hon. Geo. E. Foster is one of the directors, has secured from the Ontario Government a concession of 270 square miles of timber limits, comprising banksian pine, poplar, spruce, tamarac and cedar. It is making preliminary surveys for flumes, dams and mills and intends erecting a thirty-ton mechanical pulp mill and a fifteen-ton chemical mill. A sawmill to do general lumbering business will also be erected. t is expected that the sawmill will be in operation next spring and the pulp mill by the spring of 1905.

THE ST. LAWRENCE ROUTE.

The article which we subjoin is from the Boston Transcript of August 22nd, but similar references to the growing importance of Montreal as a grain export point on the Atlantic have appeared in other American journals recently. It is evident that western corn bound for the seaboard is drifting more and more towards the St. Lawrence as the preferable route. It is certain that maize can be kept cooler in transit by using the water route than by carrying it all rail. The Transcript says:

Boston's corn exports continue to fall off, Montreal having become the principal shipping port on the Atlantic side for this commodity. The Boston shipments have declined about sixty per cent. and the New York shipments twenty-nine per cent. since the Dominion has made the Canadian port free. As matters now stand, grain for export can be shipped from Chicago to Liverpool via Montreal three cents a bushel cheaper than through Boston, in spite of the fact that this port has superior facilities for trans-

shipment. A remedy for this condition of things lies in the lowering of the export freight rate by the American railroads, but, although the export shippers are trying to get the railroads to grant them concessions on grain for export by seaboard ports, the roads are doing such a large domestic business that they are not much inclined to cater to the cheap ocean business. It may be, however, that the steamship companies may realize the mistake of making a flat rate from all the seaboard ports, regardless of distance and port advantages, and that the American roads will realize that it is worth while to keep the cheap trade, which they may need some day if they do not at present.

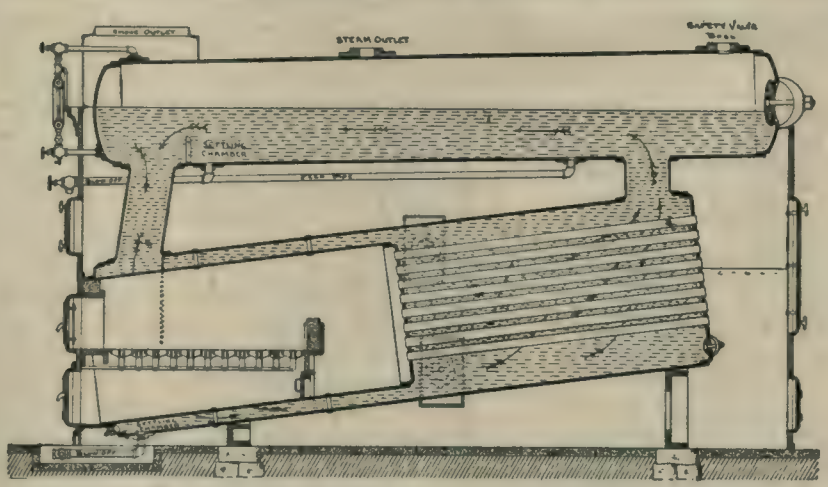
Combines the Best Qualities of Other Boilers.



The Mumford Standard internally fired boiler combines to a remarkable extent the best features of the Scotch and English types of internally fired boilers, together with the lighter weight, less floor space and more perfect circulation of the best boilers of the American water tube type.

The construction throughout, except the tube sheets, is cylindrical and spherical, requiring no stays; the boiler is supplied with an outer steel casing or for brick setting as desired by the customer.

The steam and water space is divided between two cylindrical shells; the thickness of plate is not so great as in the Scotch marine type, and the expensive and troublesome rear combustion chamber is avoided.

PICKFORD & BLACK,
HALIFAX.

A WORD FOR WESTERN CANADA

It is a little puzzling to find an American publication devoting a whole issue to Canadian affairs. But this is what has been done in its number of August 18th by The Inglenook, a magazine published at Elgin, Illinois, at a dollar a year. And it could hardly have praised Canada more unreservedly had the writer of the articles been a Canadian. For example, the editor's letter to us says: "What we [press editors] saw in Canada will be a surprise to tens of thousands of our American readers." On page 804 the magazine says of far West Canada: "That region of Canada which we have under consideration is one of the healthiest in the world. The country is open, the atmosphere is cool and dry, and there is an abundance of bright sunshine. In the winter, in this part of our territory the snow never falls to more than a few inches in depth and is dry and powdery." Page 817; he is speaking to United States readers: "Strange how a near country is so little understood. Lots of people will wonder about their reception by the Canadians, should they wish to settle among them. The answer is that you will be welcomed. . . . Outside of their form of government, which is more of a sentiment than a hard fact, one might as well be in the United States. The people are about the same in the northwestern part of Canada as they are anywhere in any English-speaking country." And again, on page 823: "Going to the western part of the Dominion is not like going to a foreign country. It is rather a visit to a little-known section of our own land, and that is what it really is. The English language is spoken, and the customs of the middle and western part of the country are very like those of our own home. In fact, there is nothing at all to indicate that one has crossed the border. Meeting an occasional Englishman simply adds flavor to the speech of the country. In money, food, manners, methods of thought and action, one is as fully at home as he is in any other section of country where the English language is spoken. The bugaboo of a monarchical form of government speedily disappears when one is on the ground."

D. McLachlan & Co. — McLachlan Business Universities — Canada Business College, Chatham, Ont.

To the Business Man:

Do you require the services of a Stenographer or Bookkeeper? We have been supplying some of the best business houses for years with competent office help. As we have served these people, so can we serve you. Give us a trial at your next vacancy.

Hundreds of earnest, honest, capable young men and women come to us every year to secure this preparation. Our position gives us an excellent opportunity of distinguishing between the wheat and the chaff. We would supply you with wheat. We let the chaff take care of itself. It does not pay us to recommend the chaff.

Yours for business,
D. McLachlan & Co.

What we have done for others we would like to do for you.

During the 11 months ending June 1, we placed 345 of our students with representative business houses. Graduates of this School occupy some of the choicest positions of trust on the continent. We train them so practically that there are no failures among them; this gives us the confidence of business firms.

If you have sons or daughters needing business training, write for our catalogue, which is acknowledged to be the handsomest business college catalogue issued in Canada.

SPECIAL ANNOUNCEMENT.

In the Main Building of the Toronto Exhibition will be found, near the South entrance, the exhibit of the

CANADA PAINT COMPANY,
LIMITED.

The attention of the public is particularly drawn to this exhibition of **Varnishes, Colors, Gums, Stains, Paints** and **Lead** products.

Interesting novelties from **all parts of the world** appertaining to the business will be on view, and the products of the

Canada Paint Company's

mines and **manufactures** will be shown and explained.

The officers of the

CANADA PAINT COMPANY

in charge of the exhibit will be happy to answer any enquiries.

LAKE SUPERIOR CONSOLIDATED CO.

It is announced that there is no likelihood whatever of the works of the Lake Superior Consolidated Company closing down pending the reorganization proceedings. Not only this, but those parts not at present in shape for operation will be pushed forward with all possible speed. An effort will be made by some of the shareholders to recover from the Philadelphia syndicate, which has had a good deal to do with the corporation in the past, the sum of $8,000,000, which, it is alleged, was promised by the syndicate in payment of preferred stock, and the lack of which brought the company to its present financial condition. So far as can be learned, the proposed plan of the directorate is to form a new corporation, exchanging old stocks for new. The stockholders will probably be assessed about $8 per share, which is practically the same amount that has been asked for in the form of subscriptions to bonds; but this will obviate the necessity of creating any bond issue, and will permit the reduction, it is suggested, of the company's capitalization to a figure approximating the actual cash investment in the property. The company has outstanding $27,000,000 preferred and $72,000,000 common stock. The shares are $100 par. Common stock has been selling around 1½ and preferred at 5¾-7, whereas at one time the common sold at 3¢ and the preferred at 70. The company is less than five years old, and until last autumn paid 7 per cent dividends on the preferred shares It is believed the capital of the new company will be about $40,000,000.

—Le Journal de Paris publishes a note as to the number of foreigners in France and the number of Frenchmen abroad. France gives hospitality, it appears, to 1,230,211 foreigners, of whom 1,200,000 are Europeans, while there are only 520,000 French people abroad, and 218,000 of that number in Europe. There are 468,300 Belgians in France, as against 52,500 French in Belgium. The Italians on French soil number 287,042, against 11,050 French in Italy. There are exactly 60,000 more Germans in France than French in Germany, and 9,500 more Russians. Compared with the 3,050 French in Austria, there are 12,100 Austrians in France. As to Spain and Switzerland the proportion is even greater. There are 77,000 Spaniards in France, and 25,000 French in Switzerland, while 83,120 Swiss are in France.

SELLING FOR CASH.

The merchants of Canada, retail as well as wholesale, have as a rule made great strides of late years in abandoning long credits, and in adopting short credit terms or absolutely cash sales. It is not yet possible everywhere to sell for cash, but the nuisance and losses of long credits are very great, and every merchant worthy of the name should strive towards the goal of cash on delivery. The present time of general activity and prosperity should be a good time for retailers to put their businesses on a cash basis. Nearly everybody is busy; work is easy to be had; cash is plentiful (except with striking workmen, the folly of whose leaders has cruelly robbed them of months of wages), farmers are prosperous. Therefore make the attempt, and explain to your customers your reasons for it; namely that you can sell for cash to better advantage to yourself, and if you buy for cash you can supply them with cheaper goods.

Some people will be offended if you attempt to refuse goods to them without money. Just here, Mr. Retailer, comes your chance to do a good stroke of business for yourself. *Sift your customers.* If you have found A poor pay, you don't want his custom, and he can go off somewhere else and take his bad temper with him. If B is an honest and valuable customer, so placed that he cannot pay cash every day, collect from him once a month, or even once a quarter. Or you may do as a Montreal firm did, in a case cited by the Dry Goods Economist. Finding their credit business growing more rapidly than their cash trade, they experimented with discounts, to their entire satisfaction. If we remember rightly, they conceded a discount of 5 per cent. on purchases paid for at the counter and 3 per cent. for charge accounts paid promptly at end of thirty days. This increased their cash sales, without antagonizing their more exclusive clientele.

There are wealthy people, as Macy & Co., of New York, have found, who don't wish to wait for change, and who won't have goods sent C.O.D., and therefore wish their goods charged. But Canadian retailers as a rule are not worried by millionaire customers. The rule of cash payment will suit such firms better. There is an instance given of a large concern which established a branch store in a Pennsylvania city, adopting the cash basis from the start. Being the only house in the town that did not sell on credit, much criticism was at first excited by its action, but this gradually wore off and the store has done a successful business ever since. So Canadian firms in country places which have pluckily made the plunge, and stuck to their guns, have built up a very satisfactory trade, cash or thirty days. Many more may do the same, with advantage to themselves, their customers, and their creditors.

GOOD FAITH AMONG BUSINESS MEN.

Much attention has been directed to the result of a case which came on for trial early last month in one of the manufacturing cities of England. It concerns closely and principally merchants or manufacturers who give credit and who are accustomed to rely upon the good faith of persons or firms who are given as references by applicants for credit. The circumstances, as we find them set forth in the Huddersfield Chronicle of August 8th, are as follows:

Thomas Cresswell & Co., woolen manufacturers, Huddersfield and Bradford, brought suit against Thomas Longbottom, member of the firm A. S. Henry & Co., stuff merchants in Bradford. The suit was for damages sustained in consequence of fraudulent misrepresentation on the part of the defendant as to the credit of Alexander & Co., a firm in Paris, France. The action was brought against the defendant in person and not against his company, because the misrepresentation complained of was made and signed by him. Mr. Longbottom was the director in charge of the Continental portion of Henry & Co.'s business.

In Paris there was a firm named Alexander, Cie., & Soubrat, which bought Huddersfield goods, and the plaintiff had sold them small amounts. This, and further circumstances of the matter were set forth by Cresswell & Co.'s solicitor, as follows:—

In January, 1901, the Paris firm sent out a notice informing the persons to whom they were indebted that in consequence of heavy losses the firm of Alexander & Co. found it

necessary to go into liquidation. They could not pay their debts, and proposed to pay them by instalments. In June, 1901, a few months after the partnership of Alexander, Cie., and Soubrat was dissolved, Alexander and Cie. proceeded to trade without any partner at all. Up to the time of that liquidation or failure the firm had done trade with Henry & Co., and had done it on the ordinary terms on which Continental buyers dealt with people in this country. This was at ninety days' credit. At the time of the failure in January, 1901, the firm owed Messrs. Henry as much as £6,000, and was getting considerable credit for large amounts from the firm. When Alexander started in the new company, he desired to do business with Messrs. Cresswell, the plaintiffs. The latter then wrote to the defendants as follows:

"We are referred to you by M. Alexander C., 28, rue de Sentier, Paris. Will you kindly give us in confidence your opinion of this firm, if honest and respectable, and if you consider them good in the ordinary way of trade for a credit of £1,000 to £1,500. Thanking you in anticipation,—We are, yours very truly, Thomas Cresswell & Co." An answer came back from Mr. Longbottom, dated February 24th, 1902, as follows:

"Dear Sirs,—In reply to your favor of the 22nd inst., we have been in business relations with the firm you mention for several years, and have always found Mr. Alexander honest and reliable in the conduct of his business. We give him credit for about the amount you name. This information is in confidence, and without prejudice to ourselves."

Upon receiving the assurance contained in this letter of Longbottom's, the plaintiffs proceeded to give Alexander & Co. credit to a pretty large amount on the usual ninety days' trade terms. Alexander & Co. failed for the second time in November, 1902, owing the plaintiff firm £2,650 (which credit had been given on the faith of Mr. Longbottom's letter), and the dividends since received from the estate, some £664, reduced the plaintiff's loss to some £1,986 sterling. The plaintiff afterwards found out that, after the first failure, Alexander's credit with Henry & Co. was stopped, and his debt to them was reduced from £6,000 to £1,200, partly by drafts, and partly by taking back goods which had been sent by Messrs. Henry & Co. In February, 1902, his clients were induced by the letter to put themselves in the position of giving long and large credit. Before getting the letter from Mr. Longbottom, the firm of Cresswell's had sold the Paris firm not over thirty pieces; but after the letter, in the following April, the largest order reached 600 pieces.

An accountant who had examined A. & S. Henry & Co.'s books, and who gave evidence at the trial, said that Alexander & Co.'s account with that firm was £537 in 1897, and as high as £6,934 in 1899. "But by the end of May, 1901, it was down to £1,183 by goods and cash." So that Henry & Co. were taking back goods to get their claim reduced. A new account was opened in 1901, for the supply of goods, but no longer on the former 90 days' terms; and the business on new account did not average £100 a month on practically cash terms, whereas in the old account it was thousands, at 90 days.

After addresses from counsel, the judge summed up, expressing the opinion that when the defendant stated that his firm had given credit for the amount named, (£1,000 to £1,500), he was deceiving the plaintiff. The question for the jury to answer was this: Was the defendant justified in making these statements? The jury found a verdict for the plaintiff, and the learned judge decided that the plaintiff should receive £1,500, less the proportionate part of any dividend which he had received from the failed firm.

The interest taken in this case has been extreme, not only because of the prominent standing of the house which is defendant in the case, but because so great a volume of trade is done in England on the strength of references of one firm to another. We in Canada have known of brother merchants "cracking the ten commandments," if not absolutely breaking them, in replies to enquiries from neighbors about the standing and payments of customers. Especially were people economical of the truth with respect to the amounts such customers owed. But we have been taught to look for a high standard of honor among the merchants of Yorkshire. And it was hardly to be expected that we should hear of a prominent firm breaking faith with a neighbor merchant by giving him misleading information, much less to hear of its being cast in damages for so doing.

THE FALL MILLINERY OPENINGS.

The millinery openings this week, both in Montreal and Toronto, have been attended by greater crowds even than usual of late years, visitors coming from the Far East as well as the Far West. In Toronto the fact that the opening coincides with the early days of the great Fair, has helped to swell their numbers considerably. A few from long distances came to view and purchase the new beauties in the millinery art several days ago, in order to be able to take advantage of freight rates, so much cheaper than those by express.
